Article 1 – Statement of Work (SOW)

Note to Contractors: Proposals must include detailed responses to all tasks as requested in Article 1. Contractors should provide thorough responses to each task, or, when appropriate, state their agreement that the Contractor will provide the requested services. Contractors are encouraged to provide detailed responses in order to allow the State to fully evaluate the Contractor's capabilities.

Throughout this SOW, language referring to Contract or Contractor(s) refers to any Contract awarded from this SOW. This SOW in itself is not to be construed as a Contract.

1.010 Project Identification

1.011 Project Request

This is an SOW for a Municipal Water Supply Assessment on behalf of the Department of Treasury and the City of Flint in Genesee County. This is a formal request to prospective Contractors to solicit bids or price quotations. Contractors must submit written proposals according to the instructions contained within this document, discussing how they will meet the specific requirements

Any awarded Purchase Order(s) between the State and any awarded Contractor(s) is a separate document, whose terms are limited by the Contract.

1.012 Background

The Treasury Department is charged with monitoring, oversight and provision of assistance to local units of government under various statutes, including but not limited to, the Home Rule City Act (Act 279 of 1909), the Uniform Budgeting and Accounting Act (Act 2 of 1968), and the Glenn Steil State Revenue Sharing Act (Act 140 of 1971). In providing such monitoring and assistance to local units of government, the Treasury Department strives to preserve the capacity of local units to provide those services essential to the public health, safety and welfare of the citizens of this State.

The City of Flint is currently supplied potable water from the Detroit Water and Sewerage Department (DWSD) This supply is provided through a single 72-inch water main that terminates at a master meter. The City of Flint's water treatment plant uses the Flint River as a back-up and redundancy supply source to the DWSD supply, as required by the Michigan Department of Environmental Quality (MDEQ). The City of Flint also provides potable water to Genesee County downstream of the DWSD master meter.

The newly formed Karegnondi Water Authority (KWA) plans to construct a raw water supply system that will feed Flint's water treatment plant with water directly from Lake Huron The Flint water treatment plant could be upgraded to accommodate and treat this new raw water source. DWSD has also proposed alternatives to the existing agreement with the City of Flint that could also be pursued.

A Contractor is needed to provide services to the Department of Treasury and the City of Flint upon request of the Treasury Department. The Department of Treasury is requesting a Contractor provide an analysis of the water supply options for the City of Flint to assist the Department of Treasury and the City of Flint in determining the best available option

1.020 Scope of Work and Deliverables

1.021 In Scope

The Contractor must provide Water Supply Assessment as requested by the Department of Treasury. These services will include data collection and review, an engineering evaluation and the generation of recommendations.

Bidder Response:

Agreed; our attached Sample Project Plan describes our approach for these services

1.022 Work and Deliverable

Contractor must provide Deliverables/Services and staff, and otherwise do all things necessary for or incidental to the performance of work, as set forth below

A. **Data Collection and Review:**

1. Provide all labor, materials and equipment to fully perform the work of data collection and review for an assessment of water supply options for the City of Flint

Bidder Response.

Our Price Proposal in Attachment A includes all labor, materials and equipment to perform the base work described in our Sample Project Plan.

2 Perform an analysis and comparison of the KWA and DWSD proposals that includes all capital, financing, operational and maintenance costs.

Bidder Response:

Agreed, our attached Sample Project Plan describes our approach for these services.

3 Prepare and submit for Department of Treasury and City of Flint review a preliminary report on the findings by Thursday, December 20, 2012; additionally, a final inspection report of findings and recommendations must be presented no later than January 8, 2013 (also see Section 1 022.E).

Bidder Response:

Agreed, however, meeting these dates are predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012

B Data collection and analysis services must include the following:

1 DWSD's proposed contract with the City of Flint

Bidder Response:

Agreed, this is included in our attached Sample Project Plan

2. DWSD's proposed water rates with the City of Flint

Bidder Response:

Agreed, this is included in our attached Sample Project Plan.

3. Other relevant DWSD documents or information regarding the provision of municipal water to the City of Flint

Bidder Response:

Agreed

4. KWA's proposed contract with the City of Flint

Bidder Response.

Agreed, this is included in our attached Sample Project Plan

5 Any engineering or environmental reports that evaluate KWA's proposal to provide municipal water to the City of Flint.

Bidder Response·

Agreed

6 Other relevant KWA documents or information regarding the provision of municipal water to the City of Flint

Bidder Response:

Agreed

C **Engineering Evaluation:**

1 Evaluation and recommendation of a potential water supply for the City of Flint must be based upon: 1) Cost; 2) System redundancy and reliability; and 3) The capacity for the Flint River to supply all of the City of Flint's water needs

Bidder Response

Agreed, this is included in our attached Sample Project Plan.

2 Evaluation and recommendation of a potential water supply for the City of Flint will also be based upon any additional criteria mutually agreed upon by the Department of Treasury, the City of Flint and the Contractor.

Bidder Response.

Agreed

D *The Contractor must carry out its operations in strict accordance with local, state, federal* regulations.

Bidder Response.

Agreed.

E. Provide electronic copies (in the most suitable format) of the final inspection report of findings and recommendations to the City of Flint and the Department of Treasury, Office of Fiscal *Responsibility by January 8, 2013:*

Bidder Response:

Agreed

1. Describe format of findings and recommendations. Format should also include a description of all work performed.

Bidder Response

Our attached Sample Project Plan describes our approach for the findings and recommendations. TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified.

a) Preliminary inspection report of findings and recommendations must be presented by December 20, 2012

Bidder Response

Agreed, this is included in our attached Sample Project Plan and the date is predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012

b) Final inspection report of findings and recommendations must be presented no later than January 8, 2013

Bidder Response

Agreed, this is included in our attached Sample Project Plan and the date is predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012

2 Describe electronic formats available

Bidder Response.

Document formats would include PDF's or in their initial format (Word, Excel, GIS/CAD, etc.).

F Submit findings and recommendations to an independent Quality Control and Quality Assurance (QA/QC) review process for validation

Bidder Response

Agreed; the independent QA/QC approach is included in our attached Sample Project Plan.

1 Provide electronic copies (in the most suitable format) of the independent QA/QC review to the City of Flint and the Department of Treasury, Office of Fiscal Responsibility by January 8, 2013, with the final inspection report.

Bidder Response

Agreed, however, meeting this date are predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

1.030 Roles and Responsibilities

1.031 Contractor Staff, Roles, and Responsibilities

1. Contractor must identify staff who will be involved in the project, including the name of each individual, work locations, and detailed descriptions of their roles and responsibilities.

   Note: If an overall organization chart has been developed, provide a reference to that chart as well Note any part-time personnel.

   Bidder Response:

The staff will be comprised of our senior management. Messrs. David Guastella and Awni Qaqish Also, we will be supported by our part-time staff member, former Finance Director of Redford. Their roles will include meeting with Flint, KWA, and DWSD; estimating capital costs of all options; estimating all operation and maintenance costs of all options, a financial analysis for funding capital; and all other issues related to the costs of service.

2. Specific work schedules for this project are Monday through Friday, 8:00 a.m. to 5:00 p.m. Eastern Time; however, possible night and weekend hours may be required.

   Bidder Response:

Agreed

1.032 State Staff, Roles, and Responsibilities

1 Contract Compliance Inspector (CCI). The State's CCI provides oversight and monitoring of the selected Contractor's adherence to the terms and conditions of this project and the Contract.

2 Project Manager: The State's Project Manager will monitor the project activities

1.040 Project Plan

1.041 Project Plan Management

1 The Contractor will carry out this project under the direction and control of the CCI or designee.

2. Although there will be continuous liaison with the Contractor team, the CCI or designee will meet quarterly as a minimum, or as requested by the CCI or designee, with the Contractor's Project Manager for the purpose of reviewing progress and providing necessary guidance to the Contractor in solving problems which arise

3 Contractors must provide a sample project plan with proposal for the deliverables proposed in section 1.022 The plan must include the details noted in section 1.041.4.

Contractor Response

Agreed, the Sample Project Plan is attached.

4 Within five working days of Contract or purchase order award, the Contractor must submit to the CCI or designee for final approval a detailed project plan This final project plan must be in agreement with the Contractor's proposal and accepted by the State for Contract, and must include the following:

   a. The Contractor's project organizational structure

   b. The Contractor's staffing table with names and title of personnel assigned to the project. This must be in agreement with staffing of accepted proposal. Necessary substitutions

due to change of employment status and other unforeseen circumstances may only be made with prior approval of the State.

c. The project breakdown showing sub-projects, activities and tasks, and resources required and allocated to each (e.g., estimated levels of effort for each level of personnel for Contractor personnel, including any contractual employees, and State personnel)

1.042 Reports

1. The Contractor must submit written bi-weekly summaries of progress which outline the work accomplished during the reporting period; work to be accomplished during the subsequent reporting period; problems, real or anticipated, which should be brought to the attention of the CCI; and notification of any significant deviation from previously agreed-upon work plans

1.050 Acceptance – Deleted – N/A

1.060 Proposal Pricing

1.061 Proposal Pricing

1. For authorized Services and Price List, see Attachment A (Price Proposal). Please complete Attachment A and submit with proposal.

2 Bidders are encouraged to offer quick payment terms (i.e _0__% discount off invoice if paid within _____ days) This information can be noted on the Bidders price proposal (see Attachment A). This may be a factor considered in the award decision.

3. Contractor's out-of-pocket expenses are not separately reimbursable by the State or local unit of government unless, on a case-by-case basis for unusual expenses, the State has agreed in advance and in writing to reimburse Contractor for the expense at the State's current travel reimbursement rates. See **www.michigan.gov/dtmb** for current rates.

4. Invoicing and payment must occur per Article 2 (Compensation) of Indefinite Scope Indefinite Delivery Contract No. 263 (Discretionary Contract Number 00263) and Attachment A

1.070 Additional Requirements – Deleted – N/A

Attachment A, Price Proposal

Bidders are encouraged to offer quick payment terms (i.e __0__% discount off invoice if paid within _____ days) This information can be noted on the price proposal This may be a factor considered in the award decision.

Provide the price per deliverable for the proposed services in section 1.022.	
Deliverable	**Price**
A Municipal Water Supply Assessment	
1. Data Collection and Review	$ 6,500
2 Engineering Evaluation	$ 30,000
3 Provide Copies of Findings and Review Findings	$ 3,000
Grand Total	$ 39,500
B Optional Services

CITY OF FLINT WATER SUPPLY ASSESSMENT
SAMPLE PROJECT PLAN

November 2012

1. Scope of Work

Tucker, Young, Jackson, Tull, Inc. (TYJT), at the request of the State Treasurer is providing a proposal to perform an analysis of the water supply options being considered by the City of Flint. The work would be completed as an authorized task under the reference contract, Contract No. 00383. This proposal provides a background of our understanding of the issues, our approach, schedule dates, and the level of effort to perform the task.

2. Background

The City of Flint is presently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is from a single 72-inch water main that terminates at a master meter located at Potter and Baxter. Additionally, downstream of the DWSD master meter, Flint supplies its customer Genesee County. The City of Flint also operates a water treatment plant that uses the Flint River as its source of supply to provide back up and redundancy to the DWSD supply as required by MDEQ

The Karegnondi Water Authority (KWA) is planning on constructing a raw water supply system that could provide Lake Huron water to the Flint's Water Treatment Plant. Flint's existing plant would be upgraded to treat the new raw water source.

The State Treasurer has appointed an emergency financial manager for the City of Flint. As such the Treasurer has requested TYJT to provide an analysis of the water supply options to assist the Treasurer in determining the best course going forward for the City of Flint.

3. Scope of Work

The proposed scope of work summarizes TYJT's approach to perform the analysis. The work includes data collection and review, an engineering evaluation, and recommendations. The recommendations would be provided in a report that would also include a description of all the work performed under this task.

3.1. Data Collection and Review

To perform an analysis of competing proposals it is important to provide a relative or "apples-to-apples" comparison. As example, DWSD's cost of service includes all capital, financing, and operation and maintenance costs to deliver the water to Flint's system. Therefore, it will be necessary for an assessment of KWA's proposal to also include all of these costs in the comparison.

Additionally, DWSD is proposing other alternatives to its existing agreement with Flint that will also need to be evaluated. The options currently proposed include:

- Using DWSD's new model contract that provides reduction in cost for communities with their own storage,
- Moving the location of supply from Potter and Baxter to the Imlay Pumping Station to reduce fees associated with elevation and distance from DWSD's water plants,
- Providing finished (potable) non-pumped water from the Lake Huron Water Treatment Plant, and
- Providing raw (not treated) non-pumped water from the Lake Huron Water Treatment Plant.

This phase of the work would include the collection and review of the following documents:

- The Lake Huron Water Supply Karegnondi Water Authority Preliminary Engineering Report, dated September 2009 and the 2012 update by Rowe Engineering,
- The Analysis of the Flint River as a Permanent Water Supply for the City of Flint Report, dated July 2011;
- Proposed or draft contract agreements that would be used between the KWA and the City of Flint;
- DWSD's contract rates based on the new model contracts;
- Information related to other DWSD proposals for service to Flint; and
- Other letters, minutes, etc. from all parties that provide information that could be used in the evaluation

All information provided would be evaluated and subsequent meetings would be held with the DWSD, Flint and the KWA to address any data gaps or clarifications that may be required. These meetings would be coordinated with the Treasurer so that its representatives can be present at the meetings. For the purpose of this proposal, TYJT has assumed a total of two meetings for both the DWSD and KWA.

3.2. Engineering Evaluation

The City of Flint Emergency Financial Manager has indicated that he believes the determination of who supplies water to the City's system should mainly be based on the following criteria (in order of importance).

- Cost,
- System redundancy/reliability, and
- The recognized limitation of the Flint River as a source to supplying all of Flint's water needs.

In consultation with the Treasurer, these factors plus additional ones that may be identified in the evaluation process would be used.

An analysis will be performed for the options identified and a comparison will be made based on cost, reliability of supply, and any limitations that may identified by both suppliers in providing the needed service.

TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified. TYJT will then incorporate comments from the Treasury's review and submit a final document to the Department of Treasury for their use.

Furthermore, as is done as a standard of practice at TYJT for quality control and quality assurance (QA/QC), an independent review will be completed by staff or outside consultants not directly involved in the project. These reviewers will have noted experience in the field necessary to complete the QA/QC reviews. Two reviews are envisioned; one to review the evaluation process and the other to review the findings and recommendations

4. Schedule

At the meeting between all interested parties on November 1, 2012, two dates were identified by the Treasurer. The first date identified was December 20, 2012 for the preliminary evaluation to be provided to the State. The second date was January 15, 2013 for the Treasury to make a decision on the City of Flint water supply. TYJT proposes to complete the draft report for submittal on December 20th. This will provide a two week review period by the Treasury. The final report would then be completed and submitted one week prior to the January 15th deadline. TYJT will also be available, if requested by the Treasurer, to attend a general meeting with all parties involved at the conclusion of the work.

November 6, 2012

RECEIVED
NOV 8 2012
OFFICE OF THE STATE TREASURER

Mr Andy Dillon, Treasurer
Michigan Department of Treasury
430 W Allegan Street
Lansing, MI 48922

Dear Treasurer Dillon

First, thank you for giving us the opportunity to present our plan for the "Flint Water Supply Future" with you We have already had initial contact with DWSD about scheduling meetings as well as what information is needed by them to make a proposal to us. Our understanding from the meeting is that DWSD needs to make a proposal to us for consideration along with the KWA proposal by the 20th of December We would then make a recommendation to you for the Governor's consideration A final recommendation will be made by the Governor's office by January 15, 2013

I assure you, that we will work diligently with DWSD to provide them with whatever they need, so they can meet that deadline. We will give serious consideration to their proposal

As I stated at the meeting, I am not an advocate for KWA but for the best cost option for the next 30 to 40 years for the people of the City of Flint However, in our analysis of the options, KWA does several things that I think are in the best interest of our city, our region (Mid Michigan) and the State of Michigan They are

1. It provides a second source of water from Lake Huron Currently over 40% of the people of the state are served by DWSD

2. DWSD does not provide water services to the Thumb area, namely Sanilac and Lapeer Counties

3. It affords the opportunity for the region to form a water and sewer authority in the future Genesee County, the Genesee County Drain Commission, the Cities of Flint and Lapeer Lapeer and Sanalac Counties as well as other regional municipalities could come together to form a Mid Michigan Water and Sewer Authority to the benefit of the entire region

4 It gives the City of Flint "ownership" in a water distribution system and the ability, along with its partners, to control its own water resource destiny

5 It offers additional economic development opportunities for the region by providing businesses with a source of low cost water

I think it is also important to again indicate that Genesee County intends to go ahead with the pipe line with or without Flint The County Board of Commissioners has already aporoved bonding for the first stage of the project.

Again, let me assure you that we in the City of Flint have an open mind relative to the outcome

Sincerely,

Edward Kurtz
Emergency Financial Manager

MEETING MINUTES

IN ATTENDANCE:	Ed Kurtz; Flint Emergency Financial Manager, City of Flint Dayne Walling; Mayor, City of Flint Mike Brown, City of Flint John O'Brien, Genesee County Howard Croft, City of Flint Dwayne "Duffy" Johnson, City of Flint Brent Wright, City of Flint Awni Qaqish, TYJT Dave Guastella, TYJT
DATE:	November 24, 2012
PURPOSE OF MEETING	Meeting with the City of Flint for the Indefinite-scope, Indefinite-delivery Contract Number 00383, 2012 Professional General Architectural/Engineering Services – City of Flint Water Supply Assessment
PREPARED BY	Dave Guastella

A meeting was held at the City of Flint Municipal Center on November 20, 2012 to discuss the water supply option being presented by the Karegnondi Water Authority (KWA) to the City of Flint. The main items discussed generally followed the attached KWA Discussion/Questions that were provided to City prior to the meeting. A summary of the key points discussed are provided below.

The questions submitted are repeated in the Discussion Items for easy reference. A summary of the action items generated from the meeting follow the Discussion Items.

DISCUSSION ITEMS

1. Question/Discussion Item. Is the maximum day demand of 18 MGD for Flint the maximum day demand (MDD) throughout the 25 year planning period? If not, what is the 25 year projected MDD?

   KWA would supply up to 18 MGD. 18 MGD has been assumed as the maximum day demand and 12 MGD is assumed as the average day demand throughout the 25 year planning period.

2. Question/Discussion Item: Copy of the intake contract documents and engineer's estimate.

   The intake contract documents are approximately 90% complete and are not available for distribution. However, the updated Appendix 20, dated October 4, 2012 includes the most recent cost estimate of the intake based on the current design in process

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting These minutes will be considered approved unless comments are provided within three days

3. Question/Discussion Item: Documentation of the Flint WTP improvements required and cost estimate.

   The costs are approximately $7M as presented in the September 2009 Preliminary Engineering Report. However, this estimate has been updated. Some processes have been eliminated. John O'Brien will provide the updated costs and the description of the planned improvements to the plant.

4. Question/Discussion Item: Confirm Flint's allocated percentage of the KWA capital improvements (30%?)

   Yes, the allocation is based on 18 MGD/60 MGD total capacity.

5. Question/Discussion Item: Copy of the proposed KWA operating agreement for Flint.

   John O'Brien will provide the operating agreement as well as the Capacity Contract and Articles of Incorporation.

6. Question/Discussion Item: What is the annual operating agreement adjustment projected for the 25 year planning period?

   This information is provided in Appendix 14, Table 14.2 of the September 2009 Preliminary Engineering Report. Operating cost based on Table 1. Used 12 MGD as average day demand (ADD). Assumed 5% as the annual increase in operating costs. John O'Brien indicated that these operating costs were based on Genesee County's operating costs John O'Brien will provide the last 10 years of audited financial statements for the water fund.

   To assess operating and maintenance costs for the Flint WTP, Duffy will provide multiple years of financial statements for the water fund Duffy did not believe they had 10 years, but they will provide what they have.

   Regarding operation and maintenance costs, Flint believes that these costs will increase by 2/3 of what they are now.

7 Question/Discussion Item: Need the route of the pipelines and the locations of the facilities proposed. Purpose is to identify constraints that impact costs (i.e., utilities, environmental (e.g wetlands), easements, etc.).

   KWA will not release the route due to concerns regarding speculation of land and easements. John O'Brien did indicate that the Lake Huron pump station would be at Fisher and M-25. The intermediate pump station site is near a location of the Lapeer/Sanilac/St. Clair border; where all three meet.

8 Question/Discussion Item: KWA's initial charge to Flint is based on a 12 MGD average day demand. What is the basis of this number? Are there population projections and water use figures available that were used to determine the Flint demand for the 25 year planning period?

Comments: Meeting minutes were recorded based on the understanding of the author Please contact the author within three days if you have any different understanding of the meeting These minutes will be considered approved unless comments are provided within three days

This was answered in Question No. 1 above.

9. Question/Discussion Item: Is there a transition plan and cost during construction of the KWA system identified?

   Flint is looking for an agreement with DWSD for back-up supply from the 72-inch main at the Genesee border.

10 Question/Discussion Item: The October 4, 2012 Preliminary Engineering Report Update states "no backup power is planned for the pumps" (LHPS) and "No backup power is planned for pumping" (IPS). In case of power loss, how would Flint supply its customers?

   Flint indicated that they have adequate storage to supply the system for 6 to 7 days Flint has 55 MG of storage and Genesee County has 65 MG for 2.5 days

11. Question/Discussion Item The latest plan shows only a 5 million gallon ground reservoir is planned for balancing between LHPS and IPS. How is redundancy maintained?

   In cases of emergency, Flint indicated that the back-up for the KWA system will be the same as it is now with DWSD; they will use the Flint River as the source water. Flint currently operates their plant four times a year.

   When questioned as to whether the WTP will be able to treat both lake water from the KWA system and river water Flint indicated that once the improvements identified in the September 2009 Preliminary Engineering Report are completed they will be able to accomplish both treatment processes. Flint will provide a schematic of the treatment trains at the WTP and a copy of the Flint transmission system.

   Genesee County indicated that additional redundancy would also be provided from the new Genesee County WTP.

   Regarding hydraulic transients, Genesee County indicated that a model analysis has not been included, but capital costs for mitigating transients have been included.

12 Question/Discussion Item: Related to the construction cost:

   a. Does it include an additional traffic lane since the construction will occupy half the right of way? *Not required, all roads are county roads, however, there are a few State road crossings*

   b. Does it include costs/fees for permit requirements such as inspection cost by the jurisdictional authorities? As a point of reference, the permit fee costs for the Flint Transmission System came out to be $5.8 million. *Not required: all of the counties have waived any fees.*

   c. Does the cost of the steel pipe segments include corrosion protection measures such as

anode stations and related O&M? *Yes; however, the KWA has not settled on using steel pipe. PCCP pipe may be used. Steel shown in estimate because it is highest in cost and therefore the pricing is conservative.*

d. SCADA monitoring stations require power. Is the cost of bring power to the SCADA stations included? Again, as a point of reference for the Flint Transmission System we estimated $800,000 for power to SCADA and valve operators. *Yes, Genesee County did emphasize that the SCADA system will be simple and straightforward because a lot of controls are not required*

e. Other items discussed at the meeting included:

- The 2009 plant improvement cost is still good; however, there will be some reduction, such as a sulfuric chloride feed system that was eliminated. Plant capacity now is 36MGD, but will be 18 MGD.
- The KWA Lake Huron Pumping Station (LHPS) is now only high lift pump station
- Genesee County will provide the distance of the intake pipe from the crib to the LHPS.
- The intake project is almost ready to bid; waiting for the COE permit.
- Genesee County is estimating the construction for the pipe lines and pump stations will begin July 2013.
- The route has been flown for survey
- Genesee County is estimating construction will be complete and the project will be placed in service by Jan 2016.
- Genesee County to provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.

13. The Flint River is identified as a backup: At what capacity? MDD or emergency supply?

The Flint River would serve as a back up supply.

14. Where did the 40 years come from (Flint hostage to Detroit)? DWSD's new contracts are 30 years with openers to revise terms of supply (volume and pressure) after the first two years, then three years, and then in five year increments thereafter.

The 40 years was stated in error. The reference was to DWSD's requirement to sign a 30 year contract.

After 40 years Flint will own 30% of the project and can sell their share of ownership if they want. Conversely, with DWSD, they continue to pay for the capital projects but have no ownership. Flint believes they will know what they will be charged for the next 25 years versus DWSD that can't commit to a fixed escalation.

Action Items for Follow up		
Items:	***Assigned To:***	***Date to Complete***
1. Updated Costs for the Flint WTP Improvements and a description of the improvements.	John O'Brien	11/21/12
2 KWA Operating Agreement, Capacity Contract and Articles of Incorporation.	John O'Brien	11/20/12
3 Provide the last 10 years of audited financial statements for the Genesee water fund.	John O'Brien	11/20/12
4 Provide multiple years of financial statements for the City of Flint water fund.	Duffy Johnson	11/26/12
5 Provide schematic of the Flint WTP and a map of the Flint transmission system.	Brent Wright	11/26/12
6. Provide the length of the intake pipe from the crib to the pump station.	John O'Brien	11/20/12
7 Provide a list of assumptions that the $272 million cost estimate is based on since the route is now known	John O'Brien	11/26/12

Comments: Meeting minutes were recorded based on the understanding of the author Please contact the author within three days if you have any different understanding of the meeting These minutes will be considered approved unless comments are provided within three days

CITY OF FLINT WATER SUPPLY ASSESSMENT

KWA Discussion/Questions for the November 20, 2012 Meeting

1. Is the maximum day demand of 18 MGD for Flint the maximum day demand (MDD) throughout the 25 year planning period? If not, what is the 25 year projected MDD?
2. Copy of the intake contract documents and engineer's estimate.
3. Documentation of the Flint WTP improvements required and cost estimate.
4. Confirm Flint's allocated percentage of the KWA capital improvements (30%?)
5. Copy of the proposed KWA operating agreement for Flint
6. What is the annual operating agreement adjustment projected for the 25 year planning period?
7. Need the route of the pipelines and the locations of the facilities proposed. Purpose is to identify constraints that impact costs (i.e., utilities, environmental (e.g. wetlands), easements, etc.).
8. KWA's initial charge to Flint is based on a 12 MGD maximum day demand. What is the basis of this number? Are there population projections and water use figures available that were used to determine the Flint demand for the 25 year planning period?
9. Is there a transition plan and cost during construction of the KWA system identified?
10. The October 4, 2012 Preliminary Engineering Report Update states: "no backup power is planned for the pumps" (LHPS) and "No backup power is planned for pumping" (IPS). In case of power loss, how would Flint supply its customers?
11. The latest plan shows only a 5 million gallon ground reservoir is planned for balancing between LHPS and IPS. How is redundancy maintained?
12. Related to the construction cost:
    a. Does it include an additional traffic lane since the construction will occupy half the right of way?
    b. Does it include costs/fees for permit requirements such as inspection cost by the jurisdictional authorities? As a point of reference, the permit fee costs for the Flint Transmission System came out to be $5.8 million.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting These minutes will be considered approved unless comments are provided within three days.

c. Does the cost of the steel pipe segments include corrosion protection measures such as anode stations and related O&M?
d. SCADA monitoring stations require power. Is the cost of bring power to the SCADA stations included? Again, as a point of reference the for the Flint Transmission System we estimated $800,000 for power to SCADA and valve operators.

13. The Flint River is identified as a backup: At what capacity? MDD or emergency supply?
14. Where did the 40 years come from (Flint hostage to Detroit)? DWSD's new contracts are 30 years with openers to revise terms of supply (volume and pressure) after the first two years, then three years, and then in five year increments thereafter.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting These minutes will be considered approved unless comments are provided within three days.

1. INTRODUCTION

Tucker, Young, Jackson, Tull, Inc. (TYJT), at the request of the State Treasurer performed an analysis of the water supply options being considered by the City of Flint. The City of Flint is presently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is from a single 72-inch water main that terminates at a master meter located at Potter and Baxter. Additionally, downstream of the DWSD master meter, Flint supplies its customer Genesee County. The City of Flint also operates a water treatment plant that uses the Flint River as its source of supply to provide back up and redundancy to the DWSD supply as required by MDEQ

The Karegnondi Water Authority (KWA) is planning on constructing a raw water supply system that could provide Lake Huron water to the Flint Water Treatment Plant. Flint's existing plant would be upgraded to treat the new raw water source.

The State Treasurer has appointed an emergency financial manager for the City of Flint. As such the Treasurer has requested TYJT to provide an analysis of the water supply options to assist the Treasurer in determining any potential risk and the best course going forward for supplying potable water to the City of Flint.

Report Organization

The following sections of this report are described below:

Section 2 – The basis of the analysis is described in this section. The options include the KWA option and several options offered by DWSD.

Section 3 – A significant amount of information and data was collected including memorandums, reports, drawings, financial reports, and other documents. This section summarizes the information used in the analysis.

Section 4 – This section describes the evaluation of the cost of supply for the Flint options. The costs are comprised of the initial cost of operations plus the annual rate of escalation/inflation.

Section 5 – The evaluation process used to analyze the construction costs associated with the KWA supply system is described in this section. Additionally, the cost of financing the capital requirements is described.

Section 6 – This section presents the financial review of the options considered to supply potable water to Flint. A summary of these options is also provided.

Section 7 – In addition to the financial analysis other considerations were identified that should be considered in understanding the risks and determining the best option to supply Flint. They include items related to cost, redundancy and reliability, and Flint's ability to control their future cost of water supply.

2. FLINT WATER SUPPLY OPTIONS

Two water purveyor options were evaluated, the KWA water supply system and continued supply from DWSD. Both suppliers would provide water from Lake Huron as the source. The KWA system is a raw water supply, which means that the water would have to be treated by Flint before distributing the potable water to its customers. The DWSD supply is potable or "finished" water and would not need additional treatment.

Additionally, an option for the Flint WTP to supply the City of Flint without being supplied from either DWSD or KWA was initially considered. The preliminary investigation evaluated the cost associated with the required improvements to the plant and to the Flint River dam system. Although it appeared that this was a viable option, Flint in a meeting on December 20, 2012 with the Treasury, stated that the City did not want to pursue the option and it is no longer being considered.

Karegnondi Water Authority (KWA) Lake Huron Water Supply

The KWA water supply system schematic is shown in Figure 2-1. The system is comprised of an intake in Lake Huron that supplies water to the Lake Huron Pump Station (LHPS). The LHPS lifts the water and pumps it through an approximately 22 mile long 60-inch pipeline. The pipeline terminates at a 5 MG reservoir and is then pumped from the Intermediate Pump Station (IPS) through approximately 26 miles of 60-inch and 18 miles of 30-inch pipeline to the existing Flint WTP. Downstream of the IPS, approximately half way to the Flint WTP, the 60-inch line would also supply a new Genesee County WTP.

The raw water transmission system has a 60 MGD capacity and is sized to deliver a maximum of 18 MGD to the Flint WTP with an average day supply of 12 MGD. Improvements at the Flint WTP would also be required to treat the lake water as the plant is currently designed to treat the Flint River water.

The term of the KWA contract for Flint is 40 years.

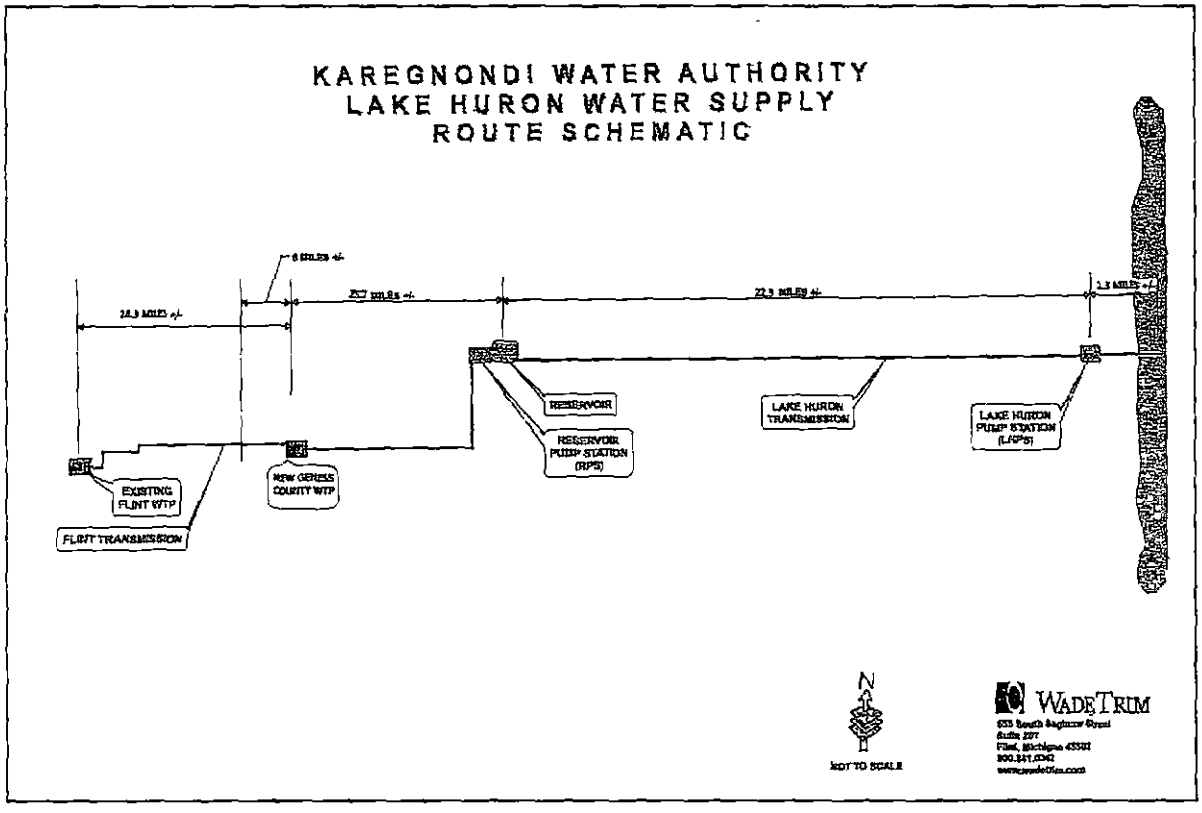

Figure 2-1: KWA Raw Water System

DWSD Water System

The DWSD system schematic is shown in Figure 2-2. Flint is currently supplied by DWSD at Master Meter FL-1, located at Potter and Baxter. Flint typically gets its water from the Lake Huron WTP, located in Fort Gratiot, Michigan; near the Lake Huron shoreline. Water is treated and pumped at the Lake Huron WTP and supplied through a 120-inch pipeline to an intermediate pump station called the Imlay Pump Station. The Imlay Pump Station has 20 MG of reservoir capacity Depending on the time of year and the DWSD system demand, water is either bypassed directly to Flint or it is re-pumped at Imlay. It should be noted that the DWSD supply to Flint is part of a very large water system and during emergencies or outages water can be supplied from the south up to Flint in lieu of the Lake Huron facility.

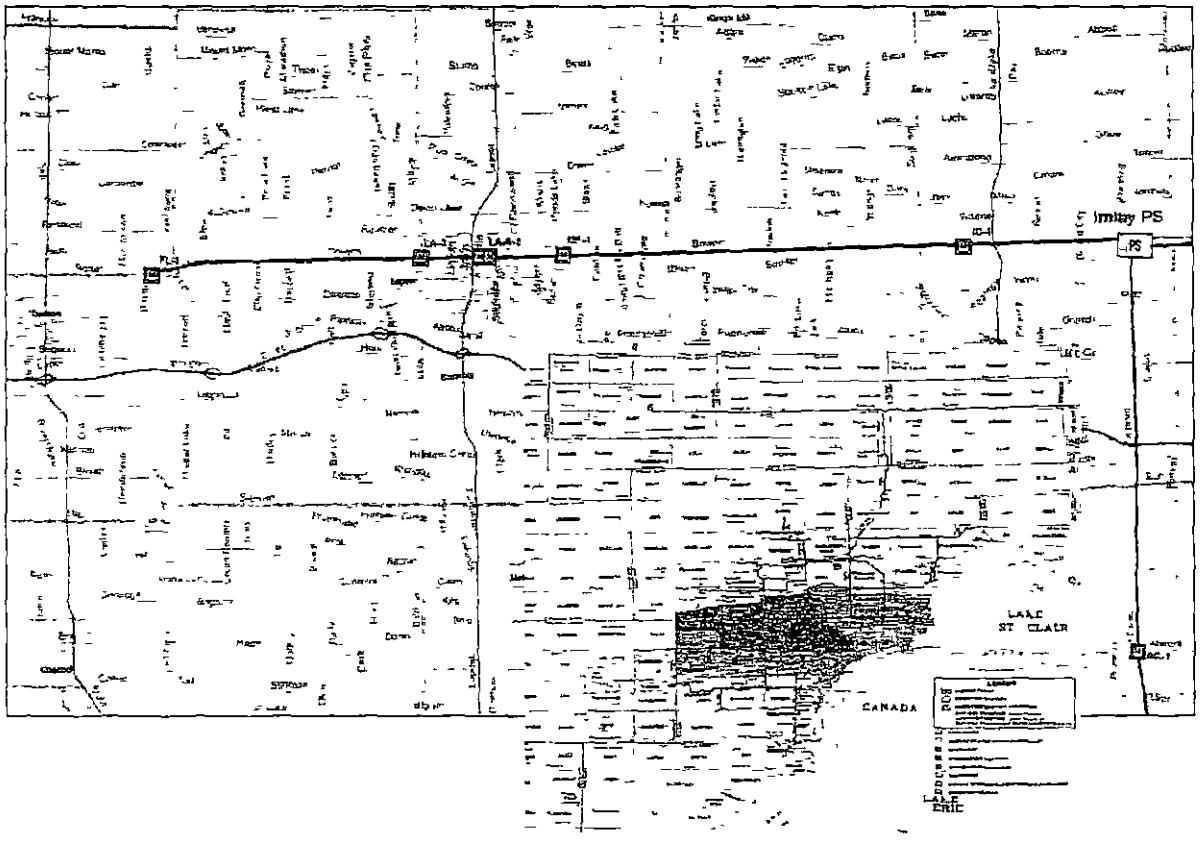

Figure 2-2: DWSD Water System

The pipeline from Imlay to FL-1 is a 72-inch pipeline. It has been estimated that the 72-inch line serving Flint has a capacity in excess of 90 MGD.

DWSD has presented several contractual options to Flint and all of them are based on Flint signing a new 30 year contract. The options shown in Table 2-1 are based on two different supply points; one at the current master meter location FL-1 at Potter and Baxter (P&B) and the other at the location of the Imlay Pump Station. The reason for the varying options is to provide a lower water rate at the Imlay Station, since the DWSD rate formula is based on distance and elevation factors related to the supply location.

The rates are also dependent on the maximum amount of water DWSD supplies. As example, if DWSD supplies a maximum day demand of 18 MGD that would equal the entire amount of water required by Flint.

For the options less than the maximum of 18 MGD means that the Flint WTP would supplement the difference by supplying water treated from the Flint River. These options are known as "blending" and would allow for Flint to blend two sources of water to supply its customers; the Flint River using the Flint WTP and Lake Huron from DWSD system.

Description	Average Day Demand
18 MGD Maximum Day Customer – FL-1	12 MGD
12 MGD Maximum Day Customer – FL-1	8 MGD
8 MGD Maximum Day Customer – FL-1	8 MGD
12 MGD Maximum Day Customer - Imlay	12 MGD
8 MGD Maximum Day Customer - Imlay	12 MGD

Table 2-1: DWSD Supply Options

3. DATA COLLECTION

During the course of the investigation several documents were used to perform the analysis. The names of the documents are listed below for reference.

KWA and Flint

- Preliminary Engineering Report, Lake Huron Water Supply Karegnondi Water Authority, September 2009;
- Analysis of the Flint River as a Permanent Water Supply for the City of Flint, July 2011;
- Cost Comparison, KWA vs. DWSD, Letter to Mr Kurtz, October 31, 2012;
- Lake Huron Supply Study, KWA, Appendix 20, October 2012 Preliminary Report Update, Final Report (DRAFT), October 4, 2012;
- Articles of Incorporation of Karegnondi Water Authority, endorsed in 2010;
- Karegnondi Water Authority Bylaws, October 26, 2010;
- KWA Raw Water Supply Contract;
- Flint WTP Statement of Revenues and Expenditures 09' – 12';
- GCDC Division of Water and Waste Services Financial Statements 03' – 11'; and
- Assorted emails with further clarification of questions and documentation.

DWSD

- Historical Rates and Charges to Flint 04' – 13';
- Historical Rates and Charges to Flint with Hypothetical Model Contract 10' – 13';
- 2013 Rates and Charges for the following options:
  - 18 MGD Maximum Day Customer at FL-1;
  - 12 MGD Maximum Day Customer at FL-1 (Flint blending*);
  - 8 MGD Maximum Day Customer at FL-1 (Flint blending*);
  - 12 MGD Maximum Day Customer at Imlay (Flint blending*);
  - 8 MGD Maximum Day Customer at Imlay (Flint blending*); and
- Assorted emails with further clarification of questions and documentation.

* Flint blending based on DWSD supplying two-thirds and Flint one-third of 12 MGD average day demand.

Two meetings were also held; one with DWSD and one with Flint and Genesee County representing KWA. The meetings were held on November 19, 2012 and November 20, 2012, respectively. Minutes from these meetings are included in Appendix A.

4. COST OF SERVICE

Information provided by DWSD, Flint, and representatives of the KWA were used in the cost of service evaluation. To evaluate the annual escalation/inflation rate over the planning period, the rate adjustment for DWSD was estimated based on the recent rate adjustment history For the KWA system both the estimated cost of operations when the system begins supplying water and the annual rate adjustment or inflation was evaluated. The existing cost of operations and escalation for the Flint WTP was based on actual costs provided and then adjusted depending on the scenario considered. This section describes the evaluation process and the rates used in the analysis.

DWSD Water Supply

The City of Flint has been a customer of DWSD since 1967 The Flint WTP has been maintained as a backup to the DWSD system. As indicated previously, several options were provided by DWSD depending on the type of service Flint was to select. The unit cost of water for each of these options is shown in Table 4-1. These rates are based on DWSD's FY13, which are current until July 2013.

18 MGD Maximum Day Customer – FL-1	12	16.37
12 MGD Maximum Day Customer – FL-1	8	16.31
8 MGD Maximum Day Customer – FL-1	8	12.68
12 MGD Maximum Day Customer - Imlay	12	14.38
8 MGD Maximum Day Customer - Imlay	12	11.11

Table 4-1: Cost of DWSD Supply Options

To determine annual escalation rate, DWSD's last 10 years of history was used along with other large urban water systems in Michigan. The water systems used for benchmarking comparison were: Lansing, Grand Rapids, and Saginaw.

Table 4-2 identifies the annual and average rate of increase to Flint based on supplying water either to the current FL-1 at Potter and Baxter or Imlay. Note the last three years of the rates (FY 2011 through FY 2013) assumes that Flint's cost would be based on the new 30 year contract; FY 2011 being the first year that the new contract was available.

Fiscal Year	Average Unit Cost ($/MCF)	Annual Change (%)

From Imlay

Table 4-2: Recent DWSD Water Rates

Audited financial reports were used to determine the rate of inflation associated with other three large municipal systems. The results are shown in Table 4-3

Lansing	05'-12'	4.6
Grand Rapids	04'-11'	1.6
Saginaw	04'-11'	7.0

Table 4-3: O&M Inflation Rates of Other Large Water Systems

Based on the information analyzed from DWSD and the other communities, it was determined that a fair annual rate of inflation for operations and maintenance cost for the analysis should be 4.4%. The 4.4% has historical significance from Flint's current water supplier and falls within the range of the other communities

KWA Water Supply

The initial projected O&M cost for the KWA supply would be comprised of KWA's O&M costs as well as Flint's O&M costs Because there was limited information provided, the initial estimated rate of $1.50/MCF was used This rate is based on information from the cost comparison analysis attached to the letter to Mr. Kurtz, dated October 31, 2012.

The KWA cost evaluation used an annual O&M inflation rate of 5%. To validate this rate a similar analysis to DWSD's operations and maintenance annual rate of inflation was used First, in discussions with Flint and the Genesee County Drain Commission (GCDC), they believed that the annual rate of inflation for the new KWA system would be similar to the GCDC Water & Waste Services (WWS) Additionally, two large transmission systems were used to benchmark the inflation rates. the Southeastern Oakland County Water Authority (SOCWA) and the Ypsilanti Utility Community Authority (YUCA). Although both of these systems transmit finished water opposed to raw water, they were considered similar enough for comparison as they are comprised of only large water mains, pumping facilities and storage.

Once again audited financial statements were used to calculate the inflation rates A summary of the findings are shown in Table 4-4. Based on the fact that the information analyzed showed a large difference between the two systems, it was determined that the KWA assumption of 5% was a good rate of inflation to use in the financial analysis. This rate is almost equally between the GCDC rate and the other two transmission systems.

Systems	Years Evaluated	Average Rate (%)
GCDC WWS	03' – 11'	10.5
SOCWA	04'-12'	--
YUCA	04'-12'	0.7

Table 4-4: O&M Inflation Rates of Other Comparable Systems to KWA

Flint WTP

The Flint WTP currently serves as a backup supply to the DWSD service to Flint To maintain backup operations, the City of Flint operates the plant approximately 20 days each year. Flint indicated that the average production rate when they operate is 11 MGD

For the blending options and the KWA supply considered, Flint would be required to operate its plant all year around. Therefore, their operating and maintenance costs were evaluated and adjusted to determine an annual cost associated with year-round operations

The Flint WTP provided three years of operating costs for the assessment. Additionally, reports listed in Section 3 were also used as reference to determine both operating costs for the plant processing Flint River water (blending options) and Lake Huron raw water (KWA option).

Major cost centers were analyzed to estimate annual operation and maintenance They included: labor, utilities, chemicals and residual management In general, as recommended by the Flint plant staff, labor and overhead were increased from the current costs by two-thirds. Additionally, variable costs for power, chemicals and residual cost were increased to estimate full time treatment at the Flint WTP Data from the KWA Preliminary Report and annual operating data for the Flint WTP (provided separately) were analyzed to make these forecasts.

The annual operating and maintenance costs developed for Flint WTP used are shown in Table 4-5.

Flint River (Blending with DWSD)	4	$5,895,097
Lake Huron (Supplied by KWA)	12	$7,913,118

Table 4-5: FY 13 O&M Costs for Year-round Operations

It was determined that a fair annual rate of inflation for operations and maintenance cost for the Flint WTP plant should be 4.51%. The 4.51% is an average of Lansing, Grand Rapids and Saginaw facilities.

5. CAPITAL REQUIREMENTS

Large capital investments would be required by Flint and GCDC to construct the KWA supply system. Furthermore, some of the options presented by DWSD (supply point from Imlay) would require the purchase by Flint of DWSD's 72-inch water main. Performing the financial analysis; therefore, required an analysis of the KWA construction cost estimate for the transmission system and Flint WTP improvements.

Revenue bonds were also identified as the source of financing the new supply system and associated improvements. This section describes the assumptions made and the interest used for financing the improvements

KWA Supply System

The most current cost estimate of the KWA system was presented in the document titled; Lake Huron Supply Study, KWA, Appendix 20, October 2012 Preliminary Report Update, Final Report (DRAFT), October 4, 2012. The cost of construction is estimated at $272,421,558. Flint's portion would be 30% or $81,726,467.

Due to the significance of this expenditure, a detailed review of the cost was performed and is presented in this section. The analysis was performed based on the main elements of the supply system: the lake intake, the two pumping stations, and the transmission pipeline. Additionally, an analysis was performed related to construction contingencies and other costs such as engineering, legal, and administration

Lake Intake

KWA representatives indicated in a meeting in November that the design documents for the intake were at 90% and that it was planned for advertisement in January 2013. A summary of the estimate is shown in Table 5-1.

Intake and Crib	$22,076,850
ELAC at 25%	5,519,213
Property	2,300,000
Total	**$29,896,063**

Table 5-1: KWA Intake Cost Estimate

Based on the evaluation, it appeared that the cost estimate was reasonable. Given that the design was nearly complete, the engineering, legal, administration, and construction contingencies (ELAC) at 25% were also found to be appropriate.

Pumping Stations

KWA representatives indicated that the pump stations were estimated at a level of design less than 15%. Therefore, in addition to an evaluation of their cost estimate, other water pumping station costs were used for comparison. Additionally, contractors were also contacted for costs. Table 5-2 summarizes the KWA cost estimate compared to our cost estimate performed for the Treasury.

Pumping Stations		$24,618,080		$54,573,314
Land for Intermediate Pump Station and Reservoir		--		75,000
Subtotal		$24,618,080		$54,648,314
ELAC for Construction	25%	6,154,520	30%	16,394,494
Total		**$30,772,600**		**$71,042,808**

Table 5-2: Pumping Stations Cost Estimate

Two things to note regarding the difference in the cost estimates; firstly, there is a large difference in the cost estimates of the pumping stations The estimate developed for the Treasury used several other pumping stations construction costs from Southeastern Michigan and discussions with contractors. These costs were then computed on a $/MG's for comparison

Secondly, our estimate for the Treasury is based on an ELAC of 30% instead of KWA's 25% Although 25% was acceptable for the intake, it is believed to be too low for the pumping station estimate given that the engineering effort is less than 15%.

Transmission Main

Although the specific route for the transmission main was not provided, an estimate was calculated based on the general information provided. Once again, the KWA estimate was based on a level of design less than 15%. The estimate performed for the Treasury used the line items provided by KWA for the pipeline and also consulted with contractors to evaluate the cost of construction. The comparison is shown in Table 5-3

Although the cost of construction of the pipeline is similar, a value of 30% was used for ELAC due to the level of design. Additionally, KWA did not believe there would be any additional costs for easements, however, this did not seem practical. Therefore an estimate for acquiring the easements was added to the Treasury estimate and is based on the 277 easements identified by KWA. The cost shown includes surveying, legal, engineering, administration, etc

Description	KWA	Estimate	TYJT	Estimate
Transmission Mains		$166,202,316		$167,419,530
ELAC for Construction	25%	41,550,579	30%	50,225,859
Subtotal		$207,752,895		$217,645,389
Easements		–		1,166,170
Total		**$207,752,895**		**$218,811,559**

Table 5-3: Transmission Pipeline Cost Estimate

Other KWA Costs

In prior estimates of the construction cost, KWA used an ELAC of 37%. In this case it could be considered that the engineering effort associated with the design would have been included. However, it is believed that KWA's reduced ELAC of 25%, does not include the design effort Additionally, it would be prudent to assume that the owner would want a construction manager during construction of this large project. A summary of these costs are shown in Table 5-4.

Design Engineering for Pumping Stations and the Transmission Pipeline	$16,939,581
Construction Management at 5%of Project Cost Estimate of $217,645,389	14,434,609
Administration	349,440
Legal, Easements, Contract Documents	831,000
Total	**$32,554,630**

Table 5-4: Other Costs

Summary Comparison

A summary of the two cost estimates are shown in Table 5-5. Based on the comparison, the estimate performed by TYJT shows a higher cost to Flint by approximately $25,000,000.

Note that there are two other costs shown in the summary that were not previously addressed; power and backup power Regarding the cost of providing power to the pumping facilities, the cost of $4,000,000 appears reasonable.

The KWA has repeatedly indicated that backup power is not needed. Backup power is a standard practice in the water industry. Furthermore, a loss of power at either pumping facility will prevent the supply of water to both Flint and Genesee County For these reasons, the cost of providing backup power was included in our estimate for the Treasury

Intake/Crib	$ 27,596,063	$ 27,596,063
Pump Stations	30,772,600	71,042,808
Transmission Mains	207,752,895	217,645,389
Power	4,000,000	4,000,000
Redundant Power for PS		1,273,200
Land for Lake Huron Pumping Station	2,300,000	2,300,000
Design Engineering/PS and Transmission		16,939,581
Construction Management		14,434,410
Administration		349,440
Legal/Easement/Contract Documents		831,000
Easements		1,166,170
Total	**$ 272,421,558**	**$ 357,578,060**
Flint Share at 30%	**$81,726,467**	**$107,273,418**

Table 5-5: Total Cost Comparison

Flint WTP Improvements

The KWA analysis identified capital costs required to convert the existing WTP from river water treatment to treating lake water. The cost estimate was identified as $7,100,000 in the 2009 report. This number was used in the our analysis, since additional information was not provided. For the purpose of the financial analysis; however, the $7,100,000 was increased by 3% each year for three years to account for inflation.

DWSD Imlay Station Supply Options

The options identified by DWSD to supply service to Flint at the Imlay Pump Station would require Flint to purchase the 72-inch water main from Imlay to Master Meter, FL-1. The pipeline is approximately 25 miles long. The estimated cost provided by DWSD for estimating purposes is $4.700,000

Financing

The cost of financing the revenue bonds for the capital work was investigated. Based on conversations with local financial advisors knowledgeable in bond financing, an interest rate of 5% for the 25 year

period was considered acceptable. This is based on a Standard and Poor's bond rating of A without insurance.

Additional costs associated with the bond include the reserve and bond issuance fee. The bond holders will require a reserve of approximately 10% of the loan to be held for the 25 year payment period. The cost associated with the bond issuance has been estimated at 2.25% of the principal borrowed for the KWA project and 3% for the smaller loan associated with the Flint WTP improvements or the purchase of the 72-inch main

Furthermore, since no revenue will be generated to pay on the bonds for the first three years that the system is being constructed, the cost associated with capitalizing the interest was also included.

Finally, interest on the reserve will be provided back to KWA and Flint. Although the interest is currently less than 1%, it was determined that a 3% rate would be more prudent long-term.

6. FINDINGS

Using the information described in the previous sections, a cost evaluation was conducted for the KWA supply and the DWSD options. Individual worksheets for each option are provided in Appendix B. For the purpose of comparison a 30 year period was used This period includes the 3 year construction period, the 25 loan period and an additional two years to get a sense of the cost of operation after the loans have been paid

There were three separate cost sheets prepared for the KWA option. The first cost sheet (KWA) is based on the cost estimate provided by KWA. The costs provided assumed no overruns or delay in construction With KWA's own assumptions of an overrun in construction of 15% and a one year delay in operations, the KWA estimated cost becomes $686,375,920 through Year 2042.

Since this cost estimate did not appear to include the financing of revenue bonds, another cost sheet (KWA-1) was developed that included KWA's cost estimate without overruns with the additional finance costs associated with the revenue bonds A final cost sheet (KWA-2) includes the cost associated with the revenue bonds based on the estimate provided by TYJT for the Treasury.

A summary of the cost sheets provided in Appendix B are shown in Table 6-1. Figure 6-1 shows the cumulative annual costs associated with each option.

DWSD 8 MGD Maximum Day at Imlay Station	634,795,488	1
KWA *(10/31/12 No Overruns, As Provided)**	649,775,166	2
DWSD 8 MGD Maximum Day at FL-1	672,671,705	3
KWA-1 *(10/31/12 No Overruns with Cost of Financing)*	707,279,715	4
DWSD 12 MGD Maximum Day at Imlay Station	725,576,803	5
DWSD 12 MGD Maximum Day at FL-1	762,110,308	6
KWA-2 *(Treasury Estimate)*	766,784,313	7
DWSD 18 MGD Maximum Day at FL-1	821,226,268	8

* $686,375,920 with 15% overrun in construction and a one year delay in operations

Table 6-1: Total Cost of Options through 2042

Based on the analysis, it is prudent to assume the KWA water supply option costs would be somewhere between the KWA-1 and KWA-2 options Therefore, the analysis indicates that the two DWSD options of supplying 8 MGD on a maximum day and up to 8 MGD on average are the least cost options for Flint. These options allow Flint to maximize the use of existing assets; the City of Flint's (the Flint WTP) and DWSD's (the existing 72-inch main)

Additionally, in recent conversations with the Treasury another option was discussed that could potentially be the most cost-effective solution. Currently the Flint WTP serves as a backup if service is

lost through either the DWSD or KWA pipeline. If the a twin pipe paralleling the DWSD 72-inch water main were constructed with interconnects with the 72-inch line, then the new water main could serve as the backup to Flint and the Flint WTP could be abandoned or potentially sold to Genesee County for their use.

The construction of the parallel pipeline would be considered in the DWSD capital expenditure as a Common to All (CTA) cost. This means that the capital cost of the pipeline would be shared by all DWSD customers and not just by Flint. Preliminary analysis of this option appears to be the most cost-effective of all the options discussed. However, a more thorough cost analysis is warranted and this approach would require an agreement between Flint and DWSD.

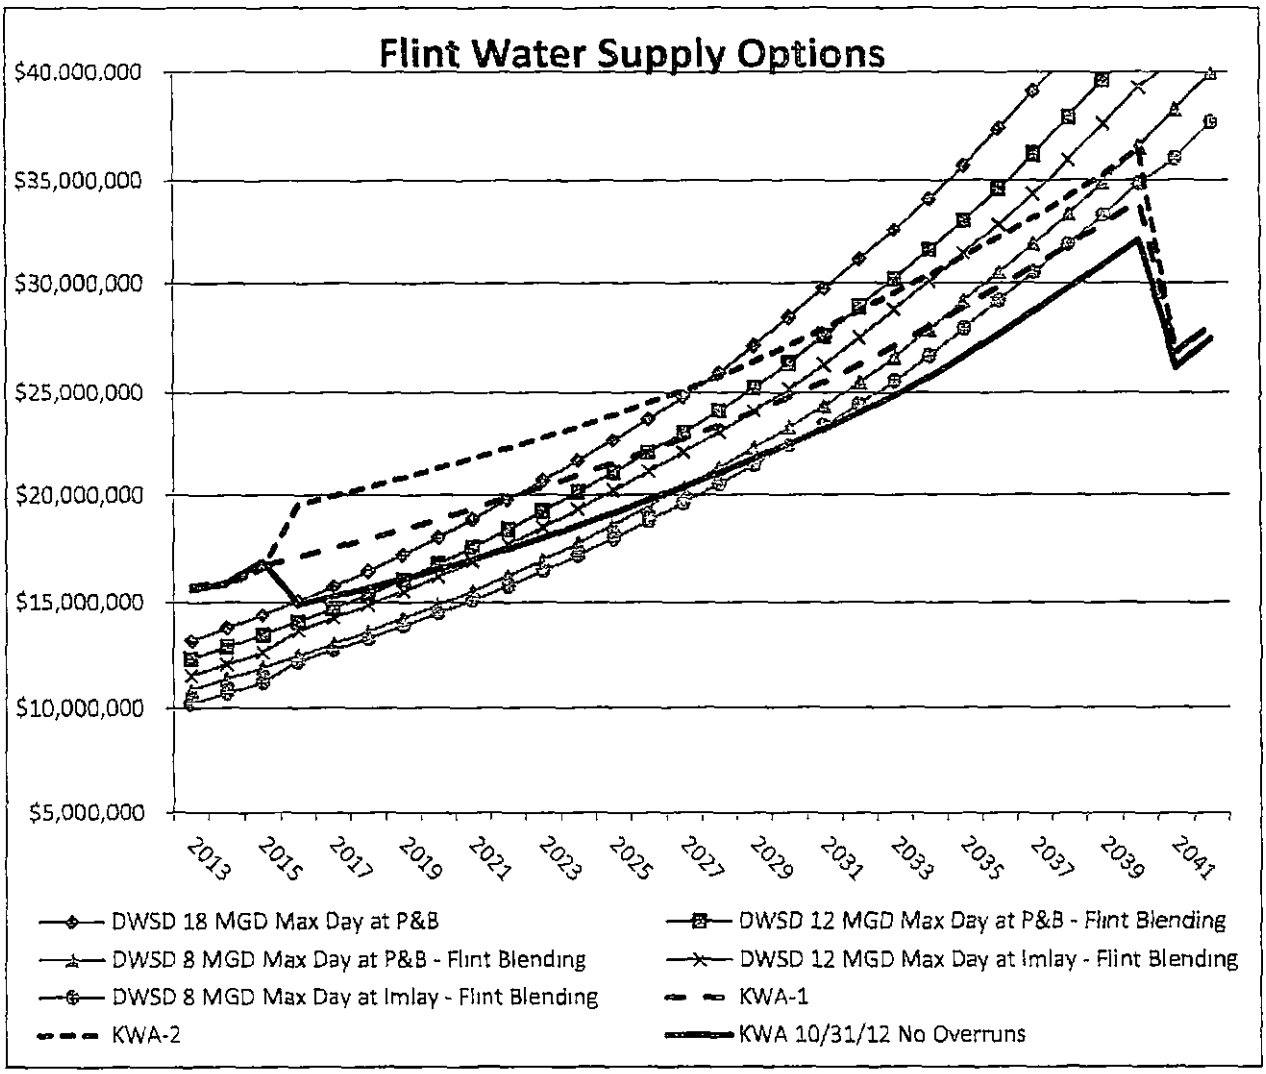

Figure 6-1: Flint Water Supply Options through 2042

7. OTHER CONSIDERATIONS

As part of the investigation other issues were identified that may result in risks to Flint that should be considered by the Treasury in determining how Flint's potable water should be supplied These issues are related to redundancy and reliability, other items affecting cost, and Flint's desire to control its own destiny related to its water supply. These are described further below.

Redundancy/Reliability

In one of the first meetings related to this task assessment, which was held on November 1, 2012, the Genesee County Drain Commissioner, Mr. Jeff Wright, stated that one of the main reasons for pursuing the KWA supply option related to the lack of reliability of the DWSD system He pointed to the Northeast blackout of 2003; a widespread power outage that occurred throughout parts of the Northeastern and Midwestern United States and Ontario, Canada, on Thursday, August 14, 2003. He stated that Flint and Genesee County were out of water for several days.

It is worth noting that this was a power outage of historic proportions that affected millions of Americans. However, DWSD did begin supplying water again relatively quickly in comparison to other major cities impacted by the same power outage.

Furthermore, the KWA supply system offers less redundancy to Flint than the current DWSD system Under both options, Flint is supplied by a single pipeline; however, DWSD has backup power at all of its major facilities supplying Flint. The KWA system will not have a redundant power at its pumping facilities. This would be a major risk.

Currently, backup to the DWSD system for Flint is Flint's WTP using the Flint River as the source of supply KWA has stated that the Flint River source would also be used as backup to Flint if the KWA supply through its pipeline was lost. However, since the Flint WTP would be upgraded to treat Lake Huron water under the KWA option, using the Flint River as a backup source would require the Flint WTP to maintain two process treatment streams.

In addition to Flint and Genesee County, the DWSD's 72-inch main supplies Imlay City, Mayfield and the Greater Lapeer County Utilities Authority (GLCUA). The volume of water contained within the 72-inch main is approximately 30 MG. Only supplying these three remaining communities would cause the water age to increase dramatically; somewhere in excess of three weeks old, before reaching the customers' master meters. Since the half-life of chlorine in the DWSD system is approximately 5 days, the chlorine would most probably be near zero requiring re-chlorination of the finished water upstream of the master meters

Re-chlorinating is a costly and risky process due to the instability of chlorine gas. It is unknown whether DWSD would pursue this improvement or possibly abandoned the 72-inch pipeline.

If Flint is supplied by the KWA system, then DWSD supplying their other customers along the 72-inch water main may be reconsidered. Since the KWA system is a raw water supply, the communities would

either have to build a treatment facility to treat the water from KWA or find another water source for their communities.

Additional Cost and Risk Considerations

The design of the KWA supply and the construction of the system have not been completed; therefore, final costs and time to complete are unknown. Cost overruns and delays in completion will both negatively impact Flint's final cost. As example, if the project is not completed within the three year period, payment on the bonds will be due, but the revenue source needed from the sale of water could not be provided

Furthermore, there is always a risk with large water system construction; especially those including an intake in the Great Lakes, pumping stations and rehabilitation of older water treatment plants. These risks include the potential of explosive gases in tunneling below Lake Huron, changing site conditions associated with the large number of miles of pipe installation and rehabilitating an older WTP, and the startup and debugging of the entire pumping system.

Flint has indicated that they have a high water loss. Not addressing this issue prior to sizing the Flint supply pipeline from KWA could cause the water main to be oversized along with its incremental cost in construction

Also, the KWA supply option appears to run counter to the Treasury's Competitive Grant Assistance Program (Formerly EVIP Grant). This program has been put in place to allow for communities to consolidate their services and save money. Two existing customers of DWSD (Flint and Genesee County) along with the potential of others customers (GLCUA, Mayfield, Imlay City) separating to from another water system is in contradiction to the program.

Finally, there is a concern over the ability of smaller systems (KWA) over larger systems (DWSD) to pay for future unfunded mandates and regulations. Obviously, identifying regulation requirements over 30 years is hard to determine However, it is widely accepted that a large system has greater ability to respond to unfunded mandates because the cost can be distributed over a large customer base.

Flint's Autonomy

Flint has indicated that a major point of consideration is that they have no control over the rate increases issued to Flint by DWSD. All other counties supplied by DWSD have representatives on the Board of Water Commissioners (BOWC). The BOWC is one of the governing bodies that approve the water rates Since Flint and Genesee County do not have a representative on the BOWC, Flint believes they are held "hostage" to DWSD's rates and cost of service

This issue was stated in Flint's handout at the November 1, 2012 meeting. The handout is titled, "Flint Water Supply Future." However, it is worth noting in the same handout, Flint also identifies similar concerns with the governing board of the KWA system. Notably, that although Flint and Genesee County will be the only customers and Flint will be responsible for 30 percent of the construction cost,

they will have a minority vote on the KWA board. Furthermore, there are other communities (Lapeer County, the City of Lapeer, and Sanilac County) that sit on the board and vote However, they are not purchasing water nor contributing to the construction costs.

MEETING MINUTES

IN ATTENDANCE:	Sue McCormick, DWSD Director Darryl Latimer, DWSD Deputy Director George Karmo, TYJT Awni Qaqish, TYJT Dave Guastella, TYJT
DATE:	November 24, 2012
PURPOSE OF MEETING.	Meeting with DWSD for the Indefinite-scope, Indefinite-delivery Contract Number 00383, 2012 Professional General Architectural/Engineering Services – City of Flint Water Supply Assessment
PREPARED BY	Dave Guastella

A meeting was held at the DWSD Main Office Building on November 19, 2012 to discuss the water supply options being presented by DWSD to the City of Flint. The main items discussed generally followed the attached DWSD Discussion/Questions that were provided to the Department prior to the meeting. A summary of the key points discussed are provided below.

DISCUSSION ITEMS

1. Question/Discussion Item: Verify that the four options presented at the November 1, 2012 meeting are still available for consideration:

    a. Supplied from Potter & Baxter using the new model contract (assume a Maximum Day Customer),

    b. Supplied from Imlay Station,

    c. Finished un-pumped supply from Lake Huron WTP, and

    d. Raw un-pumped supply from Lake Huron WTP.

    DWSD prefers to focus on the first two supply point listed; from the current location at Potter & Baxter and at the Imlay Pump Station as these apply specifically to Flint

    DWSD provided the attached summary regarding the current costs to Flint based on the various options that DWSD is offering. The savings associated with each option is provided as well. As example, if Flint were to purchase water from the supply point located at Imlay Station, the current cost to Flint would be $5,661,000 and it would be a savings of nearly 50%

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

compared to Flint's current rate.

2. Question/Discussion Item: What additional capital improvements will be required for each option?

   If Imlay Pump Station is selected as the supply point then Flint would need to purchase the 72-inch water main and an agreement to supply Lapeer would need to be worked out DWSD believes that this could be worked out through a "wheeling" charge over the 72-inch main or possibly moving the supply point downstream of the Lapeer connection.. DWSD estimates the value of the water main at $4.7M. Flint could bond for this amount or DWSD could include the cost into Flint's rate

3 Question/Discussion Item: Are there other options being presented that should be considered (e.g., blending)?

   Only the two options indicated above are currently being considered and both would include blending, DWSD providing 2/3 of the supply and the Flint WTP providing the other 1/3.

4 Question/Discussion Item: To evaluate each option over the 25 year planning period, provide:

   a. Annual water rate for Flint for 2002 through 2012, and the

   b. Projected annual rate adjustment for each option. What are the proposed measures to keep the rate adjustments down in the future?

   DWSD provided the attached historical rates from 2002 through 2012 for the existing water contract with Flint. The attachment also includes what the rates would have been if Flint had signed the new model contract or had taken service from Imlay. These rates were provided back to 2010.

   DWSD believes that 5% would be a good estimation to assume for their annual escalation in rates over the 25 year planning period.

5 Question/Discussion Item: Flint stated a 10% increase in the capacity charge What number did DWSD provide Flint?

   It was unclear to DWSD where the 10% increase in capacity charge stated by Flint came from. DWSD's information provided shows an average of 6.3%. DWSD offered a meeting with TYJT to discuss how the fixed and commodity charges are allocated

6. Question/Discussion Item: Flint financial comparison is based on the initial Cost of $14,413,858, which includes $2,725,538 for Flint WTP operating cost; i.e, DWSD charge is $11,688,320. How good is this number?

   DWSD indicated that the charge of $11,638,320 is good through 6/30/13.based on their existing contract with DWSD.

7 Question/Discussion Item: KWA's initial charge to Flint is based on 12 MGD. Is DWSD charge

based on 12 MGD?

Yes, 12 MGD from DWSD would be a maximum with Flint supplying 6 MGD for a total of 18 MGD (2/3 vs. 1/3).

Comments Meeting minutes were recorded based on the understanding of the author Please contact the author within three days if you have any different understanding of the meeting These minutes will be considered approved unless comments are provided within three days

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

SUMMARY REPORT

TO Brom Stibitz, Senior Policy Advisor, Department of Treasury

FROM. Eric Cline Unit Operations Specialist

SUBJECT. Flint Water System Summary

DATE: April 18, 2013

Summary

In November 2012 the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The purpose of this study was to provide objective analyses to the State Treasurer and Flint's Emergency Financial Manager (EFM) in order to secure future potable drinking water for the City.

In December 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, five options were presented. These options ranged from the Flint Water Plant providing 100% water, to 100% provision of untreated Lake Huron Water by KWA, to 100% provision of treated drinking water by DWSD, or provision of variable amounts of water from DWSD using a combination of blended DWSD water and Flint River water.

From the presentation of the preliminary report in December 2012 to the submission of the final report by TYJT in January 2013, a number of developments made arriving at a final decision very difficult

- DWSD provided the City of Flint with at least two modified proposals to consider
- A debate ensued between TYJT and KWA's principal engineering firm regarding the others' conclusions and estimates for construction of the KWA pipeline.
- The Flint EFM eliminated all options except the 100% DWSD option or joining KWA.

In January 2013, the OFR provided a comprehensive report to the State Treasurer analyzing three questions: 1) The projected construction costs and why Treasury believed the projections provided by Flint/KWA were acceptable, 2) Identification of the construction contingencies, and 3) Identification of the options Flint will utilize in the event of a construction cost overrun or a delay in construction. At the end of this report, the OFR recommended to the State Treasurer that KWA presented the best future option for future potable water The OFR also concluded that KWA appeared to be the cheaper option, the quality of water would improve; Genesee County appeared willing to assist the City in securing the financing for their portion of the project; the KWA project could signify the beginning of better collaboration between the City of Flint and Genesee County; and the KWA project had both political and popular support

Between January and April, intense scrutiny of the various proposals was undertaken by Treasury and Flint officials Treasury officials met with officials from Genesee County to gain a better understanding of the KWA project In February 2013, Genesee County opened bids for construction of the Lake Huron intakes. This bid opening represented the first meaningful step toward commencing construction of the KWA system The bid was $3-million less than projected.

In March 2013, Treasury was notified that DWSD had contacted Flint to negotiate with the City to retain them as a customer. On April 12, 2013, the State Treasurer authorized the Flint EFM to join KWA, pending review of any final offer from DWSD. A final offer was received from DWSD on April 15, 2013.

DWSD's final offer provided two options. The first option was for a "supply only" rate schedule. Only water treatment costs would be recovered and DWDS would absorb all other delivery costs. Capital and operating revenue charges would be calculated based upon KWA's usage relative to the entire demand upon DWSD's Lake Huron WTP KWA would also have the ability to construct and own its own transmission lines.

The second option was a "full service" rate option. DWSD would provide all production and transmission services Transmission rates would be calculated only on those costs necessary to supply KWA and no additional transmission rates would be charged. Capital and operating revenue charges would be calculated based upon KWA's usage relative to the entire demand upon the Lake Huron WTP.

Independent analyses of DWSD's final offer by the OFR, the Flint EFM, and the Department of Environmental Quality (DEQ) generally reached the same conclusions:

- DWSD's offer was a framework subject to negotiations and was not a firm offer
- The offer provided by DWSD was incomplete.
- DWSD's offer did not include a guaranteed rate beyond year one, nor did it limit maximum annual rate increases
- The DWSD scenarios were based on 40 MGD of service capacity. However, the KWA project provides 60 MGD of initial capacity with potential expansion to 75 MGD
- DWSD indicates that Flint/ Genesee County would be given "broadened representation," it is unclear exactly what this means in terms of actual control in the decision making processes
- The DWSD offer relies on a single transmission system and would require the City of Flint to maintain its WTP for emergency purposes In addition, it would leave Genesee County without an adequate backup supply to meet their needs
- DWSD's offer included an attachment that listed the rank-ordered options (from cheapest to most expensive) DWSD Scenario 2 is listed as the least expensive option (but it is unclear how the total cost of this option was arrived at). DWSD Scenario 1 was not listed.
- DWSD provided a summary table of their unit costs but how these figures are arrived at was not clear, so analysis proved difficult.

Without specific details from DWSD on this proposal, a true comparative analysis is difficult to provide As such the Flint EFM rejected the DWSD proposal and agreed to join KWA

If further information on this issue is needed, please let me know.

What: *Jeff Wright Statement on Flint City Council Approving Resolution to Join KWA.*

When: *March 26, 2013*

Additional Info: Jeff Wright, CEO of the KWA, today praised the Flint City Council for voting to approve a resolution to officially have the City of Flint join the KWA and its' water line.

"I have said from the beginning that this decision must be made by Flint's City Council and Mayor," said Wright. "I appreciate the council voting the way they did, but even more than that, I am glad the residents of Flint were able to have their voices heard via their elected officials." The next step in the process will come with the KWA Board executing the contract for the City

"The most important aspect from the vote is the fact that we as an Authority can move forward knowing Flint's intentions," said Wright.

Despite Emergency Manager Ed Kurtz publicly supporting the project, Wright had made a vote by council a condition of Flint joining the KWA so the residents would have their say.

"There is a basic tenet that government is best when it has local control. We saw that with the council vote. Nobody, whether they live in Flint, Grand Blanc, Davison, Fenton, or anywhere in Genesee County, should have these types of decisions made by people who live outside of their community," said Wright.

At the next Water and Waste Advisory Board meeting a vote will be taken to award a contract for construction of the intake portion of the water line. All bids were submitted to the board at their last meeting for review.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

Mr Edward Kurtz
Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, MI 48502

April 11, 2013

Dear Mr Kurtz.

Thank you for your March 29, 2013 letter, which is attached for reference. As the Emergency Manager for the City of Flint ("Flint" or "City"), you have asked for my concurrence, pursuant to Public Act 436 of 2012, the Local Financial Stability and Choice Act, to authorize a contract in excess of $50,000.00 not subject to competitive bidding. This request was related to the City entering into an agreement with the Karegnondi Water Authority (KWA) for provision of raw water for the City.

In considering your request, I took note of the following facts in support of Flint joining KWA. First, there is widespread support in the City for this move, including the support of the Mayor, the City Council, and the Emergency Manager. Second, this move will provide a unique opportunity for the City and County to partner on an important project, which will hopefully lead to future regional collaboration. Third, the Department of Environmental Quality is supportive of the City participating in the KWA project Finally, your representations that this deal will lead to substantial savings for the City over the coming decades, savings that are desperately needed to help with the turnaround of the City of Flint

It is my understanding that the Detroit Water and Sewer Department is making a final best offer to Genesee County and the City of Flint next Monday, April 15, 2013 As such, this approval will be effective at 5 pm on April 16, 2013 after receiving written notice from the City that either no such offer was presented to the county and the City or that an offer was received and was rejected in good faith based upon specified objections.

For the reasons described above and subject to the conditions set forth herein, pursuant to Section 12 (3) of PA 436 of 2012, I am authorizing you to proceed with adopting the resolution and entering into a contract with KWA

Sincerely,

Andy Dillon
State Treasurer

Karengondi Water Authority
4160 Beecher Rd
Flint, Michigan 48532-2617

Ed Kurtz, Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, Michigan

Gentlemen:

Over the last several months, governed by a process laid out by the State of Michigan, the Detroit Water and Sewerage Department (DWSD) has proposed a number of alternatives for long term water supply to the City of Flint. Each alternative was offered in the spirit of working in earnest to address the needs, priorities and concerns of the City of Flint and each provided an immediate cost reduction when compared to the current costs of water purchased from DWSD. In the final analysis conducted by Flint, these proposals did not overcome the desire for the Flint/Genesee region to be served by the same system and to have a voice in the future decisions governing the provision of water to this region.

Many of the proposals DWSD has made to Flint during this period are applicable to Flint/Genesee County or KWA with adjustments to demand and use requirements and would provide similar overall benefit. These options remain available for further discussion should the parties' desire. These prior proposals are included in summary form in Attachment 1 as an expanded table 6-1 from the February 2013 State of Michigan Contract No. 271N3200089, City of Flint Water Supply Assessment, submitted by Tucker, Young, Jackson, Tull, Inc. For comparison purposes only, DWSD's new proposal (Flint's 30% allocated share) is inserted.

The proposal scenarios outlined today offer a public/public partnership with options tailored to Flint/Genesee County or KWAs interests. For ease of writing, the remainder of this memo will present this proposal to KWA Two basic scenarios are presented for consideration, both of which contemplate that KWA would enter a multi-year contract. Service commitments and usage definitions would be negotiated in the same manner as employed that have resulted in new contracts for other customers.

In brief, the proposal provides a unique opportunity to reserve capacity at DWSD's Lake Huron Water Treatment Plant and to participate in decision making for facility operation and capital investment through a joint operating committee. The proposal envisions that KWA would enter into a 30-year contract to purchase treated water directly onsite at DWSD's Lake Huron Water Treatment Plant.

In Scenario 1 the purchased water can either be pressurized or unpressurized. This first scenario results in a "supply only" rate schedule, with a "standby delivery" component to provide for emergency service at the existing Baxter / Potter connection. This scenario provides KWA the ability to construct new transmission owned and operated by KWA.

Scenario 2 maintains the public/public partnership concept and extends it to transmission facilities through which the Lake Huron Water Treatment Plant provides water. This scenario results in a "full service" rate schedule. The standby delivery component is eliminated, since the rate structure to KWA includes costs associated with the transmission system between the Lake Huron Water Plant and the Baxter / Potter connection.

DWSD proposes a modified rate schedule for the customers currently served through the contract with the City of Flint, which includes Flint and Genesee County This modified schedule is intended to facilitate negotiations for a new water service agreement with the Karegnondi Water Authority (KWA). The scenarios presented herein represent the innovative thinking that DWSD and its new leadership are bringing to the table. Our goal is to provide the lowest cost water solution for the KWA service area.

The potential rate structures are introduced in summary form herein, with preliminary calculations using the proposed rate structures with FY 2013-14 as a baseline. These calculations and the accompanying discussion are based on the assumptions regarding contract terms that approximate recent discussions amongst the parties.

The proposal introduces the concepts, but does not definitively present all of the specifics, appreciating that such specifics are best addressed through negotiations designed to produce a new contractual agreement satisfactory to all parties.

[Remainder of page intentionally left blank]

Scenario 1 – Lake Huron Direct Supply Purchase:

- KWA enters into a long term partnering arrangement with DWSD to purchase all of its primary water supply directly at the DWSD Lake Huron water treatment plant.
- Supply rate schedule is designed to recover only water treatment revenue requirements. This rate schedule does not contain any delivery costs (pumping, transmission, storage, etc.).
- Supply rate schedule is computed based on specific costs associated with the Lake Huron Plant. No other DWSD revenue requirements, including those associated with other DWSD water plants, are included in the rate to KWA
- Revenue requirements are separated into capital recovery and operation and maintenance expense elements. Baseline revenue requirement data (including operating budget, rate of return, depreciation assumptions, etc.) are identical to those developed for all other wholesale customers.
- KWA is allocated Lake Huron Plant capital revenue requirements based on the proportion of their contracted max day demand (assumed in these calculations at 40 6 mgd) relative to the total capacity at the Lake Huron Plant (400 mgd). The resulting revenue requirements are recovered through a fixed monthly charge.
- KWA is allocated Lake Huron Plant operating revenue requirements based on the proportion of their contracted average daily usage (assumed in these calculations at 24 mgd) relative to the total average daily usage at the Lake Huron Plant (assumed at 125 mgd in these calculations).
- Calculations are conducted for two alternatives Purchase of *pressurized* water (after high lift pumping) and *unpressurized* water (KWA takes directly from clearwell.)
- Contract includes an arrangement for emergency service at the existing Baxter / Potter connection, and computes a standby charge related to such service.
- The standby charge is computed in the manner set for the by the American Water Works Association (AWWA) in its Manual of Water Supply Practices M1 - "Principles of Water Rates, Fees, and Charges" Manual M1.
    - KWA is allocated one day's worth of transmission related capital revenue requirements.

Scenario 2 – "Full Service" Lake Huron System

- Same as the "pressurized" option in Scenario 1, except that concept is extended to the pumping, storage, and transmission facilities directly served by the Lake Huron Plant
- Transmission rate schedule is computed based on specific costs associated with these facilities. No other DWSD revenue requirements, including those associated with other DWSD transmission mains, etc, are included in the rate to KWA.
- Revenue requirements are separated into capital recovery and operation and maintenance expense elements. Baseline revenue requirement data (including operating budget, rate of return, depreciation assumptions, etc) are identical to those developed for all other wholesale customers.
- KWA is allocated Lake Huron "transmission system" capital revenue requirements based on the proportion of their contracted max day demand (assumed in these calculations at 40.6 mgd) relative to the total capacity at the Lake Huron Plant (400 mgd). The resulting revenue requirements are recovered through a fixed monthly charge.

- KWA is allocated Lake Huron "transmission system" operating revenue requirements based on the proportion of their contracted average daily usage (assumed in these calculations at 24 mgd) relative to the total average daily usage at the Lake Huron Plant (assumed at 125 mgd in these calculations).
- Standby charge is eliminated.

The resulting potential proposed rate structures under both Scenarios are summarized below

Potential Proposed DWSD Water Rate to KWA
Lake Huron Direct Scenario

	1 - Supply Rate @ LH Plant		2 - Full Service
	Unpressurized	Pressurized	Wholesale Rate
Supply Rate			
Fixed Monthly Capital Charge - $	219,900	316,600	503,200
Commodity Rate - $/Mcf	2.60	4.16	5.31
Average Unit Cost - $/Mcf	*4.85*	*7.40*	*10.46*
Monthly Standby Charge	167,500	110,300	0
Total Monthly Charge	387,400	426,900	503,200
Total Average Unit Cost - $/Mcf	*6.57*	*8.53*	*10.46*

The direct comparison over the period 2013-2042 is demonstrated in Attachment 2.

As KWA considers this proposal, I offer the following observations for consideration.

- The Public Partnership requires the least near term capital investment and preserves the economy of scale associated with operation of a large regional system resulting in an immediate reduction in the cost of water supply for Flint/Genesee, making the identified and necessary near term investment in local water infrastructure more feasible.
- The Public Partnership provides the opportunity to optimize service level and efficiency through collaborative asset management decision making.
- The Public Partnership provides representation for critical decision making consistent with DWSD newly demonstrated interest in engaging our customers in critical decisions impacting them. This formalizes that interest in contractual terms.
- The Public Partnership reduces the risks identified with a 'go alone' solution, including further declines in use/sales (see graph), project cost overruns or schedule delays and other unforeseen costs inherent in starting a new venture. See Attachment 3
- The DWSD Board of Commissioners has previously approved sale of raw water from the Lake Huron facilities for raw water end use. We remain open to further discussion about the raw water capacity needs and stand ready to provide an affordable commodity option.

DWSD is an organization in transformation. In April of 2011, a new Board of Commissioners was seated with additional autonomy and more direct customer representation. In the past year we have demonstrated the ability to reduce costs, resolve long standing compliance issues and have gained support for establishing a new legal and operational model for DWSD that could enable broadened representation for Flint/Genesee on the Governing Board.

I remain available to discuss this proposal to assure that each of the issues critical to Flint/Genesee are addressed.

Best regards,

Sue McCormick, Director
Detroit Water and Sewerage Department

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
EDWARD J. KURTZ

ELECTRONIC LETTER

April 16, 2013

Andy Dillon
State Treasurer
P O Box 30716
Lansing, MI 48909

Dear Treasurer Dillon:

Flint, Genesee County and KWA received an eight page letter from Detroit Water and Sewerage Department (DWSD) offering a framework for a long-term agreement with our region Two scenarios were presented.

Scenario 1: Water from the Lake Huron Plant.

This offer was dismissed immediately because Flint would still be responsible for their share of the KWA water pipeline delivery system estimated to be $79 million In addition Flint would not be able to operate the Flint Water Plant in which we have invested over $40 million per MDEQ mandates over the past ten years Finally, although DWSD shows this as an option and supplied a per month cost projection for the first year, no total costs over the life of the contract were provided.

Scenario 2: "Full Service" Water Supply

This offer was also rejected. DWSD would supply water to Flint/Genesee the same way they currently are today They would change the method of calculating our bill The offer would provide a $1.00 per ccf reduction on our usage for the first year, providing a 30 year contract is signed

After review of the offer Flint/Genesee has the following concerns.

1 DWSD's offer is a framework subject to negotiations and is not a firm offer.

2. DWSD's offer is based on 40.6 mgd, the KWA plan is based on 60 mgd. Flint/Genesee last summer hit the peak of 40.6 mgd and this DWSD offer provides no room for growth. Growth would result in penalties or added cost.

3. DWSD's offer does not include a guaranteed rate for years two through thirty, nor does it provide a maximum annual increase.

4. DWSD's offer does not provide a redundant supply for GCDC.

5 DWSD's offer does not allow for the use of Flint's existing water plant.

6 The offer indicates that the total cost to Flint over the life of the contract would be $587,990,665. No indication of what annual rate of increase was used in this projection. Flint can only assume it is 4.4% based on the Tucker Young report. It is also based on 40.6 mgds. KWA's proposal is for $649,775,166 based on 60mgds (33% more). Based on 60 mgds DWSD's proposal would be $868,950,738.

On a final note, Flint/Genesee has great concern over the accuracy of the figures provided by DWSD. Attachment 1 indicates that our joint annual cost to DWSD is $50 million; actual cost is less than $25 million. Attachment 2 indicates $800 million in savings over the next 30 years That is greater than the total cost we would pay DWSD.

Therefore, I will sign the resolution to join KWA at the close of business today.

Sincerely,

Edward J. Kurtz
Emergency Manager

Ms. Inez M. Brown
City Clerk
City of Flint
2nd Floor, City Hall
1101 S. Saginaw Street
Flint, Michigan 48502

Dear Ms. Brown:

Regarding: Termination of Contract for the Provision of Water Services by the City of Detroit, Water and Sewerage Department

On December 20, 1965, the City of Detroit, through its Board of Water Commissioners, (DWSD) and the City of Flint, Michigan (Flint) entered into a contract for the provision of DWSD treated water to Flint and the distribution by flint of that water to other Genesee County communities. Section 18 of that Agreement[1] provides:

18. The Board [DWSD] shall supply and sell water to the City [Flint] from the water system of the City of Detroit, and the City shall receive and purchase such water in accordance with the terms of this Agreement for an indefinite period of time but at least for a period of thirty-five (35) years from the date hereof. This Agreement may be terminated by either party after expiration of said 35-year period, upon one year's written notice served upon the other party by delivering the same to the Secretary of the Board or to the Clerk of the City as the case may be, or at any time upon mutual consent of both parties.

Please take notice that pursuant to this section, 18, of the above-referenced Agreement. DWSD is terminating this Agreement one year from today's date (April 17, 2014)

Sincerely yours,

Sue F. McCormick
Director

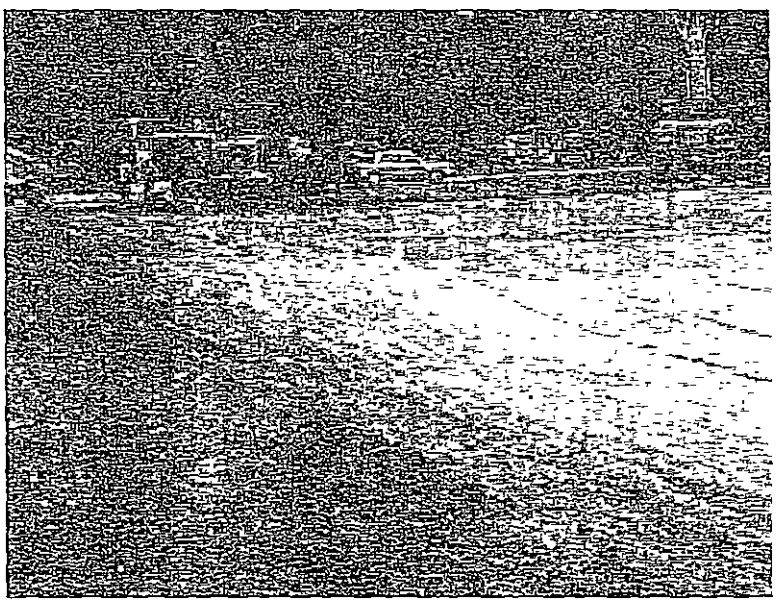
[1] Although the Agreement between DWSD has been subsequently amended, Section 18 remains unchanged and in full effect.

Westward ho: KWA pipeline groundbreaking starts new path for water

By Ron Fonger | rfonger1@mlive.com
on June 28, 2013 at 6:00 AM, updated July 03, 2013 at 9:34 AM

Tweet Reddit Email

(This story has been updated to correct an error.)



Part of the construction site for the Karegnondi Water Authority water pipeline is shown in this submitted photo

GENESEE COUNTY, MI -- When dignitaries cut the ribbon near Lake Huron on the new Karegnondi Water Authority pipeline today, June 28, they won't have to look far to imagine the project's initial path back toward Genesee County.

Drain Commissioner Jeff Wright said plans call for the pipeline to be buried in the public right of way under Fisher Road, a gravel road that borders Sanilac and St Clair counties, most of the way to Lapeer County.

Talked about for decades, the water pipeline will put Flint and Genesee County into the water supply business and end its time as a customer of the Detroit Water and Sewerage Department.

Detroit water prices have increased an average of more than 9 percent annually for the last 12 years, according to the county.

The county and city are the key members or the KWA and officials in Sanilac and Lapeer counties have expressed interest in future raw water purchases from the authority. Wright said the city of Lapeer is still considering membership in the KWA.

Flint emergency manager Ed Kurtz has said the city of Flint alone has the potential to save at least $100 million during the next 25 years by using KWA water

Friday's ceremony at Fisher Road and M-25 marks the start of construction of the intake portion of the pipeline and heavy equipment is already at the site, laying the foundation for that work, much of which will be done in Lake Huron.

While that work gears up this summer, talks are continuing over the design of the pipeline and the firming-up of the exact route it will be built on

"About 95 percent of the pathway has been set," Wright said. "The other 5 percent – we're looking at some options ... potentially a cost savings" by using some private property.

The drain commissioner said he expects to contact about 10 owners of farmland in Lapeer County as early as next week about his interest in using their land Talks with road commissions in Sanilac and St. Clair counties about Fisher Road started about six months ago, he added

Sanilac County Road Commission Engineer/Manager Robb Falls said he's already getting questions from Fisher Road residents about the $274-million pipeline project, which will require detours.

"A lot of people, I think, are happy for the project," Falls said. "They figure maybe the road will actually be improved (as a result). A couple of people have been upset (but) hopefully, maybe the pipeline would allow some industry in the area."

The potential for attracting new businesses with a need for raw water is certain to be one of the subjects of speeches kicking off the pipeline ceremony. which starts at 10 a.m. Friday

Several officials, including Wright, Flint Mayor Dayne Walling, state Reps. Pam Faris and Charles Smiley, and county Board of Commissioners Chairman Jamie Curtis are among scheduled speakers

Wright said visitors to the ground-breaking site might be surprised by how much preparation work, including construction of a service road, has already started.

"It's amazing I'm surprised myself (about) how much they have gotten done," including about 100 feet of road, drainage work, and the creation of a 3-acre staging area for the intake project work, he said

Construction of the water intake will require tunneling under the floor of Lake Huron and the use of divers, who will connect sections of 72-inch diameter pipe underwater.

The work is expected to take 30 months to complete and to bring an estimated 250 workers to the construction zone, located on 230 acres, including 40 acres of shoreline, which is owned by the county.

L. D'Agostini & Sons Inc., a Macomb-area contractor, won the right to build the intake for $24.6 million, and the job, including engineering, is expected to cost $26 7 million.

KAREGNONDI WATER AUTHORITY FINANCING CONTRACT

THIS CONTRACT, dated as of August 1, 2013, by and among the Karegnondi Water Authority, a municipal authority and public body corporate of the State of Michigan (hereinafter referred to as the "Authority"), the City of Flint in the County of Genesee and the County of Genesee (collectively, the "Local Units" and each a "Local Unit").

WITNESSETH:

WHEREAS, the Authority has been incorporated under the provisions of Act No. 233, Public Acts of Michigan, 1955, as amended (hereinafter referred to as "Act 233"), for the purposes set forth in Act 233; and

WHEREAS, the Authority will acquire, construct and operate a water supply system to be known as the Karegnondi Water Supply System that provides untreated water to the Local Units, each of which is a constituent municipality of the Authority; and

WHEREAS, it is immediately necessary and imperative for the public health and welfare of the present and future residents of each of the Local Units that a certain water supply system, as more fully described on Exhibit A hereto, together with all necessary interests in land, appurtenances and attachments thereto (the "System") be acquired, installed and constructed; and

WHEREAS, plans and an estimate of cost of the System have been prepared by the Authority's consulting engineers, Wade Trim (the "Consulting Engineers"), which said estimate of aggregate cost totals an amount not to exceed $300,000,000, and

WHEREAS, each of the Local Units is desirous of having the Authority acquire and own the System in order to continue to operate the System in order to furnish the Local Units with untreated raw water; and

WHEREAS, the parties hereto have determined that the System is essential to the general health, safety and welfare of each of the Local Units; and

WHEREAS, the Authority and each of the Local Units are each agreeable to the execution of this Contract by and among themselves which provides, among other things, for the financing of all or a portion of the cost of the System; and

WHEREAS, this Contract contemplates the issuance of bonds in one or more series by the Authority to pay all or part of the costs of the System; and

WHEREAS, each of the Local Units has or will approve and authorize the execution of this Contract by resolution of its governing body; and

MILLER, CANFIELD PADDOCK AND STONE P.L.C.

WHEREAS, each of the Local Units has published or will publish, individually or jointly, a notice of intention to enter into this Contract in a newspaper of general circulation in the territory encompassed by each Local Unit, and

WHEREAS, this Contract will become effective for each Local Unit upon expiration of a period of forty-five (45) days following publication by each Local Unit of its notice of intention without filing of a petition for referendum on the question of its entering into this Contract, or if such referendum election be required, then upon approval by the qualified electors of the Local Unit.

NOW, THEREFORE, IN CONSIDERATION OF THE PREMISES AND THE COVENANTS MADE HEREIN, THE PARTIES HERETO AGREE AS FOLLOWS:

SECTION 1. The Authority and the Local Units hereby approve the acquisition, construction and operation of System, together with all necessary interests in land, appurtenances and attachments thereto

SECTION 2. Each of the Local Units hereby consents to the use by the Authority and any parties contracting with the Authority of the public streets, alleys, lands and rights-of-way in each Local Unit for the purpose of constructing, operating and maintaining the System including any improvements, enlargements and extensions thereto.

SECTION 3. The System is designed to provide and transport untreated raw water to each of the Local Units and the System is immediately necessary to protect and preserve the public health.

SECTION 4 The Authority and each of the Local Units hereby approve and confirm the plans for the System prepared by the Consulting Engineers and the total estimated cost thereof in the sum of not to exceed $300,000,000. Said cost estimate includes all surveys, plans, specifications, acquisition of property for rights-of-way, physical construction necessary to acquire and construct the System, the acquisition of all materials, machinery and necessary equipment, and all engineering, engineering supervision, administrative, legal and financing expenses necessary in connection with the acquisition and construction of the System and the financing thereof

SECTION 5. The Authority shall not enter into any final contract or contracts for the acquisition and construction of the System if such contract price or prices will be such as to cause the actual cost thereof to exceed the estimated cost as approved in Section 4 of this Contract unless the Authority has sufficient funds to cover such excess, or, each of the Local Units, by resolution of its respective legislative body, (a) approves said increased total cost, and (b) agrees to pay such excess over the estimated cost, either in cash or by specifically authorizing the maximum principal amount of bonds to be issued, as provided in Sections 9 and 14 of this Contract, to be increased to an amount which will provide sufficient funds to meet said increased cost, and approves a similar increase in the installment obligations of each Local Unit, if any, pledged under the terms of this Contract to the payment of such bonds.

SECTION 6. The System shall be acquired and constructed by the Authority substantially in accordance with the plans and specifications therefor approved by this Contract. All matters relating to engineering plans and specifications, together with the making and letting of final construction contracts, the approval of work and materials thereunder, and construction supervision, shall be in the

MILLER CANFIELD PADDOCK AND STONE, P.L.C.

control of the Authority. All acquisition of sites and rights-of-way, if any, shall be done by the Authority. Each Local Unit's share of the costs of such acquisition in each Local Unit, if any, shall be paid from the Local Unit's share of bond proceeds and, in addition, any costs incurred by any Local Unit in connection with the acquisition or construction of the System, including, but not limited to, engineering expenses, shall be promptly reimbursed to the Local Unit by the Authority from the proceeds of the Authority's Bonds with the approval of the Authority board

SECTION 7. The Authority shall operate, maintain and administer the System for and on behalf of the Local Units. The System shall be maintained in good condition and repair. The Authority shall provide insurance as part of its obligation to operate the System. The Authority will furnish reports to the Local Units at periodic intervals corresponding with the reporting periods of the Local Units in detail sufficient to inform the Local Units of the operations of the System and to permit the Local Units to meet their financing requirements hereunder.

SECTION 8. To provide for the construction and financing of the System in accordance with the provisions of Act 233, the Authority shall take the following steps:

(a) The Authority will take steps to adopt a resolution or resolutions providing for the issuance of its bonds in one or more series in the principal amount of not to exceed $300,000,000 (except as otherwise authorized pursuant to Section 5 of this Contract) to finance all or part of the costs of the System. Said bonds shall mature serially or be subject to mandatory sinking fund redemption as authorized by law, and shall be secured by the contractual obligations of each Local Unit in this Contract. After due adoption of the resolution or resolutions , the Authority will take all necessary legal procedures and steps necessary to effectuate the sale or sales and delivery or deliveries of said bonds.

(b) The Authority shall take all steps necessary to take bids for and enter into and execute final acquisition and construction contracts for the acquisition and construction of the System as specified and approved hereinbefore in this Contract, in accordance with the plans and specifications therefor based on the plans as approved by this Contract.

(c) The Authority will require and procure from the contractor or contractors undertaking the actual construction and acquisition of the System necessary and proper bonds to guarantee the performance of the contract or contracts and such labor and material bonds as may be required by law.

(d) The Authority, upon receipt of the proceeds of sale of each series of bonds, will comply with all provisions and requirements provided for in the resolution authorizing the issuance of such series of bonds and this Contract relative to the disposition and use of the proceeds of sale of such series of bonds.

(e) The Authority may temporarily invest any bond proceeds or other funds held by it for the benefit of each Local Unit as permitted by law and investment income shall accrue to and follow the fund producing such income. The Authority shall not, however, invest, reinvest or accumulate any moneys deemed to be proceeds of the bonds pursuant to §148 of the Internal Revenue Code of 1986, as amended, and the applicable regulations thereunder (the "Code"), in such a manner as to cause the bonds to be "arbitrage bonds" within the meaning of Code §

MILLER CANFIELD PADDOCK AND STONE, P.L.C.

103(b)(2) and §148, or otherwise as may jeopardize the tax status of the bonds.

SECTION 9. Each Local Unit irrevocably covenants and agrees to pay to the Authority its Local Unit share of each series of bonds to be issued by the Authority pursuant to this Contract. The share of each Local Unit shall be determined as set forth on Exhibit B hereto.

The cost of the System to be financed with the issuance of bonds of the Authority in the aggregate principal amount of not to exceed $300,000,000 shall be paid in annual installments on the dates and in the amounts as established in the Authority's bond authorizing resolution.

Each Local Unit covenants that it will make or cause to be made its payments as required by this Contract not less than 3 days prior to the dates on which the Authority is required to make payments on the bonds described herein to the transfer agent for the bonds

It is understood and agreed that the bonds of the Authority hereinbefore referred to will be issued in anticipation of the above contractual obligation, with principal maturities on the dates established by the Authority corresponding to the principal amount of the installments then coming due, and there shall also be paid in addition to said principal installments, on such dates as shall be determined by the Authority, commencing on such date as determined by the Authority, as accrued interest on the principal amount remaining unpaid, an amount sufficient to pay all interest at an interest rate not to exceed ten percent (10%) per annum, due on the next succeeding interest payment date on the bonds from time to time outstanding

It is further understood and agreed that the bonds of the Authority may be secured by a debt service reserve fund or funds to provide additional security for the timely payment thereof if the Authority determines, in consultation with its financial advisor, that the provision of such debt service reserve fund or funds is advisable. If the bonds of the Authority are secured by a debt service reserve fund or funds, each Local Unit covenants and agrees to provide for the replenishment of such debt service reserve funds as described in Exhibit B.

From time to time as the Authority is billed by the transfer agent for its services for the bonds, and as other costs and expenses accrue to the Authority from handling of the payments made by the Local Units, or from other actions taken in connection with the System, the Authority shall promptly notify the Local Units of the amount of such paying agent fees and other costs and expenses, and the Local Units shall promptly remit to the Authority sufficient funds to meet such fees and other costs and expenses in the proportions hereinabove provided to the extent sufficient funds are not available to the Authority. Each Local Unit warrants and represents that the amount of its obligations under this Contract, when taken together with other indebtedness of such Local Unit, will not cause its obligations under this Contract to exceed any constitutional, statutory or charter debt limitation applicable to such Local Unit.

The Authority shall, within thirty (30) days after the delivery of each series of the bonds of the Authority hereinbefore referred to, furnish each Local Unit with a complete schedule of installments of principal and interest thereon, and the Authority shall also at least sixty (60) days prior to each principal and/or interest installment due date, advise the Local Units, in writing, of the exact amount of principal and interest installments due on each series of bonds on the next succeeding bond principal and/or interest due date, and payable on the first day of the month immediately preceding, as hereinbefore

MILLER, CANFIELD, PADDOCK AND STONE P.L.C.

provided. Failure of the Authority to notify the Local Units of any such payment shall not relieve the Local Units of the obligation to make such payment.

If any principal installment or interest installment is not paid when due, the amount not so paid shall be subject to a penalty, in addition to interest, of one percent (1%) thereof for each month or fraction thereof that the same remains unpaid after the due date.

SECTION 10. Each Local Unit states its intention to pay its obligations under this Contract from sources of moneys as are provided by Act 233 and applicable law, including the levy and collection of rates and charges to users of its respective water supply system for operating and maintaining its system provided by each Local Unit to customers in the Local Unit. Nevertheless, pursuant to the authorization contained in Act 233, each Local Unit hereby irrevocably pledges its full faith and credit for the prompt and timely payment of its obligations pledged for bond payments as expressed in this Contract, and, subject to the provisions of the last sentence of this paragraph, shall each year, commencing with the first tax levy after issuance of the bonds by the Authority, levy an ad valorem tax on all the taxable property in the Local Unit in an amount which, taking into consideration estimated delinquencies in tax collections, will be sufficient to pay such obligations under this Contract becoming due before the time of the following year's tax collections. Such annual tax levies shall be subject to applicable constitutional, statutory, and charter tax limitations. Nothing herein contained shall be construed to prevent a Local Unit from using any, or any combination of, the means and methods provided in Section 7 of Act 233, as now or hereafter amended, for the purpose of providing funds to meet its obligations under this Contract, and, if at the time of making the annual tax levy there shall be either other funds on hand earmarked and set aside, or funds provided in the annual budget of the water supply system of the Local Unit, for the payment of the contractual obligations due prior to the next tax collection period, then such annual tax levy may be reduced by such amount

In the event a Local Unit shall fail for any reason to pay to the Authority at the times specified the amounts required to be paid by the provisions of this Contract, the Authority shall immediately give notice of such default and the amount thereof, to the Treasurer of each Local Unit, the Treasurer of the State of Michigan, and such other officials charged with the disbursement to such Local Unit of funds returned by the State and now or hereafter under Act 233 available for pledge as provided in this Section and in Section 12a of Act 233, and if such default is not corrected within ten (10) days after such notification, the State Treasurer, or other appropriate official charged with disbursement to such Local Unit of the aforesaid funds, is, by these presents, specifically authorized by the Local Unit, to the extent permitted by law, to withhold from the aforesaid funds the maximum amount necessary to cure said deficit and to pay said sums so withheld to the Authority, to apply on the obligations of the Local Unit as herein set forth. Any such moneys so withheld and paid shall be considered to have been paid to the Local Unit within the meaning of the Michigan Constitution and statutes, the purpose of this provision being voluntarily to pledge and authorize the use of said funds owing to the Local Unit to meet any past-due obligations of such Local Unit due under the provisions of this Contract. In addition to the foregoing, the Authority shall have all other rights and remedies provided by law to enforce the obligations of the Local Unit to make its payments in the manner and at the times required by this Contract, including the right of the Authority to direct the Local Unit to make a tax levy to reimburse the Authority for any funds advanced.

SECTION 11. Each Local Unit may pay in advance any of the payments required to be made by this Contract, in which event the Authority shall credit the respective Local Unit with such advance

MILLER, CANFIELD, PADDOCK AND STONE, P.L.C.

payment on future due payments to the extent of such advance payment, or use such advances to call bonds without credit to the extent provided in relevant series of bonds.

SECTION 12. Each Local Unit may pay additional moneys over and above any of the payments specified in this Contract, with the written request that such additional funds be used to prepay installments, in which event the Authority shall be obligated to apply and use said moneys for such purpose to the fullest extent possible. Such moneys shall not then be credited as advance payments under the provisions of Section 11 of this Contract.

SECTION 13. It is specifically recognized by each Local Unit that the debt service payments required to be made by each pursuant to the terms of Section 9 of this Contract are to be pledged for and used to pay the principal installments of and interest on with respect to the bonds to be issued by the Authority as provided by this Contract and authorized by law, and each Local Unit covenants and agrees that it will make all required payments to the Authority promptly and at the times herein specified without regard to whether the System is actually completed or placed in operation.

SECTION 14. If the proceeds of the sale of the bonds in one or more series in aggregate amount not to exceed $300,000,000 to be issued by the Authority are for any reason insufficient to complete each Local Unit's share of the cost of the System, subject to each Local Unit's approval required by Section 5 hereof, the Authority shall automatically be authorized to issue additional bonds in an aggregate principal amount sufficient to pay the cost of completing the System and to increase the annual payments required to be made by each Local Unit in an amount so that the total payments required to be made as increased will be sufficient to meet the annual principal and interest requirements on the bonds herein authorized plus the additional bonds to be issued. It is expressly agreed between the parties hereto that the Authority shall issue bonds pursuant to this Contract and each Local Unit shall be committed to retire such amount of bonds as may be necessary to pay each Local Unit's share of the costs of the System whether or not in excess of those presently estimated herein. Any such additional bonds shall comply with the requirements of Act 233 and any increase in the annual payments shall be made in the manner and at the times specified in this Contract. In lieu of such additional bonds, each Local Unit may pay over to the Authority, in cash, sufficient moneys to complete each Local Unit's share of the cost of the System.

SECTION 15. After completion of the System and payment of all costs thereof, any surplus remaining from the proceeds of sale of bonds shall be used by the Authority for either of the following purposes: (a) for improvements or enhancements to the System or for other projects of the Authority undertaken on behalf of the Local Units, subject to approval of the Authority; or (b) credited by the Authority toward the next payments due the Authority by said Local Units hereunder

SECTION 16. The obligations and undertakings of each of the parties to this Contract shall be conditioned on the successful issuance and sale of the first series of bonds pursuant to Act 233, and if for any reason whatsoever the first series of bonds are not issued and sold within three (3) years from the date of this Contract, this Contract, except for payment of preliminary expenses and ownership of engineering data, shall be considered void and of no force and effect.

SECTION 17. The Authority and each Local Unit each recognize that the owners from time to time of each series of bonds issued by the Authority under the provisions of Act 233 to finance the cost of the System will have contractual rights in this Contract, and it is, therefore, covenanted and agreed by

MILLER CANFIELD PADDOCK AND STONE, P.L.C.

the Authority and each Local Unit that so long as any of series of bonds shall remain outstanding and unpaid, the provisions of this Contract shall not be subject to any alteration or revision which would in any manner materially affect either the security of such series of bonds or the prompt payment of principal or interest thereon. Each Local Unit and the Authority each further covenant and agree that each will comply with its respective duties and obligations under the terms of this Contract promptly at the times and in the manner herein set forth, and will not suffer to be done any act which would in any way impair the said bonds, the security therefor, or the prompt payment of principal and interest thereon. It is hereby declared that the terms of this Contract insofar as they pertain to the security of any such bonds shall be deemed to be for the benefit of the owners of said bonds

SECTION 18. This Contract shall remain in full force and effect from the effective date hereof (as provided in Section 21) until each series bonds issued by the Authority are paid in full, but in any event not to exceed a period of thirty (30) years for each series of bonds. At such time within said 30-year term as any of the series of said bonds are paid, this Contract shall be terminated In any event, the obligation of each Local Unit to make payments required by this Contract shall be terminated at such time as all of said bonds are paid in full, together with any deficiency or penalty thereon.

SECTION 19. This Contract shall inure to the benefit of and be binding upon the respective parties hereto, their successors and assigns.

SECTION 20. This Contract shall become effective upon (i) approval by the legislative body of each Local Unit, (ii) approval by the Board of the Authority and (iii) due execution by authorized officers of each Local Unit and by the Chairman and Secretary of the Authority.

SECTION 21. This Contract may be executed in several counterparts.

MILLER CANFIELD PADDOCK AND STONE, P.L.C.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed as of the day and year first above written.

EXHIBIT A

SYSTEM

The Karegnondi Water System is a raw water supply system. It will deliver untreated Lake Huron water 65 miles inland to the population centers of Lapeer and Genesee Counties, including the Cities of Lapeer and Flint, and the County Agency of Genesee County with 17 local municipal systems The system will also be capable of delivering water along the route to customers in Sanilac and Lapeer County, as well as future customers in Saint Clair County

The system will consist of a lake intake, two pumping stations, and over 65 miles of large diameter transmission watermain. The system will include fire hydrants, metering stations, reservoirs, and the appurtenances necessary to operate the system efficiently. The lake intake portion of the project and the land where the two pumping stations are located will be acquired, constructed, designed and financed by the County of Genesee and made available for use by the Karegnondi Water System.

All land and required right-of-ways and easements have been acquired.

MILLER CANFIELD PADDOCK AND STONE, P.L.C.

EXHIBIT B

LOCAL UNIT ESTIMATED SHARE OF IMPROVEMENT COST

The following is a breakdown of the percent each Local Unit is required to pay of the aggregate debt service, including the obligation to replenish a debt service reserve fund(s), if any, on the Authority's bonds authorized by this Contract:

Local Unit	Bond Issue
County of Genesee	65 8%
City of Flint	34.2%

In the event the City of Flint fails to fulfill its payment obligations under this Contract, the County of Genesee irrevocably covenants and agrees to make such missed payment within 1 day of being notified of the missed payment. Further, the Authority covenants and agrees to undertake all legal action and make use of all remedies available under this Contract to enforce the payment obligations of the City of Flint under this Contract. The Authority also covenants and agrees to undertake all legal action and make use of all remedies available to it under the Raw Water Supply Contract between the Authority and the City of Flint dated as of June 28, 2013 ("Raw Water Supply Contract"), as amended, specifically sections 7.08 and 7.09 of such contract. If the County of Genesee is required to make a payment for the City of Flint under this Contract and the Authority recovers any funds from the pursuit of such remedies described above, the Authority shall reimburse the County of Genesee from such funds for any payments made. To the extent permitted by law, the capacity that the City of Flint acquired in the System pursuant to the Raw Water Supply Contract shall be transferred to the County of Genesee until the City of Flint has repaid the County of Genesee for any additional payments made hereunder. The City of Flint shall also pay a penalty of one percent (1%) thereof for each month or fraction thereof that the same remains unpaid after the due date of the amount paid by the County of Genesee as a result of the failure of the City of Flint to fulfill its payment obligations hereunder. Further, if a Local Unit fails to pay its contractual obligation causing a shortfall and the debt service reserve fund(s) is drawn upon to pay the Authority's bonds, the replenishment of such debt service reserve fund shall be an obligation of the Local Unit that failed to pay, as provided in the resolution authorizing the bonds. Provided, however, if the City of Flint fails to fulfill its debt service reserve fund replenishment obligation, as with other payment obligations under the Contract, the County of Genesee agrees to make such payments.

Additionally, if the Authority sells raw untreated water capacity to other parties, to the extent funds are available from payments received from those parties, each Local Unit shall be credited on each day payment is due hereunder as agreed to by the Authority and the Local Units towards each Local Unit's payment obligations hereunder.

Flint to spend $171,000 for engineering to treat Flint River water while KWA pipeline is built

Jeff Wright, center, Genesee County Drain Commissioner, prepares to break ground for the Karegnondi Water Authority Pipeline in this file photo from Fort Gratiot Charter Township on June 28

Zack Wittman | MLive.com

FLINT, MI – The city will spend $171,000 to get Flint's water plant up and running on a continual basis, with the potential to use the Flint River as the primary drinking water source for about two years while the Karegnondi Water Authority pipeline is built.

The engineering work completed by Flint-based Lockwood, Andrews & Newnam, Inc. also will allow the plant to be used to convert raw water from Lake Huron delivered via the KWA pipeline to drinkable water in Flint.

Flint currently gets its water from Detroit and Flint's water plant has been used as an emergency backup if there was an interruption in service from Detroit.

"The engineering work they're looking at involves potentially using the river on a continuing basis," said Steve Busch, a district supervisor with the Michigan

Department of Environmental Quality. "I think it's yet to be determined if they would use (the Flint River) as a primary source."

City Spokesman Jason Lorenz said Flint would like to work out an agreement with Detroit to provide water for Flint until KWA's pipeline is built

"We still believe that going with Detroit for the next two years (while the KWA pipeline is built) is the best option," said Flint Spokesman Jason Lorenz "We already had to make these upgrades ahead of KWA "

Former emergency manager Ed Kurtz approved the contract in a resolution signed June 26.

"The city of Flint requires professional engineering services for assistance in placing the Flint water plant into operation using the Flint River as a primary drinking water source for approximately two years and then converting to KWA delivered lake water when available," the resolution reads.

A groundbreaking ceremony for the $274 million pipeline project took place last month.

In April, Flint decided to get its water from the KWA, thus ending its longstanding water deal with the Detroit Water and Sewerage Department

Detroit then gave Flint and Genesee County notice that Detroit would terminate the 50-year-old water deal between the two cities effective April 17, 2014.

The engineering work approved by Flint will allow for the use of the Flint River as drinking water for Flint while the KWA is being built

Upgrades to the plant's water softening process also will be done, Busch said

"Regardless of the source, they'd have to provide treated water that meets all drinking water standards and public health regulations," he said. "They're just trying to do upgrades to existing equipment to be able to provide on a consistent basis."

Detroit water prices have increased an average of more than 9 percent annually for the last 12 years, Genesee County officials have previously said.

The county and city are the key members of the KWA, while officials in Sanilac and Lapeer counties have expressed interest in future raw water purchases from the authority

Genesee County Drain Commissioner Jeff Wright previously said the project will take up to three years to construct the 64 miles of pipeline, an intake a mile out into Lake Huron, pumping stations and a county water treatment plant.

County officials said Flint would pay roughly $6.4 million annually for water service if it joined the pipeline – a nearly $4 million savings on what it pays Detroit for water.

Flint Mayor Dayne Walling previously said the city would save $19 million over eight years by getting water from the KWA.

KAREGNONDI WATER AUTHORITY
ACTING IN GENESEE COUNTY, MICHIGAN

RESOLUTION NO. 2014-01

A RESOLUTION APPROVING THE FIRST ADDENDUM TO THE RAW WATER SUPPLY CONTRACT BETWEEN THE KAREGNONDI WATER AUTHORITY AND THE CITY OF FLINT DATED JUNE 28, 2013, AND EFFECTIVE ON OCTOBER 1, 2013

At a meeting of the Karegnondi Water Authority Board, acting in Genesee County, Michigan, held on February 19, 2014, at 2:00 p.m., local time

PRESENT: _____

_____

_____

ABSENT: _____

_____

The following preamble and resolution were offered by _____ and seconded by _____.

PREAMBLE

WHEREAS, the Karegnondi Water Authority Board, by Resolution 2013-01, approved a Raw Water Supply Contract between the Karegnondi Water Authority and the City of Flint, which is dated June 28, 2013, and effective on October 1, 2013 (hereinafter "Water Contract") ; and

WHEREAS, the KWA Incorporating Board, KWA Authority Board, and the City of Flint have agreed to modify the Water Contract by approving a written addendum pursuant to ARTICLE VII, Section 7.20 of the Water Contract: and

WHEREAS, the main purpose of the proposed written addendum is to allow the KWA to issue bonds for the construction of the water transmission main and all appurtenants thereto,

NOW, THEREFORE, BE IT RESOLVED THAT:

The Incorporating Board hereby approves the First Addendum, attached hereto and incorporated herein by reference. to the Water Contract ("First Addendum")

NOW, THEREFORE, BE IT FURTHER RESOLVED THAT:

The KWA Authority Board hereby approves the First Addendum to the Water Contract.

NOW, THEREFORE, BE IT FURTHER RESOLVED THAT:

The Chief Executive Officer and the Attorney appointed to represent the KWA may modify the First Addendum as long as the intent of the First Addendum adopted this day is not modified to diminish the authority of the KWA Board or its ability to accomplish the main purpose of the First Addendum.

FIRST ADDENDUM TO
RAW WATER SUPPLY CONTRACT BETWEEN THE KAREGNONDI WATER AUTHORITY AND THE CITY OF FLINT DATED JUNE 28, 2013, AND EFFECTIVE ON OCTOBER 1, 2013

THIS FIRST ADDENDUM ("Addendum") to the RAW WATER SUPPLY CONTRACT BETWEEN THE KAREGNONDI WATER AUTHORITY AND THE CITY OF FLINT DATED JUNE 28, 2013, AND EFFECTIVE ON OCTOBER 1, 2013 (hereafter the "Contract") is entered into effective _____, by and between the Karegnondi Water Authority, a Michigan Public Authority created pursuant to Act 233 of the Michigan Public Acts of 1955, as amended (hereinafter "KWA"), whose address is G-4610 Beecher Road, Flint, Michigan 48532 and the City of Flint, a municipal corporation, of the State of Michigan (hereinafter "Flint"), whose address is 1101 South Saginaw Street, Flint, Michigan 48502 KWA and Flint are sometimes hereafter each referred to as a "Party" and collectively as the "Parties."

WITNESSETH:

WHEREAS, the Parties entered into a Raw Water Supply Contract, dated the 28th day of June, 2013, and effective on October 1, 2013;

WHEREAS, the Parties have agreed to enter into this Addendum for the purpose of modifying the Recitals, ARTICLE I, Section 1.02(6); ARTICLE I, Section 1.02(18); ARTICLE II, Section 2.04; ARTICLE II, Section 2.05; ARTICLE II, Section 2.07; ARTICLE VI, Section 6.06; and EXHIBIT A, Section 2(b) of the Contract.

NOW THEREFORE, it is hereby agreed by the Parties as follows:

1. **Amendment to the RECITALS of the Contract.** Add the following recital to the RECITALS of the Contract:

> WHEREAS, the Parties hereto acknowledge and agree that the intake system and the property where the two (2) pump systems may be acquired, constructed, is owned by the Genesee County Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended.

2. **Amendment to the RECITALS of the Contract.** Add the following recital to the RECITALS of the Contract:

> WHEREAS, the Parties hereto acknowledge and agree that the intake system and the property where the two (2) pump systems may be acquired and constructed was acquired and purchased by the Genesee County Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, and the County Agency shall be provided with a credit for the purchase and construction of the property and intake as annually in an amount equal to the

aggregated debt service of the County of Genesee's Water Supply System Revenue Bonds (Limited Tax General Obligation) Series 2013 (the "County Bonds") as more fully set forth in Exhibit A to this addendum. The County Bonds were issued in the original principal amount of Thirty-Five Million Dollars ($35,000,000.00).

3. **Amendment to ARTICLE I, Section 1.02(6) of the Contract.** ARTICLE I. Section 1.02(6) of the Contract is hereby deleted in its entirety and replaced with the following.

(6) **"Capacity Fee"** means the monthly fee paid by the Buyer to the Authority pursuant to Article III of this Contract for the limited rights to capacity. The Capacity Fee shall be billed to the Buyer monthly on the Capital Expenditure Invoice. All interest earned on the Capacity Fee shall be transferred to the reserve fund to be applied to debt service as determined by the Authority and shall not be returned to the general operations fund. The aggregate Capacity Fee payable by all Buyers shall be sufficient to enable the Authority to pay the principal of, redemption premium, if any, and interest on the Bonds, as such principal, redemption premium, if any and interest become due, less interest to be paid out of Bond proceeds or from other sources if permitted by any Bond Resolution, and all amounts required to redeem any Bonds prior to maturity when and as provided in any Bond Resolution, plus the fees, expenses and charges of each paying agent/registrar for paying the principal of and interest on the Bonds, for authenticating, registering and transferring Bonds on the registration books of the Authority maintained with the paying agent/registrar, and all annual disclosure fees Additionally, the Capacity Fee shall include the proportionate amount of any reserve funds required to be accumulated and maintained by the provisions of any Bond Resolution or as determined by the Authority and the proportionate amount of any contingency funds, if so required by the Authority. If the Bond Resolution so requires, the Capacity Fee shall allow for an amount sufficient to restore any deficiency in any of such funds required to be accumulated and maintained by the Authority. The Capacity Fee shall terminate upon redemption of the bonds issued for the implementation and construction of the System.

4. **Amendment to ARTICLE I, Section 1.02(18) of the Contract.** ARTICLE I. Section 1.02(18) of the Contract is hereby deleted in its entirety and replaced with the following:

(18) **"System"** means the long-range Water supply system authorized by this Contract, together with all improvements, enlargements, extensions and additions which, pursuant to this Contract, are deemed necessary and feasible by the Authority to provide Water supply as contracted herein to the Buyer from the point of withdrawal to the Point of Delivery; and, all future new facilities, which are acquired or constructed with proceeds from the sale of any bonds or revenues from the System; and, any water supply facilities which are deliberately and specifically, at the option of the Authority, made a part of the System by resolution of the Authority Board, and all repairs to or replacements of the System. The System is owned exclusively by the Authority and shall remain with the Authority. In the event that the Authority is dissolved the System shall be disposed of in a manner consistent with Article V of the Articles of Incorporation. Notwithstanding anything in this Contract to the contrary, the intake system and the property where the two (2) pump systems may be acquired, constructed, and owned by the Genesee County Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, through the issuance of the County Bonds.

5. **Amendment to ARTICLE II, Section 2.04 of the Contract.** ARTICLE II, Section 2.04 of the Contract is hereby deleted in its entirety and replaced with the following:

Section 2.04. **Construction of the System.** The Authority agrees to use its best efforts to issue System Development Bonds, payable from and/or secured by the Capacity Fee payments made under this Contract and any other lawful sources. Allocated portions of the System Development Bond issues may be used to fund any other approved use as determined by the Authority's Bond Counsel

6. **Amendment to ARTICLE II, Section 2.05 of the Contract.** ARTICLE II, Section 2.05 of the Contract is hereby deleted in its entirety and replaced with the following:

Section 2.05 **Enhancement and Expansion of the System.** It is anticipated that the enhancement and expansion of the System will be in incremental, finite projects and that each such project will be financed by the Authority through the issuance of one or more series or issues of System Improvement Bonds. Also, on its own initiative or at the request of the Buyer, the Authority may refund any Bonds that were issued to extend, enlarge, repair, renovate, equip, operate, maintain and otherwise improve the System and any System facilities The Authority agrees that such improvements for the System will be made in accordance with generally accepted engineering practices. It is anticipated that such improvements will be financed by the Authority through the

issuance of one or more series or issues of System Improvement Bonds payable from and secured by the payments made under this Contract and/or any other lawful sources.

7. **Amendment to ARTICLE II, Section 2.07 of the Contract.** ARTICLE II, Section 2.07 of the Contract is hereby deleted in its entirety and replaced with the following:

Section 2.07. Financing of the Infrastructure. The Authority and Buyer expect to use bond financing and any other lawful sources for construction of the System and any other approved use for the financing and constructing the Authority's facilities. The Authority through its Financial Advisor may establish appropriate custodial and/or trust accounts to hold the debt service and the proceeds from bond sales and shall establish an investment policy defining the Authority's rights to and the Authority's requirements and restrictions related to the investment of the proceeds from bond sales. Further, the custody and/or trust agreement, if any, and also the related investment policy shall comply with appropriate State of Michigan statutes and audit requirements and will be reviewed and approved by the Authority's legal counsel. The Authority may pledge revenues from this Contract to secure financing of the System, in addition to the Capacity Fees, the Members of the Authority may pledge the full faith and credit of their respective municipality toward any bonds issued by the Authority at the request of the Authority The title of the System shall be solely in the name of the Authority. The Buyer expressly agrees that it shall not have any claim to any portion of the physical infrastructure of the System. The Buyer pursuant to this Contract shall only have rights to capacity and the amount of Water purchased. Notwithstanding anything to the contrary in this Contract, to the extent the County of Genesee, or its County Agency, finances the acquisition, construction of the intake facility or the property where the two (2) pump stations are located in the amount of Thirty-Five Million ($35,000,000 00) through the issuance of the County Bonds and makes the same available to the Authority for the duration of this Contract, the Genesee County Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, shall be credited yearly in an amount equal to its bond payment with interest and fees thereby receiving a full credit for the amount paid for the intake and the property where the two (2) pumping stations are located. Once the County Bonds have been redeemed in their entirety and the County Agency has received a credit in an aggregate amount equal to the aggregate debt service of the County Bonds, as fully set forth in Exhibit A to this addendum, the County

Agency shall transfer the property, intake, and all structures, fixtures, and assets located on the property to the Karegnondi Water Authority. Further, the parties hereto expressly agree that the County Agency will receive an annual payment credit equal to the aggregate debt service on the County Bonds.

8. **Amendment to ARTICLE III, Section 3.04 of the Contract.** ARTICLE III, Section 3 04 of the Contract is hereby deleted in its entirety and replaced with the following.

Section 3.04 The Buyer expressly agrees that the Authority is responsible for furnishing Water to the Buyer and it may take several years after the execution of this Contract before Water is made available to the Buyer. Understanding that the goal of the Authority is to provide Water that benefits both the Authority, the Buyer, and the future needs of the Buyer, the Buyer shall pay to the Authority a good faith one-time fee of not less than thirty-two thousand three hundred dollars ($32,300.00) per Unit of Water purchased after October 1. 2013, but prior to October 31, 2013.

Additionally, to show its continued good faith, the Buyer shall pay to the Authority not less than thirty-two thousand three hundred dollars ($32,300.00) per Unit purchased per year until such time as Water is made available to the Buyer Said payments shall be made in monthly installments. The good faith payments are being used to secure a Water supply for the Buyer As such, Buyer agrees that it is not entitled to any interest on the good faith payments made to the Authority. The good faith payments shall be credited to the Buyer. after Water is made available to the Buyer, over a time period determined by the Authority Board, not to exceed the term of this Contract Said credits shall be applied to the monthly invoice sent to the Buyer by the Authority

After Water is made available to the Buyer. the Buyer shall pay the cost per Unit per year for Water or the cost per Unit per year for Volume for Exempt Purposes in the form of a certified bank check or wire transfer. Said payments shall be made in monthly installments. The actual payment amount will be ultimately determined by the total number of Units sold and the amount of Units available for purchase. See Exhibit D. If the Authority determines after the System is designed and the estimated costs are confirmed that the anticipated cost of construction of the System will exceed the funds and assets from the proceeds of the County Bonds and bonds issued by the Authority and secured by a Contract between the City of Flint, the County of Genesee and the

Authority dated as August 1, 2013, the Buyer shall have the right to cancel this Contract pursuant to Section 7 04 of this Contract.

9. **Amendment to ARTICLE VI, Section 6.06 of the Contract.** ARTICLE VI, Section 6.06 of the Contract is hereby deleted in its entirety and replaced with the following:

> Section 6.06. **Buyer Payment Obligations.** The Buyer shall raise money to pay the Capacity Fee, the Annual Requirement, Water Transmission Fee, the Debt Fund fee, fee for Volume for Exempt Purposes, and any other fee, if any, required under this Contract to the extent authorized by law through the levy of taxes, water system revenues collected from its customers, or from any other lawful source.

10. **Amendment to ARTICLE VII, Section 7.04(b) of the Contract.** ARTICLE VII, Section 7.04(b) of the Contract is hereby deleted in its entirety and replaced with the following:

> (b) If the Authority Board determines that the cost of constructing the System will exceed the maximum amount provided in Section 3 04, provided, however, this right to cancel must be exercised before the Authority issues any System Development Bonds

11. **Amendment to EXHIBIT A, Section 2(b) of the Contract.** EXHIBIT A, Section 2(b) of the Contract is hereby deleted in its entirety and replaced with the following.

> (b) Depending on an analysis of costs and other considerations, there may be one or two Points of Withdrawal utilized by the Authority for the extraction of Water from Lake Huron. A general site map of all possible Points of Withdrawal is set forth in attachment 2 to this Exhibit A. An engineer hired by the Authority pursuant to the Contract shall prepare an analysis of costs and preliminary design plans for the construction of all necessary components. The actual design of the Point of Withdrawal and location of the Point or Points of Withdrawal shall be subject to change as required by environmental Studies and Permits obtained pursuant to provisions of Exhibit E. Further the Point of Withdrawal may be acquired, constructed and designed by the Genesee County Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended. The County Agency will agree to make the intake facility available to the Authority.

12. **Notices.** Any notice, demand, or communication required, permitted or desired to be given under this Addendum shall be deemed effectively given pursuant to ARTICLE VII, Section 7.24 the Contract.

13. **Headings.** The headings of the sections set forth in this Addendum are inserted for the convenience of reference only and shall be disregarded when construing or interpreting any of the provisions of this Addendum.

14. **Complete Agreement.** This Addendum, the Contract and any additional or supplementary documents incorporated by specific reference contain all of the terms and conditions agreed upon by the Parties and no other agreements, oral or otherwise, regarding the subject matter of this Addendum or any part thereof shall have any validity or bind either of the Parties.

15. **Severability.** If any provision of this Addendum is held to be unenforceable for any reason, the unenforceability thereof shall not affect the remainder of this Addendum which shall remain in full force and effect and enforceable in accordance with its terms

16. **Waiver.** No waiver of any of the obligations contained herein shall be effective for any purpose unless the same shall be in writing signed by the Chairperson of the Incorporating Board of the Karegnondi Water Authority and by Mayor or Emergency Manager, or both upon the Flint City Council or Emergency Manager's approval, whichever is applicable

17. **Construction.** This Addendum has been prepared and negotiations have occurred in connection with said preparation pursuant to the joint efforts of the Parties This Addendum therefore shall not be construed against either Party

18. **Amendment.** This Addendum may not be amended or modified except for by written agreement signed by both Parties

19. **Certification of Authority to Sign Addendum.** The persons signing on behalf of each of the Parties certify by their signatures that they are authorized to sign the Addendum on behalf of such Party and that this Addendum has been authorized by such Party

20. **Remainder of Contract.** Except as modified by this Addendum, the terms of the Contract shall remain in full force and effect.

IN WITNESS WHEREOF, the Parties hereto have caused this Addendum to be executed and delivered by their respective duly authorized representatives as of the day and year first above written

KAREGNONDI WATER AUTHORITY
ACTING IN GENESEE COUNTY, MICHIGAN

RESOLUTION NO. 2014-02

A RESOLUTION APPROVING THE FIRST ADDENDUM TO THE WATER PURCHASE CONTRACT BETWEEN THE KAREGNONDI WATER AUTHORITY AND THE GENESEE COUNTY DRAIN COMMISSIONER, AS COUNTY AGENCY, PURSUANT TO ACT 342 OF THE MICHIGAN PUBLIC ACTS OF 1939, AS AMENDED DATED AUGUST 16, 2013, AND EFFECTIVE ON OCTOBER 1, 2013

At a meeting of the Karegnondi Water Authority Board, acting in Genesee County, Michigan, held on February 19, 2014, at 2:00 p m., local time.

PRESENT: _____

_____

_____

ABSENT: _____

_____

The following preamble and resolution were offered by _____ and seconded by _____:

PREAMBLE

WHEREAS, the Karegnondi Water Authority Board, by Resolution 2013-02, approved a Water Purchase Contract between the Karegnondi Water Authority and the Genesee County Drain Commissioner, as County Agency,

pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, which is dated August 16, 2013, and effective on October 1, 2013 (hereinafter "Water Contract") ; and

WHEREAS, the KWA Incorporating Board, KWA Authority Board, and the Genesee County Drain Commissioner, as County Agency, have agreed to modify the Water Contract by approving a written addendum pursuant to ARTICLE VII, Section 7.19 of the Water Contract; and

WHEREAS, the main purpose of the proposed written addendum is to allow the KWA to issue bonds for the construction of the water transmission main and all appurtenants thereto;

NOW, THEREFORE, BE IT RESOLVED THAT:

The Incorporating Board hereby approves the First Addendum, attached hereto and incorporated herein by reference, to the Water Contract ("First Addendum").

NOW, THEREFORE, BE IT FURTHER RESOLVED THAT:

The KWA Authority Board hereby approves the First Addendum to the Water Contract.

NOW, THEREFORE, BE IT FURTHER RESOLVED THAT:

The Chief Executive Officer and the Attorney appointed to represent the KWA may modify the First Addendum as long as the intent of the First Addendum adopted this day is not modified to diminish the authority of the KWA Board or its ability to accomplish the main purpose of the First Addendum.

FIRST ADDENDUM TO
WATER PURCHASE CONTRACT BETWEEN THE KAREGNONDI WATER AUTHORITY AND THE GENESEE COUNTY DRAIN COMMISSIONER, AS COUNTY AGENCY, PURSUANT TO ACT 342 OF THE MICHIGAN PUBLIC ACTS OF 1939, AS AMENDED, DATED AUGUST 16, 2013, AND EFFECTIVE ON OCTOBER 1, 2013

THIS FIRST ADDENDUM ("Addendum") to the WATER PURCHASE CONTRACT BETWEEN THE KAREGNONDI WATER AUTHORITY AND THE GENESEE COUNTY DRAIN COMMISSIONER, AS COUNTY AGENCY, PURSUANT TO ACT 342 OF THE MICHIGAN PUBLIC ACTS OF 1939, AS AMENDED, DATED August 16, 2013, AND EFFECTIVE ON OCTOBER 1, 2013 (hereafter the "Contract") is entered into effective _____, by and between the Karegnondi Water Authority, a Michigan Public Authority created pursuant to Act 233 of the Michigan Public Acts of 1955, as amended (hereinafter "KWA"), whose address is G-4610 Beecher Road, Flint, Michigan 48532 and the Genesee County Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended (hereinafter "County Agency"), whose address is G-4610 Beecher Road, Flint, Michigan 48532. KWA and GCDC are sometimes hereafter each referred to as a "Party" and collectively as the "Parties."

WITNESSETH:

WHEREAS, the Parties entered into a Water Purchase Contract, dated the 16th day of August, 2013, and effective on October 1, 2013;

WHEREAS, the Parties have agreed to enter into this Addendum for the purpose of modifying the Recitals; ARTICLE I, Section 1.02(17), and ARTICLE II, Section 2.06 of the Contract.

NOW THEREFORE, it is hereby agreed by the Parties as follows:

1. **Amendment to the RECITALS of the Contract.** Add the following recital to the RECITALS of the Contract:

> **WHEREAS,** the Parties hereto acknowledge and agree that the intake system and the property where the two (2) pump systems may be acquired, constructed, is owned by the Genesee County Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended.

2. **Amendment to the RECITALS of the Contract.** Add the following recital to the RECITALS of the Contract:

WHEREAS, the Parties hereto acknowledge and agree that the intake system and the property where the two (2) pump systems may be acquired and constructed was acquired and purchased by the Genesee County Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, and the County Agency shall be provided with a credit for the purchase and construction of the property and intake as annually in an amount equal to the aggregated debt service of the County of Genesee's Water Supply System Revenue Bonds (Limited Tax General Obligation) Series 2013 (the "County Bonds") as more fully set forth in Exhibit A to this Addendum. The County Bonds were issued in the original principal amount of Thirty-Five Million Dollars ($35,000,000 00)

3. **Amendment to ARTICLE I, Section 1.02(17) of the Contract.** ARTICLE I, Section 1.02(17) of the Contract is hereby deleted in its entirety and replaced with the following:

(17) **"System"** means the long-range Water supply system authorized by this Contract, together with all improvements, enlargements, extensions and additions which, pursuant to this Contract, are deemed necessary and feasible by the Authority to provide Water supply as contracted herein to the Buyer from the point of withdrawal to the Point of Delivery; and, all future new facilities, which are acquired or constructed with proceeds from the sale of any bonds or revenues from the System; and, any water supply facilities which are deliberately and specifically, at the option of the Authority, made a part of the System by resolution of the Authority Board, and all repairs to or replacements of the System. The System is owned exclusively by the Authority and shall remain with the Authority In the event that the Authority is dissolved the System shall be disposed of in a manner consistent with Article V of the Articles of Incorporation. Notwithstanding anything in this Contract to the contrary, the intake system and the property where the two (2) pump systems may be acquired, constructed, and owned by the Genesee County Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, through the issuance of the County Bonds.

4. **Amendment to ARTICLE II, Section 2.06 of the Contract.** ARTICLE II, Section 2.06 of the Contract is hereby deleted in its entirety and replaced with the following:

Section 2.06 Title of System. The title of the System shall be solely in the name of the Authority. The Buyer expressly agrees that it shall not have any claim to any portion of the physical infrastructure of the System used to provide Water capacity to the Buyer. The Buyer pursuant to this Contract shall only have rights to the amount of Water purchased. Notwithstanding anything to the contrary in this Contract, the Buyer at its sole expenses, with the full faith and

credit of Genesee County as security, has agreed to finance, acquire, design and construct the intake facility and acquire the property where the two (2) pump stations will be located through the issuance of the County Bonds.

The parties hereto express agree that the County Agency will receive an annual payment credit equal to the aggregate debt service on the above described bonds.

The Buyer hereby agrees that it shall receive a credit in an annual amount equal to the aggregate debt service of the County Bonds, as fully set forth in Exhibit A to this addendum. Upon the bonds being redeemed in their entirety, the Buyer agrees that it will have been reimbursed for the intake, the property, and any physical assets located on the property and it shall thereafter transfer ownership of the property, intake, and all assets, buildings and fixtures located on the property to the Karegnondi Water Authority. If the Buyer fails to deed the property, intake, and assets located on the property to the Karegnondi Water Authority within three (3) months after the bonds have been redeemed, or at a mutually agreed upon date and time after the bonds have been redeemed, or after it is brought to the attention of the Buyer that is required to deed the property, intake, and assets located on the property to the Karegnondi Water Authority, then the Buyer shall pay to the City of Flint in a lump sum payment of $35,000,000 00 within sixty (60) days as a penalty and not as payment for the property.

Buyer further agrees to maintain the property and cooperate fully with the Karegnondi Water Authority, including, but not limited to, allowing authorized employees of Karegnondi Water Authority onto the property and access to any building or equipment deemed to be in the interest of the Karegnondi Water Authority

5. **Amendment to ARTICLE III, Section 3.04 of the Contract.** ARTICLE III, Section 3.04 of the Contract is hereby deleted in its entirety and replaced with the following:

Section 3.04 The Buyer expressly agrees that the Authority is responsible for furnishing Water to the Buyer and it may take several years after the execution of this Contract before Water is made available to the Buyer. Understanding that the goal of the Authority is to provide Water that benefits both the Authority, the Buyer, and the future needs of the Buyer, the Buyer shall pay to the Authority a good faith one-time fee of not less than thirty-two thousand three

hundred dollars ($32,300.00) per Unit of Water purchased after October 1, 2013, but prior to October 31, 2013.

Additionally, to show its continued good faith, the Buyer shall pay to the Authority not less than thirty-two thousand three hundred dollars ($32,300.00) per Unit purchased per year until such time as Water is made available to the Buyer. Said payments shall be made in monthly installments. The good faith payments are being used to secure a Water supply for the Buyer. As such, Buyer agrees that it is not entitled to any interest on the good faith payments made to the Authority. The good faith payments shall be credited to the Buyer, after Water is made available to the Buyer, over a time period determined by the Authority Board, not to exceed the term of this Contract. Said credits shall be applied to the monthly invoice sent to the Buyer by the Authority.

After Water is made available to the Buyer, the Buyer shall pay the cost per Unit per year for Water or the cost per Unit per year for Volume for Exempt Purposes in the form of a certified bank check or wire transfer Said payments shall be made in monthly installments. The actual payment amount will be ultimately determined by the total number of Units sold and the amount of Units available for purchase. See Exhibit D. If the Authority determines after the System is designed and the estimated costs are confirmed that the anticipated cost of construction of the System will exceed the funds and assets from the proceeds of the County Bonds and bonds issued by the Authority and secured by a Contract between the City of Flint, the County of Genesee and the Authority dated as August 1, 2013, the Buyer shall have the right to cancel this Contract pursuant to Section 7.04 of this Contract.

6. **Amendment to ARTICLE VII, Section 7.04(b) of the Contract.** ARTICLE VII, Section 7.04(b) of the Contract is hereby deleted in its entirety and replaced with the following:

(b) If the Authority Board determines that the cost of constructing the System will exceed the maximum amount provided in Section 3.04, provided, however, this right to cancel must be exercised before the Authority issues any bonds for the construction of the System.

7. **Notices.** Any notice, demand, or communication required, permitted or desired to be given under this Addendum shall be deemed effectively given pursuant to ARTICLE VII, Section 7.23 the Contract.

8. **Headings.** The headings of the sections set forth in this Addendum are inserted for the convenience of reference only and shall be disregarded when construing or interpreting any of the provisions of this Addendum.

9. **Complete Agreement.** This Addendum, the Contract and any additional or supplementary documents incorporated by specific reference contain all of the terms and conditions agreed upon by the Parties and no other agreements, oral or otherwise, regarding the subject matter of this Addendum or any part thereof shall have any validity or bind either of the Parties.

10. **Severability.** If any provision of this Addendum is held to be unenforceable for any reason, the unenforceability thereof shall not affect the remainder of this Addendum which shall remain in full force and effect and enforceable in accordance with its terms

11. **Waiver.** No waiver of any of the obligations contained herein shall be effective for any purpose unless the same shall be in writing signed by the Chairperson of the Incorporating Board of the Karegnondi Water Authority and by the Genesee County Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended.

12. **Construction.** This Addendum has been prepared and negotiations have occurred in connection with said preparation pursuant to the joint efforts of the Parties. This Addendum therefore shall not be construed against either Party

13. **Amendment.** This Addendum may not be amended or modified except for by written agreement signed by both Parties.

14. **Certification of Authority to Sign Addendum.** The persons signing on behalf of each of the Parties certify by their signatures that they are authorized to sign the Addendum on behalf of such Party and that this Addendum has been authorized by such Party

15. **Remainder of Contract.** Except as modified by this Addendum, the terms of the Contract shall remain in full force and effect.

IN WITNESS WHEREOF, the Parties hereto have caused this Addendum to be executed and delivered by their respective duly authorized representatives as of the day and year first above written.

City of Flint
2nd Floor, City Hall
1101 S. Saginaw Street
Flint, Michigan 48502

Dear Ms. Brown:

Regarding: Termination of Contract for the Provision of Water Services by the City of Detroit, Water and Sewerage Department

On December 20, 1965, the City of Detroit, through its Board of Water Commissioners, (DWSD) and the City of Flint, Michigan (Flint) entered into a contract for the provision of DWSD treated water to Flint and the distribution by flint of that water to other Genesee County communities Section 18 of that Agreement[1] provides:

18. The Board [DWSD] shall supply and sell water to the City [Flint] from the water system of the City of Detroit, and the City shall receive and purchase such water in accordance with the terms of this Agreement for an indefinite period of time but at least for a period of thirty-five (35) years from the date hereof. This Agreement may be terminated by either party after expiration of said 35-year period, upon one year's written notice served upon the other party by delivering the same to the Secretary of the Board or to the Clerk of the City as the case may be. or at any time upon mutual consent of both parties

Please take notice that pursuant to this section, 18, of the above-referenced Agreement, DWSD is terminating this Agreement one year from today's date (April 17, 2014).

Sincerely yours,

Sue F. McCormick
Director

[1] Although the Agreement between DWSD has been subsequently amended, Section 18 remains unchanged and in full effect

MEDIA ADVISORY:
City of Flint Transition to Flint River Water Ceremony

WHERE: Flint Water Treatment Plant, 4500 N. Dort Hwy. by Stewart Ave.

WHEN: Friday, April 25, 2014 at 2:00pm

Description: The City of Flint is holding a ceremony tomorrow to officially begin the transition to use of the Flint River by shutting the valve to the intake pipe from Detroit.

The DEQ has given Flint final authorization to begin water distribution from the Flint Water Treatment Plant. City, Genesee County, and Michigan Department of Environmental Quality officials will be on hand to witness this historic event and answer media questions.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system was recently found to be in violation of a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 ug/L. The location reporting the highest TTHM level was 99 ug/L; thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, you may be at increased risk and should seek advice about drinking water from your health care provider.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015.

For more information, please contact Mr. Brent Wright or Mike Glasgow at 810-787-6537 or the Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F1 53 WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules. Reminder to water supplier: This notice/certification must be sent to the DEQ.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Gerald Ambrose
Emergency Manager

TO: Wayne Workman, Deputy Treasurer
Treasury Department
State of Michigan

FROM: Jerry Ambrose, Emergency Manager
City of Flint

DATE: March 3, 2015

As the Emergency Manager for the City of Flint, I am charged with restoring the City government to financial solvency, and working to assure that the City moves forward on a financially sustainable basis. The steps taken over the past three years have been difficult. Taxes and fees have been raised, services and workforce reduced, and ongoing costs, including legacy costs, have been constrained.

The current controversy surrounding the provision of water, and the path for resolution, has a potentially significant impact on the progress that is being made. I am satisfied that the water provided to Flint users today is within all MDEQ and EPA guidelines, as evidenced by the most recent water quality results conducted for MDEQ. We have a continuing commitment to maintain water safety and to improve water quality, and have dedicated resources to assure this commitment will be made.

The oft-repeated suggestion that the City should return to DWSD, even for a short period of time, would, in my judgment, have extremely negative financial consequences to the water system, and consequently to the rate payers. By the most conservative estimates, such a move would increase costs by at least $12 million annually, with that amount achieved only by eliminating virtually all budgeted improvements in the system. For a system with Unrestricted Assets of only $740,745, according to the June 30, 2014 audited financial statements, the only recourse within the City's control would be to increase revenues significantly. And in my judgment, that would come from raising rates for water by 30% or more . Further, changing the *source* of the city's water would not necessarily change any of the *aesthetics* of the water, including odor and discoloration, since those appear to be directly related to the aging pipes and other infrastructure that carry water from the treatment facility to our customers.

This direction of discussion also deviates from what, in my judgment, should be the focus: How can we not only operate and maintain a system to assure the delivery of safe and quality water dependably, but significantly reduce the cost of water and sewer to the users? At an average of $149 per month for water and sewer service for a residential user, the cost is extremely high in comparison to surrounding areas, as well as most areas across the state, and creates a significant financial burden for many users. In my judgment, we should all be concentrating on how to reduce rates by 50% or more. Unfortunately, there are no easy or evident answers, and continuation of the status will be an impediment to the sustainable recovery of the City of Flint. It is a conversation that I expect we will have with the recently created Water Quality Advisory Committee.

My reasoning for this conclusion is as follows:

One of the decisions made in the context of beginning to eliminate deficits and to restore financial stability to the City of Flint was to increase water and sewer rates significantly – the only choice available to financially stabilize a system that as of June 30, 2012, had a deficit of $8,758,091. Another was to leave DWDS for the KWA because it offered the opportunity to lower future rate increases. A third decision was to utilize the Flint River on an interim basis when DWSD unilaterally terminated the City's contract for water purchase. That decision was made because it also offered an immediate cost savings opportunity which translated into the ability to upgrade the Water Treatment Plant without having to seek financing. It was a reasonable decision because of our experience in using the river in a back-up capacity, including test runs on a quarterly basis for several decades.

Unfortunately, the switch to the river as a primary source was more challenging than anticipated, and the harsh winter of 2013-2014 resulted in much more damage to the aging water infrastructure than in previous years. The result was the issuance of required notices that water exceeded established guidelines for safety as it could affect certain vulnerable populations, and some users of the system experienced unpleasant odors and discoloration. Some users also appeared to have had some negative reactions to the new source of water. However, as soon as the test results were known, City staff took immediate actions to address the concerns. These actions are evidenced today by the fact that MDEQ has certified that our most recent testing shows water from all testing sites to be well within acceptable guidelines. Additionally, the City is continuing to taking the necessary actions to assure that the water supply remains safe and that water quality continues to improve.

As the City has moved to address the situation, the suggestion continues to be made that the City should re-engage with DWSD and purchase water at least until the KWA pipeline is supplying water As evidenced by the most recent letter from DWSD, such a decision would immediately increase the City's cost by $846,700 per month, or $10,160,400 per year, just for the fixed cost portion of the price. The actual *purchase* of water would be an additional fee, and dependent upon

the quantity purchased. We estimate the actual water purchase cost to average more than $1 million per month, for a grand total of approximately $22 million per year. Finally, the DWSD offer is conditioned upon the City (or presumably the KWA) agreeing to negotiate a long term contract (30 years) for back-up.

The $22 million annual estimate of increased costs to purchase water from DWSD would be minimally offset by an approximate $3 million in reduced operating costs, and could be further offset by an additional $9 million, but only if all funding for capital improvements to the system are eliminated To eliminate all funding dedicated to repairing, stabilizing, and improving the system would be totally irresponsible and would have long term negative consequences to the City and to future rate payers.

As you are aware we have recently brought in outside expert assistance to evaluate the steps we have taken to assure that the water is safe and to continue to improve water quality. We are expecting specific recommendations within the next few weeks, and are committed to implementing those recommendations in a timely manner. Many steps have already been taken. I am confident that implementing their recommendations will assure a continuing supply of safe water as well as improved quality, and at far less cost than re-engaging DWSD.

We have also created a 40-member Water Advisory Committee and a 13-member Technical Advisory Committee to assure two-way communication with the public and users of the system. Those committees will begin to meet this week, and we look forward to answering their questions and receiving their input.

It is unfortunate that problems and concerns with quality have arisen, and we are working every day to address the issues that caused them. Maintaining safe water and improving quality is a top priority as we work to make the City of Flint an attractive place to live, work, study, and play.

VEOLIA

Water Quality Report

March 12, 2015

FROM

Veolia North America

TO

Emergency Manager Gerald Ambrose

Executive Summary

The City of Flint changed water sources, transitioning from Detroit's system to the Flint River. This change created water treatment challenges that have resulted in water quality violations. Aging cast-iron pipe has compounded the situation, leading to aesthetic issues including taste, odor and discoloration. Public interest and scrutiny of the drinking water system intensified following the distribution of required public notices of violation.

The City of Flint has made a number of good decisions regarding treatment changes that have improved water quality. However, this is a very complex water quality issue and the City is seeking additional advice on what to do to ensure healthful drinking water for the community.

Veolia appreciates the City's decision to seek independent third parties to review current treatment processes, maintenance procedures and actions taken to date, and provide ideas for improvement. We are pleased to present this final report to the City of Flint following our experts' 160-hour assessment of the water treatment plant, distribution system, customer service and communications programs, and capital plans and annual budget.

This report provides recommendations and a roadmap for improvement, though our engagement was limited in scope. Our assessment included reviewing actions taken by the City to date, validating the City's plans going forward, and making recommendations for ideas not being considered.

Although a review of water quality records for the time period under our study indicates compliance with State and Federal water quality regulations, Veolia, as an operator and manager of comparable utilities, recommends a variety of actions to address improvements in water quality and related aesthetics including operational changes and improvements, changes in water treatment processes, procedures and chemical dosing, adjustments in how current technologies are being used; increased maintenance and capital program activities, increased training; and, an enhanced customer communications program.

We are also providing a recommended schedule and estimated costs for implementing changes. It is our desire to help Flint residents and public officials better understand the current situation so that informed decisions can be made to ensure safe drinking water for the city's customers.

Review of Actions Taken to Date

To address water quality issues, the city has made operational changes, sought help from the State, hired engineering firm Lockwood, Andrews & Newnam, Inc (LAN) to provide additional advice, and hired Veolia for an assessment from a utility operator's perspective The City has also reached out to different specialty vendors (chemical suppliers, filter companies and tank aeration companies) for information about products to help with the TTHM issues These are logical steps to take

Flint is not alone in dealing with TTHM problems, as many utilities across the country are facing this challenge The City appears to be following standard steps that many of those communities are taking to successfully correct the problem

Although the primary focus of this review was based on solving the TTHM problem, the public has also expressed its frustration over discolored and hard water Those aesthetic issues have understandably increased the level of concern about the safety of the water

The review of the water quality records during the time of Veolia's study shows the water to be in compliance with State and Federal regulations, and, based on those standards, the water is considered to meet drinking water requirements

The City has been proactive in its efforts to reach out to the medical community, to set up a phone number and email address to receive complaints, to post State Water Quality reports, to provide the list of EPA required water tests, and offer to test the water at customers' homes

From our review, these numerous efforts demonstrate how the city is trying to be transparent and responsive beyond what many other communities might do in similar circumstances

State Report

The Michigan Department of Environmental Quality (MDEQ) has requested specific actions be taken related to the total trihalomethane (TTHM) issues. The February 2015 report from LAN (*Operational Evaluation Report TTHM Formation Concern*) indicated apparent reasons for the elevated levels of TTHM in the distribution system. These generally relate to high Total Organic Carbon (TOC) in the water source, improperly operating equipment both in the plant and the distribution system, less-than-optimal plant TOC removal and old cast-iron pipe in the distribution system. **Our assessment confirms that these reasons are likely given our on-site laboratory testing and analysis, as well as our first-hand observations.**

Due to time constraints, LAN's report to the State was submitted prior to Veolia's final analysis and recommendations, and contained a number of key initial and contingent steps the City should consider, including

Initial Actions

- Hire a Third Party Water Quality Expert to Complete Independent Audit
- Obtain a THM Analyzer
- Carry Out Jar Testing
- Water Plant Optimization Softening
- Water Plant Optimization Disinfection of Filter Beds (Pre-Chlorination)
- Water Plant Optimization Polymer Aid to Coagulation and Flocculation
- Increase Water Main Flushing
- Water Modeling Cedar Street Pump Recirculation
- Water Modeling West Side Pump Recirculation
- Broken Valve Locations
- Increase Flushing

Contingent Actions

- Fix Ozone System
- Start Feeding Coagulant and Flocculation Polymer
- Convert to Lime and Soda Ash Softening
- Change Disinfection to Chloramine or Chlorine Dioxide Temporarily
- Install Pre-Oxidant at Intake
- Replace Filter Media Implement Advanced Treatment
- Increase Main Flushing
- Continue Valve Replacement
- Emphasize Cast Iron Pipe Replacement

Veolia's Recommendations

While many of Veolia's recommendations match the *initial assessment* provided by LAN, our approach, as an *operator and manager* of comparable utilities, considers a more comprehensive solution These *improvements* include operational changes, differences in water *treatment regimes and* chemical dosing, increased maintenance, and increased *training*

- **Addition of Permanganate** – The addition of a permanganate chemical will *help reduce ozone demand* as well as *chlorine demand*. The reduction of ozone is needed to help eliminate the possibility of violating the bromate limit The addition of the chemical will *require state approval*, submission of design documents for approval, *procurement* of the equipment and installation The State has indicated they will work with the City on expediting review and approval of any requested *changes* The required dosage of permanganate is *estimated to range from* 0 5 mg/L to 1.2 mg/L with a corresponding price of $160,000 to $320,000 per year (Please note – The water in the river is dynamic *which means it will change* with weather, seasons and other *factors* The estimates provided are based on bench testing at a given time and as such *require* the operators to test water and to verify *chemical dosages on a* frequent basis)
- **Reduction of Ozone Feed** – Treating water is a delicate balance - *increasing ozone* to fix the TTHM problem *can raise bromate levels to a* point of violation The introduction of permanganate is being recommended to reduce the demand for ozone so that *feed rates will not exceed* 5 mg/L The current *ozone dosing has* been as high as 8 mg/L and, as such, if allowed to continue, will increase the risk of violating the bromate levels
- **Increase of Ferric Chloride** – Four coagulants were tested by Veolia -*ferric chloride*, *ferric* sulfate, polyaluminum chloride (PACl) *and aluminum* chlorohydrate (ACH) Ferric chloride and ACH were found to be the best choice of product for effectiveness in removing *TOC, a precursor to* TTHM formation Current *ferric chloride dosages are* too low and dosages of 100 mg/L or more are recommended Again, please note, that the amount of chemical needed changes *with the nature of the river* and as such, water must be tested *multiple times a day* with corresponding changes in chemical dosages This increase to *100 mg/L* is twice what is currently being fed and much higher than what had *previously* been fed last year The *increase in chemical* costs could be up to $1,000,000 per year This change in dosage (using ferric chloride) can be made immediately *without state permit review*
- **Reduction of Lime** – Lime is currently being overfed A *higher dosage of lime* does not necessarily mean better treatment A *review of different* dosages with jar testing indicates that the current dosage of 280 mg/L can be reduced to 230 mg/L This represents a potential *range of savings of* up to $270,000 per year. This *change can be made immediately* It should be noted that the current softening equipment is in poor condition, which does complicate the treatment *process with a poor balance of* flow between the two basins, *weirs that are not level* causing bypassing with the softener basins, and simply old mechanical *equipment* that periodically breaks down This equipment *is not going to be needed* when a change to lake water occurs Addition of soda ash to help further reduce hardness in cold weather might require dosages *up to* 40 mg/L with an annual chemical cost up to $320,000 *There have also* been some questions or complaints *from the public* regarding hard water The water entering the plant is currently 360 mg/L and the plant is reducing that level of hardness to *about 210 mg/L* Optimization of the dosage can reduce the hardness

further to about 180 mg/L. This reduction however has been sporadic as equipment breakdowns and high flows have caused problems keeping the softening process on-line As we have noted before, the dosage needs to be adjusted daily or more often based on process control monitoring. The raw water hardness in the summer is much less than in the winter For illustration purposes, the difference could be 360 mg/L in raw water in winter compared with 220 mg/Lin the summer

- **Eliminate Pre-Chlorination on the Filters** – The reduction of pre-chlorination on the filters during the summer months can help reduce TTHM formation. This action has to be considered carefully with procedures documented and reviewed for engineering principles As such, it will take time for the design engineer to determine what could be done to assure the proper chlorine contact time and document that other safety protocols in water are met This requires state approval. Any submission should be considered along with a possible change in filter media If Granulated Activated Carbon (GAC) is installed then the pre-chlorination would be stopped or drastically reduced because of the chlorine impact on the GAC filter media. Veolia's initial investigation into changes in chlorine feed point indicate that the recommended action can be accomplished while maintaining the required regulatory contact time for disinfection
- **Change Filters to Granulated Activated Carbon (GAC)** – The object of the other changes being made is to reduce the TOC before chlorine is added into the process The plant by design is limited on the amount of TOC removal possible. A maximum removal of only 60% is likely if the plant is properly optimized The change of filter media to GAC would provide the best reduction possible and provide better than 90% removal dramatically reducing the potential for TTHM formation and thus ensuring compliance with that parameter for the water system. The change in filter media, however, is complicated requiring approval by the state, design of the changes, procurement of the media and a contractor to install it That will take time and is likely in a range of $1 5 million (more or less) in cost The use of GAC also requires more testing and monitoring of the media and the TOC than with the current media GAC will accumulate TOC and begin to become in effective after a period of time Depending upon the level of TOC reaching the filters this could be as short as 3 months and as long as 9 months The amount of TOC is dependent upon the river water quality and operation of the other plant processes Once the ability of the filters to remove TOC is diminished, the GAC media has to be replaced if river water continues as a source The change to lake water will not require TOC removal and the media could continue to be used as filter media for that new water source
- **Corrosion Control** – The primary focus of this study was to assure compliance with the TTHM limits That is not the only problem facing the city and its customers though Many people are frustrated and naturally concerned by the discoloration of the water with what primarily appears to be iron from the old unlined cast iron pipes The water system could add a polyphosphate to the water as a way to minimize the amount of discolored water Polyphosphate addition will not make discolored water issues go away. The system has been experiencing a tremendous number of water line breaks the last two winters Just last week there were more than 14 in one day Any break, work on broken valves or hydrant flushing will change the flow of water and potentially cause temporary discoloration
- **Eliminate a Storage Tank** - The water system has more storage than it requires, due to excess capacity in the water lines in combination with the storage tanks The City has already employed LAN to update the hydraulic model The hydraulic model should be used to help determine if water levels can be lowered further and even to remove some storage tanks from service That decision may need to be made

seasonally For example demand during water main breaks last week required extensive amounts of water. The excess storage is more a problem with TTHM formation for the system in summer than winter

- **Prioritize Valve Replacement** - The hydraulic model shows long water age in portions of the system that appear to be contributing to the TTHM problems LAN has updated the model to include the location of broken valves and that added information is being used to identify other system problems The City has a contract for valve turning and repair work that should be focused on known broken valves, particularly in sections of the distribution system with old water age This activity however must wait until warmer weather in fear of causing problems in the water system with lines freezing
- **Target and Increase Flushing** – Flushing the fire hydrants can be useful in cleaning out lines to minimize discolored water complaints and also helping reduce the age of water This DOES NOT mean just opening hydrants The hydraulic model needs to be used to determine which hydrants should be opened and for how long to ensure the lines are properly cleaned For example, this might require 15 minutes or even several hours of flushing depending on location The flushing of hydrants also needs to include records of hydrant condition, color of water initially and after periodic increments plus chlorine residual testing All of that information will help provide information to the engineers on the effectiveness of the procedure. Each crew doing the work should be trained to help explain the process to the public and also warn neighborhoods about flushing so that staining of laundry can be avoided
- **Change to Lake Water** – The changes being made now to the water plant will not be the same changes required to treat lake water once it becomes available A thorough analysis and plan needs to be made in preparation of that switch. This is going to need to include changes in how the plant is operated, like eliminating lime softening and reducing the dosages of many chemicals Consideration will also have to be given to algae treatment when lake water is being used
- **Operating Programs** – All of the changes discussed above are based on testing and techniques proposed by engineers and skilled operators of both LAN and Veolia The staff will need further training and implementation of detailed protocols to successfully implement the changes and to ensure long-term success at the plant. This means the City needs to implement a series of programs to ensure success in these changes
    - **Process Control Management Plan** (PCMP) – The amount of testing and resulting changes in chemical dosages, along with monitoring the impact on the water, will require a well-documented process that all operators follow An example of this is jar testing, which is used by the operators to identify the most effective chemicals and dosages to optimize treatment The staff understands the basic treatment process but needs further practice and training to become proficient in the use of routine process control to adjust for water quality This is commonly referred to as a PCMP and is used as a standard operating procedure so that the operators on the day shift can communicate with the night shift, that operators are following the same treatment plan for water, that the adjustments are unified between different shifts and different people, that a desired water treatment quality is defined and variations from it signal alarms and that the staff knows what to do when the water quality setpoints begin to drift away from its desired quality levels.
    - **Lab QA/QC** – The operation of the water plant is dependent upon accurate lab results Standard operating procedure needs to be set and lab technicians trained in that process EPA and the State

set procedures and standards to be met and the staff should strive to meet those standards The City has already purchased a TTHM analyzer but should also consider a TOC analyzer that can be an online continuous device to provide immediate information on influent and effluent levels of TOC Part of the lab records should be historical review of data to help operators better understand the changes they make in the plant.

- **Maintenance Management** – The key to water equipment is having all the equipment effectively maintained and functioning properly The current capital program is fixing many broken pieces of equipment and updating the plant to current standards This however must be followed with a rigorous maintenance program that ensures the proper preventive maintenance, is able to predict when maintenance is needed to keep equipment functioning properly and responsive to changes in flows and source water quality
- **Training** – The changes being suggested are new to the staff and as such training needs to be provided in what the changes involve, why they are being made, the impact on the water quality, and how best to run the plant A good demonstration of skill level is for the staff to become certified by the State as a licensed water plant operator Many utilities now require all operators to hold at least the minimum certification level as a starting point and offer incentives to increase their certification level

- **Communication Program** – The city should lay out an immediate, written strategy for communicating with the public in the short-term, as well as a 6-to-12 month strategy that contemplates known, future events like the KWA pipeline and switch to lake water A wide range of activities are underway to work with the public but a comprehensive and coordinated effort, with a strategic focus, will help the utility and its customers
  - **Dedicated Communications Personnel** – The City has a single, dedicated public information officer, tasked with providing service to all of city government The current focus on communications support for Public Works, and the anticipated needs over the next several years, indicate the city would benefit from the hiring of a staff person in Public Works who could establish a communications program designed to provide clear and concise information to a broad audience though a number of different channels. In the interim, the city could hire a communications intern, local communications firm, or somebody with experience who is able to provide reduced or no-cost services for the immediate future
  - **Communications Planning – Public Notification** – The City should be congratulated on its efforts to keep the public informed It is posting its monthly reports on the web page to provide transparency, though these reports are highly technical – and may be too technical for the customer base at large They are valuable to those customers who do want this level of detail. The city should create a single-page dashboard of information that outlines the water utility's performance for the previous month, post the dashboard on the website, print copies for distribution at customer service or other reception areas, and be provided during speaking engagements or other events This dashboard should be easy to understand, and include
    - The number of water quality tests conducted the previous month
    - The number of violations reported

- Whether these results are in or out of compliance
- Information about other proactive measures such as main and hydrant replacements, or other programs to improve performance of the water utility
- Benchmarking information so the reader has a greater understanding of how Flint compares with other similar utilities in the region and across the country

- **Public Meetings** –There should be additional, proactive coordination with neighborhood, community and civic groups to provide speakers on timely topics Given the list of numerous responsibilities, the Public Works director cannot do it alone – the city should identify three or four other staff members, knowledgeable about the water utility who can also speak to various groups, provide information and answer questions The development of an outreach strategy to target key neighborhood, community and civic groups also will advance the communications effort and the dissemination of information in both the short and long term
- **Standard tools** – Work crews in the field are often the faces of the utility – the city should create standardized tools for communicating with the public that can be easily and quickly delivered to the community in the event of main breaks, flushing or pre-planned capital improvements Tools should include
  - Door hangers for individual distribution
  - Yard signs with simple messaging to be placed near work-sites
  - A simple tri-fold brochure with useful information about the utility and appropriate contact information
  - Specific flyers about a range of topics
  - Infographics about how the water system works, from the intake to the customer's site
- **Change in Billing Format** – The City currently has no real way to reach all customers on a regular basis and provide information. The city should consider changing from a billing postcard to using an envelope and bill stuffer Monthly or bi-monthly bill inserts are typically used to provide educational material for customers and are standard ways to provide information Understandably, budget considerations must be taken into account
- **Use Public Affairs Programming and Opportunities** – The news media has been covering this topic quite extensively – there are other media-related opportunities that may reach a wider audience Taking advantage of these opportunities will help the city relay information to its customers and the community
  - Participate in regular editorial-board meetings to provide background information and updates on key milestones or events
  - Identify a local weekly television program and offer to provide guests to speak about key milestones or upcoming events

Conclusions and Next Steps

The focus of this report is to help assure TTHM compliance and then improve general water quality The City had good results in its most recent TTHM tests, although that is to be expected with the changes made to date and the cooler weather which contributes to low TTHM formation Warm weather will be a different situation both in the nature of the Flint River water quality and in the formation of TTHM With those changes coming, the City needs to act quickly to make improvements before additional testing takes place this spring and summer The summary below provides the recommended actions, a priority for their implementation and projected costs either operational or capital The costs are rough orders of magnitude and will vary with changes in water quality, operational decisions, and engineering choices being made and in some cases require State approval Although a priority is assigned many of these actions can take place simultaneously

Priority	Action	Annual Operational Cost	One Time Capital Cost
1	Implement operating programs for process control, lab QA/QC, maintenance, and training These programs are needed regardless of the TTHM issue and will help with transition to lake water The City has decided upon a central maintenance software and the water system should be the first to utilize this program since costs are already budgeted These programs should be initiated immediately	$ 25,000	$ 250,000 - $ 350,000
2	Contract with your engineer and initiate discussions with the State on the reduction of chlorine prior to the filters and changing the filter media to GAC This activity has the longest time frame for design and approval, but also is extremely critical to assuring reduced TTHM production The current filter cleaning and maintenance project needs to be adjusted to take into consideration the change in filter media both to dispose of the anthracite instead of cleaning and to install the GAC This entire project needs to be done by early July to assure a flow of water throughout the system Several months are required for the engineering design, State approval, bidding of work and installation of GAC and as such needs to begin now	$ 0	$1,500,000
	Contract with your engineer and initiate discussions with the State on the addition of 0 5 to 1.2 mg/L of either potassium permanganate (dry) or sodium permanganate (liquid) This will take time to get approved and to implement The use of liquid tanks at the raw water pump station may be the quickest and least expensive alternative for a temporary measure	$ 160,000 - $ 320,000	$ 50,000

	Contract with your engineer and initiate discussions with the State on the addition of a corrosion control chemical. This action can be submitted and discussed with the state at the same time as the other chemical and filter changes saving time and effort. A target dosage of 0.5 mg/L phosphate is suggested for improved corrosion control	$ 50,000	$ 50,000
3	Increase the ferric chloride dosage to 100 mg/L depending on river water TOC levels. (Lower TOC levels can be treated with less ferric chloride.) This change can be made now and is allowed by the State	$ 1 000,000	$ 0
	Reduce the ozone feed rate to 5 mg/. This change can be done now and does not require State approval	($50,000 – $100,000	$ 0
	Reduce the lime dosage to minimize hardness levels after softening. This will eliminate magnesium removal during treatment, but will also reduce total hardness. A reduction in carbon dioxide dosing for recarbonation treatment also is expected due to the reduction in lime feed. This change can be made now and does not require State approval	($270,000)	$ 0
4	Confirm with the engineer when the revised hydraulic model will be completed and if necessary for time to focus on areas of longest water age if that would speed up the effort. Identify impact of reducing tank levels or eliminating a tank seasonally to improve water age. Include with this effort a list of hydrants to flush along with time required to assure drawing fresh water through the system. The engineer has been assigned this task already and confirmation of the timing of a delivery is needed	$ 0	Already Contracted
	Ask the engineer to identify closed valves on a map that are impacting water age and that can be bid for replacement as soon as weather permits. Have the engineer identify areas of the system where the valve contractor should be focused on finding and fixing closed valves	$ 0	Already Budgeted
5	Implement the recommendations in the communications program including a person assigned to public works education, using envelopes instead of cards along with bill stuffers for education and provide training for staff. Envelopes and bill stuffers are expensive and might be done periodically and not every month. The cost of TTHM notices, Annual Water Quality Reports and City notices should be figured into if any additional costs would exist. Many of these changes are underway now by the City	Position Being Budgeted	

Notes

- The costs provided are rough order of magnitude which final engineering will firm up but will fluctuate with final decisions on engineering, operating technique and water quality
- The change from river to lake water will dramatically cut the chemical costs as less is needed once the change occurs. This means that potassium permanganate will likely not be needed, ferric will drop as much as it went up. Ozone levels will be lower and little lime will be needed

Results Expected

The real question is what changes can be expected from these results in lowering the TTHM, improving the aesthetics and preparing for the change to lake water

- **TTHM** – The City has already made great strides in reducing the TTHM levels with the changes already made The additional suggestions by Veolia will further reduce TTHM in the water and help get the city released from the notices being provided to customers
- **Hardness** – The hardness entering the plant this winter is 360 mg/L with the current system reducing it to 210 mg/L and optimization will reduce to about 180 mg/L During the summer the levels will be lower probably in the 140 mg/L to 150 mg/L range The target set by the current best operating practices is 120 mg/L to 150 mg/L
- **Discolored Water** – The discolored water is caused by the old unlined cast iron pipe. The water from the plant can have an impact on discolored water, but a greater concern is the breaks and construction work that disrupt the flow of water causing discoloration A polyphosphate is suggested to help bind the old cast iron pipe reducing instances of discolored water This along with improve flow of water and programmed hydrant flushing will help, BUT WILL NOT eliminate discolored water occurrences
- **Change to Lake Water** – The recommendations include the suggestion of programs to help the staff better manage the treatment process, additional testing to adjust the plant and additional lab monitoring, a maintenance program focused on keeping equipment properly functioning and more training for staff to improve their skill level Those actions will prepare the staff for the change of water sources when it comes next year in addition to developing a thorough plan for the switch

MDEQ Testing of City of Flint Water Shows TTHM Levels are Well Below the Required Action Level, City No Longer in Violation

Flint, Michigan – September 3, 2015 – The City of Flint has made significant improvements to its water treatment process and distribution system. Annual average results show all locations are within acceptable limits for total trihalomethanes (TTHM) and work continues to ensure that the average stays below the acceptable level. Flint's TTHM levels have now been below the actionable level for four consecutive quarters, long enough to bring the City out of violation with the Safe Water Drinking Act.

Installation of the Granulated Activated Carbon filter mediums in July has had a significant impact on the reduction of total organic carbon (TOC) and is expected to continue to do so. TOC contact with chlorine can lead to the creation of the chemical byproduct trihalomethanes By reducing the amount of TOC in the treated water, the amount of TTHM in the water fell as a direct result.

"The City of Flint is continuing to improve its water system including both the areas of treatment and distribution," said Mayor Dayne Walling. "As the issue of trihalomethanes comes under control and the City is no longer in violation of safety standards, it will work with the MDEQ on implementing water optimization measures to reduce the corrosive effects of water on older pipes and home service lines." Older pipes and service lines can contain lead solder which can leach into the water over time.

–CONTINUE–

Dayne Walling
Mayor

Natasha L. Henderson
City Administrator

Flint has been looking at the water optimization option for some time and is now looking at taking accelerated steps toward implementation. According to the MDEQ, a typical water optimization plan can take up to five years to complete, as in the case of the Detroit Water and Sewerage Department. The City of Flint plans to have its water optimization measures in place by the beginning of 2016. This measure, combined with the ongoing improvements to the distribution system wherever possible, will improve water quality and extend the performance of the City's aging infrastructure.

"The City of Flint has been in constant communication with the MDEQ in our continuing efforts to upgrade and improve our water system," said Director of Public Works Howard Croft. "We have received assurances from them that every step we have taken has been in line with their recommended actions. The City will continue to work to ensure safe, quality water to its residents, businesses and visitors."

The City of Flint will continue to provide updates on its water progress through its website, cityofflint.com. Anyone with water issues is encouraged to call 810-766-7202 so that they can be addressed. Residents wishing to receive a free and independent in-home water test can call 810-787-6537 or email flintwater@cityofflint.com.

City of Flint Issues Lead Advisory

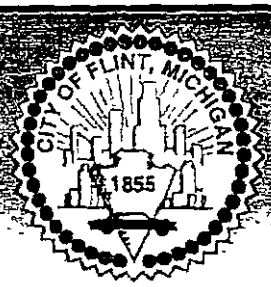
Flint, Michigan – September 25, 2015 – The City of Flint is issuing a Lead Advisory for residents to be aware of lead levels in drinking water after hearing concerns from the medical community. While the City is in full compliance with the Federal Safe Drinking Water Act, this information is being shared as part of a public awareness campaign to ensure that everyone takes note that no level of lead is considered safe.

The Genesee County Health Department has issued a fact sheet regarding lead precautions for residents. The fact sheet can be found on their website at www.gchd.us. Here are a few of the suggestions the Health Department recommends:

- Flush your cold-water pipes by running the water for approximately 5 minutes
- Use only water from the cold-water tap for drinking, cooking, and especially for making baby formula.
- Install a water filter that is NSF-certified for lead removal.

Lead contamination can leach into water from a home's lead water service lines, lead solder, and leaded plumbing materials including fixtures, faucets, and fittings. Older service lines with pipes and fixtures installed before 1986 can sometimes be more susceptible to lead issues due to materials used in the home such as lead based paint and lead pipes.

This message is meant as a precaution to residents and does not mean that all homes in the City will experience the same issue. Residents with concerns about lead service lines



and lead in home plumbing fixtures are encouraged to contact the City's Utilities Division to schedule a free water testing by calling the Water Treatment Plant at 810-787-6537 and pressing #1 after prompted or by emailing flintwater@cityofflint.com.

The City of Flint is working proactively along with the County Health Department, the Michigan Department of Environmental Quality, and the U.S. Environmental Protection Agency to improve the water system throughout the City. An accelerated plan to add a corrosion control agent to our water within 30 to 60 days with expedited approval from the Michigan Department of Environmental Quality is already underway. This will reduce corrosion which can cause lead in old pipes to leach into the water.

This plan is in addition to Mayor Walling's letter requesting $30 Million in water infrastructure assistance funding from the State of Michigan. $10 Million of that request would be for the replacement of lead service lines in households to ensure that lead no longer presents a danger to the drinking water of our residents. As the letter states, "It is the City's position that the abatement of lead through the removal of lead containing pipes and fixtures in homes is the best long term solution to keeping our residents' water safe."

Mayor Walling further stated: "I am extremely concerned about the risks around lead with Flint's children and I will be working tirelessly to ensure the water is safe and all of our families have the information they need. I also will continue to pursue funding for infrastructure improvements and a comprehensive healthy homes initiative that addresses lead in paint and pipes. We have to get the lead out of our community to eliminate the threat of childhood lead poisoning."

The City of Flint continues working proactively with the County Health Department, the Michigan Department of Environmental Quality, and the U.S. Environmental Protection Agency to improve the water system throughout the City. The City remains committed to working with all of our partners in the Water Technical Advisory Committee to address all

issues of public health and quality concerns that face the community. Updates on progress made in addressing this issue will be made during regular public meetings including City Council and other scheduled meetings. Information on this and all related matters will continue to be posted on the City of Flint's website, cityofflint.com.

Gary K. Johnson, M.D , M P H , Medical Director

How does lead get into my tap water?

Under typical circumstances, lead will dissolve into the water. The concentration of lead in drinking water can vary greatly, depending on the corrosiveness of the water, the type and age of the plumbing materials and the length of time that the water stands in the pipes. The highest levels of lead occur when very corrosive water stands motionless in lead or lead soldered pipe for long periods of time

How do I know if my tap water is contaminated with lead?

The only way to know whether your tap water contains lead is to have it tested. You cannot see, taste, or smell lead in drinking water. There are different sampling methods for sampling lead in drinking water. To determine your household risk, it is recommended to take a first draw sample.

Does lead in my tap water cause health effects?

Lead can cause damage to the brain, red blood cells and kidneys. The greatest risk is to young children and pregnant women. Amounts of lead that won't hurt adults can slow down normal mental and physical development of growing bodies. Lead in water can be a special problem for infants, whose diets may be mostly liquids, such as baby formulas or concentrated juices mixed with water. Smaller bodies can absorb lead more rapidly than bigger ones. A child's mental and physical growth can be permanently harmed by too much lead. Risk will vary, depending on the individual, the circumstances, and the amount of water consumed.

What can I do to reduce or eliminate lead in my tap water?

Flush your cold-water pipes by running the water for approximately 5 minutes. The longer the water has been sitting in the pipes, the more lead it may contain. You can fill containers for later use, after the flushing process. Use only water from the cold-water tap for drinking, cooking, and especially for making baby formula Hot water is likely to contain higher levels because it dissolves more lead.
You may choose to install a water filter that is NSF-certified for lead removal. If a water filter is installed, replace filters at least as often as recommended by the manufacturer.

Buy a lead-free faucet. The legal definition of "lead-free" still allows brass faucets to contain up to 8 percent lead. However, faucets marked with "NSF 61/9" and/or "California Proposition 65" meet stricter limits. Regularly clean particles from faucet aerators.

Is it safe to take a bath or shower, if my water has high lead levels?

Yes. Bathing and showering should be safe for you and your children, even if the water contains lead over EPA's action level. Human skin does not absorb lead in water. This information applies to most situations and to a large majority of the population, but individual circumstances may vary. Some situations, such as cases involving highly corrosive water, may require additional recommendations or more stringent actions.

Who do I contact for more information?

The local water authority is always your first source for testing and identifying lead contamination in your tap water. You can visit the City of Flint Website at www.cityofflint.com or contact the Flint Water Department at 810-787-6537.

City of Flint Reconnects to Detroit Water

Flint, Michigan – October 16, 2015 – Flint has reconnected to Detroit water. reached an agreement with the Detroit Water and Sewerage Department (DWSD) for the temporary provision of treated Lake Huron water to Flint. Work to establish the reconnection will begin immediately in a coordinated effort between the City of Flint, Genesee County and the DWSD.

A tremendous effort by all three partners, along with the efforts of the Governor and the State Legislature, ensured that this action occurred as quickly as possible. "The money from the state to begin fixing Flint water by reconnecting to Detroit is just a start – a down payment,' said Mayor Dayne Walling. "I am not going to stop until every drop of drinking water in Flint is 100% safe."

Detroit water will be introduced into the Flint system throughout the evening. It is expected that the thorough replacement from Flint River water to Detroit water will happen after approximately three weeks. Residents in Flint may see discoloration as well as noticing some taste and odor issues during the transition

Water provided by DWSD will contain corrosion control agents to hinder the leaching of lead from old pipes into the water; however, the City will also be adding additional corrosion control agents to further minimize the risk presented by lead pipes.

–CONTINUE–

Dayne Walling
Mayor

Natasha L. Henderson
City Administrator

The contract between the City and DWSD calls for the provision of 12.5 million gallons per day (mgd) of treated water from Lake Huron at a cost of $1.1 million per month. DWSD Director Sue McCormick noted that the talks between Flint, DWSD and the GLWA Board were very cordial: "everyone acted in a spirt of cooperation in order to come to this agreement." Flint will purchase water from Detroit until the Karegnondi Water Authority (KWA) pipeline can be completed in 2016. At that time, the KWA will become the primary water source for the City and the Flint River will remain as a backup system.

Residents with questions or concerns about the hydrant flushing in their area can call the Water Service Center at 810-766-7202. Continuing information on water will be provided via the City of Flint's website, cityofflint.com.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGIONAL ADMINISTRATOR
77 WEST JACKSON BOULEVARD
CHICAGO, IL 60604-3590

REPLY TO THE ATTENTION OF:

MEMORANDUM

DATE: November 4, 2015

SUBJECT: Transmittal of Final Report - High Lead at Three Residences in Flint, Michigan

FROM: Tinka G. Hyde
Water Division Director

TO: Jim Sygo
Deputy Director
Michigan Department of Environmental Quality

Howard Croft
Director of Flint Public Works

Enclosed please find for your file a final redacted version of a report prepared by EPA Scientist, Miguel Del Toral, regarding lead in drinking water at three residences in Flint, Michigan. The redactions remove personally identifiable and medical information. This report has been finalized and is also being provided to the National Drinking Water Advisory Council (NDWAC) for discussion during their upcoming meeting on November 17-19, 2015. We understand you saw an earlier version of this document; and note that most of the recommendations in that interim report are already being implemented (e.g., the City of Flint has switched back to Detroit water; filters have been provided to residents; and additional corrosion control treatment will be implemented).

The final report contains important new information indicating that physical disturbances of lead service lines can dislodge the protective coating that prevents lead from leaching into drinking water. The final report recommends notifying residents about the potential risks of increased lead levels in drinking water when work is undertaken that may disturb lead service lines.

High Lead Levels in Flint, Michigan

The purpose of this report is to present the findings of activities conducted in response to high lead levels in drinking water reported to the United States Environmental Protection Agency Region 5 Office (EPA) by a resident in the City of Flint, Michigan.

Background Information

Prior to April 30, 2014, the City of Flint purchased water from the City of Detroit. On April 30, 2014, the City of Flint switched from utilizing purchased water from Detroit to a new water source, the Flint River. Subsequent to the change in source water, the City of Flint experienced a number of water quality issues resulting in violations of National Primary Drinking Water Regulations (NPDWR) including acute and non-acute Coliform Maximum Contaminant Level (MCL) violations and Total Trihalomethanes (TTHM) MCL violations (see Appendix A).

Beginning in January 2015, [redacted], a resident of Flint, called the Flint Water Department (FWD) regarding the water quality in her home. In response to the initial and subsequent calls, the FWD visited the [redacted] home on a number of occasions and also collected tap water samples. [redacted] also contacted EPA regarding these same water quality issues and medical issues she believes are associated with the water quality in Flint.

Following initial calls on the general water quality, on February 26, 2015, [redacted] contacted EPA regarding high lead levels found in her drinking water by the City of Flint. The result of the initial lead in water sample collected by the City of Flint on February 18, 2015 from the [redacted] home was 104 µg/L and the level of iron in the water exceeded the capability of the instrument to measure (>3.3 mg/L). On February 26, 2015, upon receiving the lead results from [redacted], the EPA contacted the Michigan Department of Environmental Quality (MDEQ) regarding the high lead result. The MDEQ advised that the City of Flint collect a follow-up sample for lead at the [redacted] home.

On March 3, 2015, the City of Flint collected a follow-up sample for lead at the [redacted] residence and the result of this second sample was 397 µg/L[1]. Subsequent to receiving her second result, EPA spoke to [redacted] via phone on March 19, 2015, and the following information was provided by [redacted]:

- The [redacted] home is a HUD home which was gutted and renovated in 2011. All existing plumbing had been removed and the [redacted] installed plastic plumbing.
- Due to high iron levels in the tap water, the [redacted] installed an iron filter downstream of the service line inlet into the home.
- [redacted] indicated that at this time they are not drinking the water or using it for cooking. She stated that her child's blood lead level (BLL) was originally at [redacted] in 2012 and that a more recent test showed it had increased to [redacted], but she noted that

[1] *Note: A third water sample had been collected on April 2, 2015, but the results had not been provided to the [redacted] at the time the interim report was written. The third lead in water sample result was 707 µg/L*

the BLL testing was done well after the child had stopped drinking the water and may have been higher during the time the child was consuming the water.

- Water samples collected by the City of Flint from her home were collected from the kitchen tap after the iron filter was physically removed.
- The Flint Water Department (FWD) informed [redacted] that her service line does not connect to the water main in front of her home as is typically the case for most homes.
- On March 18, 2015, City of Flint personnel went to the [redacted] home to locate the external shut-off valve in conjunction with the planned replacement of the [redacted] service line and were unsuccessful. Eventually it was discovered that the external shut-off valve was located at the corner of [redacted] and Bryant Street, two houses down from the [redacted] home.

As part of EPA's effort to respond to [redacted] concerns regarding her water results, EPA contacted the FWD. The following information was provided to EPA by the FWD:

- [redacted] home is one of the first homes built on the block and the service line runs for approximately 50-60 yards, connecting to the water main on Bryant Street which runs perpendicular to [redacted] (see Appendix A).
- Flint has a large number of lead service lines, so it would not be surprising to find that this is a very long lead line.
- The first sample from the [redacted] home was collected with the iron filter in place, and the second was with the iron filter physically removed. The iron filter was located just after the water meter.
- [redacted] showed FWD a video of her son 10 minutes after taking a bath, and that he had a full body rash in the video.

It was a common practice in the early 1900s to purchase large parcels of land and later subdivide them. Since service lines are typically run from the water main to the nearest location on a property and it is possible that the [redacted] home may have originally been part of a larger parcel of land that encompassed the two homes that now exist adjacent to the [redacted] home and was subsequently divided, leaving the original home connected to the same service connection and water main, while the newer homes were connected to a more recent water main installed along [redacted].

Based on a suspected conflict of interest at the healthcare facility that originally tested her son's BLL, [redacted] took her son to a different healthcare facility to have his blood lead tested again. On April 1, 2015, [redacted] provided EPA with a copy of her child's blood lead testing performed on March 27, 2015, showing a higher BLL ([redacted]) than the original test.

Due to the persistently high lead results, the FWD shut off the water service to the [redacted] home on April 3, 2015. Per agreement between the FWD and [redacted], her home was then connected to her neighbor's home via a garden hose, from one hose bib to another. This was understood to be a temporary measure until the [redacted] service line could be replaced. The [redacted] used this water connection only for bathing, washing dishes and washing clothes.

At the invitation of [redacted], EPA visited the [redacted] home on April 27, 2015, and reviewed the internal plumbing and information provided by [redacted], including water samples and spent filter cartridges. During this visit, EPA observed that the internal pipes, valves and connectors at the [redacted] residence were made of CPVC plastic, approved by NSF for potable drinking water applications, with a few minor metal connectors. A review of the treatment units in the home by EPA found that there was no iron filter in the home as had previously been thought. The only active treatment device in the home was a whole-home sediment filter which utilizes NSF certified Whirlpool WHKF-WHWC cartridge filters for sediment removal and taste/odor. There was also a non-functioning 'Water Resources International Hydro-Quad Commercial Water Processor' which was bypassed (see Appendix A).

At the request of [redacted], Dr. Marc Edwards at Virginia Tech provided sampling instructions to [redacted] for collecting a series of samples from her home. As part of the instructions, on the night of April 27, 2015, the water at the [redacted] residence was turned back on temporarily and the kitchen tap was flushed for 25 minutes at low flow prior to letting the water sit overnight. A series of sequential samples were collected the following morning (April 28, 2015) and sent to Dr. Edwards for analysis.

Dr. Edwards provided [redacted] with the results of the analyses and also shared the results with EPA on May 5, 2015, along with information regarding other chemical parameters tested (see Appendix B). In addition to very high lead levels in all sample results, the analytical data shows a correlation between lead and phosphate as well as lead and aluminum in all samples. On April 24, 2015, EPA had learned that Flint did not have corrosion control treatment in place and also learned that Flint was using ferric chloride as a coagulant. Consequently, as the City of Flint is not utilizing phosphate or alum as treatment chemicals since the source switch, the results indicate that it is likely that the phosphate and aluminum were being released from the scale within the distribution system network. This scale would have formed on the inside of the pipes in Flint during the time when the City was purchasing water from Detroit, as Detroit utilizes orthophosphate for corrosion control and alum as a coagulant in their water filtration process.

Research conducted by EPA on lead content in pipe scales has shown that scales which form on the inside of lead pipes can be released or dislodged into the water and may contain a high percentage of lead (Appendix C). Although the results received from Virginia Tech were indicative of the presence of a lead service line, the FWD indicated that no records existed to confirm whether any portion of the service line connecting to the [redacted] home was made of lead. However, given the high lead levels found, it was presumed that at least a portion of the service line was likely made of lead. In the course of following up on the high lead at the [redacted] home, additional sample results provided to EPA from other residences in Flint also showed high lead levels.

Primarily from a public health standpoint, but also from a research standpoint, it was important to try to find out what the cause of these very high lead levels might be. EPA Region 5, EPA's Office of Research and Development and others have been working

together collaboratively to better understand lead release mechanisms from lead service lines in anticipation of upcoming revisions to the Lead and Copper Rule (LCR) and as part of a collaborative effort in EPA Region 5 to study potential options for optimizing phosphate treatment to control lead in water and the need to reduce phosphorus discharges into the environment. Since the [redacted] service line was scheduled for replacement on May 6, 2015 and the presumption was that at least a portion of the service line was lead, EPA visited the [redacted] home on the day of the service line replacement to gather information and service line pipe samples that could provide additional information as to how lead levels could get as high as they did in this case.

The original service line to the [redacted] home was disconnected and two service line pipe segments from this service line were extracted on May 6, 2015. Additional tap water samples were collected also from two homes on Bryant Street that were connected to the same water main as the [redacted] home (Appendix A). The samples were collected from these homes as they had more typical service line lengths as compared with the [redacted] home. During the same visit, patches of asphalt were also noted along the curb on Browning Avenue, indicating that excavation had occurred. These patches, which were in proximity of the [redacted] service line in the parkway (see Appendix C) may be one of the potential factors contributing to the high lead at the [redacted] home, as it has been shown that physical disturbances to pipes can dislodge the scales within those pipes.

The two service line segments that were extracted were subsequently identified as galvanized iron pipe. Analyses conducted by Virginia Tech on the extracted portions of the pipe indicate that the galvanized iron pipe was fairly typical in terms of composition (see Appendix C). The galvanized iron portion ran from inside the [redacted] home to the external shut-off valve at the corner of [redacted] and Bryant Street. The remainder of the [redacted] original service line from the shut-off valve to the water was made of lead.

Although the service line had been disconnected from the [redacted] home, it was not possible to retrieve a segment of the lead portion of the service line as it was beyond the shut-off valve which had been closed and left in place. Following the disconnection of the original service line, a new service line made of copper was installed from the [redacted] home to the water main in front of the home on [redacted]. Subsequent to the replacement of the service line at the [redacted] home, water samples were also collected from the [redacted] home and sent to the EPA Chicago Regional Laboratory for analysis. In all three homes, the sequential samples were collected using standard protocols used in prior sequential sampling efforts to capture water samples reflecting lead levels from the kitchen tap to the water main. Two additional samples were collected from the water heater drain valve at the [redacted] home to determine if lead deposits had accumulated in the water heater, and a final sample was collected from the bathroom tap. The sequential sampling results indicate that the service line replacement eliminated the high lead levels and that no residual lead had accumulated within the plastic plumbing of the [redacted] residence, which was a potential concern and possibility based on prior research. One of the two samples collected from the [redacted] hot water heater had high lead (32 µg/L), likely from lead particulate that had accumulated in the tank, and the sample collected from the bathroom was 5.5 µg/L.

The sequential samples collected from the two homes on Bryant Street had differing results. At the first home (Site 2), a series of 15 sequential one-liter samples were collected and the results are indicative of a service line that does not contain any portion that is made of lead. Consequently the lead results were low overall for samples representative of the service line. The first sample in the sequential sampling series was the highest, which potentially indicates the presence of leaded brass in the faucet or underlying sink fixtures. Some leaded brasses manufactured prior to the 2011 lead-free law have been shown to release high levels of lead in certain water qualities. Leaded-solder was ruled out as the home plumbing consisted of galvanized iron pipe, and it is presumed that if the galvanized iron pipe were contributing the higher lead, the lead levels would be more consistent in all 15 samples.

At the second home (Site 3), a series of 15 sequential one-liter samples were collected from the kitchen tap and the results indicated that there were no significant sources of lead within the home plumbing but that a portion of the service line is likely made of lead, as indicated by the characteristic peaking of lead levels in the liters capturing water from the service line between the property and the water main, where the portions of many service lines in Flint are made of lead.

All three sets of sequential samples were analyzed for lead, copper, iron, phosphorus and cadmium. In contrast to the samples analyzed by Virginia Tech from the [redacted] home prior to the removal of the original service line, no phosphorus was present in the sequential samples at the [redacted] home following the replacement of the service line. In addition, no phosphorus was detected in the sequential samples from the two homes on Bryant Street. These results indicate that the source of high lead, aluminum and phosphorus in the analyses conducted by Virginia Tech was likely dislodged or disintegrated scale from within the [redacted] original service line.

The sequential sampling results from the [redacted] home before and after service line replacement, as well as the results from the two homes on Bryant Street are included in Appendix B.

Although relative contributions cannot be determined, there are a number of factors that could have contributed to the high lead levels found at the [redacted] home as follows:

1) Corrosiveness of water and lack of mitigating (corrosion control) treatment

The corrosiveness of the water and the absence of mitigative treatment to control lead release are well known factors that can contribute to high lead release.

2) Presence of a lead service line

Lead service lines are the largest source of lead, when present, and can contribute up to 75 percent of the total mass of lead released into the water. The portion of the original service line from the water main to the external shut-off valve at the corner of [redacted] and Bryant Street, estimated to be approximately 25 feet in length, was found to be a lead

pipe. In addition, studies have also shown that the scales within galvanized iron pipe downstream of lead pipe segments can be 'seeded' with lead from the lead portion of the service line. The [redacted] service line was much longer than most typical service lines which would allow accumulation of a greater total mass of scale within the pipe.

3) Physical disturbances

A recent EPA study indicates that physical disturbances in proximity to lead service lines can cause the dislodging of the protective scales from within the service lines. The photograph in Appendix C shows the scale that was dislodged from inside a lead service line during routine maintenance work in another city due to a physical disturbance of the line. The dislodged scale and sediment contained a very high concentration of lead. At the time of the EPA visit to the [redacted] home, there were two patches of new asphalt visible on [redacted] along the parkway where the [redacted] original service line was located, indicating recent excavation and possible recent physical disturbances to the [redacted] service line (Appendix C). These potential disturbances were along the galvanized iron section of the service line and as noted above, research has shown that the presence of lead pipe upstream can 'seed' the galvanized iron pipe downstream with lead, which results in an accumulation of lead-bearing scales within the galvanized pipe downstream of the lead portion of the service line. It is reasonable to assume that these physical disturbances to the galvanized iron portion of the service line could therefore result in the same dislodging of scale and sediment as studies have shown can happen with lead service lines.

The street disturbances on [redacted] occurred after the [redacted] moved into the home along the portion of the service line made of galvanized iron pipe. There were no visible signs of disturbance on Bryant Street where the lead portion of the [redacted] service line was situated (see Appendix C). It is likely, given the extremely high lead levels found and the co-occurrence of aluminum, phosphorus and lead, that the long segment of galvanized iron pipe was seeded with lead over the entire length of the pipe and the physical disturbances and other factors such as the water chemistry resulted in the release of large amounts of the high-lead bearing scale and sediment into the water. Virginia Tech also found nearly perfect correlations between the lead in water and markers for galvanized pipe scales including zinc.

Recommendations

As indicated by the results from the [redacted] home and previous EPA work, the presence of lead pipes over many years has likely resulted in the accumulation of lead in the scales within non-lead pipes downstream of the lead pipe and physical disturbances to the leaded or non-leaded portions of the service lines have the potential to release large amounts of scale and sediment that could pose an immediate and acute health hazard to the residents. Consequently, even with corrosion control treatment in place in the future, physical disturbances will be capable of dislodging the high lead-bearing scale and sediment from non-lead pipes as well as lead pipes, as was the case in the earlier EPA study.

Obtaining information on the lead reservoirs in the scales within the lead and non-leaded portions of intact service lines is essential for determining the potential risk to residents

from lead-bearing scale released as lead lines are replaced as well as the risk that may remain following removal of the lead lines, where the non-leaded portions of service lines are left in place.

As the [redacted] service line was very long compared to the length of most typical service lines, it is important to assess the potential risk posed by the scale reservoirs in more typical lengths of service lines by extracting both the leaded and non-leaded portions of service lines which have not been physically disturbed. The service lines chosen for extraction and analysis should be representative of the materials commonly used downstream of the lead pipe (e.g., galvanized iron, copper, plastic). Extraction/handling procedures should be developed by EPA to ensure that damage to the scales from the excavation, extraction and delivery of the service line segments is minimized. Sequential sampling should also be conducted on a representative group of homes with common plumbing materials (e.g., galvanized iron, copper, plastic) to determine the extent to which the lead from the service line has seeded the interior plumbing in homes.

It is also critically important to develop and incorporate ongoing training and public education on the potential for high lead release from the scales as a result of any future physical disturbances to service lines and mitigative actions that residents can take to lower their exposure risk. The training and educational material should be assessed for clarity, meaningfulness, and accessibility by a group of residents and health experts to ensure the effectiveness of the communications.

At a minimum, immediate training and public education on the potential risks posed by physical disturbances to service lines should be developed by communications experts and provided to residents, community groups, elected officials, health departments, pediatricians and gynecologists, water and non-water utilities (gas, electric, cable, etc.), plumbing organizations and contractors. Residents should be notified of scheduled work by water and non-water utilities and informed of the potential risk of increased lead levels due to these disturbances.

Appendix A – Background Information

National Primary Drinking Water Regulations (NPDWR) Violations – City of Flint

Following the switch to the Flint River, the City of Flint experienced a series of NPDWR violations as follows:
Acute Coliform MCL violation in August 2014
Monthly Coliform MCL violation in August 2014
Monthly Coliform MCL violation in September 2014
Average TTHM MCL violation in December 2014
Average TTHM MCL violation in March 2015
Average TTHM MCL violation in June 2015

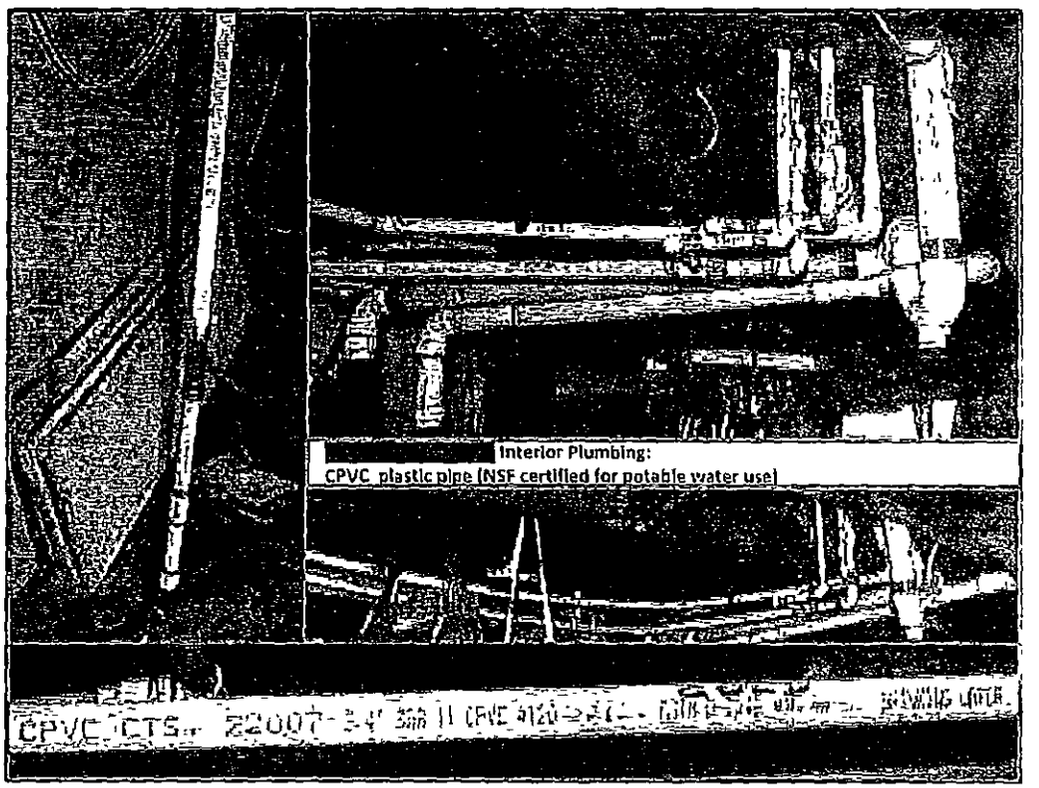
Sampling Sites

The map below shows the three homes that were sampled as provides information on the length of the service lines and the plumbing material. Two portions of the original service line were extracted and analyzed and a third portion was collected from the entry point into the home, but not analyzed.

[map redacted because it shows Personally Identifiable Information]

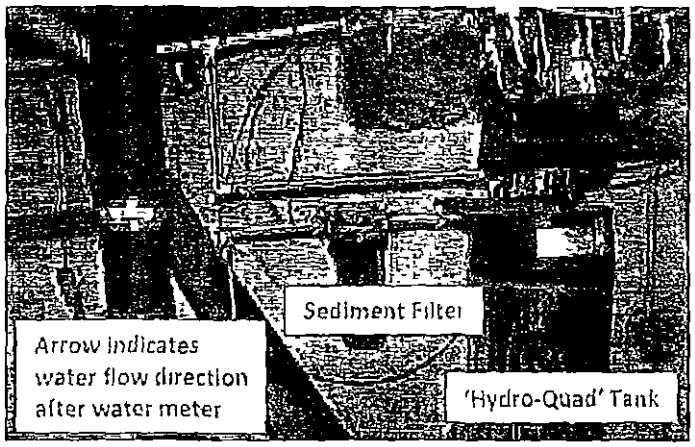
Internal Plumbing – [redacted]

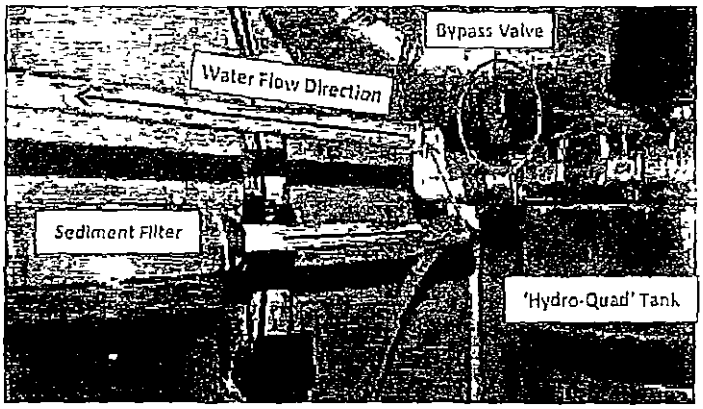
The following pictures were taken at the [redacted] home located at [redacted]. With the exception of a a few minor metallic connectors, all potable water plumbing in the home was found to be CPVC plastic pipe which is NSF-certified for drinking water use.

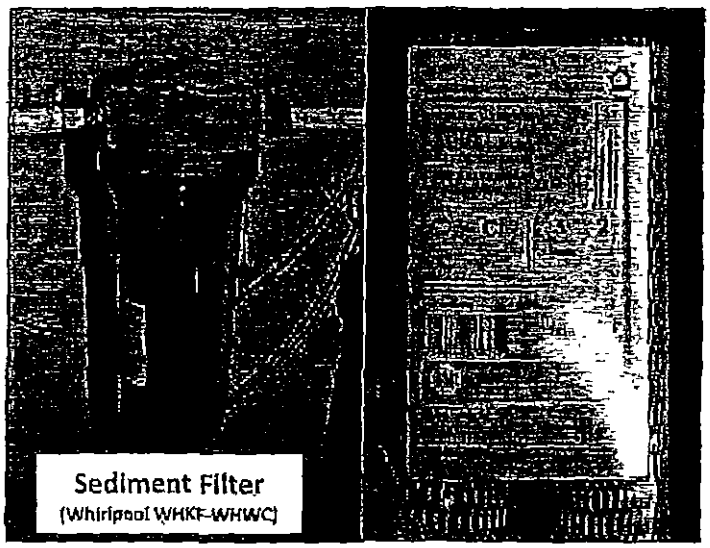


Treatment Units – [redacted]

The [redacted] home has a whole-home sediment filter, as well a non-functioning 'Hydro-Quad Commercial Water Processor' which is bypassed. There was no iron filter in the home as had been previously reported.







Appendix B – Analytical Results

Lead in water sampling results from the [redacted] residence ([redacted])

City of Flint Samples

The City of Flint collected water samples from the [redacted] residence and analyzed them for lead. The results for each date are listed below.
February 18, 2015: 104 µg/L
March 3, 2015: 397 µg/L
April 2, 2015: 707 µg/L*

*This sample result had not been provided to the [redacted] at the time the interim report was written.

Virginia Tech Sampling Results (provided courtesy of Virginia Tech)

Samples were collected from the [redacted] home following an extended stagnation period (April 3, 2015 to April 27, 2014) after the water at the [redacted] residence had been shut off. The water was turned back on and three sets of sequential samples were collected on April 28, 2015, at different flow rates (low, medium and high).

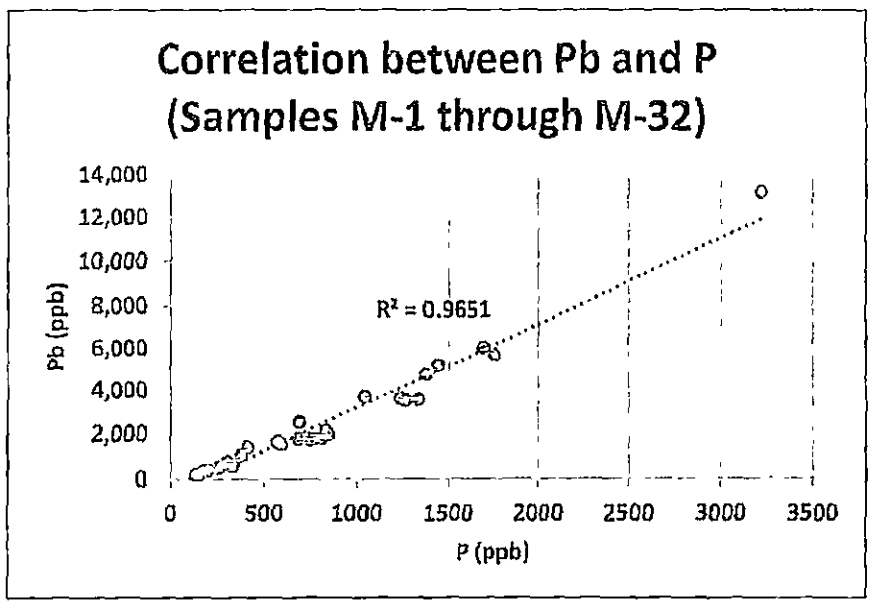
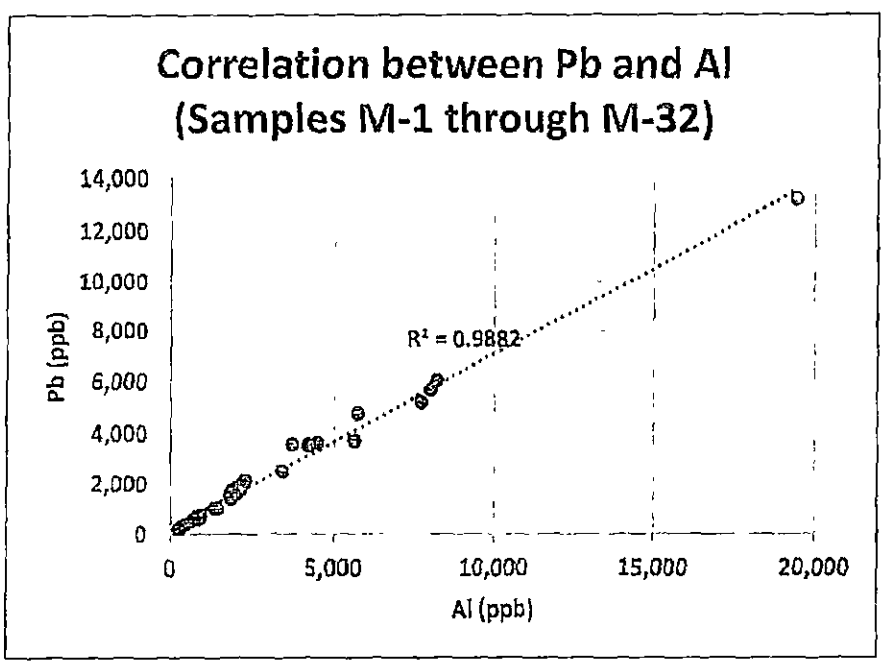
Correlation between lead, phosphorus and aluminum

The correlation of lead and phosphate, as well as lead and aluminum, indicate that the samples were captured scale and sediment that had formed inside the pipes while the City of Flint was purchasing water from Detroit. The absence of these chemicals in the current treatment provided by Flint indicate that these elements were not in the water passing through the pipes, but came from the scales inside the service line which had disintegrated into the water or were dislodged into the water.

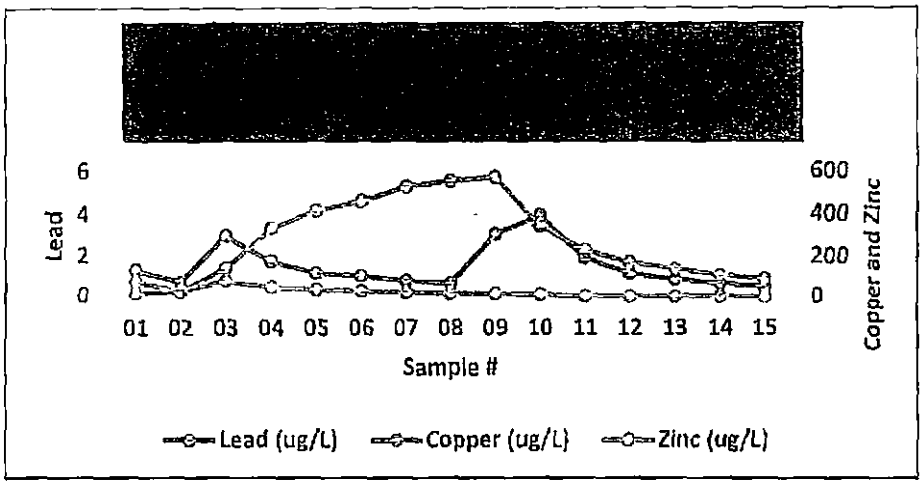




U.S. EPA Region 5 sampling

[redacted] residence (following replacement of service line)

Following the replacement of the [redacted] original service line, a series of 15 sequential samples were collected from the kitchen tap to measure the lead levels and other parameters to ensure that the high lead from the original service line had not contaminated the interior plumbing at the [redacted] home. With the exception of two areas, lead levels were low throughout the [redacted] plumbing following the service line replacement. The two sources of lead that were still detected in the plumbing are likely the water meter (Sample 3) and the new external service shut-off valve (Samples 9-11). Although new brass plumbing components must be lead-free, there can still be some lead that is released from these components.



[redacted]. ([redacted] home)

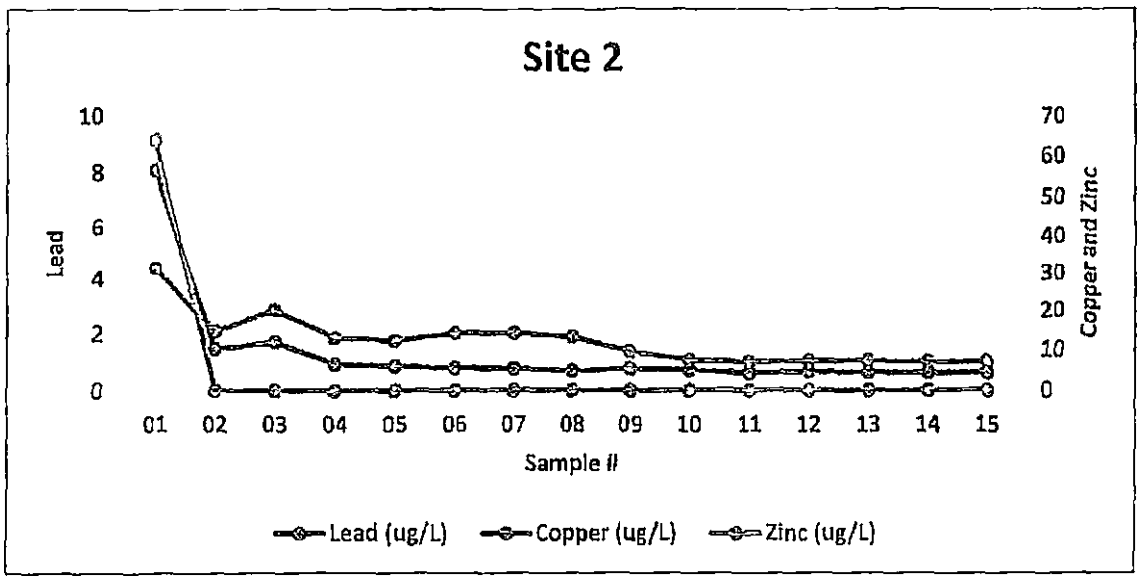
Site #2 (Bryant Street)

Based on the results found at this home, it does not appear that any portion of the service line is made of lead, and as a result, the lead levels are low in most samples. The exception is in Sample 1 which reflects water within approximately 15 feet of the kitchen tap and is likely due to brass components in the faucet, underlying valves and fixtures.



Site 2

(Note: U for Zinc replaced with 0 to show on graph)

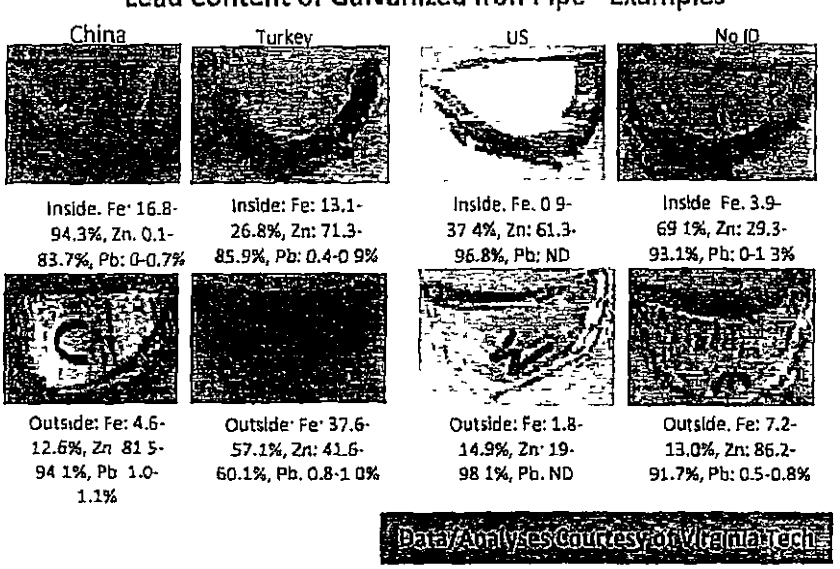
Analysis of [redacted] original service line pipe (galvanized iron portions)

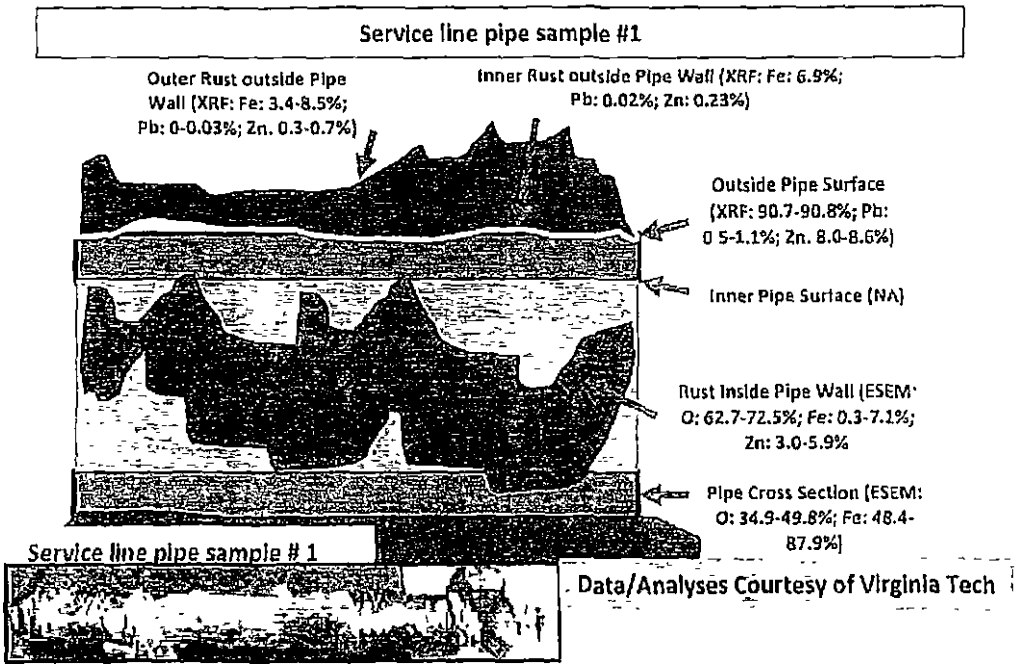
Lead can also be found in galvanized pipe coatings as a contaminant in the zinc that is used to coat the surface of iron pipe in the galvanizing process. As such, two sections of the [redacted] original service line were analyzed for lead content.

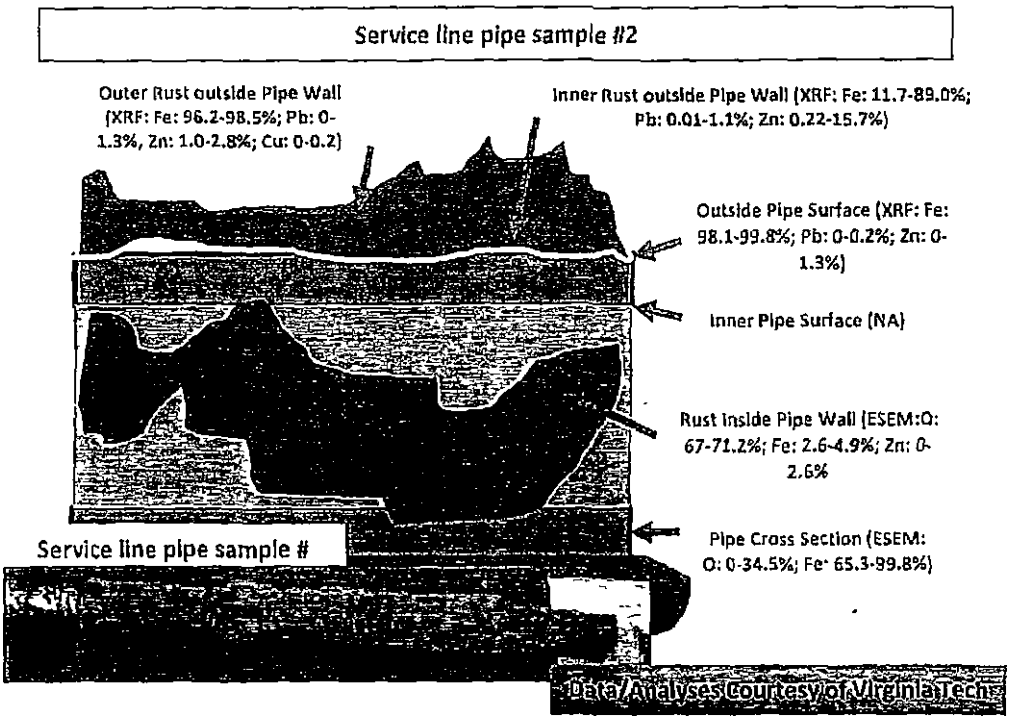
The images and data presented below are for a typical range of galvanized iron pipe.

Lead Content of Galvanized Iron Pipe - Examples



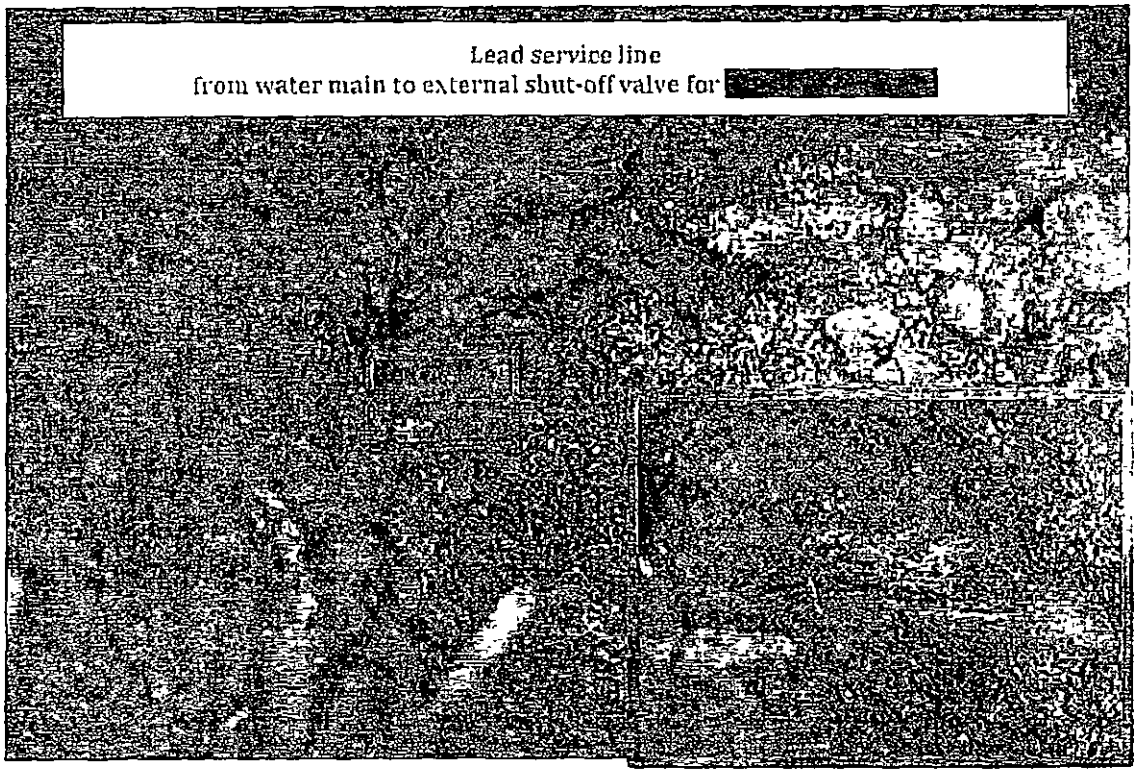
Below are the results of the galvanized pipe analyses conducted by Virginia Tech on the two sections of galvanized iron pipe from the [redacted] original service line. The analyses indicate that the [redacted] original service line was a typical galvanized iron pipe.





Lead portion of the [redacted] original service line

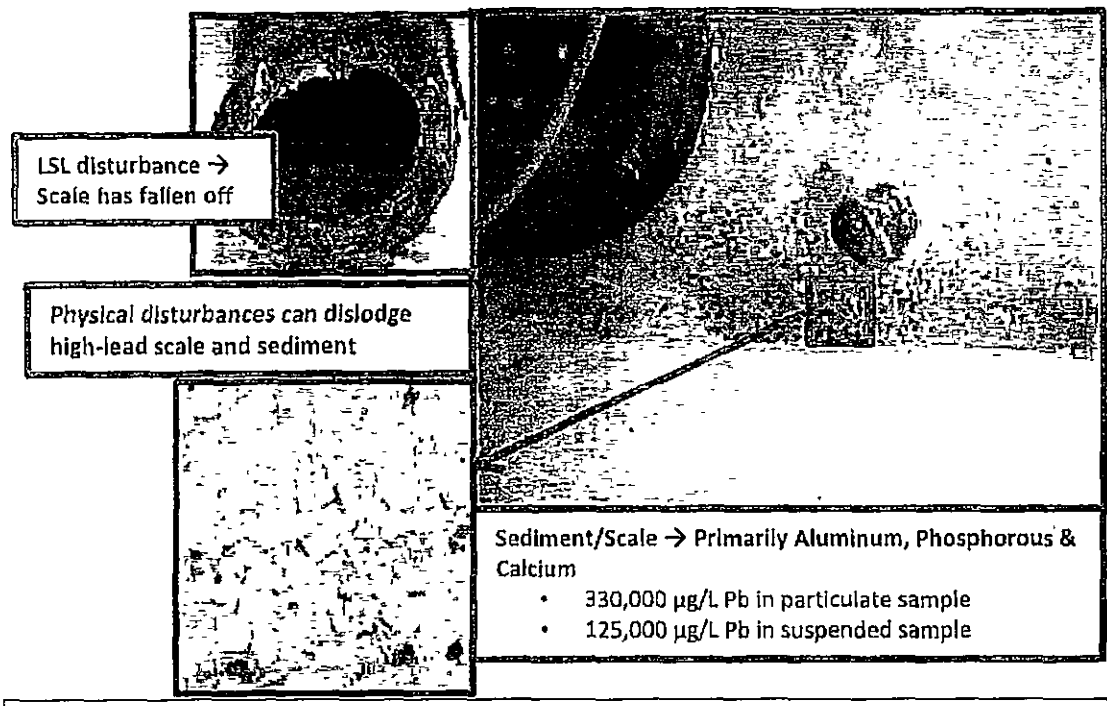
Lead service lines can contribute up to 75 percent of the total mass release into the water. The portion of the [redacted] original service line from the water main to the external shut-off valve at the corner of [redacted] and Bryant Street is made of lead and is estimated to be approximately 25 feet in length.



Appendix C – Additional Information

Physical disturbance of lead service lines

A recent EPA study indicates that physical disturbances to lead service lines or in proximity to lead service lines can cause the dislodging of the protective scales from within the lines. The photograph below shows the scale that was dislodged from inside a lead service line during routine maintenance work in another city due to a physical disturbance of the line. The dislodged scale and sediment contained a very high concentration of lead.



Lead service line disturbances were found to be a common factor for the majority of sites with high lead levels. It is also possible that low water usage may play a role in sites with the highest lead levels.

Lead service line scale analyses conducted by EPA's Office of Research and Development or obtained from peer-reviewed published literature from cities across the U.S. and in Canada (summarized below) show that scales within lead service lines can contain very high concentrations of lead. The yellow highlighted column in the table below shows the percentage of lead that has been found within different scales inside of lead service lines.

Lead & Element Percentages in Important Corrosion Byproduct Solids

Mineral Name	Formula	% Pb	%C	%O	%S	% P	%Cl
litharge, massicot	PbO	97.80	0.00	7.20	0.00	0.00	
plattnerite, scrutinyite	PbO_2	86.60	0.00	13.40	0.00	0.00

Weekly Critical Issues —October 1, 2015

- **Allen Park**— City Council has appointed Mark Kibby as City Administrator. We have several names for serving on the RTAB that are getting vetted by the Governor's Office. A discussion list will be prepared as to where each could serve. The tender offer has been extended, at this time, approximately 30% of bondholders have agreed.
- **Benton Harbor**-The lawsuit with the former Public Safety Director and two former employees is a major issue for the City. Darwin has indicated that it will cost the City $1.7M to settle these three cases. They are only partially insured. I have advised Darwin to seek the City Commission's approval for the Finance Director's Search. The cost is $10,000 for the MML Proposal. If approved, it won't begin until late October. The Assistant City Manager position will be reduced to part-time due to commuting distance. A job posting for this position has been advertised.
- **Ecorse** –they received and filed the Memo from Treasury. The City indicated that if they were to agree to have River Rouge provide fire protection or if they were to go to a paid part-time department the pension liability costs would spike. Their five year financial plan will need to be reviewed once again. We need to determine who will serve on the RTAB position after Joyce leaves.
- **Flint** – Lawsuit on water rates and the lead issues have Flint in a crisis mode. The media was reporting that the Finance Director indicated is projecting that the Water and Sewer Fund will have a $14M deficit at year end. I have asked for a copy of the budget report and a copy of the cash flow analysis. Natasha has sent me a revised cost from Miller Canfield to represent the City in the Shears and Kincaid cases. Treasury is determining the level of support, if any, to provide the City in this matter. I informed Natasha this morning that the legal representation is still being "discussed".
- **Hamtramck**-We have several names for the RTAB position to replace Cathy. Segal will develop a work plan for phase 3 of the pension study. The City has hired Alan Young for audit services but that decision was rejected by the RTAB. Katrina wants to reorganize staff. Overtime last month was $60K, we are asking her to get quotes for a police study. Treasury will pay $25,000 for the study. Eric and I will be meeting with individual members of the City Council in October.
- **Highland Park**-The City hired a collection firm to collect the past due water and sewer bills. Hiring a collection firm is a requirement of the loan agreement. Cathy has indicated that the OPEB savings of approximately $750K will be implemented by October 1. The City has purchased $300,000 of new water meters as part to the FDCVT grant award and are installing them. The City Council conditionally approved the DWSD agreement but no word from DWSD or Great Lakes Water Authority. Regular billing of water and sewer customers has begun. The plans for the demolition of the High School Building are being reviewed. I expect the project will be let for bids soon.
- **Lincoln Park**-Brad is placing a PA 345 request on the November Ballot seeking approval of 6 mills to fund the City's pension system. Some of the City Council members are supporting the millage request. Brad has prepared a four month plan which is being updated. His exit will be in the

first week of January. The new city manager, Matt Coppler began work on Monday. We will be discussing the final order with Brad.

- **Inkster**- the City won its appeal on the water billing lawsuit. Mark said the city will be discussing its options. The City is negotiating with Wayne County on its $4.9M sewer debt. A judgement levy for several years will be likely be placed on the July 2016 tax roll. Patrick submitted his report on the Benton Harbor Park Conservancy. Mark has indicated that the City is updating its Park and Rec Master Plan. I have encouraged Mark to meet with the ministers.
- **Pontiac**-Jane Di Sessa will become the new Deputy Mayor. A contract has been drafted but not signed as of 9/30. Because Jerry Ambrose will not hired as a transition advisor, we may be more involved. The Pontiac RTAB exit plan is nearing completion. The major issues are a deputy mayor ordinance, the Phoenix Center Order and city council action items. Problem with the School Board.
- **River Rouge**—the five year financial plan is not balanced yet. Do we want to exit without a balanced five year financial plan? The City's plan for taking over fire service for the City of Ecorse is on hold for now. The Mayor has drafted a revised plan that is even more favorable to Ecorse. The City was chosen by the Governor to be a part of the Rising Tide Initiative.
- **Royal Oak Township**- We may receive a proposal from Oak Park. Additional discussions with Ferndale and Hazel Park are needed. The Township needs to submit another grant application for police funding. We have received Robert's six month plan. Patrick will be assisting Robert on several items. Montgomery and Co. the accounting firm has submitted an invoice for $17,000. Robert says that they won't have a deficit at the end of the year. The MERS issue has resurfaced, Robert wants to invest these funds with MERS but the market is risky at present.
- **Miscellaneous Items**—the draft of the October Governor's Memo is finished, I am waiting to hear from Angela. Staffing update. RTAB candidates are being vetted by the Governor's Office. The draft exit plan for several communities is nearing completion. Should I schedule a visit to the City of Wayne? I have a consent agreement template ready for your review. I have been asked by the MML to speak at their elected official's workshop on Saturday, February 27, 2016.

Subject: RE: FDCVT - Flint

To be honest I am not sure... I don't have the history/background to know whether we would actually turn them/communities down (& we might) if they can't fully fund their project. I am sure that area (assessing) is in chaos as well in Flint.
If that were the case i.e., we would say no to the assessing project; then yes in terms of the switch to water related projects. I think the number I heard yesterday was 10,000-15,000 filters for $250k. Or maybe you create a program to replace the curb-to-home lead piping.

The call with Flint got cancelled today. They are not available now at that time.

Subject: FW: FDCVT - Flint

One of my 'take-aways' from the meeting this afternoon was to follow up on whether they could use those Distressed Cities' $s for filters. Remember last year they did receive $2mm which they used for water related items. This year they want funds for the property assessing area. Their project cost is more than the grant limit. It is not clear they realize that. The deadline application is Oct 15 if they were willing to change the application. Assuming that is doable.

With Wayne away (and before the 1:00 mtg)... a call was set up actually earlier today with Natasha Henderson. Do you care if we still do that ? The email setting it up is attached. Obviously we are not going to commit to anything.

Let me know if you need anything else.

Subject: RE: FDCVT - Flint

Tom,

Below are the answers to your questions. If you have any further questions, let us know. Thank you.

Do we know whether Flint has yet applied for any of these (FDCVT) $s ?
ANSWER: We received an application from the City of Flint on September 17th. The amount requested for the project is $2M (the limit for a local unit) and it is estimated to take $3.1M to complete the entire project. They also indicated that if full funding is not awarded, it is doubtful that they will be able to move forward with the project. The proposed project is:

"The city proposes to hire a qualified contractor to provide property assessing services. Specifically, this contractor will create digital property sketches of all improved properties, evaluate existing property conditions and improvements by providing real property data verification, and conduct a comprehensive appraisal valuation study. This process will take place over a period of 3 years, from June 1, 2016 to July 1, 2019."

Do we know if they have plans to?
ANSWER: Since they asked for the entire $2M for the above project, we would assume they are not submitting any further projects, however we are not sure.

And have they asked (& rec'd) $s from this program previously i.e., last year, and if so, what did they use those $s for?
ANSWER: Treasury awarded Flint two grants in FY 2015 under the FDCVT program. Treasury has not yet received any reimbursement requests from the City. Therefore, we have not distributed any of the FDCVT grant related funds to the City. The two grants are:

Awarded	Project Name	Brief Description

$1,100,000	Water Pollution Control Incinerator Shutdown	Water system enhancements through improved waste management
$900,000	Water Main Leak Detection Survey and Condition Assessment	Water system enhancements through leak detection and pipe assessments

Subject: Use of SRF to replace lead service lines

Hi Dan –

Here's a quick answer to your question about using SRF to replace lead service lines. Under the federal SRF program, SRF funds can be used to replace lead service lines on both public and private property. (We don't know if Michigan rules allow for the use of SRF funding on private property, but presumably you know whether that's the case.) If you have additional questions, your staff can follow up with Steve Marquardt, Chief of the R5 Water Division State and Tribal Program Section. His number is 312-353-3214.

Please keep me posted on the time for the event later this week.

Thanks,

Susan

Subject: RE: Use of SRF to replace lead service lines

Hi Sonya,
Because it is an eligibility question, there is probably no specific regulation to address it, but HQ issued a memo (attached). Although is not dated, it was still draft in 2012, so is probably 2012/2013. We may be able to find a more precise date from HQ. Just FYI, there is a reference on page 2 to a 2003 memo – the link to the 2003 memo is: http://water.epa.gov/grants_funding/dwsrf/upload/2008_04_10_dwsrf_memos_memo_dwsrf_policy_2003-07-25.pdf.

I hope this helps.
Please let me know if you have any questions.
Thanks.

Subject: Use of SRF to replace lead service lines

Hi Dan –

Here's a quick answer to your question about using SRF to replace lead service lines. Under the federal SRF program, SRF funds can be used to replace lead service lines on both public and private property. (We don't know if Michigan rules allow for the use of SRF funding on private property, but presumably you know whether that's the case.) If you have additional questions, your staff can follow up with Steve Marquardt, Chief of the R5 Water Division State and Tribal Program Section. His number is 312-353-3214.

Please keep me posted on the time for the event later this week.

Thanks,

Susan

MEMORANDUM

SUBJECT: Eligibility of Replacement of Lead Service Lines on Private Property Under the DWSRF.

FROM: Joanne Hogan
Attorney- Advisor
Civil Rights and Financial Law Office
Office of General Counsel

THROUGH: Wendel Askew
Assistant General Counsel
Civil Rights and Financial Law Office
Office of General Counsel

Ken Redden
Deputy Associate General Counsel
Civil Rights and Financial Law Office
Office of General Counsel

TO: Peter Shanaghan
Team Leader
Drinking Water State Revolving Fund Team
Office of Ground Water and Drinking Water, Office of Water

Question Presented.

You have asked whether financial assistance from a State's Drinking Water State Revolving Loan Fund can be used by eligible entities to fund projects that involve replacing lead service lines that may be on private property and that connect to private dwellings.

Brief Answer

We believe that lead service line projects, regardless of the ownership of the property on which the pipe is placed, may be funded by a State's DWSRF so long as the loans are made to an eligible entity and all other requirements of the DWSRF are met.

Analysis

The statute and the regulatory provisions governing the use of State DWSRF funds, though defining which entities may receive funds, do not require the Public Water System to have control over all portions of a project that is funded by the DWSRF. Congress gave EPA's Administrator the clear authority to determine which projects would be eligible under §1452: "Financial assistance. . . may be used. . . only for expenditures of a type or category which the Administrator has determined, through guidance, will facilitate compliance with national primary drinking water regulations." PHSA §1452 (a)(2). The only broad statutory limitations on the types of projects that cannot be funded are projects which include monitoring, operation, or maintenance expenditures, or projects for the acquisition of real property unless the purchase is made from a willing seller and the acquisition is integral to the project.

40 CFR §35.3520 (b)(2) sets forth the categories of projects that can be funded by a DWSRF. This provision includes the transmission and distribution of water to be a category of eligible projects. Specifically, the regulation provides examples of such projects to include: "installation or replacement of transmission and distribution pipes to improve water pressure to safe levels or to prevent contamination caused by leaks or breaks in the pipes." See 40 CFR §35.3520 (2)(ii).

Lead pipes can contaminate water at any point, including on its way to a private home. Allowing a public water system to use its funds to replace such pipes is consistent with this allowable category of projects, and is similarly consistent with the overall health protections of the Safe Drinking Water Act. See PHSA 1452 (a)(1)(A). Note that if a Public Water System wishes to purchase and retain an easement so that it maintains control of such infrastructure, that purchase is authorized as well: "Funds shall not be used for real property or interests therein unless the acquisition is integral to the project authorized... and the purchase is from a willing seller. . ." PHSA 1452(a)(2).

This determination that replacement of lead pipes on privately owned property is an eligible project cost so long as it otherwise complies with the PHSA is consistent with prior approved eligible projects, such as water efficiency projects, that do not require all elements of a project to be under the control of a Public Water System. In a Memorandum dated July 25, 2003, then Assistant Administrator for Water G. Tracy Mehan III informed Water Division Directors in the regions that projects such as the installation or retrofit of plumbing fixtures and appliances, installation of water meters, and implementation of incentive programs to conserve water, such as rebates or conservation rate structures were all eligible projects under the DWSRF. Therefore, so long as the assistance is given to an eligible entity, and the project otherwise meets the requirements of the DWSRF, the project may be funded regardless of ownership or control of the resulting infrastructure.

All-

Just received this from Dave Eggert...

I am going to tell David that **Treasury did send a timely response to the Representative.** It was due (following a statutory extension) on Tuesday, September 29, 2015. Our response (attachment 1) went in the mail on Tuesday. As you will see, it was a "denial," as Treasury does not have any records regarding "waivers, permits or applications to use the Flint River..."

Apparently, the response has not arrived in his (Flushing, MI) mailbox...or is arriving today.

I have also attached the extension letter (attachment 2), which was timely-mailed as well.

Let me know if you have any questions...

Statement from state Rep. Phil Phelps (D-Flushing) on his FOIA requests pertaining to the City of Flint water crisis being denied:

"Residents of the City of Flint face a substantial health risk due to contaminants found in their drinking water. In an effort to not politicize this situation, I have been working directly with state and local officials in seeking important information and attempting to correct the City's water crisis. Unfortunately, I have been faced with continual road blocks in my requests for information. It has been nearly a month since I submitted Freedom of Information Act (FOIA) requests to the State and the City of Flint requesting to see documents related to the City's switch to using water from the Flint River. I requested the applications and permits required by law to change a city's source of water. So far, the State Treasury has violated FOIA by not providing any information or even a denial. The Department of Environmental Quality (DEQ) and City of Flint have denied my request saying that the documents I requested do not exist. However, state law requires Michigan cities to apply for a permit from the DEQ to switch their source of water. Violation of this law is punishable by a fine of $5,000 per day and possible incarceration. I find it hard to believe that the DEQ and the City of Flint ignored such a critical step, not to mention one that the cost in fines alone would already be roughly $2.5 million and cause those responsible to be subject to criminal prosecution.

"My request for these documents was meant to be a fact-finding mission to ascertain the degree to which the State knew about or took any action to determine the potential hazards of making this switch prior to being officially ordered by the State-appointed Emergency Manager. Since the State has decided not to disclose this information to me, it is unclear the extent to which the State is culpable. I believe the bottom line here is that the decision to switch the source of Flint's water to the Flint River was made by the Emergency Manager appointed by Governor Snyder and the burden is on his shoulders to make this right.

"The use of the river water has caused a great amount of destruction to the City's water infrastructure, and it has put the residents who use the water in harm's way. To help continue this fight for information, I have retained attorney Keith D. Flynn of the law firm Miller Cohen P.L.C. to further evaluate my legal options. My position and recommendation to the Governor on this issue is that the State should immediately switch Flint's water source back to the Detroit Water System at no additional cost to Flint residents and supply water filters to every household in Flint.

"Furthermore, the State should begin to estimate costs for the total damage done to the City's public works infrastructure and for the treatment of potential adverse health outcomes we could see in Flint residents in the future and allocate expenditures to correct this problem."

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

September 15, 2015

Mr. Phil Phelps
819 Main Street
Unit A
Flushing, MI 48433

Dear Mr. Phelps:

This notice is issued in response to your request dated September 4, 2015, which you submitted under the Freedom of Information Act (FOIA), MCL 15.231 *et seq*. Your request was received in the Department of Treasury (Department) by electronic mail on September 8, 2015.

You have requested records which you describe as: 1) All documents the Michigan Department of Treasury, or its agents, has in its possession, including correspondence, related to any waivers, permits or applications to use the Flint River as a source for water and/or drinking water for the City of Flint or any other municipality or municipal entity; 2) All documents the Michigan Department of Treasury, or its agents, has in its possession, including correspondence, related to any communications between the Michigan Department of Environmental Quality, or its agents, and the Michigan Department of Treasury, or its agents, regarding any waivers, permits or applications to use the Flint River as a source for water and/or drinking water for the City of Flint or any other municipality or municipal entity; 3) All documents the Michigan Department of Treasury has in its possession, including correspondence, related to any communications between the Michigan Department of Treasury, or its agents, and the Office of the Governor of the State of Michigan, or its agents, regarding any waivers, permits or applications to use the Flint River as a source for water and/or drinking water for the City of Flint or any other municipality or municipal entity.

In order to search for records in the possession of the Department that may fall within the scope of your request, under section 5(2)(d) of the FOIA, MCL 15.235(2)(d), the Department is extending by ten business days the period to respond. We will issue a written notice no later than September 29, 2015.

Sincerely,

Carla M. Robert

Carla M. Robert
FOIA Coordinator

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

September 29, 2015

Mr. Phil Phelps
819 Main Street
Unit A
Flushing, MI 48433

Dear Mr. Phelps:

This notice is issued in response to your request dated September 4, 2015, which you submitted under the Freedom of Information Act (FOIA), MCL 15.231 *et seq*. Your request was received in the Department of Treasury (Department) by electronic mail on September 8, 2015. As set forth in the Department's September 15, 2015 notice, a statutory extension of time to respond was taken through September 29, 2015.

You have requested records which you describe as: 1) All documents the Michigan Department of Treasury, or its agents, has in its possession, including correspondence, related to any waivers, permits or applications to use the Flint River as a source for water and/or drinking water for the City of Flint or any other municipality or municipal entity; 2) All documents the Michigan Department of Treasury, or its agents, has in its possession, including correspondence, related to any communications between the Michigan Department of Environmental Quality, or its agents, and the Michigan Department of Treasury, or its agents, regarding any waivers, permits or applications to use the Flint River as a source for water and/or drinking water for the City of Flint or any other municipality or municipal entity; 3) All documents the Michigan Department of Treasury has in its possession, including correspondence, related to any communications between the Michigan Department of Treasury, or its agents, and the Office of the Governor of the State of Michigan, or its agents, regarding any waivers, permits or applications to use the Flint River as a source for water and/or drinking water for the City of Flint or any other municipality or municipal entity.

To the extent we understand your description, your request is denied. After a thorough search of Department records, to the best of the undersigned's knowledge, information and belief, no such records as you describe, or by any other name reasonably known to the Department, regarding any "waivers, permits or applications to use the Flint River as a source for water and/or drinking water for the City of Flint or any other municipality or municipal entity," exist in the Department of Treasury.

In an effort to be cooperative, you may wish to contact the Department of Environmental Quality as they may have records responsive to your request.

As to the denial of your FOIA request, the Department is obligated to inform you that under section 10 of the FOIA, MCL 15.240 you may do the following:

1. Appeal this decision in writing to the State Treasurer, Michigan Department of Treasury, P.O. Box 30716, Lansing, MI 48909. The writing must specifically state the word "appeal" and must identify the reason or reasons you believe the denial should be reversed. The Department must respond to your appeal within 10 days of its receipt. Under unusual circumstances, the time for response to an appeal may be extended by 10 business days.

2. File an action in the appropriate court within 180 days after the date of the final determination to deny the request. If you prevail in such an action, the court is to award reasonable attorney fees, costs, and disbursements, and possible damages.

Pursuant to section 4 of the FOIA, MCL 15.234, the Department's FOIA procedures, guidelines and written summary can be found on the Department's website at the following link: http://michigan.gov/treasury/0,4679,7-121-72699-357926--,00.html.

Sincerely,

Carla M. Robert

FROM: Jody Lundquist, Chief Financial Officer

RE: Review of Water/Sewer Funds' Fund Balance

On August 7, 2015 Genesee County District Court Judge Archie Hayman issued a Preliminary Injunction Order (the "Order") against the City of Flint (the "City"). As a result of the Order, the City anticipated an immediate and devastating impact on the financial stability of the Water and Sewer Funds if a stay was not quickly granted by the Michigan Supreme Court Appellate Court. Indeed, the City's request was denied and the financial impact of the Court order has been reviewed through the fiscal year ending June 30, 2016.

Upon issuance of the Order, the City was immediately enjoined from charging and collecting water and sewer rates that include the September 16, 2011 35% rate increases and disconnecting water service for its delinquent water and sewer customers wherein the delinquency arose between September 16, 2011 and the date of the Order. This immediately resulted in a decrease in cash collections on outstanding and current water bills and a decrease in total billed revenue.

At August 7, 2015 the City had $8,024,558.65 in outstanding accounts receivable (or unpaid bills). As of September 25, 2015, the City's outstanding accounts receivable had grown to $10,313,020.61. This clearly indicates that all outstanding accounts due and payable as of the date of the court order remain unpaid. With an

increase equivalent to the amount of non-delinquent bills issued since the order. It is highly probable that the entire accounts receivable balance as of the court order will have to be written off as uncollectible without the ability to enforce payment.

On a foregoing basis, the City has already experienced a decrease in monthly revenue by approximately $666,000 for the month of September as a result of the reduced water and sewer rates. Projecting the rate loss of the remaining nine months of the fiscal year will result in total lost revenue of $6.6 million.

The City's adopted FY16 budget projected a beginning unrestricted fund balance of $16 million for its water and sewer funds. As the City works to finalize its FY15 operating activity, it appears that actual results were close to projections with the only difference being outstanding capital improvement projects in progress at year end.

The information was summarized before Council at the Department of Public Works Committee meeting on September 30, 2015 as follows:

	Budget	Actual
Beginning Unrestricted Fund Balance	$16M	$18M
FY15 CIP	N/A	<$2M>
Adjusted Unrestricted Fund Balance	0	$16M
Net Income	<$26K>	$14M
Ending Unrestricted Fund Balance	$16M	$2M
Required Fund Balance Reserve	$16M	$16M

In addition to the budgetary impact, the City has seen a drastic decrease in payment activity since the date of the Court Order. The City began tracking daily collections activity on a weekly basis since August 7. On average, the City is receiving approximately 100 less water payments per day. For the period August 10-September 25, the City has realized $1.75 million less in cash receipts than the same period last year.

With approximately the same number of customers, the City's apples-to-apples comparison illustrates that not only is the City billing less, less customers are paying. While shut-off efforts to enforce non-payment will resume in October, the outstanding balance of accounts receivable at August 7 and loss in monthly revenues has already been incurred.

The City is working diligently to review the FY16 water and sewer fund operating budgets for additional sources of spending. Upon issuance of the Order, the City immediately implemented a spending and hiring freeze for all non-critical items. In addition, the City is working to redevelop its capital improvement plan to cancel and postpone planned projects and purchases until financial stability has been regained. The City's emphasis at this time continues to be on providing safe, clean water to the City's residents and moving forward with preparations for the KWA pipeline to come online.

Flint Drinking Water Press Conference Communications Plan
Oct. 2, 2015

Situation overview:
In May 2014, the city of Flint began drawing its drinking water from the Flint River, and left the Detroit Water and Sewerage Department. Recently, some city residents and outside activists have expressed concern about levels of lead in the drinking water. Although repeated testing demonstrates the water leaving the city of Flint's plant is free of lead contamination, Flint contains many old homes with lead plumbing, and some lead gets into individual homes' drinking water.

Talking points:

- The water leaving Flint's water system is free of lead contamination; however, the state recognizes many older homes have lead pipes and therefore some measure of lead in the water that comes out of their taps
- While this is a problem with individual homes, the city, state and federal governments have come together to provide a number of actions to address the issue.
- This plan includes both short- and long-term solutions, and focuses on increasing water testing, offering additional precautions for families, and providing long-term solutions to address the city's water infrastructure.
- The action plan:
    - Gov. Rick Snyder names Dr. Eden Wells as the Flint Drinking Water Public Health Advisor.
    - Provide water filters to residents of Flint.
    - Continue to disseminate advisories recommending residents flush their cold water pipes before use, as well as use only water from the cold water tap for drinking, cooking and especially for making baby formula.
    - Immediately test Flint public schools to ensure that drinking water is safe. Testing also will be available at no cost to any other school in Flint.
    - Expand health exposure testing of individual residences.
    - Offer water testing at no cost to Flint residents to assure water is safe.
    - Fully optimize corrosion controls in the Flint drinking water system by Nov. 1, 2015.
    - Convene a "Safe Drinking Water Technical Advisory Committee" to ensure the best technology, practices and science are being utilized, and add an expert from the EPA's Office of Research and Development to the group.
    - Accelerate water system improvements to address replacement of lead service lines.
    - Expedite completion of Karegnondi Water Authority.

> > Dennis - in response to your earlier email; Wayne's guys came up with a ballpark estimate for reconnecting to DWSD. Let me emphasize 'ballpark'. They used your assumptions & they talked to Natasha H. after 5:00. Bottom line... the estimated cost is approx $10.5mm to reconnect until June '16.
> >
> > These numbers on their surface seem much improved over previous DWSD $offers. [Is Daddow in the loop on this ?] We need to give some more thought as to whether this is all inclusive. e.g., there might be some costs from turning down operations at the plant
> >
> > I am being told this can happen in a relatively short time i.e., less than a week. Which seems aggressive. Obviously that does not mean the lead concerns nor discolored water, etc goes away in a week. The pipe section they sold to the county won't be an impediment to this deal.

There apparently are no 'upfront' costs we need to worry about. In theory, it seems like it can be paid over the 9-10 months (vs a lump sum). But I am not clear Dennis on those couple ideas/sources the Mayor & Senator mentioned i.e., at this point I am not sure where the $10.5mm comes from.

My guess is we will keep refining this estimate. Let us know if you need anything else. Again, "credit " Wayne's guys for pulling this together quickly.

To: Saxton, Thomas (Treasury); Koryzno, Edward (Treasury); Byrne, Randall (Treasury)
Subject: RE: follow up

City's usage is 14 MGD/Day

Timeline is 9 months until June 2016

Fixed Cost is $662,100 for 9 months or $5,958,900

Commodity Rate is $501,383/month

Total Monthly Cost is $1,163,483

Cost until June 2016 is $10,471,347

The City does not know the cost to move the water plant into stand-by mode. However, they have indicated that there might be some reduced costs as lower chemical costs will be incurred.

Subject: Re: SOM and City issues regarding drinking water

Gentleman: There would be no capital cost to hook back up to DWSD. It would take a day or two of planning, and then turning 4 values. There is currently an used piece of pipe owned by the Genesee County Drain Commission that we would need to use. That pipe would need to be sanitized and depressurized. So approximately 2-3 days to physically hook back up.

It would then take approximately 30 days for Lake Huron water to reach all COF customers.

The below email concerns anti-corrosion. I will provide more information on this shortly, as well as address the other questions.

Afternoon Pete—

Bill Danhof, Steve Chester and myself have been kicking this issue around internally. We have also reached out to the Gov's office. We have some ideas, but do you have time for a quick call to discuss what is (and isn't) on the table relative to the water issue? Either this afternoon or tomorrow should work on our end.

Thanks Pete.

Al

Probably not (in terms of a reason not to)... it is not clear to me that you will have an immediate fix on the water issues (e.g., coloring, lead, etc).

You will have issues/costs in standing down the water plant & costs when switching to KWA. We haven't seen those estimates.

We are in this fix in part because DWSD had kicked the City off their system so I am not sure I have a ton of confidence in their numbers or deal. Hopefully as you are saying there are no hidden costs.

And we need to figure out how best to pay for it.

If the ballpark is $11M, and we decide to reconnect, can you think of any other reason not to do so? Can you think of any other costs that might pop up.

Apparently I asked for top users when I first started. This isn't by dollar amount but by usage. For the sake of time, I am forwarding this to you as is.

Please note that at least one account is sewer only. The attorneys were correct that at least one GM location left the City's system shortly after our transition to Flint River. They installed the necessary plumbing to connect to Genesee County. They may or may not return as a City customer once we begin receiving Lake Huron water again.

All-

The Free Press is constructing a "timeline" of the Flint water situation...and I've been asked for the following:

-dates for EM appointments, departures
-the date Dillon signed off on KWA

I am going to send some other pertinent dates and documentation. My planned response is below...please advise on any suggested changes.

Flint EM dates for financial emergency declared in December 2011

Mike Brown, apptd 12-1-11 (when fin emer declared under PA 4 of 2011)
Ed Kurtz, apptd 8-8-12 (when PA4 was repealed in Aug 2012, Brown couldn't serve as EM, PA 72 back in effect)
Mike Brown, apptd 7-4-13 (Kurtz retired; PA436 in effect)
Darnell Earley, apptd 10-8-13 (Brown resigned)
Gerald Ambrose, apptd 1-13-15 (Earley appointed DPS EM)

Financial Emergency resolved, 4-29-15 (RTAB apptd)

Other dates

June 26, 2012 – Letter from EM Brown to DWSD seeking permission to blend river water with DWSD water (attached).

Sept. 20, 2012 – Letter from EM Kurtz to DWSD requesting written permission to implement blending (attached).

March 25, 2013 – The Flint City Council endorses joining KWA (see url below)
http://blog.mlive.com/newsnow_impact/print.html?entry=/2013/03/flint_city_council_approves_re.html

April 11, 2013 – Treasurer Dillion sends letter to EM Kurtz (attached) noting conditional approval of move to KWA (pursuant to PA436), pending a review of DWSD's last, best offer.

April 16, 2013 – EM Kurtz informs Treasury that the City will join KWA (attached).

April 17, 2013 – DWSD transmits letter to EM Kurtz terminating service to Flint, effective April 17, 2014 (attached).

April 17, 2014 – Water service from DWSD officially ends.

Subject: RE: Bottle Deposit Fund

Bottle deposit or Escheats fund? Whatever the case, think you would still have the lending of the credit of the State issue. Hence why the ELB route was created, which is an "investment" on the State's books. And for the most part if you would lend from an individual fund or just have an overall "investment" from the common cash fund, you are still trying up cash that would otherwise be available to manage.

How about some sort of loan from the SRF?

SPECIAL REVENUE FUNDS – CONSERVATION, ENVIRONMENT, AND RECREATION RELATED

MICHIGAN CONSERVATION AND RECREATION LEGACY FUND

This fund ("Legacy Fund") was created by Article 9, Section 40, of the State Constitution, an amendment approved by voters in November 2006. The purpose of the amendment was to constitutionally prevent the diversion of certain funds and revenues for purposes other than those for which they were created. Section 40 created the following accounts within the Legacy Fund: Forest Recreation, Game and Fish Protection, Off-Road Vehicle, Recreation Improvement, Snowmobile, State Park Improvement, and Waterways.

The implementing legislation related to this amendment, found in Sections 324.2002 – 324.2035 of the Michigan Compiled Laws, transferred a number of special revenue funds and certain restrictively financed activities within the General Fund to the Legacy Fund. The following special revenue funds were transferred into the fund. Game and Fish Protection Fund, Michigan State Waterways Fund, Marine Safety Fund, and State Park Improvement Fund. The restrictively financed activities transferred into the fund from the General Fund were related to various outdoor recreation activities including snowmobiles, off-road vehicles, recreation trails, and State forest recreation.

Financing consists primarily of hunting and fishing licenses, camping and park entrance fees; 2% of gasoline taxes dedicated for boating, snowmobiling, off-road vehicles and other trails, watercraft and snowmobile registration fees; and trail use permits. The fund also receives funding from the Michigan Game and Fish Protection Trust Fund. Expenditures are limited to those activities specified in Section 40 and include forest recreation activities, wildlife and shades programs, off-road vehicle and snowmobile trails and facilities, State parks and recreation areas, improvement of lake harbors and inland waterways, and water safety education programs.

MICHIGAN GAME AND FISH PROTECTION TRUST FUND

The former Game and Fish Protection Trust Fund was established in 1988 to restrict certain assets for the purpose of generating interest and earnings for transfer to the former Game and Fish Protection Fund (now accounted for within the Michigan Conservation and Recreation Legacy Fund). Article 9, Section 41, of the State Constitution, an amendment approved by voters in November 2006, further protected these assets by creating the Michigan Game and Fish Protection Trust Fund.

The fund operates under Sections 324.43702 – 324.43704 of the Michigan Compiled Laws. The Legislature may appropriate up to $6 million annually for use by the Game and Fish Protection Account of the Michigan Conservation and Recreation Legacy Fund. Mineral royalties from lands acquired by the Game and Fish Protection Account, direct sale proceeds, and other revenues, which, by statute, are retained for permanent investment, provide additional investment funding.

MICHIGAN NONGAME FISH AND WILDLIFE TRUST FUND

The former Michigan Nongame Fish and Wildlife Fund was established in 1983 to finance research and management of nongame fish and wildlife, designated endangered species, and designated plant species of this State. Article 9, Section 42, of the State Constitution, an amendment approved by voters in November 2006, further protected these assets by creating the Michigan Nongame Fish and Wildlife Trust Fund.

The fund operates under Sections 324.43902 – 324.43907 of the Michigan Compiled Laws. The fund may receive transfers from other funds, donations, investment income, and revenue from specialty license plate sales.

FOREST DEVELOPMENT FUND

This fund was established in 1993, along with the Michigan Forest Finance Authority, and operates under Michigan Compiled Laws Section 324.50507. The primary revenue source of the fund is timber revenue from State forest lands. Expenditures from the fund are for forest management activities and forest fire protection. The Authority is authorized to, but thus far has not, issued bonds.

BOTTLE DEPOSITS FUND

Michigan Compiled Laws (MCL) Section 445.573c created the Bottle Deposits Fund to provide for the disposition of unredeemed bottle deposits. The Department of Treasury and the Department of Environmental Quality (DEQ) jointly administer the fund. The law mandates that an annual distribution of the funds be made as follows: 25% returned to the dealers and 75% to fund several sub-funds.

The 75% distribution to DEQ is initially deposited into the Cleanup and Redevelopment Trust Sub-Fund (CRTF), and if not further distributed, remains there until the principal amount reaches $200 million. Of funds received annually by the CRTF, 80% is allocated to the Cleanup and Redevelopment Sub-Fund (CRF) and 10% to the Community Pollution Prevention Sub-Fund.

MCL Section 324.20108 moved the former Environmental Response Fund (ERF) to a sub-fund of the CRF. The law mandates that proceeds of all cost recovery actions taken and settlements entered into pursuant to the ERF (excluding natural resource damages) by DEQ or the Attorney General, or both, shall be credited to the ERF.

Several DEQ sub-funds are administratively housed within the Bottle Deposits Fund, although they receive no bottle deposits revenue. Included is the State Sites Cleanup Sub-Fund, established in accordance with MCL Section 324.20108c to provide for response activities at facilities where the State is liable as an owner or operator. The following loan programs administered by DEQ are also included: the Brownfield Revolving Loan Fund created by MCL Section 324.19608a, the Revitalization Revolving Loan Fund created by MCL Section 324.20108a, and the Federal Brownfield Cleanup and Revolving Loan Fund.

I had not forgotten about this request... Joe F. pulled some background/numbers for me. DEQ controls it in terms of how it is used programmatically. There are some $s in their fund balance. My sense is we couldn't 'loan' them money i.e., you end up with lending of credit issues. I will look at it further when I get back Tues.

Ecorse – Sept. 22 – W. O'Neal, R. Byrne, D. Van de Grift, P. Dostine

Priorities

- Budget and 5-year budget. New Controller has re-done the budget, is re-doing the 5-year budget. O'Neal said the controller discovered that Pepperman's baseline was all wrong. The debt, the MERs payment, all wrong. The C.I.P had to be "gutted", O'Neal said. The FY '14-'15 fund balance is approximately $500K, O'Neal said. Treasury requested a copy of the revised 5-year budget when it's completed.
- Attempt to terminate Wayne O'Neal. At the last council meeting, council voted to terminate Wayne O'Neal. The motion failed 4-3. O'Neal also reported that a councilmember took the new controller for a ride and asked him if he'd be interested in the position of city manager.
- City Treasurer. Is still not bonded. Has financial issues.
- FDCVT grant. O'Neal said the money requested ($2MM) would be used and is necessary to make an ARC payment and is, furthermore, necessary if there is any savings to be realized in restructuring the fire department. (see below)

Fire consolidation

- O'Neal said the council does not want to re-structure the Ecorse fire department. There have been no new talks with River Rouge about fire consolidation. A few weeks ago, O'Neal said he was looking to create an all part-time department, that the savings would still be realized in the 5-year budget. O'Neal said today that the savings realized would be offset by a higher ARC payment due to closing the pension when the 5 full time firefighters are restructured out. That's why Ecorse applied for $2MM of the FDCVT grant to cover the ARC payment.

OPEB benefit audit

- No change. Nothing has been done on this.

Flint – Sept. 30 – N. Henderson, Mayor Walling, J .Freeman, F Headen, R. Byrne, E. Cline, R Widigan, P. Dostine

- **Priorities**:
  - Water: City is looking to CDBG funding to purchase lead filters, Mayors initiative.
    - City has CDBG funding to the tune of $400K, city will start within and use city resources before approaching the Mott Foundation.
    - Working with United Way – they are activity searching for funding.
  - Veolia is finished the contract with the city. City has implemented the recommendations from Veolia.
  - $8.4M outstanding in billing. City cannot keep going on with this issue – state needs to help take some of the responsibility with us.

        - City Admin. argues Flint is a special case with Judge Hayman's order, lead issues, financial issues, etc…
    - Cash on hand: Finance department is estimating how long the city can operate with cash on hand, and what bills are and are not being paid (presentation will be made at the November RTAB meeting).
    - Council is requesting a special meeting on October 21 to have an open discussion regarding water issues. Letters will be sent to 75 individuals, including F. Headen.
        - City Admin. does not agree with the ida and believes it is micromanaging at best.
    - Budget amendments will be presented to Council next week – reduction in revenue for enterprise fund and removing capital improvement projects. Without being able to collect water bills, the city cannot go forward with CIPs.
    - Today is the deadline for the finance department's report required by Judge Hayman's Order.
        - A report was completed and submitted, it was determined not acceptable by attorney Val Washington, the city was then asked to re-submit the report.
        - Will be submitted by 5pm today.
- **KWA**:
    - City Administrator said that they are still on track to hook up June 2016.
    - Jeff Wright, Genesee Co. Drain Commissioner is putting together all paperwork, permits, etc. to submit to the state for approval. Trying to stay/get ahead of the project.
- **Water/lead:**
    - The city has issued a lead advisory due to information released from the medical community. Working with the Gen. Co. Health Department as well.
    - Operational standpoint: Working with LAN to tie down a corrosion control plan. Will include adding phosphate to the water, aware of the potential issues with adding phosphate.
    - The city has requested that the state assist the city with possibly re-connecting to DWSD until can connect to KWA.
    - Mayor has spoken with DEQ director, he stated the city's requests are being carefully considered.
        - GOV has met with Congressman Kildee and Senator Ananich.
- **Legal representation for Flint:**
    - City Manager has received additional detail from Miller Canfield and is reviewing it.
    - The City Administrator will send it to Treasury today.
    - Should have engagement by end of week if council works with administration.
- **Crime Rate:** City was named 3rd most violent city in America.

September 30, 2015

Via email: nhenderson@cityofflint.com
and U.S. Mail

Ms. Natasha L. Henderson, City Administrator
City of Flint
1101 S. Saginaw St.
Flint, Michigan 48502

Dear Ms. Henderson:

Thank you for your inquiry regarding the possibility of reconnecting the City of Flint to the Detroit Water and Sewerage Department's (DWSD) Water Supply system. Director McCormick has asked me to respond to you and provide a brief outline of the basis for that reconnection. However, I want to again emphasize what Ms. McCormick has previously stated to your City Council on this issue: DWSD is willing to sit down and talk with the City of Flint without pre-condition, if that is mutually desirable.

I would be remiss if I did not point out that on June 12, 2015, the City of Detroit and the Great Lakes Water Authority (GLWA) executed a Lease Agreement that provides for the GLWA's operation of the Regional Water Supply System. At present, we are transitioning management of the system from DWSD to the GLWA while certain Conditions Precedent of the Lease Agreement are satisfied. We have made substantial progress towards satisfying these Conditions Precedent with a goal of having GLWA commence full system operations on or before January 1, 2016. I can assure you that, like DWSD, the GLWA is concerned with the challenges Flint's residents have faced in recent months, and will be willing to discuss service to your City.

That said, here is a likely list of issues that would need to be addressed:

1) Rates: In Sue McCormick's January 12, 2015 letter to Flint, she indicated that the rates Flint would pay for the remainder of the then current 2014-2015 Fiscal Year (FY) would be "the same rates Flint was paying as a terminated customer when it left the system but modified to include the 4% increase experienced by all other DWSD wholesale customers in 2014." As we are now in the 2015-16 FY, that offer must be modified to include an additional adjustment similar to that which was received by other customers. In this regard we propose that the rates be adjusted as follows:

a) Starting with the 2013-2014 FY terminated rate; and

b) Adding a 4% adjustment to that rate to account for the 2014-2015 FY increases; and

c) Adding an adjustment equal to the average Suburban Wholesale Charge Adjustment for the current 2015-2016 FY. This rate would remain in place until June 30, 2016, the end of the current 2015-2016 FY.

d) Based upon the above considerations, the resulting rate structure is a fixed monthly rate of $662,100 and a commodity rate of $8.93/Mcf for the current 2015-2016 FY. Please note that this rate structure is designed to be applicable to incremental water sales over and above water sales to the Genesee County Drain Commission. Depending on how water is provided to the combined GCDC/Flint customer, alternative rate structures may be appropriate.

e) Additionally, DWSD recently changed its wholesale customer billing methodology as follows: Flint's calculated share of the FY 2016 Budget is allocated 60% to the Fixed Monthly Charge and 40% to the Commodity Charge, which is consistent with the adopted FY 2015-2016 water wholesale rates

f) In extending this proposal, our assumption is that the service provided is to Flint only and computations are based on data from our previous customer relationship.

g) It is anticipated that under the management of the GLWA, the rates for the 2016-2017 FY will be computed using the same methodology as applied to all other Water Supply System customers.

The proposed rate methodology is intended to ensure that Flint is treated fairly by using the average wholesale customer adjustment in the current Fiscal Year, and the same methodology as all other customers.

2) Term: DWSD understands that Flint's current long-term desire is to receive water service from the KWA. Under these circumstances, Flint would be expected to remain a DWSD customer from the time of reconnection until the time it begins to receive service from KWA. If Flint wishes to consider a longer term relationship with DWSD or GLWA, we would welcome that discussion.

3) Reconnection: As previously indicated by Ms. McCormick in her January 12, 2015, letter, DWSD will not charge an additional fee for Flint to reconnect to the DWSD Water System, and is prepared to immediately take those steps necessary on its end to facilitate a reconnection. Any expenses incurred would be billed at actual cost. Because DWSD lacks sufficient information on the status of the disconnection, we are unable to provide an estimate of those costs at this time. Nonetheless, we will work with you in good faith to develop an expedited plan for reconnection, and to develop a mutually agreed good faith estimate of the costs associated with that plan.

Thank you for raising this issue with us. We hope that this letter addresses the concerns you raised during your recent conversation with Ms. McCormick, and we sincerely appreciate your interest and the opportunity to serve Flint.

Finally, we look forward to the opportunity to meet with you at your earliest convenience to discuss this letter, and how we may best assist Flint in serving its residents' needs. Please contact Ms. McCormick's office at (313) 224-4701 to arrange this meeting.

MEMORANDUM

DATE: October 7, 2015

TO: Wayne Workman, Deputy Director, Treasury Department
Randall Byrne, State Administrative Manager

FROM: John F. O'Brien, P.E., Director

SUBJECT: Letter Dated September 30, 2015
Wolfson to Henderson

My staff and I have reviewed the letter referenced above and have prepared this quick memorandum to explain the economics concerns and ramifications of the temporary cessation of the Flint water treatment operations and the return to DWSD/GLWA supply.

This memorandum is broken down into three parts: economics, procedure and concerns.

Economics

Prior to April 2014, Flint held a water contract with DWSD. Flint also had the franchise rights to DWSD water for Genesee County. Therefore, Genesee County received DWSD water via the Flint. The water rate was calculated on that joint demand. In 2013-2014, the allocated cost was $25,303,062 or $738,066 per month plus $13.01 per mcf.

In 2013, DWSD terminated the Flint contract effective April 2014. The Flint chose to go to the Flint River as its source water until KWA water was made available. With the contract terminated, the franchise was terminated and the county had to go to DWSD for water because Flint could no longer supply DWSD water and the Flint River and the Flint water treatment plant does not have the capacity to serve both utilities.

DWSD established a new rate for GCDC that included significant non-contract and non-member charges to access the water. GCDC also acquired approximately 9 miles of water main pipe from the Flint. (The Detroit water meter at the county line between Lapeer and Genesee and the Flint water plant is approximately 11 miles into the county.) The pipeline is of no use to Flint under the Flint River supply or KWA supply scenario. As part of the purchase agreement, language was included for emergency reconnection for Flint to DWSD through this water line.

GCDC water rates with DWSD are as follows:

	Fixed Monthly	Commodity
July 2013 – April 2014 (Flint Contract)	$346,863	$13.01
May 2014 – June 2014	$423,400	$15.18
July 2014 – June 2015	$1,149,400	$3.89
July 2015 – Present	$900,000	$11.86

As you can see, the fixed monthly fees and commodity fees have had significant swings. This is because under the Flint contract, only 40% of revenue was fixed. GCDC went to 80% and are now 60% for the current billing period.

Upon reviewing DWSD's letter of September 2015, DWSD went back to the 2013-2014 rate, added 4% for FY 14-15 and added approximately 11.3% for FY 15-16. This would create a water revenue requirement for a combined Flint/Genesee supply. In Section 1 d) of the letter, they state they would subtract GCDC current payments from that volume, leaving the amount to be paid by Flint. Remember, GCDC is paying the non-contract/non-customer penalty charges.

(1) The reported rate would be $662,100 monthly fixed and $8.93/mcf commodity. Based on 15 million gallons a day and a 30 day month, the monthly charge would be:

new rate

$662,100 + 15,000,000 gal x 30 days x 1 mcf / 7,480 gallons x $8.93 / mcf

$662,100 + $537,232.62 = $1,199,332.62 per month

Flint, over the last two seasons, has seen periods of water flow in the 20 to 25 mgd range due to water main breaks. This period has lasted 2 to 3 months. What is the additional cost if the monthly average was 21 mgd?

6,000,000 x 30 / 7,480 x $8.93 / mcf = $214,893.04 per month

main breaks

The only way for DWSD to provide water to Flint is a common meter at the county line and flow through a county water main. As previously stated, the Flint and GCDC have a contract regarding this potential circumstance (see 5.7 attached).

Assuming the fixed rate by DWSD is correct, the cost with the current commodity would be:

(2) $662,100 + 15,000,000 x 30 / 7,480 x $11.86 = $1,375,602.67

common county water line rate

And again, with water main breaks, the additional monthly cost would be $285,401.00.

Paragraph 1 d) of the DWSD letter recognizes this issue in the last sentence: "Depending on how water is provided to the combined GCDC/Flint customer, alternative rate structures may be appropriate."

(3) We can back into that alternate rate based on our knowledge of the DWSD rate structure. DWSD wants 60% of its revenue from fixed rate.

		Volume per month
GCDC fixed	$900,000	49,428 mcf
Flint fixed	$662,100	50,590 mcf
TOTAL	$1,562,100	100,018 mcf

Total commodity required is $1,041,400
Rate based on volume $10.41 would be the alternative rate

The adjusted rate for Flint would then be:

50% of fixed rate plus $10.41 per mcf
$781,050 + $15,000,000 + 30 / 7,480 x $10.41 = $1,407,320

And again, at this rate, the water main break situation could add $250,508 per month

Therefore, Flint's expected bill for DWSD supplied water for a nine month period with 2 months of high flow would be $13,166,896.

Procedure to Activate Supply

1. Agreement with DWSD and common rate for joint GCDC/Flint water supply would be required. Agreement needs to include separate billings to Flint and GCDC, Flint to pay directly to DWSD based on meter readings at Baxter and Potter and Station 2 on Flint plant site. GCDC makes no representation to the water quality - that is between Flint and DWSD. The agreement needs a termination transfer protocol for Flint exiting and GCDC remaining.

2. Separate agreement with Flint: back up supply was anticipated on an emergency basis. Nine months to a year of service requires a more detailed agreement. Water outage due to line break and cost to repair, etc. The agreement needs a termination clause if Flint is still on DWSD when GCDC is ready to turn on its water treatment plant in the fall of 2017.

3. The 72-inch line will be required to be reactivated. This will require flushing, pressure testing, and BAC-T sampling.

4. Station 2 meter needs to be calibrated and GCDC will need access to control the valves and read the meters.

5. Flint needs to reactivate the Dort Reservoir.

6. Flint should perform a significant water flush of the distribution system just prior to the switch over.

Flint Distribution System

The TTHM and lead issues here arising due to the water quality at the residential tap: Everyone agrees that the water leaving the water plant is clean, clear, and lead-free. At the residential tap, it has been shown to contain lead, is often brown in color, and has an odor. These are all indications of problems in the distribution system. The distribution system was built for a population of 250,000 people and major industrial use. Current population is below 100,000 and there is limited industrial use.

If Flint does not continue to make improvements/modifications to the distribution system, the problem at the residential tap will continue.

Concerns

Will the lead sampling protocols change based on Flint's switch back to DWSD?

What happens to water treatment plant personnel during this 9-month period? Will they be laid off or carried as an additional expense?

When Flint switches to KWA, will the staff be capable of treating the water or will the learning curve begin again?

What is the Desired Outcome?

It is the understanding of GCDC that all of the current samples that have been compiled at the Flint Water Treatment Plant have all tested within EPA and MDEQ guidelines. The emergency appears to be in the distribution of the water, which includes lead service leads to several residences located throughout Flint and not in the treatment of the water. As the treated water leaving the Flint Water Treatment Plant is within EPA and MDEQ guidelines, GCDC is confused as to what the emergency is at this time or why Flint would need to purchase water from DWSD. *The quality of the water leaving the Flint Water Treatment Plant is as safe to drink as the water that would be transmitted by DWSD to Flint.*

Given the facts as they have been provided to GCDC, if DWSD begins to supply Flint with water via GCDC, the elevated lead levels will not immediately disappear and Flint will be paying an additional million dollars plus a month over what it is currently paying to provide the same clean potable water to its residents. Additionally, by Flint receiving water from DWSD via GCDC, Flint will not be performing corrosion control measures on the DWSD treated water. This is important because once Flint begins to treat the raw water provided by KWA, the lead issue may resurface and continue until the corrosion control measures that will need to be restarted take effect, which GCDC estimates may take up to eight (8) months to establish the necessary film to separate the distribution system from the supply water.

The DWSD letter purposely pits Flint against Genesee County customers by offering a lower rate to Flint than is currently being offered to GCDC. And the delivery point is the same.

These are our quick thoughts on the matter. As time progresses, we will have more time to understand the issues and most likely additional concerns will present themselves.

Should you have any questions, do not hesitate to contact this office at your convenience.

WATER TRANSMISSION MAIN

ACQUISITION AGREEMENT

BY AND BETWEEN

CITY OF FLINT

AND THE

GENESEE COUNTY DRAIN COMMISSIONER AS COUNTY AGENCY

DATED MAY 30, 2014

approval, clearance, waiver, order or authorization of any person. organization, or entity; and (iii) do not conflict with, or result in any breach of, or default or loss of any right under (or an event or circumstance that, with notice or the lapse of time, or both, would result in a default), or the creation of any encumbrance pursuant to, or cause or permit the acceleration prior to maturity of any amounts owing under any indenture, mortgage, deed of trust, lease or other agreement to which the County Agency is a party, which failure, violation, conflict or breach would, in the aggregate, materially hinder or impair the consummation of the transactions contemplated by this Agreement.

5.4 Litigation. As of the Execution Date, there is no action, suit or proceeding pending or threatened against or affecting the County Agency before any governmental entity in which there is a reasonable possibility of an adverse decision which could have a material adverse effect upon the ability of the County Agency to perform its obligations under this Agreement or which in any manner questions the validity of this Agreement.

5.5 Due Diligence and Inspection. The County Agency acknowledges that it is being afforded the opportunity to conduct due diligence and investigation with respect to the transaction contemplated by this Agreement. The County Agency represents and warrants that it has conducted any and all such legal, factual, and other examinations, inquiries, investigations, and inspections, including conducting any tests, studies and examinations, that it, in its sole discretion, has determined necessary to complete such due diligence inspection to determine that the subject matter of this Agreement is suitable for the County Agency's intended use.

5.6 Environmental Matters. The County Agency represents and warrants that it has conducted any and all such legal, factual, and other examinations, inquiries, investigations, and inspections, including conducting any tests, studies and examinations, that it, in its sole discretion, has determined necessary to complete such due diligence inspection to have full knowledge of the environmental condition of the subject matter of this Agreement. County Agency shall enter into this Agreement subject to any and all environmental conditions present upon the subject matter of this Agreement.

5.7 Emergency Water Supply. The County Agency warrants that it will provide, to the extent the Detroit Water and Sewerage Department has available capacity treated water through the water main that is the subject matter of this Agreement in an emergency situation to Flint until such time as the Karegnondi Water Authority Water Transmission Pipeline construction is completed (which is estimated to be completed by May 2017) and the Karegnondi Water Authority is providing raw water to its customers.

The emergency supply of treated water to the Flint by the County Agency during the construction of the Karegnondi Water Authority Water Transmission Pipeline shall be at the prevailing rate and any additional charges, fees, special charges, and penalties, as billed by the Detroit Water and Sewerage Department to the County Agency.

If Flint shall need an emergency water supply after the Karegnondi Water Authority Water Transmission Pipeline has been installed and is operational, the County Agency will provide, to the extent the County Agency has available capacity, treated water through the water main that is the subject matter of this Agreement in an emergency situation to Flint. The emergency supply of treated water to Flint by the County Agency after the Water

Transmission Pipeline has been installed and is operational, shall be at the prevailing rate and any additional charges, fees, special charges, and penalties, if applicable, as billed by the Detroit Water and Sewerage Department to the County Agency.

ARTICLE 6
COVENANTS OF FLINT

Flint covenants and agrees with the County Agency as follows:

6.1 Operation and Maintenance of the Water Main until Closing. Between the Execution Date of this Agreement and the Effective Date of this Agreement, Flint shall:

a Operate the Water Main in the ordinary course of business; and

b. Maintain all books and records relating to the operation of the Water Main in the ordinary course of business; and

c. Fix any known breaks or leaks in the Water Main, except those set forth on **Exhibit F**; and

e. Promptly notify the County Agency of any emergency or other change in the normal course relating to the Water Main (or communications indicating that the same may be contemplated.

6.2 Litigation and Claims. Flint shall promptly inform the County Agency in writing of any Claims of which Flint is or becomes aware that are or might reasonably be expected to become the subject of litigation affecting the Water Main or the transactions contemplated by this Agreement.

6.3 Notice of Changes. Flint shall inform the County Agency in writing if it becomes aware that any representation or warranty made by Flint in this Agreement has ceased to be accurate or if Flint becomes aware of the occurrence of any breach of any covenant or other agreement required by this Agreement to be performed or complied with by Flint.

ARTICLE 7
COVENANTS OF THE COUNTY AGENCY

The County Agency hereby covenants and agrees with Flint as follows:

7.1 Cooperation. Subject to the terms and conditions of this Agreement, the County Agency shall cooperate with Flint to use its best efforts to secure all necessary consents, approvals, authorizations, exemptions and waivers from all persons and entities as shall be requested by Flint or required to be obtained in order to consummate the transactions contemplated hereby.

7.2 Litigation and Claims. The County Agency shall promptly inform Flint in writing of any claims (or communications indicating that the same may be contemplated) of which the County Agency is or becomes aware that are or might reasonably be expected

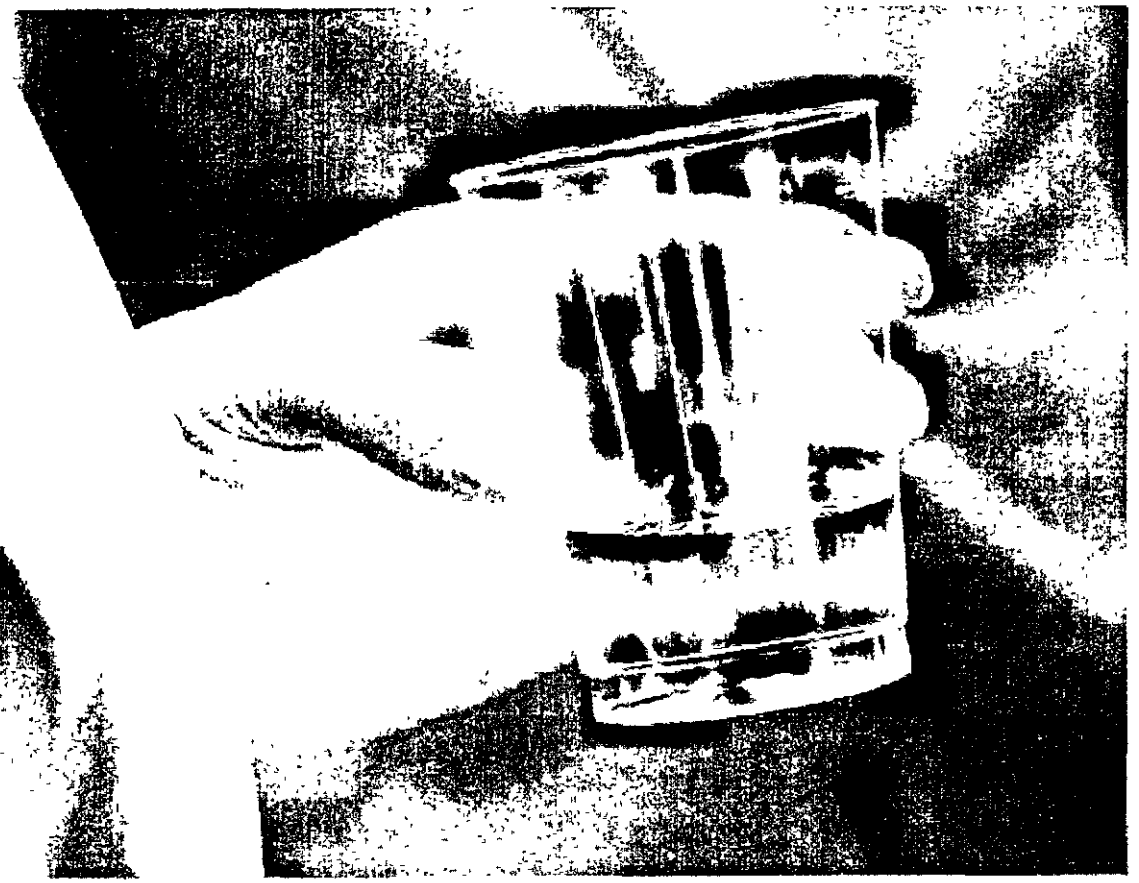
How Flint water crisis emerged



Time for change

The Flint city council voted 7-1 in March 2013 to stop buying Detroit water and join the Karegnondi Water Authority, a new pipeline project that will deliver water from Lake Huron. The state agreed with the water switch, which was projected to save the city $19 million over eight years. Emergency manager Ed Kurtz officially signed the agreement April 16, 2013.

Scott Olson

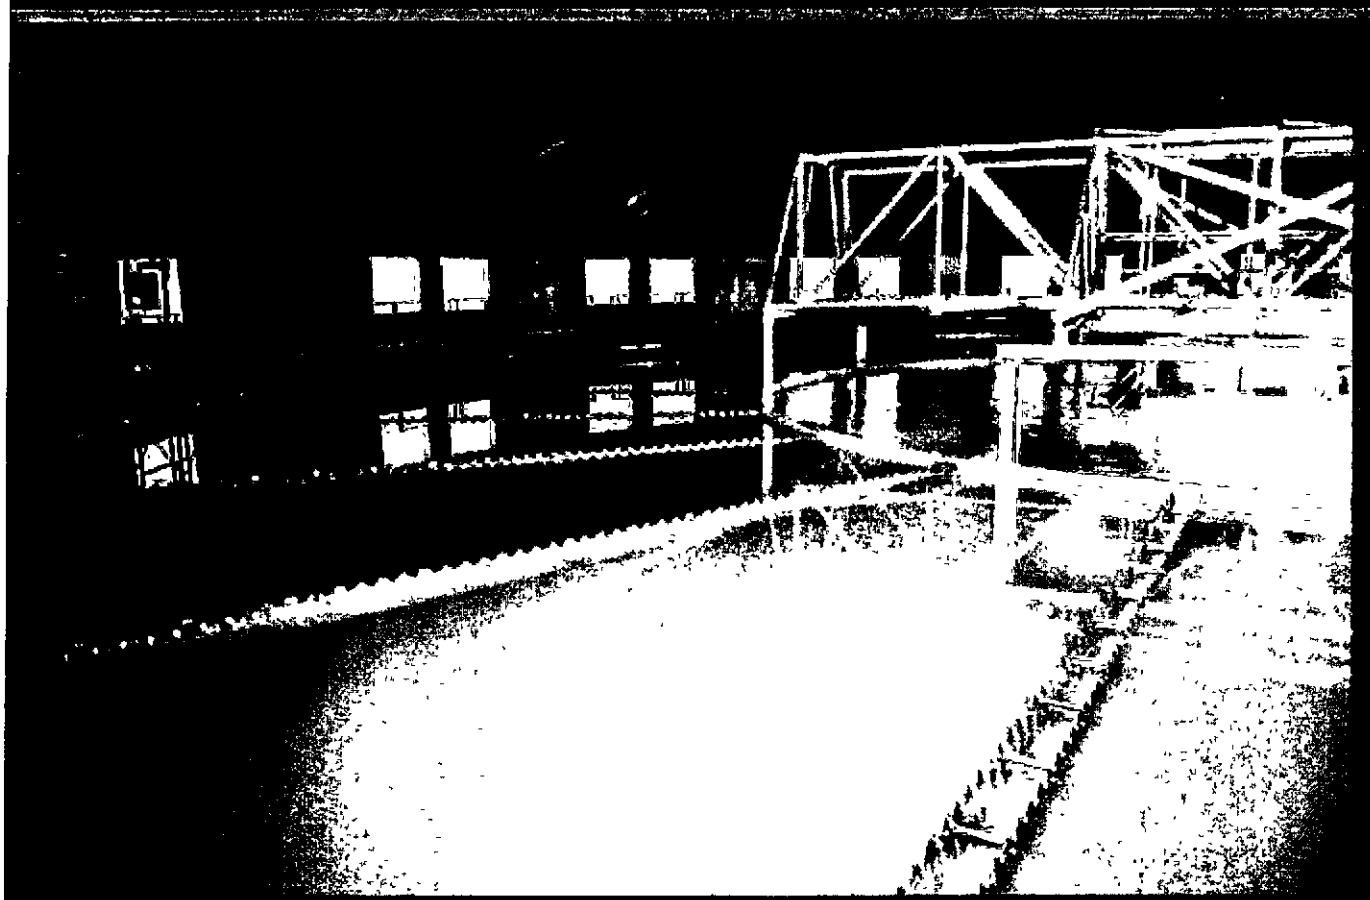
Detroit backs out

The day after joining the KWA, Detroit notifies Flint it will stop selling the city water as of April 2014. With the KWA not expected to be completed for roughly 3 years, Flint was forced to find a new source of drinking water. In the eight months following the Detroit notification of shutoff, the city invests more than $4 million into its water plant.

Michelle Tessier

To the river

In the months leading up to Detroit's water shutoff, there are discussions about where Flint will receive its water. In mid-March 2014, the Flint River is announced as the new source of Flint's drinking water. Leaders, including city council members, city employees and state officials, gathered at the city's water plant for the official groundbreaking. Mayor Dayne Walling says the plan for the switch was implemented by state-appointed Emergency Manager Darnell Earley.



The river plan

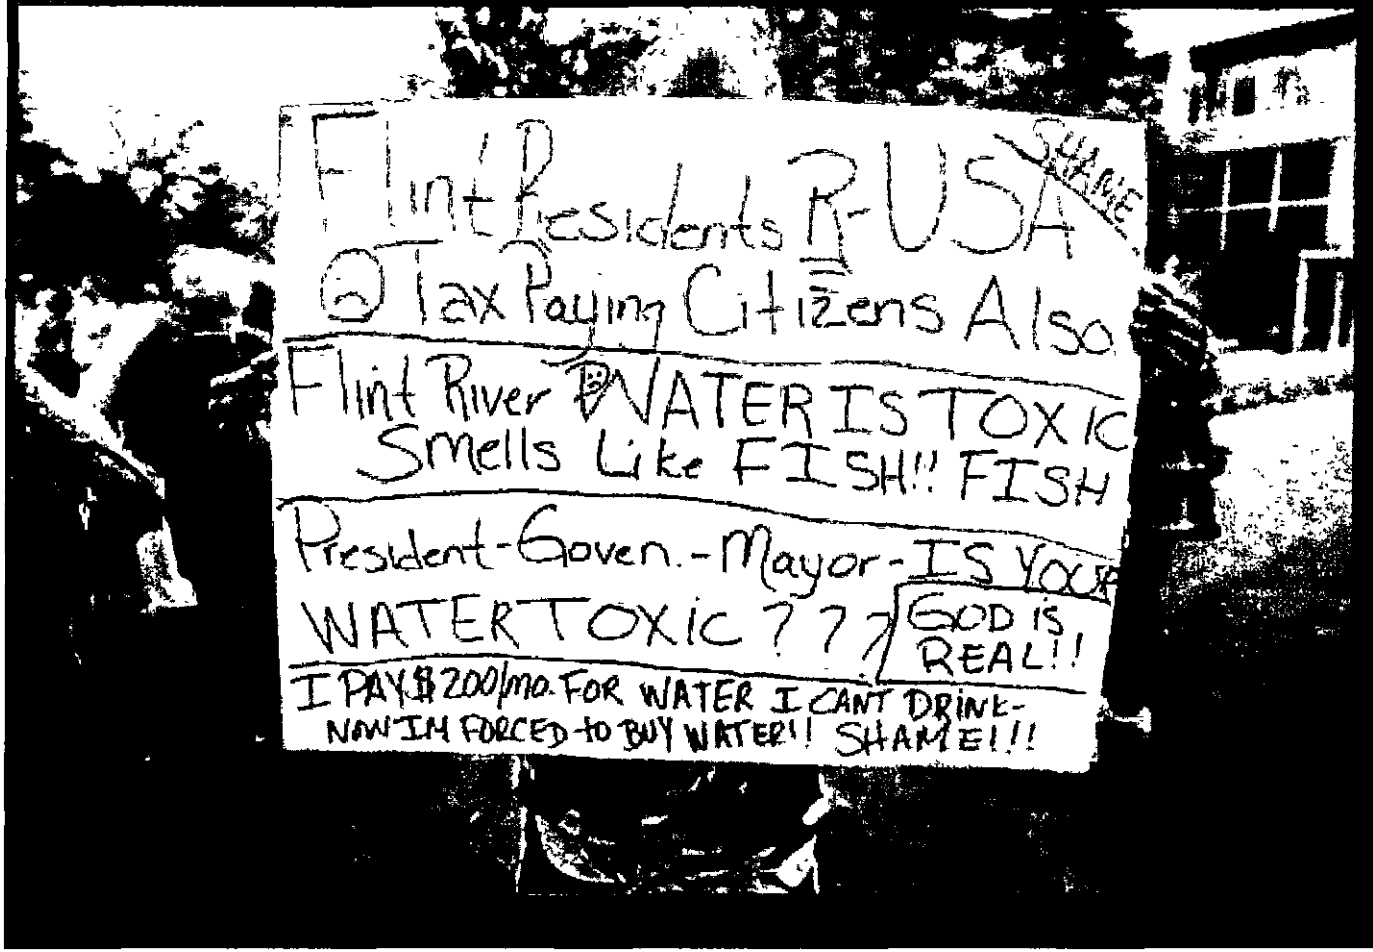
Flint's new drinking water plan calls for the city to pump water from the Flint River into the city's water plant, where it would be treated for distribution. The plan required millions of dollars in upgrades to the plant, since the city was previously purchasing already-treated water from Detroit. The switch was proposed to save the city $5 million in less than two years.

Samuel Wilson

Push the button

On April 25, 2014, after brief permitting and disinfection-system delays, Mayor Dayne Walling officially turned off the Detroit water feed. "Water is an absolute vital service that most everyone takes for granted," Walling said. "It's a historic moment for the city of Flint to return to its roots and use our own river as our drinking water supply."

Dominic Adams | dadams5@mlive.com



Complaints pour in

In the weeks following the switch, some residents begin buying bottled water as they complain of poor-tasting and- smelling city water. The city adds extra lime to the water in an attempt to combat hardness, but Mayor Dayne Walling and state-appointed emergency manager Darnell Earley continued to tell residents the water is safe. "It's a quality, safe product," Walling said. "I think people are wasting their precious money buying bottled water."

Erin Kirkland | MLive.com

Boil your water

Nearly four months after the switch, the city issues a boil-water advisory after fecal coliform bacteria was discovered in water on the city's west side. More boil-water advisories are issued as testing reveals more bacteria in the water system. "Usually, coliforms are a sign that there could be a problem with the treatment or distribution system," the city said in a statement. The city added chlorine, a disinfectant, in the area of the advisory and attempted to flush the system by opening hydrants.

GM says no

Complaints continue about the city's new water supply. General Motors, on Oct. 13, 2014, said it will no longer use the river water at its engine plant because of fears it will cause corrosion. The company reached a temporary agreement to buy Lake Huron water from Flint Township for Flint Engine Operations on West Bristol Road.

TTHM arrives

On Jan. 2, 2015, the city mails a notice to its customers saying it is in violation of the Safe Drinking Water Act due to the elevated presence of trihalomethanes -- or TTHM -- a group of four chemicals that are formed as a byproduct of disinfecting water. Over many years, the chemicals could cause liver, kidney or central nervous system problems and an increased risk of cancer. Three samples in 2014 were so high they guaranteed a quarterly average more than the law allows -- even if there's no trace of the contaminant in fourth-quarter testing

Call for change

Less than a week after the TTHM warning was released, some city council members called for the city to stop using Flint River water. Emergency Manager Darnell Earley announced he would hire a water consultant to try and improve water quality. The Detroit Water and Sewerage Department tells the city it is "ready, willing and able" to start selling Lake Huron water to Flint again, and wouldn't charge a $4 million connection fee. The city declines Detroit's offer.

Share 36 12 / 23

Full-blown controversy

The controversy surrounding Flint water reaches a fever pitch Jan. 20, 2015, when environmental activist Erin Brockovich weighs in on the issue on Facebook. "Now is not the time for the blame game ... Detroit has failed and Flint jumped ship. So much for local control ... everyone is responsible from the top down: USEPA, Michigan Department of Environmental Quality, the State of Michigan and the local officials," Brockovich's Facebook message says. Protests and complaints continued from residents

Addressing the problem

After Mayor Dayne Walling asked the state for help addressing the water concerns, state officials reassured the city it was working on the problem. "(Emergency manager) Jerry Ambrose and his management team are working diligently to ensure Flint residents have access to clean, safe water," spokesman Terry Stanton said. Walling claims the challenges of treating river water were "underestimated" by those who made the decision.

Looking for a fix

The Detroit Water and Sewerage Department director says she's willing to talk about providing emergency water to Flint — even without a long-term deal between the two cities. But emergency manager Jerry Ambrose on Jan. 29 says Detroit is not in the city's plans. Gov. Rick Snyder awarded Flint $2 million on Feb. 3 to find leaks in city water lines and to replace a wastewater incinerator — moves officials said will free up money for

Experts weigh in

Water expert Bob Bowcock, who was sent to the city by activist Erin Brockovich, calls for the city on Feb. 17 to switch back to Detroit water. Representatives from Veolia North America, a city-hired water consultant, say the next day Flint has problems with sediment and discoloration in its water but it is safe to drink and meeting all state and federal standards. The city announces it is meeting TTHM guidelines for the first time since the switch to the river.

Investing in change

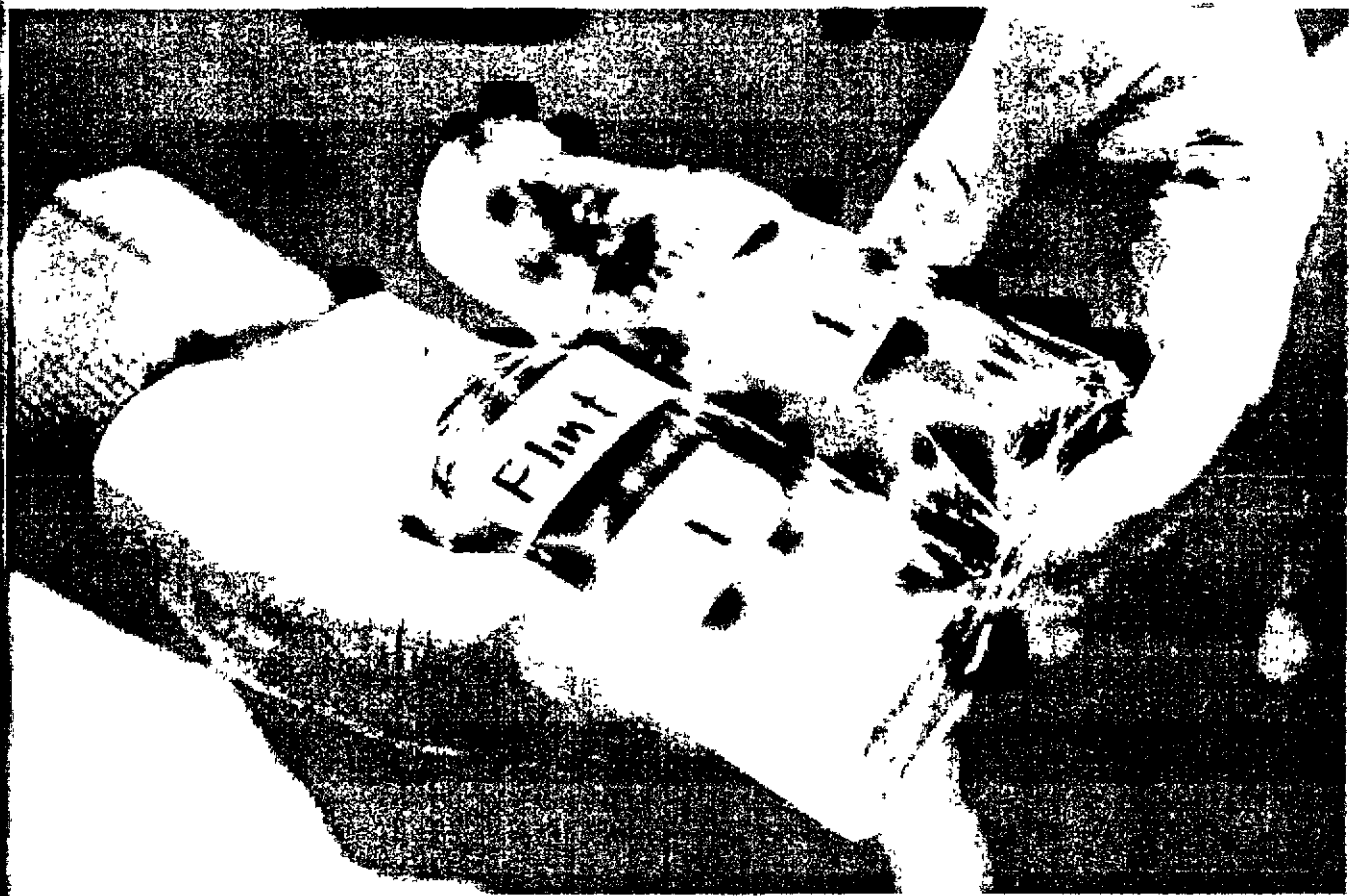
On March 18, city-hired water consultant Veolia North America calls for roughly $3 million in changes at the water plant to get TTHMs in check. The next day, the city announces it will restructure four drinking water bonds, allowing it to postpone $2.2 million in payments and spend the available cash on water safety and quality. A new $1.6 million carbon filter system will be installed in July.

Still not assured

Despite the city's proposed invesiment in the water system, the city council voted 7-1 to "do all things necessary" to reconnect Flint to Detroit water. "It is incomprehensible to me that (seven) members of the Flint City Council would want to send more than $12 million a year to the system serving Southeast Michigan, even if Flint rate payers could afford it. (Lake Huron) water from Detroit is no safer than water from Flint," emergency manager Jerry Ambrose said in response to the vote.

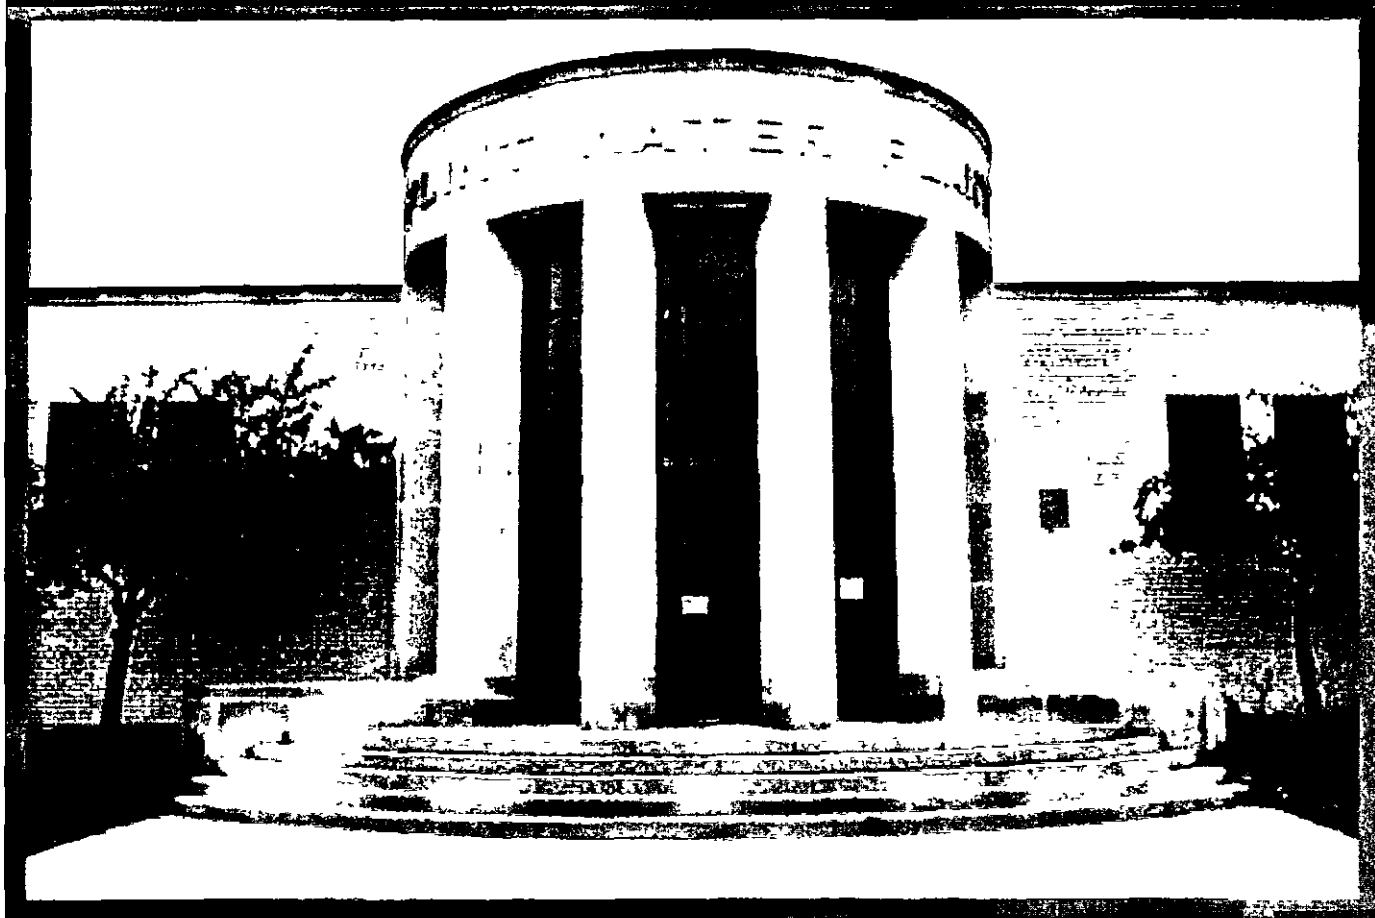
To the courts

A lawsuit is filed in early June asking a judge to order Flint to reconnect to the Detroit water system. A federal judge declines when he denies a preliminary injunction. The suit is eventually dismissed. However, Genesee Circuit Judge Archie Hayman issues an emergency injunction Aug. 7 in a separate lawsuit ordering the city to roll back water and sewer rates by **35 percent**, to end a ready-to-service fee, to repay its water and sewer fund by more than $15 million, and to stop water disconnections and liens for past-due bills, effective immediately.



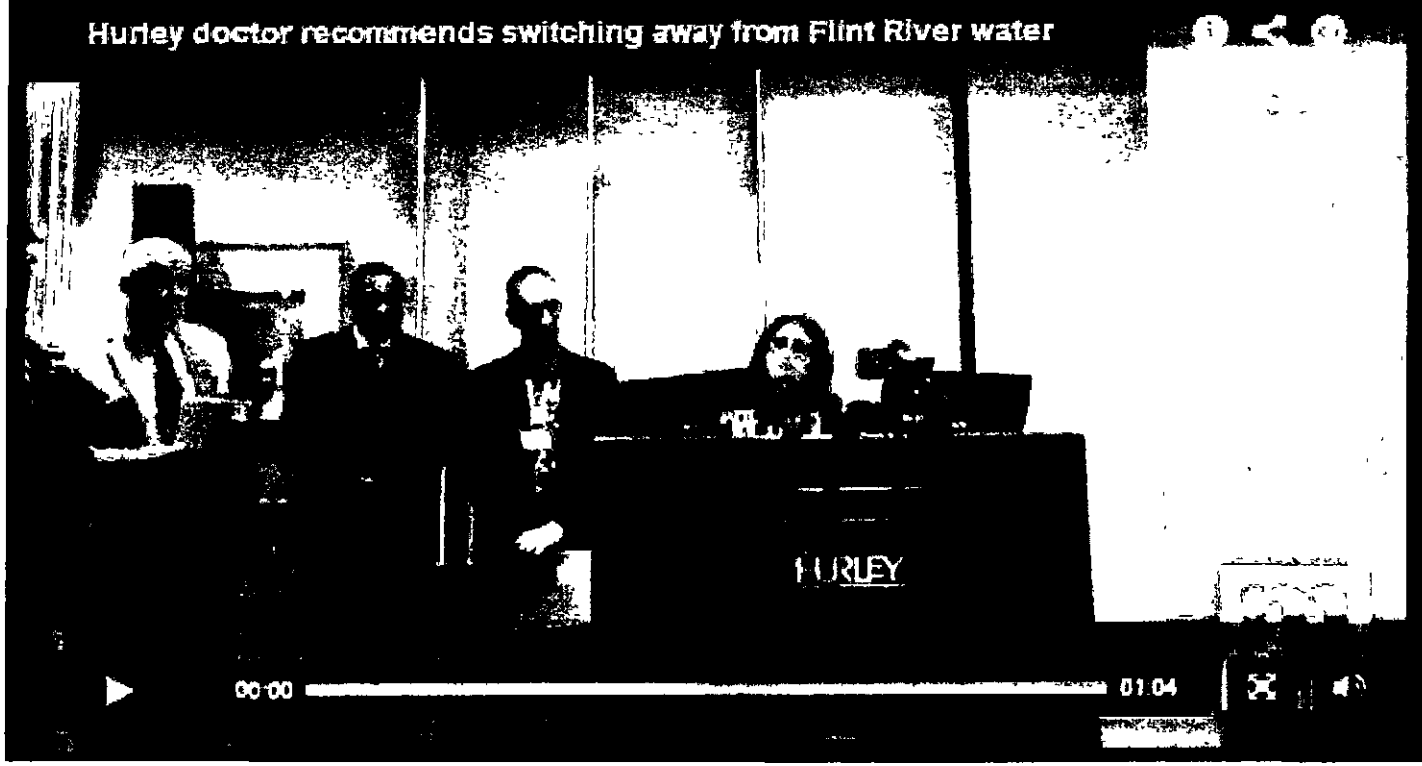
Lead leaching in

Despite continued water quality protests, fears are renewed when Virginia Tech Professor Marc Edwards claims Sept. 2 that the corrosiveness of the water is causing lead to leach into residents' water. "On a scientific basis, Flint River water leaches more lead from plumbing than does Detroit water," the report concludes. The state and city say the water meets state and federal safety standards, but will introduce a lead-reduction plan by 2016.



TTHM levels fall

The city was notified it was no longer in violation of the Safe Drinking Water Act on Sept. 2 after the city was able to drop TTHM amounts to acceptable levels. The city will no longer have to send water customers notices warning about TTHM levels. The state claimed improved filter technology and optimization of water treatment plant and distribution system processes helped lead to the drop.



Lead levels spike

Despite claims the water is safe, testing data obtained Sept. 19 shows 10 percent of homes tested in the city saw an increase in lead after the switch to the Flint River. Findings released Sept. 24 by Hurley Medical Center shows more Flint infants and children are found with elevated levels of lead in their blood since the city switched to using the Flint River. State officials dispute the findings. Mayor Dayne Walling says Flint will issue lead-in-water warnings.

Public health emergency

On Oct. 1, Genesee County officials declare a public health emergency urging residents to not drink the city's water until it is checked for lead or they have installed an approved water filter. The commissioners said they are hoping their declaration will move Gov. Rick Snyder to declare a state of emergency to handle [illegible]

Governor's action steps

The next day, Gov. Rick Snyder's administration announces it is committing up to $1 million to purchase water filters for Flint. The plan also includes immediate testing of water at Flint schools at state expense, expansion of lead exposure testing for individuals and expediting treatment of Flint water to better control pipe corrosion. Snyder's plan does not include switching back to Detroit water, although it is reviewing the option.

I'm confused by this spreadsheet. At this morning's meeting the supplemental (apart from the filters) discussed was for $6m to reconnect plus $1.5m for 10 FTEs, 8 of which I understood to be in MDHHS for nurse case managers and lead abatement investigators. This spreadsheet seems to be $1.5m short of this morning's conversation. I don't have a funding source for the positions in FY 2016. If we're absorbing within existing resources I'll need a GF transfer and work project to capture FY '15 lapse.

Subject: DRAFT City of Flint Solution
Importance: High

Colleagues,

Please find attached summary of where the State Budget Office believes we are based on this morning's meeting hosted by Director Wyant. This reflects the State commitment of resources towards provision of filters, reconnecting to Detroit Water & Sewage, and home/school/other inspections. Your quick review would be appreciated, since the Governor wants to share with legislative leaders yet today. I have included your budget officers to assist in the review.

Open issues are: (1) where to place the appropriation for the Flint re-connect and (2) whether (and what) boilerplate we may need/want.

Thanks.

Nancy Duncan
Deputy State Budget Director

Terry:

Dave Murray in the gov's office is sending me your way.

I'm trying to understand the Emergency manager timeline in Flint -- which he says you have. Also, can you send me a copy of the letter in which Detroit told Flint that it was ending the water supply to Flint?

Was it not the EM's decision about whether to turn to the Flint River? Dave is saying that Detroit refused to provide them service?

Any guidance?

312 543 4883

Best,

Monica

Thx.

Was there any vote at all from Flint City Council to use Flint water once DWSD sent that notice and city had to make determination in spring of 2014??

Harvey, Attached are various documents and press reports of the City Council's vote in March 2013 to join KWA. We have not located the actual resolution and it is not on the City's website. It is interesting that the only no vote explained he wanted to just use Flint River water. Wayne

Flint residents should be drinking Flint River water by mid-April, officials say

Sarah Schuch | sschuch@mlive.com By **Sarah Schuch | sschuch@mlive.com**
on March 12, 2014 at 6:10 PM, updated March 12, 2014 at 6:13 PM

FLINT, MI – If all goes as planned, Flint residents will have Flint River water flowing from their taps by mid-April.

Flint city leaders and Flint Water Treatment Plant officials held a ceremonial groundbreaking Wednesday, March 12, to mark the start of the process of drawing water from the Flint River.

"This is an important day for us as we break ground on this new project in the city of Flint," said Flint Mayor Dayne Walling. "The river is an invaluable asset."

The city has bought its water from Detroit, but that contract was terminated when Flint signed on to purchase 18 million gallons of raw water per day from the Karegnondi Water Authority.

The under-construction pipeline will bring raw Lake Huron water to Flint and Genesee County when it is complete by the end of 2016.

People in the city will drink Flint River water until the pipeline is complete. Detroit Water and Sewerage Department Director **said it would stop selling water to Flint and Genesee County on April 17, 2014.**

In the next couple of weeks, six more employees will be hired to help keep the water treatment plant better staffed as it is used to its full capacity. After the new hires are on board, there will be a total of 26 employees with at least four employees working at any given time, compared to the one on duty now.

The plant, which is used as a backup water supply to Flint and Genesee County, will go from being used four times a year to year-round.

Work will also take place within the next two weeks to update the electrical system from the 1950's, said Brent Wright, plant superintendent.

After Detroit cancelled its water contract here, **Flint has spent about $4 million in upgrades at the water treatment plant in the past eight months.**

"What we're doing with the upgrade is increasing reliability," said Daugherty Johnson, utilities administrator at the water treatment plant.

The treatment plant could easily be used now if it had to be used, Wright said. There is 55 million gallons of water already in storage. But the process now is to make sure the plant is well staffed and updated to handle the greater use, Wright said.

In the next year, a small pump lift station will also be built.

"This is a tremendous step in the process of securing Flint's water future," Walling said.

When it's time to switch over, the process should be smooth and effortless, Wright said. Before the switch is complete, the Flint water treatment plant will already be fully operational, testing the process a couple weeks before the process is complete.

Then once they are ready to go, plant officials will simply turn off the switch for the 72-inch pipeline from Detroit and turn on the switch for the 36inch pipeline that will draw in water from a location in the Flint River near the plant.

The target date for the switch is mid-April. On average, the plant will see 12 million gallons of water going through daily.

When Wright started working at the plant 23 years ago, he was told they would be starting the process to no longer purchase water from Detroit. And now it's happening.

"We're finally doing it. And I get to see it," Wright said.

Sam Muma, president of AFSCME Local 1600, said it's good to see the plant being used to its full potential and for the river to be utilized to its full potential.

In all, the upgrades and further use of the water treatment plant will be a benefit to the community, Muma said.

"This is a good thing for the community. It will provide jobs," Muma said. "Anytime you can be self-sufficient is a good thing. Doing this should eventually decrease water rates for the residents in Flint."

The long-term goal is to have more water efficiency and more cost savings in water rates.

The hope is to also bring school children out to the plant to have educational tours.

"Today marks the beginning of the new narrative of the city of Flint," said Flint's Director of Public Works Howard Croft.

Flint gets final permit approvals from state to use Flint River for drinking water

Ron Fonger | rfonger1@mlive.com By **Ron Fonger | rfonger1@mlive.com**
on April 10, 2014 at 4:00 PM, updated April 10, 2014 at 4:10 PM

FLINT, MI -- Bottoms up, Flint.

The state of Michigan has issued the **permits needed** for the city to begin using the Flint River for drinking water, a major step toward ending water purchases from the city of Detroit as early as next week.

"They've got a series of construction permits" that were issued Wednesday, April 10, said Brad Wurfel, a spokesman for the state Department of Environmental Quality. "They are **racing** to get all this work done."

The permits have been on Flint's to-do list since the Detroit Water and Sewerage Department said it was terminating its contract to sell water here on April 17.

That deadline was issued one year ago, and city and state water officials have been working and consulting on required upgrades at Flint's water treatment plant since.

Flint spokesman Jason Lorenz said today, April 10,that the city is still targeting April 17 as the day to shut off Lake Huron water -- treated and pumped here by DWSD -- and to turn on the intakes into the river.

Because work is still going on inside and outside the city's treatment plant, the exact time and date for the switch hasn't been set yet, Lorenz said.

Earlier this week, Flint emergency manager Darnell Earley called the city's ability to cut out the cost of water purchases from Detroit a "monumental change" for the city.

"The city of Flint will be able to control water costs," Earley said. "I'm kind of glad we're not a part of that discussion (about the future of the Detroit water system) anymore."

A consultant hired by Earley is expected to recommend new water rates during a City Council committee meeting at 5 p.m. today. The emergency manager has already said **rates will not be reduced** because of upgrades that are needed in Flint's water distribution system.

Flint officials will need that infrastructure upgrade whether they use river or lake water. City officials have signed an agreement to use Lake Huron water supplied by the Karegnondi Water Authority once the pipeline it is building is completed -- something that's expected to happen in 2016.

Re: Increase in average day and maximum peak day by GCDC

Dear Mr. Wolfson:

GCDC has received a formal request from Flint to receive DWSD water via GCDC per GCDC's contract with Flint. GCDC's rates are currently based on 12 mgd average day and 25 mgd maximum peak day. Does DWSD have the capacity to increase demand to GCDC to 28.5 mgd average day and 51 mgd peak day? If so, could you please provide GCDC with the rates for 28.5 mgd average and 51 mgd peak day through June 30, 2016?

As you are aware, time is of the essence. I would respectfully ask that if at all possible you could provide answers to the above two (2) questions stated above by 5:00 p.m. today. It is anticipated that if DWSD has the capacity and all of the issues between Flint and GCDC are resolved, GCDC anticipates providing Treated Water to Flint within the next seven (7) days.

If you should have any questions or concerns regarding this communication, please feel free to contact me at 810-569-0352 or via email at kkilby@mcgrawmorris.com.

Sincerely,

MCGRAW MORRIS P.C.

Hey guys,

As you probably saw at the news conference today, the State and CS Mott Foundation are pledging money for the switch based upon the rates quoted by DWSD ($662,100 per month and commodity rate of 8.93/Mcf for FY 2015-2016. Please confirm you are going to honor those rates. I am balancing a house of cards here and this could put this in the ditch.

Tony

On Thu, Oct 8, 2015 at 8:54 AM, Kevin K. Kilby <kkilby@mcgrawmorris.com> wrote:

Tony –

If we want to get this deal completed fast, here is what needs to happen. We just need a quick letter from DWSD stating that DWSD has the capacity in its system to service Flint and the GCDC may provide Flint with water. GCDC will continue to receive all billing from DWSD and invoice Flint for all increases pursuant to the Water Transmission Main Agreement ("Agreement"). Basically, Flint becomes a water customer of GCDC pursuant to the Agreement.

John is meeting with Brent today. Assuming we can get the letter from DWSD and Flint is able to accomplish what it needs to get done (what John and Brent discuss) water may be available as early as Monday. We can work out our agreements after the fact as they are all straight forward and minimal.

I would have Howard or Brent determine where they are going to flush the 5 million gallons from the transmission main (this will be a topic of discuss at the meeting with John and Brent). Pursuant to our conversations with Brent yesterday, they cannot physically run the 5 million gallons through the plant. They may have to eject it into the Flint River or maybe the pond at the golf course. This may require a NPDES permit from the State.

IF DWSD does not agree to the easy way (stated above), then we are going to need a three (3) or four (4) party agreement. This would include Flint, GCDC, DWSD, and maybe GLWA. This will slow us down greatly and with the given timeline, it is not the preferred method.

Sincerely,

Kevin Kilby

Subject: RE: letter from John O'Brien

I agree with Dennis... Consistent with what I think we (Wayne & I) said at the DEQ meeting yesterday... the county drain commission has more knowledge & experience running a water system than we (Treasury) do. That is why we were trying to get some outside verification. We were not able to get an outside engineering firm engaged due to the timeframe. Our fallback was Jeff Wright – the drain commissioner. He calculated $13.2mm. We did a 'back of the envelope' analysis of $10.5mm late last week. That was based off an email we rec'd from Dennis that summarized the DWSD/City proposal. We were not a part of the $12mm calculation that is in the 'public' realm now. I believe that was a result of a meeting DEQ/Dan had with the City earlier this week.
John indicated yesterday he would recommend/prefer to err on the side of caution for the amount requested from the legislature. Plus, keep in mind whatever number you choose assumes completion of KWA in June. If the project slips a month (& it very well could given it is a major capital project) the cost of the reconnect is going to go up a $1mm+ per month.
If it is possible I would recommend using the $13.2mm (hoping the project will be done as scheduled) given the county is in the best position to make that estimate. We don't have any info that would contradict that number.

Here is the letter from the Genesee Co Drain Commission. My interpretation of the contents would be their estimate is $13.2mm (vs the $12mm discussed this morning).

They included their contract with the City. Sec 5.7 references prevailing rates the City would be charged; that is different than the rates reflected in the $13.2mm. So that contract may need to be modified.

They also raise some other items (under *Procedure to Activate Supply* – p.3) that may have cost implications.

It looks like DEQ is mulling over changes to state law to allow for the financing of service lines with DWRF monies. Did you want me to respond?

I think with a change in state law we can make the loans, but we would not be able to leverage them in future tax-exempt pools as they would be considered private activity; much like the SWQIF loans for footing drain disconnects. It is worth noting, we have not leveraged the drinking water program since 2007 and have approximately $50 million annual program resources for each of the next five years.

Thanks
John

I'm not sure you saw this. Would we be able to make loans to communities to replace private service line? Let me know what you think

To: Shekter Smith, Liane (DEQ); Butler, Sonya (DEQ)
Subject: Statutory changes to Part 54
Importance: High

If we are going to clarify that Part 54 can cover replacement of private service lines, is this the best way to do? I made changes to the definition of waterworks systems to include private service lines, and changes the requirement the water supplier had to maintain and operate the private service lines.

Please let me know ASAP what you think.

Thanks,
Maggie

324.5403 Definitions; P to W.

Sec. 5403.

As used in this part:

(a) "Priority list" means the annual ranked listing of projects developed by the department in section 5406.

(b) "Project" means a project related to the planning, design, and construction or alteration of a waterworks system.

(c) "Project refinancing assistance" means buying or refinancing the debt obligations of water suppliers if construction activities commenced, and the debt obligation was incurred, after the effective date of this part.

(d) "Public water supply" means a waterworks system that provides water for drinking or household purposes to persons other than the supplier of the water, except for those waterworks systems that supply water to only 1 house, apartment, or other domicile occupied or intended to be occupied on a day-to-day basis by an individual, family group, or equivalent.

(e) "State drinking water standards" means rules promulgated under Act 399 that establish water quality standards necessary to protect public health or that establish treatment techniques to meet these water quality standards.

(f) "Water supplier" or "supplier" means a municipality or its designated representative accepted by the director, a legal business entity, or any other person who owns a public water supply. However, water supplier does not include a water hauler.

(g) "Waterworks system" or "system" means a system of pipes and structures through which water is obtained or distributed and includes any of the following that are actually used or intended to be used for the purpose of furnishing water for drinking or household purposes:

(i) Wells and well structures.

(ii) Intakes and cribs.

(iii) Pumping stations.

(iv) Treatment plants.

(v) Storage tanks.

(vi) Pipelines and appurtenances.

(vii) Private residential service lines.

~~(vii)~~ (viii) A combination of any of the items specified in this subdivision.

324.5409 Application for fund assistance; contents; availability of revenue sources; acceptance of applications by department; liability for incurred costs.

Sec. 5409.

(1) A water supplier whose project plan is approved or under review by the department under section 5407 may apply for assistance from the fund by submitting an application to the department. A complete application shall include all of the following, if applicable, as determined by the department:

(a) If assistance is in the form of a loan, financial documentation that a dedicated source of revenue is established, consistent with obligations of debt instruments existing at the time assistance is requested, and pledged to both of the following purposes:

(i) The timely repayment of principal and interest.

(ii) Adequate revenues to fund the operation and maintenance of the project.

(b) Evidence of an approved project plan.

(c) A certified resolution from a water supplier that is a municipality, or a letter of appointment from a water supplier that is not a municipality, designating an authorized representative for the project.

(d) A certification by an authorized representative of the water supplier affirming that the supplier has the legal, institutional, technical, financial, and managerial capability to build, operate, and maintain the project. The water supply does not need certify it will operate and maintain any portion of the project that funds the replacement residential private service lines.

Wayne/Randy,

Per your request, I contacted Jerry Ambrose regarding if the Flint City Council voted to approve drawing water from the Flint River at some point after notification was received that the DWSD contract would be closed.

Jerry does not specifically remember this issue appearing before the City Council.

His opinion was that once the DWSD contract was terminated there was no reason to issue an affirmative vote on the Flint River because no other options were available.

However, he did indicate that the definitive answer would be in the City Council minutes.

If additional follow-up on this issue is necessary, let me know.

Subject: RE: letter from John O'Brien

I agree with Dennis... Consistent with what I think we (Wayne & I) said at the DEQ meeting yesterday... the county drain commission has more knowledge & experience running a water system than we (Treasury) do. That is why we were trying to get some outside verification. We were not able to get an outside engineering firm engaged due to the timeframe. Our fallback was Jeff Wright – the drain commissioner. He calculated $13.2mm. We did a 'back of the envelope' analysis of $10.5mm late last week. That was based off an email we rec'd from Dennis that summarized the DWSD/City proposal. We were not a part of the $12mm calculation that is in the 'public' realm now. I believe that was a result of a meeting DEQ/Dan had with the City earlier this week.
John indicated yesterday he would recommend/prefer to err on the side of caution for the amount requested from the legislature. Plus, keep in mind whatever number you choose assumes completion of KWA in June. If the project slips a month (& it very well could given it is a major capital project) the cost of the reconnect is going to go up a $1mm+ per month.
If it is possible I would recommend using the $13.2mm (hoping the project will be done as scheduled) given the county is in the best position to make that estimate. We don't have any info that would contradict that number.

Here is the letter from the Genesee Co Drain Commission. My interpretation of the contents would be their estimate is $13.2mm (vs the $12mm discussed this morning).

They included their contract with the City. Sec 5.7 references prevailing rates the City would be charged; that is different than the rates reflected in the $13.2mm. So that contract may need to be modified.

They also raise some other items (under *Procedure to Activate Supply* – p.3) that may have cost implications.

> Good Afternoon,
>
> I have examined the portion of the 2014 Genesee/Flint contract in question. To ensure a complete understanding, I discussed that matter with Flint attorney Tony Chubb. Two options exist:
>
> 1.) Honor the provision. The City is waiting for a new quote from Detroit for what the countywide rate would be. Note that the rate is expected to be lower than the county is currently paying per unit, because a new contract for water would increase the quantity purchased (estimated to double). Also, I am told that credit risk is a factor for the per unit cost that Detroit charges, and so the county rate might save the city the cost of their poor credit rating. The County told Tony that this option can be implemented quickly (next week) if the City accepts the terms as presented.

2.) Because the contract provision only applies if the county is billed for Flint's water, a way around this provision may exist if the City signs a water agreement and is billed directly with Detroit. This way, the county wouldn't be out of pocket for the new capacity, though estimations of Flint's consumption may be necessary because of technical limitations (lacking water meters into Flint). This may result in the lowest rate for the City, however Tony was clear that negotiation of a brand new contract would take weeks, not days.

These are the only two options that the City is currently aware of, however a third option may be possible if the City, County, and Detroit are willing to communicate more and collectively work toward a speedy transition back to Detroit water.

APPROVAL

Municipality Code: 257552
Fiscal Year Ended: 9/2014

Dear Chief Administrative Officer:

Thank you for submitting a Qualifying Statement for Karegnondi Water Authority to the Michigan Department of Treasury on October 8, 2015. Based upon the information provided in the Qualifying Statement, we have determined that Karegnondi Water Authority is in material compliance with the criteria identified in Section 303(3) of Public Act 34 of 2001.

Karegnondi Water Authority is now authorized to issue municipal securities under this Act without further approval from the Department. This authorization will remain in effect for six months plus 30 business days after the end of your next fiscal year, or when the Department has made a new determination, whichever occurs first.

Within 15 business days of completing the issuance of any municipal security the municipality shall file with the Department a Security Report and all documents required in Section 319 of Public Act 34 of 2001. The Security Report can be found on our website, Michigan.gov/Treasury, by clicking on Local Government Services, Municipal Finance, Municipal Finance Forms, and 3892. The Security Report and accompanying documents may be emailed to Treas_MunicipalFinance@Michigan.gov or mailed to the address below. If emailing, the subject line must read the same as the file name of the attached documents.

If you have any questions, contact the Division at (517) 373-3227.

Sincerely,

Suzanne Schafer, Administrator
Local Government Financial Services Division

AMENDED APPROVAL
Municipality Code: **25-7-552**
Application ID No: **1305**

Jeff Wright, CEO
Karegnondi Water Authority
G-4610 Beecher Road
Flint, MI 48502

Dear Chief Administrative Officer:

Thank you for submitting to the Department of Treasury an Application for the State Treasurer's Approval to Issue Long-Term Securities under Section 303(7) of Public Act 34 of 2001, for the purpose of acquiring, constructing and equipping a water system to provide raw untreated water to the Local Units, together with all and necessary appurtenances and attachments thereto.

Based upon the information provided, the Department of Treasury has determined that the Authority has indicated the authority to issue the municipal security requested; projected the ability to repay the municipal security when due; and, adequately addressed any non-compliance with Section 303(3) of Act 34. This determination supersedes our previous determination dated February 28, 2014.

This amended approval is for the Water Supply System Bonds (Karegnondi Water Pipeline), Series 2015, in an amount not to exceed $79,500,000, which mature by no later than November 1, 2045. In approving this application, the Department has relied upon information supplied by the municipality which would indicate the probable revenues pledged for the payment of the municipal security will be sufficient to pay the principal thereof and interest thereon when due. No person may rely on the issuance of this approval as evidence that the Department has undertaken any due diligence with regard to that information. No material changes, amendments, or addenda may be made to the information provided without further approval of the Department.

Within 15 business days after the issuance of a municipal security, you will need to file with the Department the enclosed Security Report and the documents required in Section 319, Public Act 34 of 2001. Please mail them to the Local Audit and Finance Division at P.O. Box 30728, Lansing, Michigan 48909-8228. If you have any questions, contact the Division at (517) 373-0660.

Sincerely,

Suzanne Schafer, Administrator
Local Audit and Finance Division

Subject:	Karegnondi Water Authority - Request to Amend State Treasurer's Approval to Issue Long-Term Securities
Attachments:	2014B Treasury Approval(21976666_1).PDF; Presale KWA 2015 at Max Par.pdf

Harlan,

Thank you for your voicemail last week regarding the Karegnondi Water Authority (Genesee County). As I mentioned in my voicemail, the Karegnondi Water Authority received State Treasurer's Approval to Issue Long-Term Securities for two separate series of bonds for the same project (the Karegnondi Water Pipeline) in February of 2014. The first series of bonds was issued in April of 2014 in the principal amount of $220,500,000. The second series of bonds, which is the subject of the attached State Treasurer's Approval, was not issued in late 2014 as originally anticipated. It is now expected that the second series of bonds, which is necessary to complete the project, will be issued in the fourth quarter of calendar year 2015. Accordingly, on behalf of the Karegnondi Water Authority, we are requesting that the attached State Treasurer's Approval be amended to accomplish the following:

1. Change the title of the bond issue to reflect the year in which the bonds will be issued. The new title of the bond issue will be "Water Supply System Bonds (Karegnondi Water Pipeline), Series 2015."

2. Extend the maximum final maturity date by one year due to the change in the expected issue date of the bonds. The final maturity date of the bond issue is now expected to be November 1, 2045. I have attached an updated debt service schedule, which includes actual debt service requirements on the first series of bonds and estimated annual debt service requirements on the second series of bonds to be issued in 2015.

Please let me know if you have any questions or if you need any additional information. Thank you very much for your assistance with this request.

Best regards,

Steve

Re: Applications for State Treasurer's Approval to Issue Long-Term Securities

Dear Mr. Goodrich:

I am the Chief Administrative Officer of the Karegnondi Water Authority, County of Genesee, State of Michigan (the "Authority"). In connection with the review of the Authority's Applications for State Treasurer's Approval to Issue Long-Term Securities for the not to exceed $300,000,000 Water Supply System Bonds (Karegnondi Water Pipeline), Series 2014A and Series 2014B please be advised of the following:

1. The Authority is a newly-created water authority with no outstanding securities/debt – new money or refunding – limited tax or unlimited tax - and does not have an audit.

2. The Authority has not been required to levy a tax as a result of a court or judgment during its preceding fiscal year.

Thank you in advance for your attention to this matter. Should you have any questions or require any additional information, please do not hesitate to contact the undersigned.

Very truly yours,

Jeff Wright, CEO
Karegnondi Water Authority

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

P.O. Box 30728
Lansing, MI 48909-3227

Re: FLINT CITY (252040)
Qualifying Statement

Dear Ms. Schafer,

We are in receipt of your letter dated February 21, 2014 denying authorization to issue municipal securities without further approval from the Department of Treasury.

As you know, the City of Flint is currently in receivership pursuant to Act 436, and operating under the control of an Emergency Manager since December 2011. Much progress has been made to reduce the City's accumulated deficit and to restore Flint to long term financial solvency. We are currently working with Treasury to finalize a Deficit Elimination Plan which will not only eliminate the deficit but begin to establish an appropriate level of reserves. The securities issued within the past five years pursuant to the Fiscal Stabilization Act were done prior to the City being placed under the control of an Emergency Manager.

The request to issue securities at this time is in conjunction with the City's partnership with Genesee County and others to construct a new source of water supply for the City and the region. This is being accomplished through the newly created Karegnondi Water Authority, of which the City of Flint is a member. The result of this project will be a new source of water for the region at a cost which is significantly less than the current costs. It is an important component of restoring the City of Flint to financial solvency.

Treasury approval of Flint's request to issue municipal securities for this purpose is requested.

Thank you and please contact me if you have any questions.

Sincerely,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

DENIAL
Municipality Code: 252040
Fiscal Year Ended: 6/2013

Dear Chief Administrative Officer:

Thank you for submitting a qualifying statement for FLINT CITY to the Michigan Department of Treasury. Based upon the information provided in the qualifying statement, we have determined that FLINT CITY is not in material compliance with the following criteria as identified in section 303(3) of Public Act 34 of 2001:

Subsection (m) the municipality ended its last fiscal year with a deficit in one or more funds and an acceptable deficit elimination plan has not been certified or conditionally approved.
Subsection [b] the municipality has issued securities in the immediately preceding five fiscal years or the current fiscal year pursuant to the Emergency Municipal Loan Act or the Fiscal Stabilization Act.
Subsection [a] the municipality is operating under the provisions of the Local Government Fiscal Responsibility Act.

Therefore, FLINT CITY is not authorized to issue municipal securities under this act without further approval from the Department. You may request reconsideration of this denial or you may request prior approval from the Department for each municipal security that you issue until you are eligible to submit your next qualifying statement.

If you have any questions, please contact the Division at (517) 373-3227.

Sincerely,

Suzanne Schafer, Administrator
Local Audit and Finance Division

APPROVAL
Municipality Code 250000
Fiscal Year Ended 09/2012

Dear Chief Administrative Officer:

Thank you for submitting a reconsideration request of the qualifying statement denial for the County of GENESEE to the Michigan Department of Treasury dated 6/20/2013. Based upon the information provided in the reconsideration request, we have determined that the County of GENESEE is in material compliance with the criteria identified in section 303(3) of Public Act 34 of 2001.

The County of GENESEE is now authorized to issue municipal securities under this act without further approval from the Department. This authorization will remain in effect for 6 months plus 30 business days after the end of your next fiscal year, or when the Department has made a new determination, whichever occurs first.

Within 15 days after the issuance of a municipal security, you will need to file with the Department the enclosed Security Report and the documents required in section 141.2319 of Public Act 34 of 2001. Please mail them to the Municipal Finance and Systems Review Section of the Local Audit and Finance Division at P.O. Box 30728, Lansing, Michigan 48909-8228.

If you have any questions, contact the Division at (517) 373-0660.

Sincerely,

Suzanne Schafer, Administrator
Local Audit and Finance Division

Detroit, MI 48226

Re: Status of Permits

Dear Mr. Massaron:

In response to your request for the status of permits required in association with the KWA project, I offer the following:

- GCDC applied for and received a permit to withdraw up to 85 million gallons per day from Lake Huron.
- Received all permits necessary for construction of an intake into the Great Lakes, as well as the permit to construct in the bottom land of Lake Huron.
- Is in the process of acquiring permits for construction of the Lake Huron pumping station and the intermediate pump station from the Michigan Department of Environmental Quality. Design meetings have been held with the MDEQ at the 60% and 90% design milestones.
- Is in the process of acquiring permits for the construction of the piping system from Lake Huron to Flint. Meetings have been held with the MDEQ at the 60% and 90% design milestones.
- Is in the process of acquiring permits to construct in road right-of-ways from Sanilac, Saint Clair, Lapeer and Genesee Counties. Design meetings have been held with each of those entities.
- Is in the process of acquiring zoning and related construction permits from Worth Township in Sanilac County, zoning and related permits from Lynn Township in Saint Clair County for construction of the Lake Huron and intermediate pump stations (site plans have been submitted).
- Required MDEQ public hearings for permits to construct in wetlands along the proposed pipeline route have been held.

If you have any questions regarding thee or other related matters, please do not hesitate to contact me at your convenience.

Sincerely,

David M. Jansen, Chief of Services
Division of Water and Waste Services

Re: Increase in average day and maximum peak day by GCDC

Dear Mr. Wolfson:

The Genesee County Drain Commissioner's Office, Division of Water and Waste Services ("GCDC") has been working diligently to fulfill the demands of the various state and federal agencies, Governor Snyder, and the people of the City of Flint ("Flint"), to provide Flint with water from the Detroit Water and Sewerage Department ("DWSD"). These efforts include placing approximately seven (7) miles of the seventy-two inch (72") water transmission pipeline ("Pipeline") that GCDC purchased from Flint back into service, pressurizing the Pipeline, disinfecting the Pipeline, flushing the Pipeline, and performing Bac-T testing on the water inside of the Pipeline. Once these efforts have materialized and GCDC has received two (2) negative Bac-T tests, GCDC will be in a tactical position to furnish DWSD water to Flint as early as midweek.

On October 8, 2015, I sent you a letter after GCDC received a formal request from Flint for GCDC to provide DWSD water to Flint pursuant to a previous written agreement between GCDC and Flint. As of today, I have not received your response. In the October 8, 2015, letter I requested the following:

> GCDC has received a formal request from Flint to receive DWSD water via GCDC per GCDC's contract with Flint. GCDC's rates are currently based on 12 mgd average day and 25 mgd maximum peak day. Does DWSD have the capacity to increase demand to GCDC to 28.5 mgd average day and 51 mgd peak day? If so, could you please provide GCDC with the rates for 28.5 mgd average and 51 mgd peak day through June 30, 2016?

Attorney Anthony Chubb from Flint has provided me with a proposed WATER SERVICE CONTRACT BETWEEN CITY OF DETROIT AND CITY OF FLINT ("Contract"). This Contract makes the assumption that Flint has a separate connection to the DWSD water distribution system. The interconnect between the DWSD water system and the Flint water system is owned by GCDC. Flint does not have a separate connection to the DWSD water distribution system. Any water that Flint receives

from DWSD is required to flow through GN-01. Additionally, GCDC has received no communication from DWSD on this subject since the Flint water issue surfaced. Simply stated, DWSD has the ability to service Flint with water only through the interconnect owned by GCDC.

GCDC is working diligently to move forward with Flint receiving DWSD water; however, GCDC cannot do anything until it has an agreement with DWSD and Flint as to how the DWSD water will be transmitted to Flint. Right now, Flint is requesting GCDC to provide DWSD water GN-01 pursuant to the written agreement between GCDC and Flint. Additionally, Flint has also request DWSD to provide Flint with water with the understanding that DWSD has no way to transmit the water to Flint. There is no question that Flint wants and eventually will be serviced with DWSD water; however, DWSD and Flint cannot continually ignore the fact that GCDC owns and operates the interconnect between DWSD and Flint.

GCDC has been working diligently to assist Flint in receiving DWSD water; however, DWSD to date has been unwilling to provide GCDC the information it needs so that Flint may switch over the DWSD water. When you have prepared your response, please send it to kkilby@mcgrawmorris.com or contact Director John O'Brien at 810-732-7870.

Sincerely,

MCGRAW MORRIS P.C.

Memorandum
To: Receivership Transition Advisory Board
From: Natasha L. Henderson, City Administrator
Date: Tuesday, October 13th
Re: Emergency Additions to the Agenda

Members of the Receivership Transition Advisory Board:

This memorandum respectfully requests the inclusion of two urgent items on the agenda for the October 14 Receivership Transition Advisory Board Meeting.

As you may be aware, the Genesee County Health Department has issued a public health advisory in regard to the high amount of lead contamination in City water in response to the findings of physicians at Hurley Hospital. This was followed by a similar advisory declared by the City.

Seeking to address this emergency, I requested that the City explore the possibility of ceasing the use of the Flint River as the City's water source and to reconnect to the Detroit Water and Sewerage Department (DWSD) until the KWA pipeline can be completed in 2016. This request was followed by a recommendation by the Mayor's Technical Advisory Committee to reconnect to DWSD to improve the City's water quality, thereby safeguarding public health. On October 8, 2015, the Governor pledged to provide financial assistance to Flint for the reconnection, in the amount of six million dollars. The Mott Foundation graciously offered to provide an additional four million. Combined with two million dollars provided by the City, a total amount of $12 million can be utilized to reconnect the City to DWSD for a nine month period.

In the interests of the public health and welfare, I request that the first item added to the agenda be a resolution (#150872) making available two million dollars from general fund balance to reconnect to DWSD. The second item requested to be added to the agenda is a resolution (#150875) granting the City Administrator the Authority to enter into a contract with DWSD. These items have been attached for your review.

I apologize for the sudden request for changes to the agenda, however the City is facing a critical emergency requiring immediate attention. The Administration has had to react with reflexive speed and remain adaptable to try to mitigate the serious consequences already affecting the residents of this community. I ask that you please consider my request to add and approve these items so that we may address this emergency in a timely and responsive manner.

Respectfully,

Natasha L. Henderson, City Administrator

RESOLUTION NO.: 150872

PRESENTED: _____

ADOPTED: _____

RESOLUTION AUTHORIZING A BUDGET AMENDMENT TO INCREASE THE WATER AND SEWER BUDGET BY $12,000,000.00 AND TO ALLOW FOR EXPENDITURES FROM THOSE FUNDS TO FACILITATE THE SWITCH BACK TO THE DWSD WATER SUPPLY

BY THE CITY ADMINISTRATOR:

Due to the serious health threat facing the residents of the City of Flint, the Administration has been diligently working toward a feasible and speedy resolution to the City's water crisis; and

Through the commitment of $6 million from the State of Michigan and $4 million from the C.S. Mott Foundation, a total of $10 million in contributions have been pledged to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department and its successor, the Great Lakes Water Authority, until the City is able to receive water from the Karegnondi Water Authority (KWA).

The City Administrator and the Mayor have agreed to the acceptance of these funds. At this time, the KWA reports that construction is on schedule to be completed by June 30, 2016. The City estimates that the total cost to purchase water through DWSD will be $12 million for 9 months. The balance of $2 million not covered by the generous pledges of State and Local resources is the responsibility of the City.

A budget amendment is necessary to reflect both an increase in revenues for the receipt of $10 million in assistance and $2 million of budgeted Use of Fund Balance and an increase in expenditures of $12 million for the purchase of DWSD water supply.

IT IS RESOLVED that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable. Specific revenue and expenditure line items will be provided by the Chief Financial Officer.

APPROVED AS TO FORM:

RESOLUTION STAFF REVIEW

DATE: October 12, 2015

Agenda Item Title: **RESOLUTION AUTHORIZING A BUDGET AMENDMENT TO INCREASE THE WATER AND SEWER BUDGET BY $12,000,000.00 AND TO ALLOW FOR EXPENDITURES FROM THOSE FUNDS TO FACILITATE THE SWITCH BACK TO THE DWSD WATER SUPPLY**

Prepared By: Jody N. Lundquist

Background/Summary of Proposed Action: As a result of the ongoing concern for the health and wellbeing of the City of Flint's residents, City Administration has worked to negotiate the reconnection to Detroit Water and Sewerage Department (DWSD) supply until the Karegnondi Water Authority (KWA) pipeline construction is complete. Per KWA representatives, KWA construction remains on schedule with a final completion date of June 30, 2016.

Financial Implications: The purchase of water from DWSD is estimated to cost approximately $12 million through June 30, 2016 based on average usage of 16 million gallons per day. $10 million in support has been pledged from State and Local sources. The City proposes a budget amendment for Use of Fund Balance in the Water Fund in the amount of $2 million to cover the cost of purchasing DWSD water through fiscal year end.

While the City continues to grapple with the financial impact of the Preliminary Injunction Order issued on August 7, 2015, in the short term, both the shortfall in revenues as a result of the Order and the additional cost of responding to the health and safety of the City's water supply are exactly the type of events for which the City's Fund Balance Reserve policies were designed. To the extent that the City Water Fund Reserve is projected to fall below the required balance of 25% of current year operating expenses and one year's annual debt service, the City will propose a reserve replenishment plan to accompany adoption of the next fiscal year's operating budget.

Budgeted Expenditure? **Yes** **No** **Please explain if no:** Prior to the emergent concerns regarding the safety of Flint's water supply, the FY2016 budget reflects the cost of supplying Flint River water

Account No.: n/a

Pre-encumbered? **Yes** **No** **Requisition #** n/a

Other Implications (i.e., collective bargaining): None.

Staff Recommendation: **Approve FY2016 $2 million Use of Fund Balance budget amendment**

Staff Person: Jody N Lundquist **Approval:**

150875

RESOLUTION NO.:_____

PRESENTED:_____

ADOPTED:_____

RESOLUTION AUTHORIZING THE CITY ADMINISTRATOR TO TAKE NECESSARY ACTION TO CONVERT TO THE DETROIT WATER SYSTEM

BY THE CITY ADMINISTRATOR:

In order to promote the health, safety and welfare of this community, it is in the best interests of the City of Flint for the Detroit Water and Sewer Department (DWSD) to supply the City with treated water pending completion of the Karegnondi Water Authority; and

In order for DWSD to supply the City with water, it will be necessary to utilize pipe owned by the Genesee County Drain Commission (GCDC); and

The City, DWSD and GCDC are actively negotiating the terms of the necessary agreements to ensure this transition occurs as soon as possible; and

IT IS RESOLVED that the City Administrator is hereby authorized to enter into agreements with DWSD and GCDC for conversion to the Detroit Water System.

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

Jody N. Lundquist, Chief Financial Officer

Thank you. It doesn't surprise me that we have another hurdle in all of this. I appreciate your acknowledgement that GCDC will do everything in its power to help the people of Flint in this effort to reconnect to DWSD. Our first objective is to restore the health of the people, then their trust, and of course these objectives are partially accomplished through the reconnect and the efforts of your client.

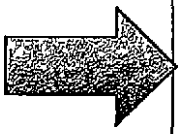
VEOLIA
City of Flint, MI
City Council Public Works Committee
Interim Water Quality Report

Veolia Scope of Work

Week 1

- Provide a review of current actions
- Engage staff, visit facilities and analyze data
- Make interim report



Week 2

- Carry out more detailed study of initial findings
- Make recommendations for Improving water quality
- Provide a plan, cost and schedule for change

Items of Note

- **Not in scope** – studying why the change from DWSD or the history of the utility
- **What we found** – A very frustrated community and a staff trying to solve the problem, having some success but frustrated with the pace of change

Everybody Is Checking the Safety of Water

- City, state, news media, universities and other groups
- Safe = compliance with state and federal standards and required testing
  - *Latest tests show water is in compliance with drinking water standards*
  - *Monthly report available on web page*
- More than 20,000 tests required annually for city
- Strict testing requirements in place (what and how to test)

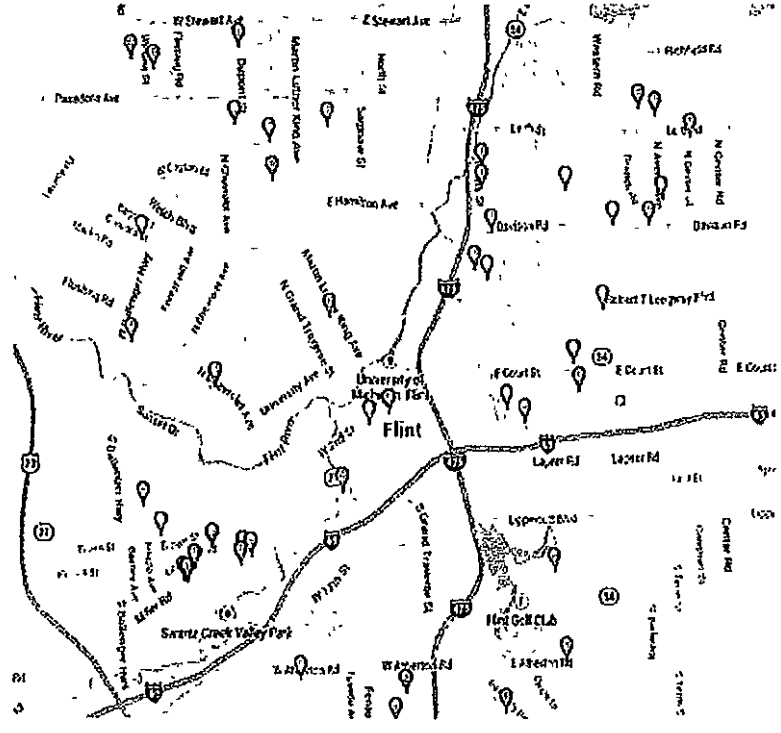
Why TTHM Notices?

- TTHM is formed as a result of the reaction between chlorine and organic material in the water
- City is required to test quarterly at 8 sites
  - *Last summer, several sites had more TTHM than allowed*
- City has reduced levels of TTHM and now all sites are in compliance
  - *Customer notification letters are required until tests are in compliance an average of four quarters*
- It will take at least 2 more quarters to lower average
  - *Even a change to DWSD water doesn't solve problem*
- Flint is not alone – hundreds of communities are facing TTHM issues

Why Discolored Water?

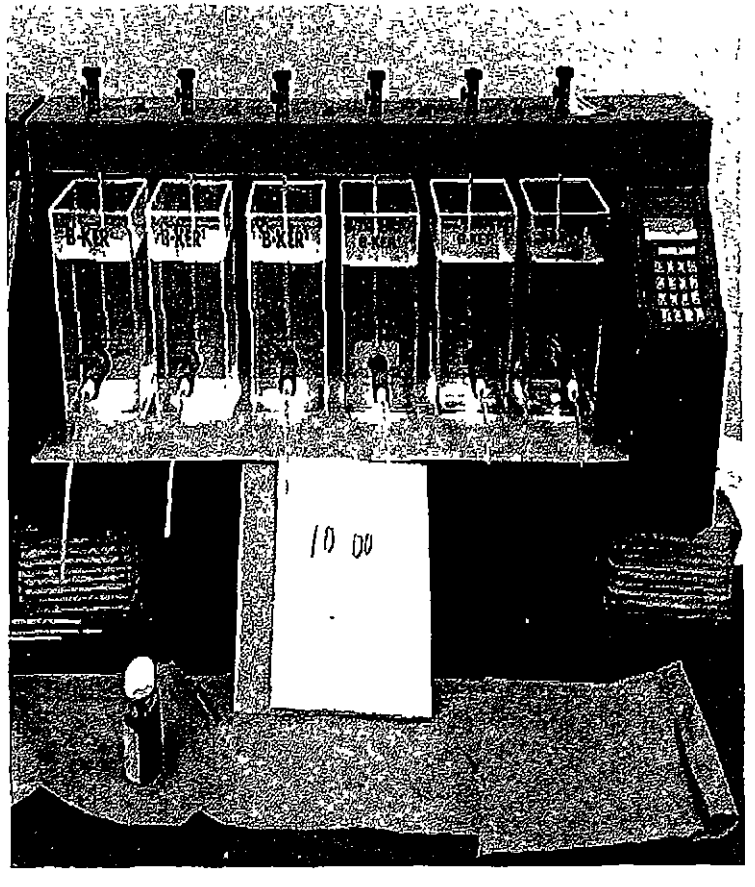
- Old cast iron pipes
- Always has been some discolored water problems – mostly after water breaks
- Efforts to reducing TTHM didn't help discoloration
  - *Doesn't mean the water is unsafe but it is not appealing and raises questions*
- City will test the water at your home – call 787-6537 or email flintwater@cityofflint.com
- Tracking customer complaints is important

Location of water quality complaints
The last 12 months – fewer than you think



Water Quality Can Be Improved

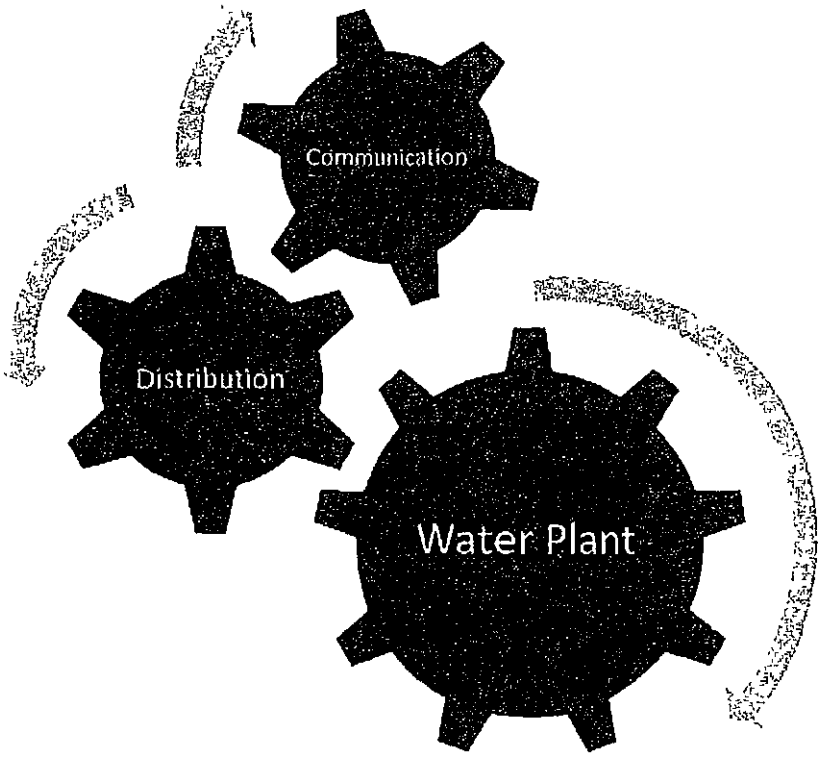
- Adjust the chemicals being fed – stop some, increase some and change some
- Provide better monitoring of water quality to help make adjustments
- Continue repair or replacement of broken parts
- Reduce the over capacity of the distribution system
- Do a better job explaining what is happening
- Do a better job of asking for help



VEOLIA

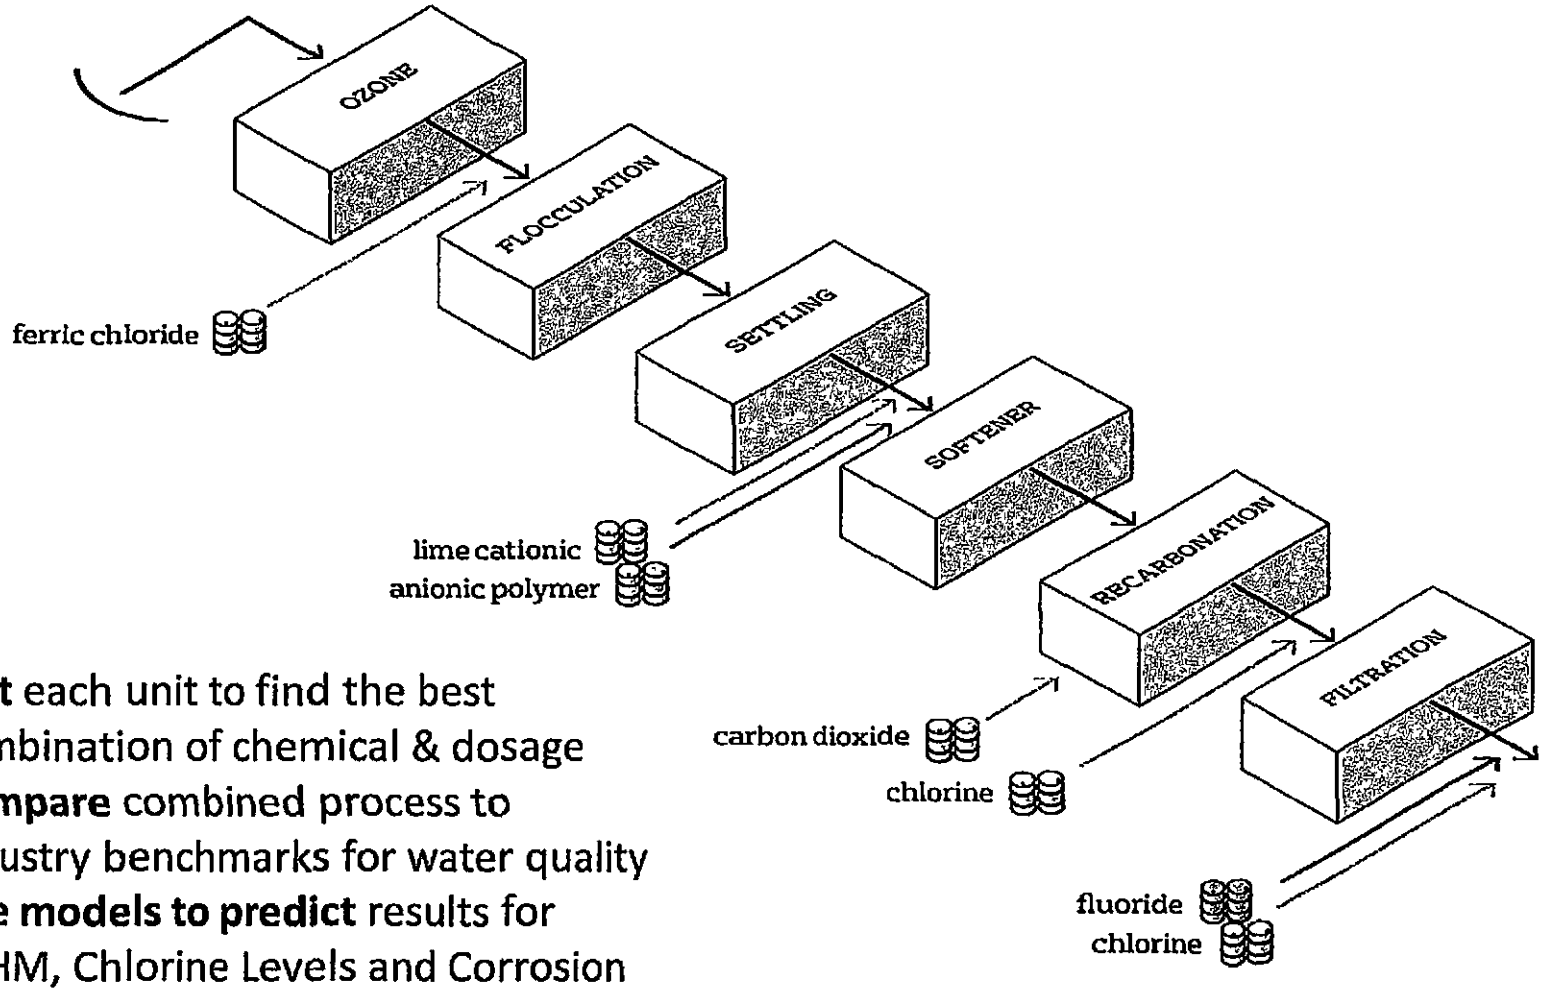
Further Explanation of Solutions

Solution Involves Coordination of 3 Activities



- Water plant improvements
  - *Optimize chemical dosages*
  - *Consider different chemicals*
  - *Change dosing points*
  - *Install granulated activated carbon*
  - *Complete plant upgrades*
  - *Implement best mgt practices*
- Distribution system improvements
  - *Fix broken valves*
  - *Ask for customer feedback*
  - *Reduce tank storage*
  - *Target line flushing*
  - *Run a hydraulic model*
- Better communication with customers
  - *Engage advisory committees*
  - *More accessible utility*
  - *Make it easy to access information*
  - *Better customer communication*

Optimize Plant Processes



- **Test** each unit to find the best combination of chemical & dosage
- **Compare** combined process to industry benchmarks for water quality
- **Use models to predict** results for TTHM, Chlorine Levels and Corrosion

Complete Plant Construction & Re Prioritize Capital

Cost effective plan in budget

- Complete water plant renovation
  - *Target SCADA and instrumentation in plant*
- Speed up valve turning contract & provide money for replacements
- Speed up hydraulic model update to reduce tank volume
- Evaluate installing of granulated activated carbon on filters

Weather can impact timing

Digging up a water valve for repair
Need good weather to start

Implement Best Management Practices

<u>Activities to Help Operators Maintain Good Water Quality</u>

- Process Control Management Plan
- Lab QA/QC Program
- Computerized Maintenance Management System
- Asset Management System
- Training and Certification Program
- Vulnerability Plan

Distribution System Improvements

- Speed up flow of water from plant to homes – 2 weeks plant to house
  - *Find closed valves & open them*
  - *Replace broken valves*
  - *Update hydraulic model*
  - *Reduce system storage*
- Track customer complaints
  - *Test customer water*
  - *Spot flush hydrants to clean areas of stagnant water in the system*

Flushing out discolored water

VEOLIA

Improving Customer Service

Make It Easy to Access Information and People

Develop a proactive customer communication plan

- Create advisory committees to help direct efforts and improve flow of information
- Establish a single point of contact to manage all water quality complaints
- Provide additional customer service training to staff
- Expand neighborhood and community outreach
- Change monthly billing statements from card to envelope with information

Example - Communicate in the field

NOTICE: ANNUAL FLUSHING PROGRAM

We are conducting our annual flushing program to enhance your water quality and clean the distribution system.

DC Water crews will be flushing hydrants in your area 10:00 p.m. to 6:30 a.m. on the following dates:

9/24 **through** 9/30

IMPORTANT INFORMATION

- Your water supply will not be shut off during hydrant flushing.
- You may notice slight water discoloration or low water pressure.
- During this time, customers can continue normal water usage, including drinking, bathing and laundry (unless water is discolored).

If you experience discolored water during this period:

- Run your cold water taps for 15 minutes. If it does not clear up, please contact our Drinking Water Division.
- Do not run your hot water. If you experience discolored water from your hot water tap for several hours, then it is recommended to drain and flush your water heater tank.

Provide field crews with additional communications tools to use to address questions or concerns from the public

- *Create door hangers, flyers, or yard signs to notify neighborhoods about main breaks, hydrant flushing, or system maintenance that may affect the public*
- *Create a business card or other contact card with the name and phone number of the single point of contact with the Department of Public Works who is managing information flow*

**sample door hanger provided by DC Water & Sewer Authority*

Clear, concise information is key

Simplify the reports on the web page dedicated to addressing water system questions

- *Create a single-page, easy to understand report for the public*
- *Use charts or provide other examples to demonstrate water quality testing and system or treatment plant improvements underway*
- *Provide name, phone number and email address for identified point of contact so customers can request more information*
- *Continue to provide Monthly Operation Report and Water Quality Report Summary for those customers interested in more technical information*
- *Use site to provide additional notice of field work that may impact customers*

VEOLIA

What Is Next

Next Steps

Week 1

- Provide a review of current actions
- Engage staff, visit facilities and analyze data
- Make interim report

Week 2

- Carry out more detailed study of initial findings
- Make recommendations for Improving water quality
- Provide a plan, cost and schedule for change

Questions Being Heard

REMEMBER

We just started. Might not have an answer yet to your question

- **When will water improve -** The water has improved with current actions. More changes will occur over weeks and months because of safety reviews
- **Date of next update and final report** – An update will be provided next week and a report the following week.
- **Time frame for implementing recommendations** – The City is already started. Others a few days and some weeks or months due to State approval being required or weather.
- **Cost of changes** – Don't know yet but we are aware of the financial concerns

More Questions Being Heard

- **How are TTHM formed** – It's the reaction of chlorine to organics (leafs, dirt) in the water.
- **How to reduce TTHM** – Reduce organics before introducing chlorine and shorten time chlorine has to react with the organics
- **What causes discoloration** – Older lines, the iron parts of the system will leach iron into the water causing the discoloration. Other times its just air built up.
- **Why no discoloration with DWSD** – There was. Flint had a bad time with breaks of old line and is doing lots of construction. This stirred up the water and caused discoloration.

More Questions Being Heard

- **Can you test my water** – The city will test your water for free. But, only 2 of 20 people have taken the city up on the offer since it began offering the service.
- **Medical problems** – Some people may be sensitive to any water. Talk to your doctor. The City is communicating with the medical community.
- **Confidence that future problems will be avoided** – Recommendations will include putting programs in place to better respond to water changes and assure quality

VEOLIA

Water Quality Report
March 12, 2015

FROM
Veolia North America

TO
Emergency Manager Gerald Ambrose

Executive Summary

The City of Flint changed water sources, transitioning from Detroit's system to the Flint River. This change created water treatment challenges that have resulted in water quality violations. Aging cast-iron pipe has compounded the situation, leading to aesthetic issues including taste, odor and discoloration. Public interest and scrutiny of the drinking water system intensified following the distribution of required public notices of violation.

The City of Flint has made a number of good decisions regarding treatment changes that have improved water quality. However, this is a very complex water quality issue and the City is seeking additional advice on what to do to ensure healthful drinking water for the community.

Veolia appreciates the City's decision to seek independent third parties to review current treatment processes, maintenance procedures and actions taken to date, and provide ideas for improvement. We are pleased to present this final report to the City of Flint following our experts' 160-hour assessment of the water treatment plant, distribution system, customer service and communications programs, and capital plans and annual budget.

This report provides recommendations and a roadmap for improvement, though our engagement was limited in scope. Our assessment included reviewing actions taken by the City to date, validating the City's plans going forward, and making recommendations for ideas not being considered.

Although a review of water quality records for the time period under our study indicates compliance with State and Federal water quality regulations, Veolia, as an operator and manager of comparable utilities, recommends a variety of actions to address improvements in water quality and related aesthetics including: operational changes and improvements; changes in water treatment processes, procedures and chemical dosing; adjustments in how current technologies are being used; increased maintenance and capital program activities; increased training; and, an enhanced customer communications program.

We are also providing a recommended schedule and estimated costs for implementing changes. It is our desire to help Flint residents and public officials better understand the current situation so that informed decisions can be made to ensure safe drinking water for the city's customers.

Review of Actions Taken to Date

To address water quality issues, the city has made operational changes, sought help from the State, hired *engineering firm Lockwood, Andrews & Newnam, Inc.* (LAN) to provide additional advice, and hired Veolia for an assessment from a utility operator's perspective. The City has also reached out to different specialty vendors (chemical suppliers, filter companies and tank aeration companies) for information about products to help with the TTHM issues. These are logical steps to take.

Flint is not alone in dealing with TTHM problems, as many utilities across the country are facing this challenge. The City appears to be following standard steps that many of those communities are taking to successfully correct the problem.

Although the primary focus of this review was based on solving the TTHM problem, the public has also expressed its frustration over discolored and hard water. Those aesthetic issues have understandably increased the level of concern about the safety of the water.

The review of the water quality records during the time of Veolia's study shows the water to be in compliance with State and Federal regulations, and, based on those standards, the water is considered to meet drinking water requirements.

The City has been proactive in its efforts to reach out to the medical community, to set up a phone number and email address to receive complaints, to post State Water Quality reports, to provide the list of EPA required water tests, and offer to test the water at customers' homes.

From our review, these numerous efforts demonstrate how the city is trying to be transparent and responsive beyond what many other communities might do in similar circumstances.

State Report

The Michigan Department of Environmental Quality (MDEQ) has requested specific actions be taken related to the total trihalomethane (TTHM) issues. The February 2015 report from LAN (*Operational Evaluation Report TTHM Formation Concern*) indicated apparent reasons for the elevated levels of TTHM in the distribution system. These generally relate to high Total Organic Carbon (TOC) in the water source, improperly operating equipment both in the plant and the distribution system, less-than-optimal plant TOC removal and old cast-iron pipe in the distribution system. **Our assessment confirms that these reasons are likely given our on-site laboratory testing and analysis, as well as our first-hand observations.**

Due to time constraints, LAN's report to the State was submitted prior to Veolia's final analysis and recommendations, and contained a number of key initial and contingent steps the City should consider, including:

Initial Actions

- Hire a Third Party Water Quality Expert to Complete Independent Audit
- Obtain a THM Analyzer
- Carry Out Jar Testing
- Water Plant Optimization Softening
- Water Plant Optimization Disinfection of Filter Beds (Pre-Chlorination)
- Water Plant Optimization Polymer Aid to Coagulation and Flocculation
- Increase Water Main Flushing
- Water Modeling Cedar Street Pump Recirculation
- Water Modeling West Side Pump Recirculation
- Broken Valve Locations
- Increase Flushing

Contingent Actions

- Fix Ozone System
- Start Feeding Coagulant and Flocculation Polymer
- Convert to Lime and Soda Ash Softening
- Change Disinfection to Chloramine or Chlorine Dioxide Temporarily
- Install Pre-Oxidant at Intake
- Replace Filter Media Implement Advanced Treatment
- Increase Main Flushing
- Continue Valve Replacement
- Emphasize Cast Iron Pipe Replacement

Veolia's Recommendations

While many of Veolia's recommendations match the initial assessment provided by LAN, our approach, as an operator and manager of comparable utilities, considers a more comprehensive solution. These improvements include operational changes, differences in water treatment regimes and chemical dosing, increased maintenance, and increased training.

- **Addition of Permanganate** – The addition of a permanganate chemical will help reduce ozone demand as well as chlorine demand. The reduction of ozone is needed to help eliminate the possibility of violating the bromate limit. The addition of the chemical will require state approval, submission of design documents for approval, procurement of the equipment and installation. The State has indicated they will work with the City on expediting review and approval of any requested changes. The required dosage of permanganate is estimated to range from 0.5 mg/L to 1.2 mg/L with a corresponding price of $160,000 to $320,000 per year. (Please note – The water in the river is dynamic which means it will change with weather, seasons and other factors. The estimates provided are based on bench testing at a given time and as such require the operators to test water and to verify chemical dosages on a frequent basis.)
- **Reduction of Ozone Feed** – Treating water is a delicate balance - increasing ozone to fix the TTHM problem can raise bromate levels to a point of violation. The introduction of permanganate is being recommended to reduce the demand for ozone so that feed rates will not exceed 5 mg/L. The current ozone dosing has been as high as 8 mg/L and, as such, if allowed to continue, will increase the risk of violating the bromate levels.
- **Increase of Ferric Chloride** – Four coagulants were tested by Veolia -ferric chloride, ferric sulfate, polyaluminum chloride (PACl) and aluminum chlorohydrate (ACH). Ferric chloride and ACH were found to be the best choice of product for effectiveness in removing TOC, a precursor to TTHM formation. Current ferric chloride dosages are too low and dosages of 100 mg/L or more are recommended. Again, please note, that the amount of chemical needed changes with the nature of the river and as such, water must be tested multiple times a day with corresponding changes in chemical dosages. This increase to 100 mg/L is twice what is currently being fed and much higher than what had previously been fed last year. The increase in chemical costs could be up to $1,000,000 per year. This change in dosage (using ferric chloride) can be made immediately without state permit review.
- **Reduction of Lime** – Lime is currently being overfed. A higher dosage of lime does not necessarily mean better treatment. A review of different dosages with jar testing indicates that the current dosage of 280 mg/L can be reduced to 230 mg/L. This represents a potential range of savings of up to $270,000 per year. This change can be made immediately. It should be noted that the current softening equipment is in poor condition, which does complicate the treatment process with a poor balance of flow between the two basins, weirs that are not level causing bypassing with the softener basins, and simply old mechanical equipment that periodically breaks down. This equipment is not going to be needed when a change to lake water occurs. Addition of soda ash to help further reduce hardness in cold weather might require dosages up to 40 mg/L with an annual chemical cost up to $320,000. There have also been some questions or complaints from the public regarding hard water. The water entering the plant is currently 360 mg/L and the plant is reducing that level of hardness to about 210 mg/L. Optimization of the dosage can reduce the hardness

further to about 180 mg/L. This reduction however has been sporadic as equipment breakdowns and high flows have caused problems keeping the softening process on-line. As we have noted before, the dosage needs to be adjusted daily or more often based on process control monitoring. The raw water hardness in the summer is much less than in the winter. For illustration purposes, the difference could be 360 mg/L in raw water in winter compared with 220 mg/Lin the summer.

- **Eliminate Pre-Chlorination on the Filters** – The reduction of pre-chlorination on the filters during the summer months can help reduce TTHM formation. This action has to be considered carefully with procedures documented and reviewed for engineering principles. As such, it will take time for the design engineer to determine what could be done to assure the proper chlorine contact time and document that other safety protocols in water are met. This requires state approval. Any submission should be considered along with a possible change in filter media. If Granulated Activated Carbon (GAC) is installed then the pre-chlorination would be stopped or drastically reduced because of the chlorine impact on the GAC filter media. Veolia's initial investigation into changes in chlorine feed point indicate that the recommended action can be accomplished while maintaining the required regulatory contact time for disinfection.
- **Change Filters to Granulated Activated Carbon (GAC)** – The object of the other changes being made is to reduce the TOC before chlorine is added into the process. The plant by design is limited on the amount of TOC removal possible. A maximum removal of only 60% is likely if the plant is properly optimized. The change of filter media to GAC would provide the best reduction possible and provide better than 90% removal dramatically reducing the potential for TTHM formation and thus ensuring compliance with that parameter for the water system. The change in filter media; however, is complicated requiring approval by the state, design of the changes, procurement of the media and a contractor to install it. That will take time and is likely in a range of $1.5 million (more or less) in cost. The use of GAC also requires more testing and monitoring of the media and the TOC than with the current media. GAC will accumulate TOC and begin to become in effective after a period of time. Depending upon the level of TOC reaching the filters this could be as short as 3 months and as long as 9 months. The amount of TOC is dependent upon the river water quality and operation of the other plant processes. Once the ability of the filters to remove TOC is diminished, the GAC media has to be replaced if river water continues as a source. The change to lake water will not require TOC removal and the media could continue to be used as filter media for that new water source.
- **Corrosion Control** – The primary focus of this study was to assure compliance with the TTHM limits. That is not the only problem facing the city and its customers though. Many people are frustrated and naturally concerned by the discoloration of the water with what primarily appears to be iron from the old unlined cast iron pipes. The water system could add a polyphosphate to the water as a way to minimize the amount of discolored water. Polyphosphate addition will not make discolored water issues go away. The system has been experiencing a tremendous number of water line breaks the last two winters. Just last week there were more than 14 in one day. Any break, work on broken valves or hydrant flushing will change the flow of water and potentially cause temporary discoloration.
- **Eliminate a Storage Tank** - The water system has more storage than it requires, due to excess capacity in the water lines in combination with the storage tanks. The City has already employed LAN to update the hydraulic model. The hydraulic model should be used to help determine if water levels can be lowered further and even to remove some storage tanks from service. That decision may need to be made

seasonally. For example demand during water main breaks last week required extensive amounts of water. The excess storage is more a problem with TTHM formation for the system in summer than winter.

- **Prioritize Valve Replacement** - The hydraulic model shows long water age in portions of the system that appear to be contributing to the TTHM problems. LAN has updated the model to include the location of broken valves and that added information is being used to identify other system problems. The City has a contract for valve turning and repair work that should be focused on known broken valves, particularly in sections of the distribution system with old water age. This activity however must wait until warmer weather in fear of causing problems in the water system with lines freezing.
- **Target and Increase Flushing** – Flushing the fire hydrants can be useful in cleaning out lines to minimize discolored water complaints and also helping reduce the age of water. This DOES NOT mean just opening hydrants. The hydraulic model needs to be used to determine which hydrants should be opened and for how long to ensure the lines are properly cleaned. For example, this might require 15 minutes or even several hours of flushing depending on location. The flushing of hydrants also needs to include records of hydrant condition, color of water initially and after periodic increments plus chlorine residual testing. All of that information will help provide information to the engineers on the effectiveness of the procedure. Each crew doing the work should be trained to help explain the process to the public and also warn neighborhoods about flushing so that staining of laundry can be avoided.
- **Change to Lake Water** – The changes being made now to the water plant will not be the same changes required to treat lake water once it becomes available. A thorough analysis and plan needs to be made in preparation of that switch. This is going to need to include changes in how the plant is operated, like eliminating lime softening and reducing the dosages of many chemicals. Consideration will also have to be given to algae treatment when lake water is being used.
- **Operating Programs** – All of the changes discussed above are based on testing and techniques proposed by engineers and skilled operators of both LAN and Veolia. The staff will need further training and implementation of detailed protocols to successfully implement the changes and to ensure long-term success at the plant. This means the City needs to implement a series of programs to ensure success in these changes.
    - **Process Control Management Plan (PCMP)** – The amount of testing and resulting changes in chemical dosages, along with monitoring the impact on the water, will require a well-documented process that all operators follow. An example of this is jar testing, which is used by the operators to identify the most effective chemicals and dosages to optimize treatment. The staff understands the basic treatment process but needs further practice and training to become proficient in the use of routine process control to adjust for water quality. This is commonly referred to as a PCMP and is used as a standard operating procedure so that the operators on the day shift can communicate with the night shift, that operators are following the same treatment plan for water, that the adjustments are unified between different shifts and different people, that a desired water treatment quality is defined and variations from it signal alarms and that the staff knows what to do when the water quality setpoints begin to drift away from its desired quality levels.
    - **Lab QA/QC** – The operation of the water plant is dependent upon accurate lab results. Standard operating procedure needs to be set and lab technicians trained in that process. EPA and the State

set procedures and standards to be met and the staff should strive to meet those standards. The City has already purchased a TTHM analyzer but should also consider a TOC analyzer that can be an online continuous device to provide immediate information on influent and effluent levels of TOC. Part of the lab records should be historical review of data to help operators better understand the changes they make in the plant.

- **Maintenance Management** – The key to water equipment is having all the equipment effectively maintained and functioning properly. The current capital program is fixing many broken pieces of equipment and updating the plant to current standards. This however must be followed with a rigorous maintenance program that ensures the proper preventive maintenance, is able to predict when maintenance is needed to keep equipment functioning properly and responsive to changes in flows and source water quality.
- **Training** – The changes being suggested are new to the staff and as such training needs to be provided in what the changes involve, why they are being made, the impact on the water quality, and how best to run the plant. A good demonstration of skill level is for the staff to become certified by the State as a licensed water plant operator. Many utilities now require all operators to hold at least the minimum certification level as a starting point and offer incentives to increase their certification level.

- **Communication Program** – The city should lay out an immediate, written strategy for communicating with the public in the short-term, as well as a 6-to-12 month strategy that contemplates known, future events like the KWA pipeline and switch to lake water. A wide range of activities are underway to work with the public but a comprehensive and coordinated effort, with a strategic focus, will help the utility and its customers.
  - **Dedicated Communications Personnel** – The City has a single, dedicated public information officer, tasked with providing service to all of city government. The current focus on communications support for Public Works, and the anticipated needs over the next several years, indicate the city would benefit from the hiring of a staff person in Public Works who could establish a communications program designed to provide clear and concise information to a broad audience though a number of different channels. In the interim, the city could hire a communications intern, local communications firm, or somebody with experience who is able to provide reduced or no-cost services for the immediate future.
  - **Communications Planning – Public Notification** – The City should be congratulated on its efforts to keep the public informed. It is posting its monthly reports on the web page to provide transparency, though these reports are highly technical – and may be too technical for the customer base at large. They are valuable to those customers who do want this level of detail. The city should create a single-page dashboard of information that outlines the water utility's performance for the previous month, post the dashboard on the website, print copies for distribution at customer service or other reception areas, and be provided during speaking engagements or other events. This dashboard should be easy to understand, and include:
    - The number of water quality tests conducted the previous month
    - The number of violations reported

- Whether these results are in or out of compliance
- Information about other proactive measures such as main and hydrant replacements, or other programs to improve performance of the water utility
- Benchmarking information so the reader has a greater understanding of how Flint compares with other similar utilities in the region and across the country

- **Public Meetings** –There should be additional, proactive coordination with neighborhood, community and civic groups to provide speakers on timely topics. Given the list of numerous responsibilities, the Public Works director cannot do it alone – the city should identify three or four other staff members, knowledgeable about the water utility who can also speak to various groups, provide information and answer questions. The development of an outreach strategy to target key neighborhood, community and civic groups also will advance the communications effort and the dissemination of information in both the short and long term.
- **Standard tools** – Work crews in the field are often the faces of the utility – the city should create standardized tools for communicating with the public that can be easily and quickly delivered to the community in the event of main breaks, flushing or pre-planned capital improvements. Tools should include:
  - Door hangers for individual distribution
  - Yard signs with simple messaging to be placed near work-sites
  - A simple tri-fold brochure with useful information about the utility and appropriate contact information
  - Specific flyers about a range of topics
  - Infographics about how the water system works, from the intake to the customer's site
- **Change in Billing Format** – The City currently has no real way to reach all customers on a regular basis and provide information. The city should consider changing from a billing postcard to using an envelope and bill stuffer. Monthly or bi-monthly bill inserts are typically used to provide educational material for customers and are standard ways to provide information. Understandably, budget considerations must be taken into account.
- **Use Public Affairs Programming and Opportunities** – The news media has been covering this topic quite extensively – there are other media-related opportunities that may reach a wider audience. Taking advantage of these opportunities will help the city relay information to its customers and the community.
  - Participate in regular editorial-board meetings to provide background information and updates on key milestones or events.
  - Identify a local weekly television program and offer to provide guests to speak about key milestones or upcoming events.

Conclusions and Next Steps

The focus of this report is to help assure TTHM compliance and then improve general water quality. The City had good results in its most recent TTHM tests, although that is to be expected with the changes made to date and the cooler weather which contributes to low TTHM formation. Warm weather will be a different situation both in the nature of the Flint River water quality and in the formation of TTHM. With those changes coming, the City needs to act quickly to make improvements before additional testing takes place this spring and summer. The summary below provides the recommended actions, a priority for their implementation and projected costs either operational or capital. The costs are rough orders of magnitude and will vary with changes in water quality, operational decisions, and engineering choices being made and in some cases require State approval. Although a priority is assigned many of these actions can take place simultaneously.

Priority	Action	Annual Operational Cost	One Time Capital Cost
1	Implement operating programs for process control, lab QA/QC, maintenance, and training. These programs are needed regardless of the TTHM issue and will help with transition to lake water. The City has decided upon a central maintenance software and the water system should be the first to utilize this program since costs are already budgeted. These programs should be initiated immediately.	$ 25,000	$ 250,000 - $ 350,000
2	Contract with your engineer and initiate discussions with the State on the reduction of chlorine prior to the filters and changing the filter media to GAC. This activity has the longest time frame for design and approval, but also is extremely critical to assuring reduced TTHM production. The current filter cleaning and maintenance project needs to be adjusted to take into consideration the change in filter media both to dispose of the anthracite instead of cleaning and to install the GAC. This entire project needs to be done by early July to assure a flow of water throughout the system. Several months are required for the engineering design, State approval, bidding of work and installation of GAC and as such needs to begin now.	$ 0	$1,500,000
	Contract with your engineer and initiate discussions with the State on the addition of 0.5 to 1.2 mg/L of either potassium permanganate (dry) or sodium permanganate (liquid). This will take time to get approved and to implement. The use of liquid tanks at the raw water pump station may be the quickest and least expensive alternative for a temporary measure.	$ 160,000 - $ 320,000	$ 50,000

	Contract with your engineer and initiate discussions with the State on the addition of a corrosion control chemical. This action can be submitted and discussed with the state at the same time as the other chemical and filter changes saving time and effort. A target dosage of 0.5 mg/L phosphate is suggested for improved corrosion control.	$ 50,000	$ 50,000
3	Increase the ferric chloride dosage to 100 mg/L depending on river water TOC levels. (Lower TOC levels can be treated with less ferric chloride.) This change can be made now and is allowed by the State.	$ 1,000,000	$ 0
	Reduce the ozone feed rate to 5 mg/. This change can be done now and does not require State approval.	($50,000 – $100,000	$ 0
	Reduce the lime dosage to minimize hardness levels after softening. This will eliminate magnesium removal during treatment, but will also reduce total hardness. A reduction in carbon dioxide dosing for recarbonation treatment also is expected due to the reduction in lime feed. This change can be made now and does not require State approval.	($270,000)	$ 0
4	Confirm with the engineer when the revised hydraulic model will be completed and if necessary for time to focus on areas of longest water age if that would speed up the effort. Identify impact of reducing tank levels or eliminating a tank seasonally to improve water age. Include with this effort a list of hydrants to flush along with time required to assure drawing fresh water through the system. The engineer has been assigned this task already and confirmation of the timing of a delivery is needed.	$ 0	Already Contracted
	Ask the engineer to identify closed valves on a map that are impacting water age and that can be bid for replacement as soon as weather permits. Have the engineer identify areas of the system where the valve contractor should be focused on finding and fixing closed valves.	$ 0	Already Budgeted
5	Implement the recommendations in the communications program including a person assigned to public works education, using envelopes instead of cards along with bill stuffers for education and provide training for staff. Envelopes and bill stuffers are expensive and might be done periodically and not every month. The cost of TTHM notices, Annual Water Quality Reports and City notices should be figured into if any additional costs would exist. Many of these changes are underway now by the City.	Position Being Budgeted	

Notes

- The costs provided are rough order of magnitude which final engineering will firm up but will fluctuate with final decisions on engineering, operating technique and water quality.
- The change from river to lake water will dramatically cut the chemical costs as less is needed once the change occurs. This means that potassium permanganate will likely not be needed, ferric will drop as much as it went up, ozone levels will be lower and little lime will be needed.

Results Expected

The real question is what changes can be expected from these results in lowering the TTHM, improving the aesthetics and preparing for the change to lake water.

- TTHM – The City has already made great strides in reducing the TTHM levels with the changes already made. The additional suggestions by Veolia will further reduce TTHM in the water and help get the city released from the notices being provided to customers.
- **Hardness** – The hardness entering the plant this winter is 360 mg/L with the current system reducing it to 210 mg/L and optimization will reduce to about 180 mg/L. During the summer the levels will be lower probably in the 140 mg/L to 150 mg/L range. The target set by the current best operating practices is 120 mg/L to 150 mg/L.
- **Discolored Water** – The discolored water is caused by the old unlined cast iron pipe. The water from the plant can have an impact on discolored water, but a greater concern is the breaks and construction work that disrupt the flow of water causing discoloration. A polyphosphate is suggested to help bind the old cast iron pipe reducing instances of discolored water. This along with improve flow of water and programmed hydrant flushing will help, BUT WILL NOT eliminate discolored water occurrences.
- **Change to Lake Water** – The recommendations include the suggestion of programs to help the staff better manage the treatment process, additional testing to adjust the plant and additional lab monitoring, a maintenance program focused on keeping equipment properly functioning and more training for staff to improve their skill level. Those actions will prepare the staff for the change of water sources when it comes next year in addition to developing a thorough plan for the switch.

FYI.

I just received this from Natasha regarding the City's request to reconnect to DWSD.

The City is asking that the RTAB consider this tomorrow. I am in the process of sending this to the Board.

It appears that the City is planning on taking the $2M from Fund Balance.

>
> Flint, Michigan – October 12, 2015 – The following statement is in response to remarks from Representative Phil Phelps regarding his recent Freedom of Information Act request of the City of Flint.
>
> "The City of Flint is operating as permitted by the MDEQ, however the specific documents requested by Rep. Phelps do not exist. As the City's full-time back up water source during the previous contract with DWSD, the Flint River was already an approved drinking water source. This issue could be as simple as a miscommunication on what was sought by Rep. Phelps and the City is willing to meet with his office to clarify and provide more information."

>
> "The decision to separate from DWSD and go with the Karegnondi Water Authority, including the decision to pump Flint river water in the interim, were both a part of a long-term plan that was approved by Flint's Mayor, and confirmed by a City Council vote of 7-1 in March of 2013 - a full seven months before I began my term as Emergency Manager. That vote was supported and signed into emergency order by then Emergency Manager Edward Kurtz on March 29, 2013. It was my responsibility to implement the previously accepted and approved plan as the contract with DWSD expired in April 2014 during my term as EM. It did not fall to me to second guess or to invalidate the actions that were taken prior to my appointment. An even bigger concern that everyone should be focused on moving forward is what is done in the long-term to replace the crumbling water distribution system that exits throughout Flint and Genesee County."

Please let him know if you have any questions.

Thanks.

IV. PUBLIC COMMENT 39

V. ADJOURNMENT 45

Wednesday, October 14, 2015
Flint, Michigan
2:04 p.m.

CHAIRPERSON HEADEN: Let's get started, please. Meeting will come to order. First item of business is the roll call. Let the record reflect that all five members of the Board are here.

Next item of business is the approval of the agenda you have before you. There's a communication from the City Administrator to add to our agenda Resolutions 872 and 875 from the City Council meeting of October 12th. Is there a motion to that effect, please?

MEMBER LARKIN: So moved.

MEMBER McGHEE: Support.

CHAIRPERSON HEADEN: Without objection, the agenda's amended to include those resolutions. Are there other additions to the -- to the agenda? Any member?

MEMBER McMAHAN: No, sir.

CHAIRPERSON HEADEN: If not, we'll consider the agenda to be approved as amended.

Next item, the approval of the minutes of our meeting of September 9th which were previously sent to Board Members.

Are there any corrections or additions to those? If not, is there a motion that the RTAB minutes of September 9th be approved as written?

MEMBER McGHEE: So moved.

MEMBER LARKIN: Support.

CHAIRPERSON HEADEN: Without objection those minutes are approved.

Next item, Unfinished Business. I'm not aware of any unfinished business pending before this Board.

Item III, New Business. Mr. Mayor, any items you would like to address?

MAYOR WALLING: Yes. Good afternoon. As Mayor, Flint safety will always be my top priority. And I want to personally bring to your attention the fact that we now know that children in the City of Flint have been exposed to dangerously high lead levels in the water. This has been devastating news for our community. It's unacceptable, it's infuriating. And we have been moving quickly to take the steps necessary to protect the public's health. We've made moving back to Detroit water the first priority, because it's the fastest way to bring in additional corrosion control.

The City's Safe Drinking Water and Technical Advisory Committee met last week and made that recommendation, at which time, myself, the City Administrator agreed that the City would work to go in that direction. And we've been thankful for the support to help us make that change.

While there's been some discussion about the responsibility in this situation, and I certainly agree that the State bears the greatest responsibility for the problem since the Emergency Manager decided to use the river as an interim source, my objective is to get safe water to Flint as fast as absolutely possible.

And I agree to pledge $2 million towards the $12 million that it's estimated cost to move back to Detroit.

After consulting with the City Administrator, I would request that you support the budget amendment that's before you today for that $2 million to become available for the purpose of reconnecting back to Detroit. We also have the pledge of $4 million from the CS Mott Foundation. The City Administrator is working to get that agreement in place. And we know we have many working on our behalf, including the Governor and

our State Representatives and Senator here in this community, for the State Legislature to follow through on the Governor's pledge of $6 million.

I also want to acknowledge that we know Flint has infrastructure problems that go beyond this one issue of water supply, but it has been determined that the corrosion control that's in the Detroit water is necessary for our distribution system. The stability of the lake water that the Detroit System uses is a way to get our system stabilized in the very short-term while we continue to move towards the Lake Huron KWA pipeline next spring.

Our distribution system continues to need work. We've recognized the challenge of lead service lines in our community and we're going to need to continue to talk about all of the precautions that we need to take, with filters and with flushing and testing our systems. And the State and the Governor are also pursuing additional resources to assist our community with that. The community's response has been incredible. We've had an outpouring of support that's ensured that bottled water and filters are being made available, especially to our kids and our most vulnerable

families. And those interim steps are going to continue to be necessary as we make the transition to Detroit, and as we improve our infrastructure system.

So again, I'd just like to reiterate as I have in other meetings, I don't want to take too much of your time, but the importance of this budget amendment that's before you and the companion resolution which the City Council also approved, we're asking for the City Administrator to have the authority to execute the necessary agreements as quickly as possible with both the Genesee County Drain Commission for the transmission of water to this community and also the Detroit Water and Sewage District at the cost estimates that they provided to us, that needs to be turned into an actual contract. And the time is so much of the essence on this. We've committed to have the reconnection back to Detroit in less than two weeks. We believe we're days away from being able to make that happen, which is very good news for our community. And with your support, we expect that to continue to proceed.

And know that I'll continue to fight for additional resources to improve our infrastructure system. This is not the last you're

going to hear of water. We're going to continue to work on this. I have outstanding requests to the Governor of $28 million for lead service line replacements, and also the gap in our Capital Improvement Plan and infrastructure needs. The State did provide us $2 million earlier this year from the Financially Distressed Cities and Townships Fund. We're thankful for that, but we do need much more investment in our infrastructure and we'll continue to work on that and hope to be able to bring those amendments to you as those funds are committed, because they are outside of our adopted budget, but they're necessary for our community as they become available. Thank you.

CHAIRPERSON HEADEN: Thank you, Mayor. I don't see City Council President Freeman here.

We will move on to item III B (1), Resolutions from the Regular City Council meeting on September 14th, 2015. We'll deal with Resolution 817 in a moment, we'll separate it out. But the main resolutions are 798, 828, 829, 830, 794 from that meeting. Is there a motion that those resolutions to be approved.

MEMBER McMAHAN: Mr. Chairman, I would like to just take a moment to -- I will be

abstaining from this discussion, given that 830 involves my institution.

CHAIRPERSON HEADEN: Thank you. So noted. Is there a motion for those resolutions to be approved?

MEMBER LARKIN: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER WALKER-GRIFFEA: Support.

CHAIRPERSON HEADEN: Motion is made and seconded. Is there any discussion concerning those resolutions? If not, those in favor of the motion, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Motion is adopted. That brings us to Resolution 817, which is a budget amendment. Can either the City Administrator or Finance Director speak to that proposed budget amendment?

MS. LUNDQUIST: Good afternoon.

MEMBER LARKIN: Good afternoon.

MS. LUNDQUIST: As you'll see, the budget amendment that's proposed is just a small amount of activity. This fund itself, the 246 Fund, had been overlooked in the adoption of the fiscal year 2016 budget. So, this simply accounts for the

projected activity for the fiscal year '16 and adopts the budget, with no changes in protected activity or events of note.

CHAIRPERSON HEADEN: Thank you. Questions? Is there a motion then that Resolution 817 be adopted?

MEMBER McGHEE: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER McMAHAN: Support.

CHAIRPERSON HEADEN: Motion has been made and seconded. Those in favor, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? The motion is adopted. That brings us to Resolutions from the regular City Council meeting of September 28th. And again, we separated out individual resolutions we'll deal with in a moment, leaving as a group, Resolutions 830, 844, 847, 848, 849, 850, 853, and 855. Are there any questions about those resolutions?

MEMBER LARKIN: Are we going to do 844?

CHAIRPERSON HEADEN: Yes.

MEMBER LARKIN: Just a quick question

for clarity. And actually, Eric, I think you mentioned it a bit. The match for the police liaison, the 50/50 match, does that change where we're already expecting to pay with -- what we had budgeted? Has it changed or --

MR. CLINE: No, I believe this is an agreement that was reached at the school district that they are splitting costs of the liaison officer on a shared basis. I believe those funds were already programmed into the budget before then and this is the agreement. I don't know if anyone will elaborate on that, but that is my understanding. So, I believe this is not connected to the prior motion from a couple meetings ago for the additional officers.

MEMBER LARKIN: No. All right.

MR. CLINE: Does that answer your question?

MEMBER LARKIN: Yes. I just wanted to know if maybe the schools were coming in and now the costs got reduced or we were doing more. It seems like there was no change.

MR. CLINE: Correct.

MEMBER WALKER-GRIFFEA: 851, is that --

CHAIRPERSON HEADEN: 851 is one of the items that were separated out.

MEMBER WALKER-GRIFFEA: Okay. Thank you.

CHAIRPERSON HEADEN: So, is there a motion that resolutions 830, 844, 847, 848, 849, 850, 853, and 855 from the regular City Council meeting September 28th be approved?

MEMBER McMAHAN: Mr. Chairman, again, with 830 I have to recuse myself and abstain from participation.

CHAIRPERSON HEADEN: Thank you.

MEMBER LARKIN: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER WALKER-GRIFFEA: Support.

CHAIRPERSON HEADEN: Proposal has been made and seconded. Is there any discussion? If not, those in favor of the motion, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Motion is adopted.

That brings us to several individual resolutions, beginning with 842. Would someone from the City, please assist us in terms of indicating what that particular resolution does?

MS. HENDERSON: Good afternoon, everyone.

MEMBER LARKIN: Good afternoon.

MS. HENDERSON: 842. The resolution to reprogram the unspent HOME Investment Partnership Funds. These are funds that we have, that need to be reprogrammed, need to be utilized, and this is the way that we are proposing to utilize these funds. It is actually attached -- in the resolution, it does explain how we will be utilizing these funds. It's $250,000 for the purchase rehab resale to Genesee County Habitat for Humanity to rehabilitate and resell a duplex. And then we're also going to reprogram $150,000 for purchase rehab resell to Flint NIPP to rehabilitate and resell up to two homes.

The division also requests to reprogram $20,000 for operating to the Flint NIPP to help conduct the preliminary planning and feasibility work for the project.

We do believe that this is a great investment in the community and this does help with our housing, which we do definitely have a shortage in housing. So that's why we have requested that we reprogram these HOME dollars in this manner and it

is qualified -- it is qualified to reprogram it in this manner.

MEMBER LARKIN: Can I ask, what was the intention of the original purpose of the HUD dollars when you originally received them, what was the designed purpose?

MS. HENDERSON: The HOME Funds, there's a number of things that you can do specifically with HOME funds, any HOME funds. They are definitely all going to be about housing. It's just how you utilize them to be able to do that. And these are not the CDBG Funds, these are not the allocation that the City uses specifically for CDBG. These are specifically HOME Funds that has to be used for home purposes.

MEMBER LARKIN: So, whenever we utilize them, do we have to reprogram them -- I guess what I'm trying to understand right now --

MS. HENDERSON: These are funds that we have available, that we either utilize them or something else --

MEMBER LARKIN: Yeah. That's all I was asking, are the dollars --

MS. HENDERSON: Yeah.

MEMBER LARKIN: Okay. So this is --

MS. HENDERSON: Yes, sir.

CHAIRPERSON HEADEN: Other questions about 842? Is there a motion then that Resolution 842 be approved?

MEMBER WALKER-GRIFFEA: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER LARKIN: Support.

CHAIRPERSON HEADEN: Those in favor, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Resolution 842 is approved.

Resolution 843, please.

MS. HENDERSON: Yes. This resolution is to process a budget amendment to add the funds that we have received from the USDA. And that increases the budget by $200,000.

CHAIRPERSON HEADEN: Questions regarding Resolution 843?

MS. HENDERSON: And this is -- I would like to point out that this is for Chevy -- well, Chevy Commons. And it will be for the -- the -- this will be a part of the phase two. You can already see the work that's going on around Chevy Commons. It was Chevy-in-the-Hole. The Chevy

Commons.

CHAIRPERSON HEADEN: Questions? Is there a motion for Resolution 843?

MEMBER McGHEE: So moved.

CHAIRPERSON HEADEN: Support?

MEMBER LARKIN: Support.

CHAIRPERSON HEADEN: Those in favor of the motion, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Motion is approved. Resolution 845.

MS. HENDERSON: Yes, this is a budget amendment. There was some funding that we did not, in the fourth quarter amendment, get to the FY16 budget. It wasn't included in the budget. And this actually pertains to a project that we've had going on for a number of years, the Smith Village project, and then also the NSP project as well. We are trying to get these homes sold. We've had some vandalism. We've had some things that were not necessarily done correctly by some of the contractors. This has gone on for a number of years. So, we are requesting to be able to -- this is not new funding, for the most part it's moving -- we had this program for last fiscal year and we

Vandalism - Contractor errors

didn't get to utilize that funding in last fiscal year, so we are simply moving it over to this fiscal year so that we can utilize it. And the importance of getting this approved, is so that we can make a lot of the necessary repairs, because we've had a lot of break-ins, a lot of theft, as far as like the fixtures in the homes, we need to be able to do that so that we can get these homes sold. And we've been working on this -- I think this has been probably an eight- or nine-year project with some of these homes.

CHAIRPERSON HEADEN: Are there questions concerning Resolution 845?

MEMBER McMAHAN: Yes, Mr. Chairman. I was wondering, it specifies the purpose of completing CDBG Housing and Smith Village Housing, so that's consistent with it. And then it says for unbudgeted economic development activities in the community. That's kind of a catch-all. What is that?

MS. HENDERSON: Unbudgeted economic development activity, which I think that one -- that would refer to the -- one of our program managers actually does a lot of the economic development, so there is a number of hours that's dedicated there

that was, like, not -- that was omitted from this budget, because we have a contract with the Chamber For Economic Development Services, however, there are some services that we do have to keep in-house, and that was not accounted for. So, that's why that's in here, because -- and that will -- and I can give you an example of that. That would be like our -- when we bring over score -- there are some things in the City that we have to do in-house. IFTs, there are some things we have to do in-house, which takes some staff time to do that, but we have to do that as a City as opposed an outside entity being able to do those things.

CHAIRPERSON HEADEN: Other questions? If not, is there a motion that Resolution 845 be approved?

MEMBER WALKER-GRIFFEA: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER LARKIN: Support.

CHAIRPERSON HEADEN: Motion is made and supported. Those in favor of the motion, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Motion is adopted. Resolution 846, please.

MS. HENDERSON: Okay. This is actually the software that the City actually utilizes for all of our accounting, for inspections, soon to be business licenses. It would be in our IT -- IT Department, basically, that manages this. This is an agreement that was entered into, a four-year agreement, with the Emergency Manager at that time and we would like to continue it. And it's actually an increase of $1,446, and BS&A is something that we have to utilize for the functioning of operations such as our accounting, all of that, we run that through that; our payroll, for HR, we utilize this software. So, this is very important. It just represents that we are continuing with a contract to be able to continue to be operational and be able to manage our budgets, manage our input and output, accounts payable, receivable, treasury department, all of our departments depend upon this software.

CHAIRPERSON HEADEN: And funds are currently budgeted for this?

MS. HENDERSON: Yes, sir.

CHAIRPERSON HEADEN: Questions? If not, is there a motion for Resolution 846 to be approved?

MEMBER McMAHAN: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER WALKER-GRIFFEA: Support.

CHAIRPERSON HEADEN: Those in favor of the motion, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Motion is adopted.

Resolution 851, please.

MS. HENDERSON: Resolution 851, this is for the purchase for pipes, stainless steel repair clamps and repair parts for the Water Service Center. This is something that is definitely needed. These are items that are -- that we would have to purchase just at different times, because this is what it takes to be able to operate a distribution and filtration system. So, these are items that we need for the repair and maintenance of this system. And it does -- and I will note, no matter what water source we're with, this is something that's going to be needed.

CHAIRPERSON HEADEN: Are there questions regarding Resolution 851?

MS. HENDERSON: And it is a budgeted expenditure, I might add.

CHAIRPERSON HEADEN: If there are no questions, is there a motion that Resolution 851 be approved?

MEMBER McGHEE: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER McMAHAN: Support.

CHAIRPERSON HEADEN: Those in favor of the motion, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Motion is adopted. Resolution 852.

MS. HENDERSON: Resolution 852 authorizes the City to retain (Lake Agency to provide excess liability insurance coverage.) This is, basically, something that's very standard. We do have to have insurance, so we would like to continue for two more years, and then of course we will see if we can get a better price. However, insurance doesn't necessarily ever go down, it usually goes up, with insurance. So this is what that would be. It's just basically to extend that service, and we would like to continue with Lake Agency to provide that liability insurance coverage. And this is a budgeted expenditure.

CHAIRPERSON HEADEN: Questions

regarding Resolution 852? Is there a motion that 852 be approved, please?

MEMBER LARKIN: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER McMAHAN: Support.

CHAIRPERSON HEADEN: Those in favor of the motion, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Resolution 852 is adopted.

That brings us to 854.

MS. HENDERSON: Okay. This is actually very similar in the sense that we would like to provide excess liability insurance coverage. This is something that has been -- we worked with Lake Agency for this coverage, and it's definitely something that is needed. A boiler is very expensive, so we must have that type of coverage for it. So, we believe this is acceptable, so this is something that we have proposed and Council did agree with that as well. And it is a budgeted expenditure.

CHAIRPERSON HEADEN: Questions regarding Resolution 854? Is there a motion that 854 be approved?

MEMBER McGHEE: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER LARKIN: Support.

CHAIRPERSON HEADEN: Those in favor of the motion, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Motion is adopted. That brings us then to two resolutions that we added to the agenda from the City Council meeting a few days ago, Resolutions 872 and 875, which the Board received I believe yesterday. While we have you here, City Administrator, do you wish to just summarize 872 and we'll see if we have any questions?

MS. HENDERSON: Yes, actually, we -- this is -- of course, I'd like to echo a lot of the things that the Mayor has already stated. We do believe that it's in the best interest of the City to reconnect to DWSD. We did have a local foundation that actually has donated $4 million for us to be able to do that, and also the Governor has stated support for $6 million dollars. And with this resolution, we have committed $2 million. This did go before Council, and Council unanimously approved the $2 million to be taken from fund

balance to support this. This is something that we expect to happen in the next week or so. We are -- and this will also get into the second resolution, because they basically are -- they both are combined in the sense that we need both of these. Which authorizes myself to enter into an agreement with DWSD and Genesee County, to be able to -- to receive the water and reconnect.

So, I would like to state that this is something that definitely is priority, and even with our policies that we -- in our policy, we do say that we should always at all times have at least 25 percent of operating fund balance, however, this is an emergency that I would see that you do take from that fund balance to be able to do this, especially when you have the Genesee County Health Department releasing a public health advisory. The City has released a lead advisory as well. So this is something that I felt very strongly about, because I don't take it lightly, when we do have to go into fund balance to do anything when we're not at the point in which the policy states that we need to be.

Also, I just would like to note that the City continues to deal with the order that we're

under, because of the water litigation that we're going through, so that has slightly -- not slightly, that has greatly decreased our fund balance as well, with some of those -- with the projections that we have. And that's something that we will be coming to you with -- coming to you with on next meeting, because I didn't want to pull too many items forward, but I just want you to be aware that this is something that we do feel very strongly about, even though we have the situation with the litigation that we're going through, and I believe that it is in the best interest of the City to pledge $2 million and become reconnected to DWSD.

CHAIRPERSON HEADEN: And just to clarify, am I correct that the fund balance to which you refer, is fund balance in the water fund?

MS. HENDERSON: Yes, sir.

CHAIRPERSON HEADEN: Okay.

MS. HENDERSON: And it's actually the water and sewer fund, because those bills are together. So, when you don't make one bill, you're just not paying both of those bills. So we have amended the water and sewer revenues as well, both of those we've had to do that and we've also halted a number of our capital improvement projects, as

well.

CHAIRPERSON HEADEN: Questions?

MEMBER WALKER-GRIFFEA: I have a question. I know in your original letter it said the general fund balance, so that was where I had looked. So, I didn't have the opportunity to look at the water fund balance. So how much is left --

MS. HENDERSON: I would say the -- oh, in the letter?

MEMBER WALKER-GRIFFEA: In the initial letter it said, "General" which is --

MS. HENDERSON: It was really water, and that's why I gave you all the new letter. And I never did state what was in the -- the -- in the fund, because those amendments will come to you next week, but since you have asked I do have them right in front of me.

Okay. We would be left with about a little bit over $6 million as a fund balance at that point, at the point in which we bring this amendment forward.

MEMBER LARKIN: What's the 25 percent? What was --

MS. HENDERSON: We should have about, what, 4 million -- we should have 17 --

MEMBER LARKIN: So 17 is the number that you want to be at?

MS. HENDERSON: Yes, that's where we need to be at.

MEMBER WALKER-GRIFFEA: Instead of $6 million.

MS. HENDERSON: Oh, that's water and sewer. And we had to reduce both because in -- because we have things going on as relates to the sewer as well. So, when I say "Water" I mean, water and sewer. So, it all will be -- you all get one bill for your water and sewer.

MEMBER McMAHAN: So, this is a combination of funds 590 and 591 --

MS. HENDERSON: Yes, sir, that is correct.

MEMBER McMAHAN: Okay.

MEMBER LARKIN: And so, it was also mentioned in the letter that there be a plan to rebuild the fund or something of that nature. I'm trying to get the exact language. But what we would have to rebuild over time is 9 million, is that what we need to build back up; is that correct?

MS. HENDERSON: If we don't -- we'll have to continue to rebuild, however at this point,

how we get there, we -- a lot of things depend on how the litigation goes. So, how we can actually have that plan of action. The first -- something that we've done proactive now, is that the capital improvement projects, all of those, unless we had to have them, for the switch to KWA, those have all been halted, all of them.

MEMBER LARKIN: Roughly, what impact has that been?

MS. HENDERSON: There was like eight -- seven -- 7.2 million for the projects and then also in addition to that, we froze about 1.2 million in jobs as well. Like, we didn't fill those positions that were slated to be filled.

MEMBER LARKIN: One thing I'm interested in, and this isn't a direct question, but I don't know if we can calculate it, but how much we will end up losing -- the reason we have those capital projects set up, is because we need those fixes over time, because things are deteriorated and how much more is it going to cost us, because we have to hold? I'm wondering how we can get to that -- it's not really a direct question, but it's something that we also have to consider.

MS. HENDERSON: That's something --

this is very devastating. Everything that's happening right now with the litigation, it's devastating the City. So, those two funds are definitely suffering as a result of this. So, we are coming up with things to try to curtail the effect -- the impact. However, at this point, we have found like, roughly, let's say, almost $9 million to take out of the budget. However, we are billing at a lower rate, because of the order. And then also, the bills that individuals had at that time, they do not have to pay those bills. So, we're billing lower, and even at that point, we had a lot of outstanding bills. We have to take into -- and all of that is taken into consideration with the amendment that we will bring, the first quarter amendment that we will bring forward in the next meeting.

MEMBER LARKIN: I'm going to ask for a brief view of that. Do we have any projections as to how much the decrease will be in our revenue based on that water piece? So, I know we've decreased our expenses by about $9 million, and do we know kind of what we projected. Worst case scenario if --

MS. HENDERSON: I can tell you what we

decreased in -- in the charge of services for the sewer fund and for the water fund. So, 5.9 million for sewer fund, and 8.5 for the water fund.

MEMBER LARKIN: Gosh. Thank you.

MEMBER McGHEE: Who -- who -- out of all of the municipalities -- this is a KWA question. Out of all of the municipalities that would benefit from KWA once it's built, who are the current financial partners paying for --

MS. HENDERSON: They would be the County, because the County -- those are their -- the other cities that receive their water from the County, they are County customers. So it will be the City of Flint and the County. So, we're responsible for that fund. Of course, that is split amongst us, you know, both entities and it's not half and half.

MEMBER McGHEE: Right.

MS. HENDERSON: However, I will note that we do have a $6 million bond payment that is due this fiscal year.

MEMBER McGHEE: Is there any thought that we will not be able to take care of that bond?

MS. HENDERSON: No, this takes into -- this -- this amendment does take that into

consideration, because it's already a part of the budget, so we take that into consideration with the amendment. We have that budgeted to do so.

MEMBER McGHEE: Okay.

MEMBER McMAHAN: So, the numbers that you just revealed would indicate that we have $14 million fund decrease in revenues in water?

MS. HENDERSON: Yes.

MEMBER McMAHAN: And $9 million --

MS. HENDERSON: I would like to be clear, that's over the whole fiscal year.

MEMBER McMAHAN: Fiscal year, you have $9 million decrease in expenditures associated with those funds?

MS. HENDERSON: Yes.

MEMBER McMAHAN: And so simple math gives us approximately $5 million.

MS. HENDERSON: $5 million -- that's correct.

MEMBER McMAHAN: Can you -- and this is maybe an unfair question and I'm happy to -- if you want to push back and say it's an unfair question, but it would be -- would be helpful to, in your scenario plans, looking out for the remainder of the fiscal year, knowing that we will connect, on

current schedule, to KWA June of 2016. There could be slippage in that, naturally. Can you kind of frame best and worst case scenarios for the remainder of the fiscal year for us? What we are looking at on the event horizon for the remainder of the fiscal year?

MS. HENDERSON: In reference to KWA?

MEMBER McMAHAN: With respect to the finances, the City financial budget as reflecting these. So, assuming that, you know, worst case scenario, assuming best case scenario assumption, what you're kind of planning. Just to give us a sense about what's coming.

MS. HENDERSON: Okay. The worst case scenario would be that we don't -- we don't meet the targets that we have in this amendment. And amendments -- just so that you all know, we will be amending -- bringing amendments every quarter. So if we don't see that we're meeting these projections, we'll amend up or down with revenues. And that also goes for the expenditures as well.

So, given that scenario, there is not a good scenario in this, because to bring this amendment forward and have to amend the budget to this type of fund balance in the first place, that's

a terrible scenario, in my opinion.

And the -- the -- I guess the worst scenario would be that this fund goes into a deficit. And there's been so much work that's been put in by various individuals over the past few years to ensure that we're not in that position. We've been on a really good track and had projects that we were slated to do and to ensure that the infrastructure is good, because no matter where we get water from, it doesn't matter if our infrastructure is not good.

So a worst case scenario is this fund goes into a deficit. And that's a possibility at some point past this time, because there's some projects that just need to be done. There is regular maintenance that you do, and there's various things -- we a very aged system. And a lot of these capital projects need to be done. And that is why the Mayor has already asked the State to help us with that, because we need a lot of these capital improvement projects, and we were well on our way to getting there, and this has halted us. I mean, think about the tremendous effect that in your first quarter that you have to come and amend your budget, amend your revenue over $8 million. That's a huge

setback.

So, this, to me, is the worst case scenario, and I just hope that our projections and that the revenue flow can actually -- maybe with DWSD, that restores the public confidence and more people will be willing to pay their bills, because right now, quite frankly, that is not happening. I'm not saying everyone is not paying their bill, I'm not trying to say that, however, I'm saying we can look over a time period and see how much we usually -- how many bills are usually paid, as opposed to how many are paid now. We can look at that from month-to-month. We can even go back the previous year, we can compare it. So we can -- we can definitely see that this financially does hit the City. And we have to be forthcoming in bringing an amendment that reflects such.

And a good case scenario would be that the water litigation, is that we are vindicated in that in some ways, because it really impacts the City for a judge to say that there cannot be any turn-offs based on your bills. So, to say -- to have the authority to say no shut-offs at all, so that means, don't pay your bills, you don't have to, the City cannot do anything.

MEMBER LARKIN: I have a question. You mentioned, and the Mayor has mentioned as well, working in coordination with the State. In proposing this or in conversations with this, has there been conversation with Treasury? I suppose we can ask the representatives here as well, on what impact this will have on the City moving forward. So we are in place, because we have moved to a certain step of receivership process. Does making this decision about this $2 million, are they okay with this? Is this something that they think was necessary, it wouldn't necessarily move us backwards along the receivership timeline?

MS. HENDERSON: No, I don't believe that -- I don't believe that the Governor would have pledged $6 million if that were the case. If you don't have confidence in your water source, and that's -- everyone feels that way in a majority and it's on the news a lot, health advisory, you have the medical community out there, I think we're doing ourselves more of a disservice not to take the $2 million and hope that that will help us be able to retain some of the revenue that we're already losing.

CHAIRPERSON HEADEN: Other questions?

MS. HENDERSON: Thank you.

CHAIRPERSON HEADEN: Is there a motion that Resolution 872 be approved?

MEMBER WALKER-GRIFFEA: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER McMAHAN: Support.

CHAIRPERSON HEADEN: Motion has been made and seconded. Those in favor of the motion, please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Motion is adopted.

That leaves the corollary resolution 875 which would authorize City Administrator to enter into any contracts with regards to reconnecting to the Detroit water system with either DWSD or the Genesee County Drain Commission.

Any questions about Resolution 875? If not, is there a motion that Resolution 875 be approved?

MEMBER LARKIN: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER McGHEE: Support.

CHAIRPERSON HEADEN: Motion has been made and seconded. Those in favor of the motion,

please say "Aye."

(All ayes.)

CHAIRPERSON HEADEN: Opposed? Resolution 875 is adopted. That concludes Resolutions.

Item C, any City Administrator items other than the budget to actual report?

MS. HENDERSON: No, sir. And if you have any questions, I will defer to Ms. Lundquist.

CHAIRPERSON HEADEN: One question I did have regarding that. Is there's a line item on the -- in the General Fund under "Total revenues" that said, "Drawing from Fund Balance." It's -- I believe it's a negative $1 million. If someone could just point out what that is for my edification.

MS. LUNDQUIST: Thank you. It's an excellent question. And an example of the current planning that the City of Flint had entered into with the adoption of its fiscal years '15, '16 and '17 budgets, it actually budgeted to set aside with each of those budget years a million dollars to its fund balance reserve. So, when you looked at the bottom of the third column, the '15, '16 amended budget, where you see the net revenues and

expenditures, there's $2 in parentheses. Really that reflects that a million dollars would remain end of fiscal year and will be contributed to our fund balance reserve as we try to attain the percentage that was set by ordinance.

CHAIRPERSON HEADEN: Thank you.

MS. LUNDQUIST: Thank you.

CHAIRPERSON HEADEN: Other questions? Without objection, the budget to actual report for July 2015 will be received.

That brings us to Item IV on the agenda, Public Comment. Do we have anybody who indicated an interest?

MR. CLINE: We do have two individuals for public comment. First individual is Eric Mays.

CHAIRPERSON HEADEN: And I'll remind everyone that the previously adopted motion of limiting public comment to no more than two minutes per person remains in effect. Councilman?

MR. MAYS: Good evening. I'm familiar with those rules, I would ask that you sometimes extend those rules, especially in your capacity to speak as an elected official and what we deem as an emergency situation. You can listen, you cannot listen, you can choose to talk privately. But as I

do my due diligence sitting in the seat that I've taken oath of office to do, when I took that oath, I took it based upon the Charter of the City of Flint. Public Act 4, you know, I mentioned Mr. Headen, under Public Act 72, we are under Public Act 436 now, and nothing in that Act tells me that an Emergency Manager order can change or amend our charter. As a matter of fact, we have a Charter Review Commission looking at those things now.

Our Charter has been greatly amended for me to do my job, in the sense that as the legislative body, my job is to inquire, investigate. It even says we can put people under oath and get information as it relates to the quality of water -- and I stand here today a little dismayed, because I asked two or three times, "What was the amount in the water and sewer fund?" I was first told $8 million, and then when I said "$8 million", then I was told "$14 million." And now today, I hear back to $8 million. That was the sort of surplus I was told had been taken. You asked the question last meeting, I think, what was the expenditures and revenues. I was told that it was -- at first $8 million a month, it dropped to $6 million and that was a loss of $2 million; reported in the news we

had 447 so customers a day drop down to 344.

I mean, I got good grades in school, I listen well, I inquire and particularly the important stuff. And then you changed your agenda, you allowed the Council President to come -- when you see me vote on stuff unanimously I think when they come before you with a unanimous vote; if I didn't get information I vote, no.

The point I'm trying to make is this: I'm very serious about no slip-backs in finances. And I'm very serious about giving information. You have an order left by Ambrose that says you have some power as it relates to us being able to amend the Emergency Manager orders to give us the power to inquire and so forth.

If I go over your time, and I'm trying to do my due diligence for folks that come up to you, and then you meet once a month, and we're trying to communicate how to run a City to you, I would hope that, you know, whether you actually say it or suspend it, it is very difficult for me to articulate in two minutes. I listen to the man. I protest it, marched out, learn about water, TTA, lead, finances and infrastructure. I say it's Forest Gump having to learn about shrimp. And I'm

here to tell you, that if you guys think that sometimes what you get here is what I'm getting, and you not having to be here for us to communicate, come to our Committee meeting some time. Sit in on our Finance Committee meetings as individuals, sit in on our Council meetings. I'm not confident yet that we are doing all we need to do, and listening to each other in order to travel around the City correctly in open and honest way to get information. People are pointing finger left and right. If people listened earlier, I know for a fact, that things can be said and done properly. I don't believe that we, in certain situations, I don't believe that people's projections will be right, because good water will flow and people will use it more, so forth and so on.

I also believe, as I'm being polite -- I know I violated the rules and I'll sit down. I also note and believe that when people raise water rates unlawfully, you can hope for a judge's decision to change, but some of this stuff has to do with -- Mr. Headen, you legal. Mr. Bade is legal. It all works together, what you can and can't do in their leadership position.

We got here because of the political

will. People didn't have the political will to meet, don't have a political will to do their due diligence. I'm asking you to have a political will to amend the Emergency Manager order that allows me to get good information, hold hearings and do my job. By the time stuff get to you, I want to been able to done my job. I want you to get good information. I'm getting and hearing different stuff and I'm getting very concerned at this point.

So, this is a red flag from me to you. And this is the short version. I can talk just as specific as the Emergency Managers and Mayor when given a chance about finances and the mechanics of how the City works both financial and legal. I'm very concerned moving forward.

CHAIRPERSON HEADEN: Thank you, Councilman.

MR. CLINE: The last individual is R. L. Mitchell.

CHAIRPERSON HEADEN: Mr. Mitchell?

MR. MITCHELL: Yeah. I'm here to talk about Public Act 432, I believe it is, about financial management. She come to you asking your permission, because we in the state of emergency and the Mayor seems like he can't speak no more, because

the financial management, and I'm saying this for the record. Thank you today.

Fred Tucker was murdered, one of the councilmen previous. My house was broken into when I was in a Council meeting Monday. And I thought they must have thought I was dead, because they took armored bars off the door and then I went to report it and they said "What you owe somebody some money?" When you ain't got any officer and the City is getting turned around and no water and you -- they act like you -- they give you the wrong information up here in front of there and the Mayor and -- and the Mayor is sitting right here, too.

And I'm going to leave it right there, because Mays said it a direct political point to you and you can figure it out. That's it.

CHAIRPERSON HEADEN: Thank you.

MR. MITCHELL: Yep.

MR. CLINE: That's all of the public comment.

CHAIRPERSON HEADEN: Is there any further business before the Board at this point? If not, is there a motion that we adjourn?

MEMBER LARKIN: So moved.

CHAIRPERSON HEADEN: Is there support?

MEMBER McMAHAN: Support.

CHAIRPERSON HEADEN: Without objection, we're adjourned.

(Meeting adjourned at 3:00 p.m.)

C E R T I F I C A T E

I, Quentina Rochelle Snowden, do hereby certify that I have recorded stenographically the proceedings had and public comment taken in the meeting, at the time and place hereinbefore set forth, and I do further certify that the foregoing transcript, consisting of (46) pages, is a true and correct transcript of my said stenographic notes.

Dated: October 23, 2015

My commission expires: 1/4/2018

LICENSE TO TRANSMIT WATER

This License to Transmit Water ("License") entered into on October 14, 2015, (the "License Date" and "Effective Date") is made between the City of Flint, a Home Rule City (the "City"), and the Genesee County Drain Commissioner, as County Agency, a county agency pursuant to the County Public Improvement Act 342 of 1939, as amended. ("GCDC"). The City and GCDC may be referred to individually as a "Party" or collectively as the "Parties."

RECITALS

WHEREAS, the City has requested the Detroit Water and Sewerage Department ("DWSD") to provide the City with potable water; and

WHEREAS, DWSD water distribution system has no physical connection to the City water distribution system, and

WHEREAS, GCDC is currently purchasing potable water from DWSD and GCDC is receiving DWSD water at the water meter GN-01 near Baxter and Potter Roads, located in Genesee County and more fully set forth in Exhibit 1 (hereinafter known as "GCDC/DWSD Connection"); and

WHEREAS, GCDC has a physical connection to the City water distribution system near Center Road and Pierson Road in Genesee Township, Genesee County, Michigan, which is more fully set forth in Exhibit 2 (hereinafter known as "GCDC/City Connection"); and

WHEREAS, GCDC owns nine (9) miles of water transmission pipeline ("Pipeline") that connects the GCDC/DWSD Connection to the GCDC/City Connection; and

WHEREAS, GCDC has the ability to allow Flint to transmit water through the Pipeline from the GCDC/DWSD Connection to the GCDC/City Connection so DWSD may service the City with DWSD treated potable water; and

WHEREAS, this License shall govern the terms and conditions of Flint transmitting water through the Pipeline from the DWSD/GCDC Connection to the GCDC/City Connection, and

WHEREAS, the Parties hereto acknowledge and agree that DWSD may assign its contract to provide potable water to the City to another entity, including, but not limited to, the Great Lakes Water Authority, and, if DWSD assigns its contract to provide water to the City, all reference to DWSD in this License shall be replaced by the party to whom DWSD assigns its contract

NOW, THEREFORE, THIS LICENSE is hereby made and mutually entered into by the City and GCDC for the mutual consideration stated herein and the Parties agree to the following:

1 **Adoption of Recitals.** All of the matters stated in the Recitals of this License are true and correct and are hereby incorporated into the body of this License as though fully set forth in their entirety herein. However, in cases of conflict, provisions of this License shall prevail over the matters stated in the Recitals.

2. **Contract for Water.** As a condition precedent to this License being effective, the City shall enter into a contract with DWSD for DWSD to supply the City with water and said contract shall require the City to pay DWSD directly for all water consumed by the City and any applicable charges, fees, or other amounts charged by DWSD The City shall hold GCDC harmless from any and all debts the City incurs from receiving water from DWSD and any and all costs that DWSD may impose on GCDC as a result of the City receiving water from DWSD.

3. **Term.** The Parties hereto understand and acknowledge that GCDC needs the Pipeline to transmit its potable water to its customers once GCDC starts receiving raw water from KWA. The Parties agree and acknowledge that this License shall expire sixty (60) days after the City has received notice from KWA that raw water is available for the City for treatment; however, the City may request GCDC to extend this License until GCDC starts receiving raw water from KWA. The City shall not transmit water through the Pipeline after GCDC begins to transmit its potable water to its customers. The City acknowledges and consents to GCDC terminating any water transmission in the Pipeline for the benefit of the City once GCDC begins to produce and sell its potable water to its customers. The City may terminate this License by providing GCDC with thirty (30) days written notice of termination.

4 **Consideration.** In exchange for GCDC allowing the City to transmit water through the Pipeline, the City shall pay GCDC one dollar ($1.00) per month for the term of this License The City is allowed to pay the first nine (9) months in a lump sum payment.

5 **Meters and Billing.** The City hereby grants GCDC complete access to and upon verbal request by GCDC complete control of Station 2, including, but not limited to, all meters, valves, structures, and appurtenances until the Karegnondi Water Authority ("KWA") has notified the City that water is available to the City for treatment or GCDC has provided the City with thirty (30) days notice that GCDC no longer requires access to Station 2. GCDC shall have the meter calibrated within fifteen (15) days of the execution of this License and all costs for the calibration shall be the responsibility of the City The City shall be entitled to all data, meter reads, and other information that is collected by GCDC at Station 2 The City shall be responsible for all utility costs associated with the operation of Station 2 The City shall be responsible for all repairs to the meter and meter pit GCDC shall notify DWSD of the monthly meter read for Station 2.

6. **Transmission of Water.** GCDC shall use reasonable diligence to allow the City regular and uninterrupted transmission of water through the Pipeline from the GCDC/DWSD Connection to the GCDC/City Connection, however, Flint shall hold harmless and indemnify GCDC for any damages, breach of contract, or otherwise for interruption of service or curtailment of supply for any cause beyond the control of GCDC. These could include, but are not limited to, Acts of God, strikes, lockouts or other industrial disturbances, acts of public enemy, orders of any kind of the Government of the United States or the State, or any civil or military authority, insurrection, riots, epidemics, landslides, lightning, earthquake, fires, hurricanes, storms, floods, washouts, droughts, arrests, restraint of government and people, civil disturbances, explosions, breakage or accidents to machinery, pipelines or canals, partial or failure of the Pipeline or appurtenances. The City shall further hold GCDC harmless from any claim for damages related to continuity of service by third parties, including DWSD, for GCDC's inability to allow the transmission of water due to any cause beyond the control of GCDC

7. **Water Quality.** The City shall hold GCDC harmless from any water quality related claim for damages by third parties, including DWSD, served by the City, which are asserted against, or are imposed upon or incurred by GCDC and which result from, relate to, or arise out of a claim regarding the treatment of water or the quality of water

8. **Volume Available.** The City shall hold GCDC harmless in the event that DWSD cannot meet the volume demands of both GCDC and the City GCDC shall be entitled to receive the quantity of water requested by GCDC and the City shall be entitled to any remaining volume of water. The City shall notify GCDC daily of its anticipated water volume for that day and GCDC shall be responsible for notifying DWSD of the water volume demands for both GCDC and the City

9 **Pipeline Malfunction.** If the Pipeline shall malfunction for any reason while the City is transmitting water through the Pipeline, GCDC shall notify the City within two (2) hours of verifying the Pipeline malfunction. Thereafter, the malfunction shall be promptly repaired by GCDC and a detailed invoice for one-half (1/2) of the total cost of the repair shall be submitted to the City. The City shall have thirty (30) calendar days to process and authorize the payment for the repair to GCDC Payment shall be made to GCDC within thirty–two (32) calendar days by either check or wire transfer Wire transfer instructions are available from the GCDC Chief Financial Officer The City shall indemnify and hold GCDC harmless for any and all claims from the City or third parties that relate to the City not being able to supply water to its customers due to the malfunction.

10 **Severability.** The Parties hereto specifically agree that in case any one or more of the sections, subsections, provisions, clauses or words of this License or the application of such sections, subsections, provisions, clauses or words to any situation or circumstance should be, or should be held to be, for any reason, invalid or unconstitutional, under the laws or constitutions of the State or the United States of America, or in contravention of any such laws or constitutions, such invalidity, unconstitutionality or contravention shall not affect any other sections, subsections, provisions, clauses or words of this License or the application of such sections, subsections, provisions, clauses or words to any other situation or circumstance, and it is intended that this License shall be severable and shall be construed and applied as if any such invalid or unconstitutional section, subsection, provision, clause or word had not been included herein, and the rights and obligations of the Parties hereto shall be construed and remain in force accordingly

11 **Governing Law and Venue.** It is specifically agreed among the Parties to this License that Genesee County, State of Michigan is the place of performance of this License In the event that any legal proceeding is brought to enforce this License or any provision hereof, the same shall be brought in the Genesee County Circuit Court

12. **Interpretation and Construction.** For purposes of interpretation and construction of this License, both the City and GCDC shall be deemed to have been the drafter of this License and this License shall not be construed against any Party to this License

13 **Modification.** This License shall not be modified, altered, or amended except through a written amendment signed by the Parties.

14. **No Third Party Beneficiaries.** This License is not intended to confer upon any person or entity, other than the Parties hereto, any rights or remedies of any kind or nature whatsoever

15 **Notices.** Other than invoices and payments, any notice, communication, request, reply or advice (herein severally and collectively, for convenience, called "Notice") herein provided or permitted to be given, made or accepted by any Party to any other Party must be in writing and may be given or be served by depositing the same in the United States mail postpaid and registered or certified and addressed to the Party to be notified, with return receipt requested, or by delivering the same to an officer of such Party, or by prepaid telegram when appropriate, addressed to the Party to be notified Notice deposited in the mail in the manner described above shall be conclusively deemed to be effective, unless otherwise stated herein, from and after the expiration of three (3) days after it is so deposited. Notice given in any other manner shall be effective only if and when received by the Party to be notified. For the purposes of notice, the addresses of the Parties shall, until changed as hereinafter provided, be as follows:

To GCDC: **Genesee County Drain Commissioner's Office, Division of Water and Waste Services, G-4610 Beecher Road, Flint, Michigan 48532.**

To the City: **City of Flint, 1101 South Saginaw Street, Flint, Michigan 48502.**

The Parties hereto shall have the right from time to time and at any time to change their respective addresses and each shall have the right to specify as its address any other address by at least fifteen (15) days written notice to the other Party hereto.

IN WITNESS WHEREOF, the Parties hereto acting under authority of their respective governing bodies have caused this License to be duly executed in several counterparts, each of which shall constitute an original, all as of the day and year first above written, which is the License and Effective Date.

RESOLUTION NO.:_____

PRESENTED: 10-12-15

ADOPTED:_____

RESOLUTION AUTHORIZING THE CITY ADMINISTRATOR TO TAKE NECESSARY ACTION TO CONVERT TO THE DETROIT WATER SYSTEM

BY THE CITY ADMINISTRATOR:

In order to promote the health, safety and welfare of this community, it is in the best interests of the City of Flint for the Detroit Water and Sewer Department (DWSD) to supply the City with treated water pending completion of the Karegnondi Water Authority; and

In order for DWSD to supply the City with water, it will be necessary to utilize pipe owned by the Genesee County Drain Commission (GCDC); and

The City, DWSD and GCDC are actively negotiating the terms of the necessary agreements to ensure this transition occurs as soon as possible, and

IT IS RESOLVED that the City Administrator is hereby authorized to enter into agreements with DWSD and GCDC for conversion to the Detroit Water System

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

Jody N. Lundquist, Chief Financial Officer

FOR THE CITY OF FLINT:

Natasha L. Henderson, City Administrator

APPROVED BY CITY COUNCIL:

PRESENTED TO CITY COUNCIL: 10/12/2015

ADOPTED BY CITY COUNCIL: 10/12/2015

How does lead get into my tap water?

Under typical circumstances, lead will dissolve into the water. The concentration of lead in drinking water can vary greatly, depending on the corrosiveness of the water, the type and age of the plumbing materials and the length of time that the water stands in the pipes The highest levels of lead occur when very corrosive water stands motionless in lead or lead soldered pipe for long periods of time.

How do I know if my tap water is contaminated with lead?

The only way to know whether your tap water contains lead is to have it tested. You cannot see, taste, or smell lead in drinking water. There are different sampling methods for sampling lead in drinking water. To determine your household risk, it is recommended to take a first draw sample.

Does lead in my tap water cause health effects?

Lead can cause damage to the brain, red blood cells and kidneys. The greatest risk is to young children and pregnant women. Amounts of lead that won't hurt adults can slow down normal mental and physical development of growing bodies. Lead in water can be a special problem for infants, whose diets may be mostly liquids, such as baby formulas or concentrated juices mixed with water. Smaller bodies can absorb lead more rapidly than bigger ones. A child's mental and physical growth can be permanently harmed by too much lead. Risk will vary, depending on the individual, the circumstances, and the amount of water consumed.

What can I do to reduce or eliminate lead in my tap water?

Flush your cold-water pipes by running the water for approximately 5 minutes. The longer the water has been sitting in the pipes, the more lead it may contain. You can fill containers for later use, after the flushing process. Use only water from the cold-water tap for drinking, cooking, and especially for making baby formula. Hot water is likely to contain higher levels because it dissolves more lead.
You may choose to install a water filter that is NSF-certified for lead removal. If a water filter is installed, replace filters at least as often as recommended by the manufacturer.

Buy a lead-free faucet. The legal definition of "lead-free" still allows brass faucets to contain up to 8 percent lead. However, faucets marked with "NSF 61/9" and/or "California Proposition 65" meet stricter limits. Regularly clean particles from faucet aerators.

Is it safe to take a bath or shower, if my water has high lead levels?

Yes. Bathing and showering should be safe for you and your children, even if the water contains lead over EPA's action level. Human skin does not absorb lead in water. This information applies to most situations and to a large majority of the population, but individual circumstances may vary. Some situations, such as cases involving highly corrosive water, may require additional recommendations or more stringent actions

Who do I contact for more information?

The local water authority is always your first source for testing and identifying lead contamination in your tap water You can visit the City of Flint Website at www.cityofflint.com or contact the Flint Water Department at 810-787-6537.

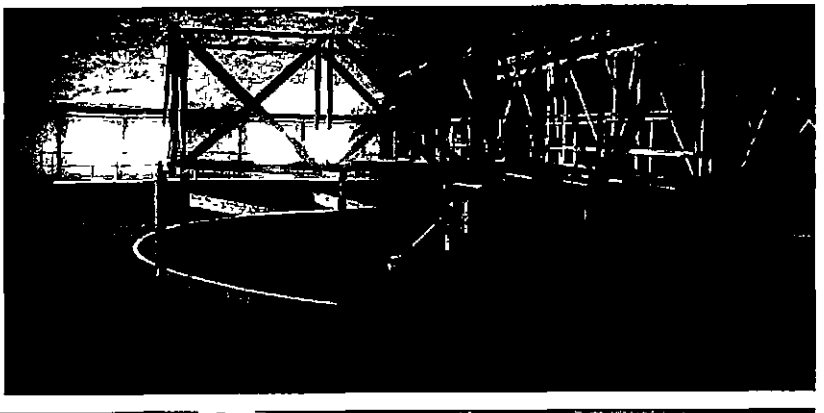
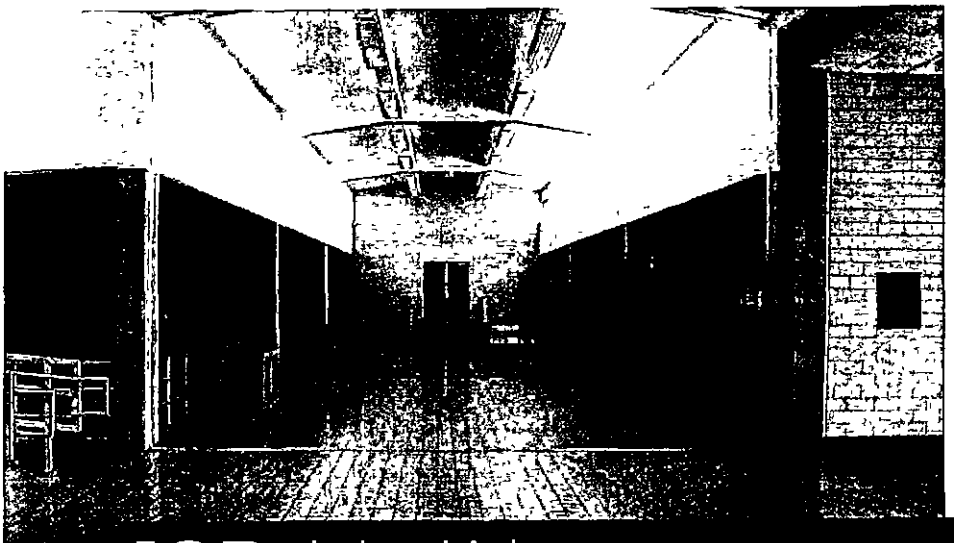
Operational Evaluation Report
City of Flint

FINAL

Trihalomethane Formation Concern

February 27, 2015





Lockwood, Andrews & Newnam, Inc.
A LEO A DALY COMPANY

EXECUTIVE SUMMARY

Environmental Protection Agency (EPA) and Michigan Department of Environmental Quality (MDEQ) regulations require that public water suppliers test drinking water quarterly throughout the distribution system for disinfectant by-products (DBP's). Two categories of DBP's, tri-halomethanes (THM) and halo-acetic acids (HAA5), are regulated and must be tested for. The City of Flint began operation of their water treatment plant (WTP) full time with the Flint River as the source on April 25, 2014. Since that time, four quarters of samples taken have resulted in an annual average violation for total THM. Prior to the first violation (Nov. 2014), the City hired Lockwood, Andrews & Newnam, Inc. (LAN) to complete this Operational Evaluation Report (OER) in conformance with EPA guidelines with the goal to determine the cause(s) of high levels of THM and evaluate possible solutions.

The EPA promulgated the Stage 2 Disinfectants and Disinfection By-Products Rule (DBPR) in January 2006 which set maximum contaminant levels (MCLs) for total trihalomethanes (TTHM) and HAA5 based on an annual running average, tested quarterly, for a given sampling location. The City of Flint reports levels from 8 sampling test locations. Of the four quarterly sampling cycles since Flint began operating the WTP full time, HAA5 levels have been acceptable but TTHM levels were high at 4 sampling sites following the third sampling cycle. Average THM levels exceeded the MCL at 3 sites following the fourth sampling cycle.

A number of issues have been identified as possibly contributing to the high THM levels measured.

1. Inefficient ozone system functionality which has resulted in increased chlorine feed.
2. Upstream source influences in terms of increased chlorine demand.
3. Bypass stream around softening contributed to chlorine demand and increased total organic carbon (TOC) levels in the effluent.
4. Unlined cast iron pipes in the distribution system contributing to chlorine demand.
5. High water age in the distribution system due to:
    a. Broken valves causing less than ideal flow patterns.
    b. Inefficient pump station pressure zones
    c. Water storage volumes in excess of that needed for today's demands
    d. Oversized water mains
    e. Low water demands
6. High chlorine demand in filters.
7. High THM formation potential (THMFP) in source water.
8. Less than optimal removal of THM precursors

A graphical representation of how the factors above relate to the timing of THM compliance sampling is shown as Table 1. Compliance sampling dates are hatched. Each row in Table 1 describes a factor than can lead to increased THM levels and the table defines when each of those factors applied. Note the convergence of nearly all factors around the second sampling period on August 21, 2014 to create what appears to be a worst case scenario. The table also shows that the factors listed as those that the City can control have been addressed prior to the February sampling period. Monthly operating report data up to February 1,2015 is depicted on the Table.

TABLE 1 - SUMMARY OF NEGATIVE INFLUENCES ON THM COMPLIANCE SAMPLING

FACTOR	2014								2015	
	May	June	July	Aug	Sept	Oct	Nov	Dec	Jan	Feb
Softening bypass stream over 20% of plant flow										
Ozone system not feeding optimally										
Using full water storage capacity of WSR & CSR										
Chlorine feed at WTP 7.0 mg/l or more										
Ferric chloride feed rate less than 10 mg/l Fe3+										
Raw water temp 23 degrees C or more										
Raw water TOC levels above 8.0 mg/l										
Raw water coliform over 5000 counts/day										
Positive bacteria test in dist. system (boil water notice)										
Water demand less than 15 mgd										

Dates of occurrence
Dates of occurrence and expected to repeat in future years
Compliance sampling date

Factors under Flint staff control
Flint River characteristics
System factors

ACTION PLAN

The City of Flint has signed an agreement with the Karegnondi Water Authority (KWA) to purchase raw water drawn from Lake Huron. The KWA system is currently under construction and expected to be operational by late 2016. The water supply from Lake Huron will have entirely different water quality characteristics from the Flint River and those characteristics are expected to yield drastically reduced DPB formation. With that, non-structural options to help reduce THM levels are much preferred over solutions requiring new construction. Therefore, two categories of actions have been devised: Stage 1 being actions that can be completed relatively quickly without major construction and Stage 2 consisting of either long term actions or solutions requiring major construction. The City is actively working to complete Stage 1 actions as soon as possible. Stage 2 actions are to be implemented only if Stage 1 actions are ineffective in adequately reducing TTHM levels and therefore Stage 2 is contingent upon the outcome of Stage 1. As of the date of this report, status updates for action items are shown in red.

Stage 1 – Immediate Actions

- Hire third party water quality expert to complete independent 'water audit'
  - The City hired Veolia Water to review all water quality related operations, procedures, actions taken and planned responses. Recommendations from Veolia are expected by the first week in March 2015.
- Obtain an in house THM analyzer to allow regular operational monitoring of THM levels
  - THM analyzer was installed 2/17/15.
- Hire ozone system manufacturer to troubleshoot ozone system
  - Manufacturer and controls programmers performed on site evaluations in January 2015.
- Bench scale jar testing
  - Match existing process and assess possible areas of improvement
    - Existing process was simulated and an evaluation of existing chemical feed dosages has been completed by LAN.
    - Existing process TOC profile was developed by Veolia.
  - Simulate potential modifications to treatment process
    - Soda ash softening evaluation completed and PAC feed testing completed by LAN.
  - Evaluate coagulation and flocculation polymer aid feeds to assist with TOC removal
    - Evaluations of polymer aids completed by LAN and PVS Technologies.
- WTP operational changes
  - Discontinue softening bypass stream to reduce chlorine demand
    - Operational directive has been set to soften no less than 80% of flow.
  - Disinfection of filter beds to reduce chlorine demand
    - Utility Service Group contracted by City and condition assessment completed. Controls improvements have been completed.
  - Begin coagulation and flocculation polymer aid feeds to assist with TOC removal if bench scale test results are positive
    - Jar testing completed to date has not indicated a useful benefit to feeding coagulation/flocculation polymer aids. Increased ferric doses have been implemented at the WTP based on positive jar test results.

- Increase water main flushing efforts to minimize stagnant water
  - Flushing efforts are ongoing as weather permits.
- Water system modeling to identify areas with high water age and potential solutions
  - The water model has been improved and preliminary results, including system wide water age, have been produced. Water demand updates and reconciliation with operator's data are scheduled for March 2015 to complete water modeling analysis.
  - Cedar Street Pump Station potential recirculation
    - Water model analysis to be completed in March 2015.
  - West Side Pump Station potential recirculation
    - Water model analysis to be completed in March 2015.
  - Storage tank volume use
    - *Operating levels of West Side and Cedar Street reservoirs have been* lowered to reduce water age
  - Possible broken closed valve locations
    - Model has been updated with known broken valve locations. Model results are being evaluated for indications of other possible broken valves. City has also initiated valve assessment program.
  - Locations in need of flushing
    - High water age areas have been identified in the water model. Further evaluation forthcoming to determine most effective flushing points.

Stage 2 – Contingent Actions

- Fix ozone system
  - Repairs have been made to gauges and programming and the system is producing proper ozone and functioning under manual operation. Further minor repairs are planned for the 1st quarter 2015 to allow automatic operation.
- Start feeding coagulation and flocculation polymer aids to lower TOC, if not completed in Stage 1
  - Polymers evaluated by LAN did not demonstrate notable benefit.
  - PVS Technologies evaluated a proprietary polymer that showed little benefit.
- Convert to lime and soda ash softening
  - Cost effective analysis to be developed, if necessary, based on routine operation THM level monitoring.
- Change disinfectant to chloramine or chlorine dioxide until KWA
  - Cost effective analysis to be developed, if necessary, based on routine operation THM level monitoring.
- Install pre-oxidant feed at intake to optimize ozone disinfection
  - Permanganate feed at intake was evaluated by Veolia the week of 2/16/15 and recommendations are expected by the first week in March 2015.
- Replace filter media with granular activated carbon (GAC) media
  - Cost effective analysis to be developed, if necessary, based on routine operation THM level monitoring.
- Implement advanced treatment for THM precursor removal
  - Cost effective analysis to be developed, if necessary, based on routine operation THM level monitoring.
- Increased main flushing based on water modeling results
  - Water model analysis to be completed in March 2015.

- Continue valve replacements with water model assistance
  - Water model analysis to be completed in March 2015.
- Emphasize cast iron pipes on water main replacement priority list
  - Flint has bid replacement of over 2 miles of 24" cast iron pipe along Dupont and Bishop Streets to be completed this coming construction season The water main section is considered a critical transmission main, and is expected to contribute to decreases in water age when complete

THM samples have been taken and tested 5 times since the City began using the Flint River for supply. Four sets of samples were taken for official regulatory compliance and one set of samples was taken by the City for operational monitoring. Samples were taken in May 2014, August 2014, November 2014, January 2015, and February 2015. THM levels at all sample sites have declined from August 2014 to February 2015. The average of all sample sites in August was 142.1 ug/l and the most recent average of samples taken in February 2015 was 19.8 ug/l. The MCL defined by the EPA is 80 ug/l.

I. BACKGROUND

The City of Detroit Water and Sewer Department (DWSD) has historically provided drinking water for the City of Flint and Genesee County. In the late 1990's growing concern regarding the reliability of the DWSD supply prompted the City of Flint to upgrade their existing water treatment plant (WTP). Those improvements, defined as Phase I, were completed in 2005 and were intended to allow the Flint WTP to operate, using the Flint River as the source, for an extended period of time in the event that supply from the DWSD was temporarily interrupted. Additionally, the Phase I improvements set the stage for Flint to break free from dependence on the DWSD supply and water charges over which they had no control.

A. WATER SUPPLY TRANSITION

1. Detroit Water and Sewer Department (DWSD)

Until recently the Genesee County and Flint region had been provided drinking water by the DWSD. However, due to excessive cost increases and reliability issues with the DWSD system other options had to be explored.

2. Karegnondi Water Authority (KWA)

In 2010 the Karegnondi Water Authority (KWA) was formed for the purpose of developing a new water supply from Lake Huron to serve the region in lieu of the DWSD supply and the City of Flint elected to join. The KWA expects the new system which is currently being constructed to become operational by the fall of 2016.

3. Flint River – Interim Period

With a renewing water supply agreement between Flint and the DWSD being terminated by the DWSD (effective April 30, 2014) and the KWA system not expected to be operational until late 2016, the City of Flint decided to initiate operation of the existing WTP full time utilizing the Flint River as the interim water source. A variety of WTP improvements were necessary for the Flint plant to become a full time plant. For purposes of this report, Phase II improvements to the Flint WTP are improvements intended to allow the plant to operate full time with either the Flint River as the source or the KWA supply as the source.

B. TTHM VIOLATIONS

The EPA and MDEQ method of determining if TTHM sample results exceed the MCL uses a locational running annual average (LRAA). Flint's first TTHM violation was cited by the MDEQ following the third cycle of sampling completed in November 2014. Of the 8 sampling sites, 4 were in violation. At that time the MDEQ used the following calculation for determining if the MCL had been violated:

(2 x current quarter value + previous 2 quarter values) / 4 = Operational Evaluation Value

Flint has now completed tests for 4 quarters and a straight annual running average applies. Based on samples taken on February 17, 2015 the number of sites in violation of the THM MCL limit has decreased to three. The City also conducted a round of sampling on January 27, 2015 in order to internally monitor the progress of actions taken to address the THM issue. It is worth noting that each round of sampling since August of 2014 has indicated a significant drop (improvement) in THM levels. Test results are tabulated in Table 2. HAA5 sample results are shown in Table 3, of which Flint has had no violations.

TABLE 2 – TTHM TEST RESULTS (ug/L)

C. WATER TREATMENT PLANT RECENT IMPROVEMENTS & STATUS

1. Phase I WTP Improvements

Since 1965, the Flint WTP has remained a secondary or backup supply system to the DWSD primary supply. Typically the secondary supply for a public water system is expected to be needed only during emergency situations and normally is designed for short term operation such as providing the average daily demand for a few days. Conversely, Phase I improvements were designed with the intent to upgrade the Flint WTP in order to allow for an extended short term period (6 weeks) because of the perceived high risk that the DWSD supply would fail and remain out of service for an

extended duration. Regardless, the Flint WTP was still intended to serve as a standby plant and as such the Phase I improvements lacked redundancies that would be required for a primary supply WTP.

2. Past Pilot Study & Testing

During design of the Phase I improvements a treatability study was completed by Alvord, Burdick & Howson, LLC (AB&H) in 2002. The Treatability Study evaluated the current treatment processes that are in place at the Flint WTP today with the Flint River as the source. The report recommended the following:

TABLE 4 – 2002 WTP TREATMENT RECOMMENDATIONS

Treatment	Purpose	Point of Application	Dosage (mg/l)
Sodium permanganate	Zebra mussel control	Intake	0.3
Ozone	Taste & odor removal, disinfection	Diffusor basin	1.5
Ferric chloride	Coagulation	Rapid mix	40
Coag aid polymer	Turbidity & TOC removal	Rapid mix	2.0
Floc aid polymer	Turbidity & TOC removal	Floc basin	0.05
Lime	Softening	Softening basin	175
Soda ash	Softening	Softening basin	52
Carbon dioxide	pH adjustment	Recarb basin	37
Media filters	Filtration	N/A	Na
Chlorine	Disinfection	Filter effluent	1.0

Of the recommended items, zebra mussel control, coagulant and flocculation polymer aids, and soda ash feed have not been incorporated into the treatment process.

3. Phase II WTP Improvements for Full Time Operation

Phase II WTP improvements are those needed to convert the Flint WTP from a back-up supply to a primary supply plant. A number of improvements have already been constructed as they were necessary to operate full time when treating water from the Flint River. The improvements under the title of Phase II that have been completed or are nearly complete include installation of the future raw water feed connection point and valving for the KWA supply, upgrades to the lime sludge lagoon, the lime sludge lagoon decant and disposal system, decant pump station and force main, installation of mid-point chlorination before filtration, and upgrade of the electric feed sub-station.

Additional improvements to the Flint WTP that are to be completed to become part of the normal treatment process using water supplied by the KWA are:

- New oxygen and nitrogen storage facilities for the ozone system (under construction)
- New coagulant feed system
- Electrical
  - Pump Station #4 upgrades (under construction)
  - SCADA and controls upgrades
  - Filter transfer pump station feeders
- Pump replacements and VFD installation in the low and high service pump station (under construction)
- Filter transfer pump station to Dort Reservoir
- Facility security improvements

II. SOURCE WATER EVALUATION

A. DATA ANALYSIS

Based on past data collected and the 2002 Treatability Study by AB&H, the Flint River water quality varies seasonally with higher hardness and alkalinity experienced in the winter. Higher magnesium concentrations are also experienced in the winter, adding difficulty to the settling process due to neutrally buoyant floc. General water quality average characteristics recorded for the 2002 Treatability Study as compared with average characteristics recorded in 2014 are shown in Table 5 below.

TABLE 5 – FLINT RIVER WATER QUALITY CHARACTERISTICS

Period	Turbidity NTU	TOC Mg/l	Alk. Mg/l	Hardness Mg/l as CaCO3	pH	Total Col. Count/day	THMFP Mg/l
2001 Apr–Oct	7.9	9.4	215	272	8.1	870-1230 (7300 max)	410
2014 May–Oct	8.3	10.3 5/22/14	207	252	8.2	1900-9000 (48,300 max)	187

The Flint River characteristics do not appear to have changed significantly over the past 10+ years. Note that further investigation by City staff revealed a sewer leak upstream of the plant that may have contributed to the total Coliform count. The leak was subsequently repaired.

B. CONCLUSIONS

Considering the minor changes in Flint River water quality, much of the information contained in the 2002 Treatability Study by AB&H remains relevant today. Data from that report assumed to be consistent today include the following:

- Flint River is influenced by groundwater from a dolomitic aquifer
- Hardness varies seasonally with higher hardness and alkalinity in the winter
- Hardness, alkalinity, magnesium concentrations tend to be reduced by run-off

In development of the 2002 Treatability Study, processes were simulated which resulted in low THM levels. Therefore, information contained in that report will be used to assist with establishing a baseline jar testing procedure as discussed further in Section III.

III. TREATMENT PROCESS EVALUATION

A. EXISTING PROCESS DESCRIPTION

The existing WTP consists of an intake with screening from the Flint River, low lift pumping, ozonation, rapid mix, flocculation, settling, softening, recarbonation, filtration, storage and high service pumping. A process diagram is shown as Figure 1.

1. Intake

A 72" diameter pipe draws water from the Flint River through 2 traveling screens to the low lift pump structure. No chemicals are currently fed for Zebra mussel control or pre-oxidation as recommended by the 2002 Treatability Study. Manual removal of zebra mussels is more economical than installation of chemical feed equipment considering the short term need.

2. Ozone

There are 2 ozone generators designed to provide adequate ozone for a WTP flow of up to 36 mgd. There are 3 ozone contact basins. The ozone generators were designed to produce 900 lbs/day at 10% concentration and up to 1300 lbs/day at 6% concentration each. Prior to recent repairs, readings indicated a production rate of approximately 700 lbs/day at 4% concentration. It is possible that before the recent improvements the ozone feed might not have been optimized. In fact, it is known that less than optimal ozonation previously led to increased chlorine feed which would have contributed to THM formation.

3. Rapid Mix

East and West rapid mix chambers allow chemical feed prior to the flocculation basins. Each rapid mix chamber is equipped with a 5 hp mixer.

4. Coagulation / Flocculation

The WTP contains two equally sized flocculation basins, east and west, and each basin provides tapered or gradually slowed mixing from inlet to outlet. There are fifteen 2 hp mixers for each basin with VFDs to control mixing speed. The 2002 Treatability Study recommended feeding both coagulation and flocculation polymer aids. Neither polymer aid is being used today because turbidity and TOC removals have been sufficient to meet regulatory requirements.

5. Settling

Primary clarification takes place within 3 basins containing plate settlers. The settlers are operating as designed.

6. Softening

Again, there are two basins for softening: east and west. Each basin is 120' in diameter and contains a solids contact softening unit. Each softening basin/unit has a design capacity of 18 mgd. The east clarifier has an effluent weir imbalance that the City intends to fix when low demands allow for construction. Low lift pumping limitations, flow control to the basins, control restrictions on residuals removal, and fluctuating demands have made it difficult for WTP staff to stabilize the softening process. Softening is accomplished by feeding lime. The decision was made by the City not to feed soda ash in order to remove non-carbonate hardness because acceptable hardness levels could be achieved with lime feed only and softening is short term until Lake Huron water becomes available. Lime and soda ash softening is a possible consideration to assist with TOC removal and thus reduce THM formation.

7. Recarbonation

Recarbonation for pH adjustment is accomplished in east and west recarbonation basins between and to the north of the softening basins. Carbon dioxide storage and feed equipment is located west of the recarbonation basins.

8. Filtration

Filtration is accomplished with 12 dual media filters, equally sized and designed to filter 3.0 mgd each. Media consists of 12" of sand and 18" of anthracite. The filters have been operated intermittently over the years due to the standby nature of the WTP and until recently, chlorine injection took place downstream of the filters. It is possible some microbial growth had developed in the filters leading to increased chlorine demand. The City recently hired a contractor to upgrade the electrical controls for the filters and that work has been completed.

9. Disinfection

Disinfection is provided by ozonation and by feeding chlorine. Ozonation occurs at the front end of the WTP. Chlorine is fed prior to filtration and prior to finish water storage / high service pumping. The intermediate chlorine injection location was recently constructed under the Phase II, Segment 1 contract.

10. Clear Well & Pumping

The pump building sits adjacent to a 3 MG clear well and contains both low and high service pumps.

B. JAR TESTS / EXPERIMENTS

1. Approach

There are several well practiced methods by which DBPs can be reduced. First, the disinfectant can be changed to an alternate that has a lower tendency to form DBPs. Second, additional treatment systems such as activated carbon or air stripping (depending on the nature of the precursors) can be added to remove DBP precursors. Lastly, the existing treatment processes can be optimized to remove as much DBP precursor as possible. Of these options, optimizing existing treatment processes is the only strategy that does not require the construction of new and expensive facilities. It is anticipated that Flint will be receiving Lake Huron water in approximately two years and this water will have a completely different chemistry from the Flint River. Major process changes instituted to address THM levels using Flint River water are likely to be unnecessary for Lake Huron water and may even be inappropriate. Therefore, those options which require addition of new treatment processes are undesirable at this time. In recognition of this upcoming change in water source, efforts for this study have concentrated on improving the existing processes, rather than adding new ones. New treatment processes will only be recommended if operational changes to the existing treatment train prove ineffective.

Recent sample test results suggest that most of the DBPs are formed in the distribution system rather than within the treatment plant. Therefore, the most logical approach is to reduce the DBP formation potential (DBPFP) rather than simply lowering the levels of DBPs leaving the plant. During bench scale testing, formation potential (FP) levels were the primary indicator of success or failure of proposed process modifications.

2. Protocol

Bench scale pilot testing is intended to reflect actual plant operating and hydraulic conditions so the bench scale treatment units were sized based on various dimensionless factors to ensure the pilot treatment matched the actual system. Bench

scale ozonation was not practical due to time and cost limitations. Therefore, water samples were withdrawn from the plant ozone basin effluent. These samples were transported to the laboratory and dispensed into square testing jars. The jars were used to simulate rapid mix, three-stage flocculation, and settling. Rapid mix and flocculation conditions were matched to the plant based on "Gt" values. The "G" value is a measure of the mixing intensity and is a function of mix time, viscosity of the liquid, and mixing power applied to the water. "Gt" then, is a size scaling factor where time has been accounted for. Settling time was scaled to match the shorter settling depth of the testing jars. After settling, samples were decanted from the test jars. The decanted samples were then lime softened; softening conditions were similarly matched on the basis of "Gt". Carbon dioxide was sparged into the samples to reduce the pH. The water was then vacuum filtered through filter paper, sized to simulate the plant's dual media filters. The samples were dosed with excess chlorine and allowed to react for seven days at 25° C before testing for DBPs to determine the formation potential.

The following conditions were applied during testing to properly match small scale testing to actual plant processes.

TABLE 6 – BENCH SCALE TEST MIXING INTENSITIES			
Process	**G**	**Duration**	**Mix RPM**
Ozonation	Plant	-	-
Rapid Mix	200	44 sec	160
Flocculation, Stage 1	50	9 min	55
Flocculation, Stage 1	25	9 min	30
Flocculation, Stage 1	12	9 min	19
Settling	N/A	10 min	-
Softening	TBD	10 min	-
Recarbonation	N/A	N/A	-

The primary variables during testing were chemical additions and chemical dosages. Specific chemicals and dosages used for initial testing conditions were selected to reflect current plant usage and the recommendations of the 2002 Treatability Study:

TABLE 7 – BENCH SCALE TEST CHEMICAL FEED RATES			
Chemical	**Current Usage**	**2002 Study**	**Test Values**
Ozonation	4.66 mg/l	1.5 mg/l	
Ferric Chloride	7.7 mg/l Fe3+	40 mg/l Fe3+	7.7 – 80 mg/l Fe3+
Coagulant Aid Polymer	Not used	2.0 mg/l	1 – 2 mg/l
Flocculation Aid Polymer	Not used	0.05 mg/l	0 – 0.05 mg/l
Powdered Activated Carbon	Not used	N/A	20 – 100 mg/l
Lime	120 mg/l	175 mg/l	120 – 175 mg/l
Soda Ash	Not used	52 mg/l	0 – 52 mg/l
Cationic Softening Polymer	3.13 mg/l	Not used	3.13 mg/l
Anionic Softening Polymer	0.88 mg/l	Not used	0.88 mg/l
Fluoride	0.45 mg/l	1 mg/l	Not used
Carbon Dioxide	32 mg/l	37 mg/l	Fed to reach pH of 7.5 +- 0.3
Chlorine	6.3 mg/l	1 mg/l	10 mg/l

3. Considerations

The 2002 Treatability Study did not note significant formation of DBPs. This may be a function of different Flint River water chemistry at that time. However, recognizing the considerable differences in chemical usage and dosages between that study and current operations, those differences in chemical use and dosage are an obvious starting point for optimizing treatment to prevent DBP limit exceedance.

Although it is believed that optimization of current treatment can correct the DBP issue, should optimization of present treatment prove insufficient, alternate residual disinfectants (chloramines and chlorine dioxide) will be investigated as additional treatment measures.

4. LAN Test Results

Two rounds of jar testing were completed by LAN during the weeks of December 15, 2014 and January 26, 2015.Detailed test data is included in Appendix A. Testing results can be summarized as follows:

- Increased dosages of ferric chloride resulted in higher reduction of THMFP.
- The currently utilized feed rate of lime at 120 mg/l is appropriate
- Softening with soda ash in addition to lime resulted in minor additional THMFP reduction – in the range of 0% - 10%.
- The benefits of using a cationic polymer during softening at a dosage range of 0.31 - 3.13 mg/l to help reduce THM's are unclear
- The benefits of using an anionic polymer during softening at a dosage range of 0.09 – 0.88 mg/l to help reduce THM's are unclear
- Feeding PAC was ineffective in reducing THMFP within the dosage range of 20 – 100 mg/l.

5. Testing by Others

In addition to jar testing completed by LAN, the chemical supplier who provides ferric chloride for the City, PVS Technologies, ran tests using their recommended flocculant polymer aid. Plus, Veolia Water completed jars testing of their own the week of February 16th to analyze other process details and current WTP parameters. Experiments completed by PVS Technologies showed very little TOC removal beyond that obtained with straight ferric chloride feed.

6. Conclusions

Increasing the dose rate of ferric chloride is an operational change that can easily be implemented without the need for any additional equipment. Test results show that over 40% THMFP removal can be obtained with a dosage of 60 mg/l Fe3+ or higher. Increased dosing of ferric chloride would be most ideal coupled with regular raw water TOC monitoring so that TOC levels would dictate the appropriate ferric chloride feed rate.

Softening with soda ash in addition to lime is another option the City should consider if increased ferric chloride doses are not adequate to maintain THM levels under the MCL, particularly during warmer months. Again, monitoring of TOC in the raw water could provide useful information of when lime/soda ash softening is necessary.

IV. DISTRIBUTION SYSTEM EVALUATION

EPA guidance for the distribution evaluation portion of an OER is focused on identification and isolation of a specific portion of the distribution system that led to the exceedance. The circumstances of Flint's apparent pending TTHM exeedances are unusual in that a new supply has been implemented which clearly corresponds to the high TTHM sample results. Although the new source is one element in increased TTHM levels, value remains in evaluating the distribution system since water age is also a critical factor. Additionally, there may be distribution improvements that can be made to help alleviate the problem.

A. INFRASTRUCTURE

1. Piping

According to the most recent MDEQ Sanitary Survey, the distribution system is estimated to contain 70% cast iron, 20% ductile iron, 2% concrete and 8% steel water mains. Unlined cast iron pipe can become pitted, allowing colonization sites for microorganisms leading to chlorine demand. Additionally, much of the piping in the system is aged and in poor condition. Increased chlorine demand could be resulting from biofilm in older pipes and from main breaks/repairs. The extent of contribution is not known but any water main replacement project will decrease chlorine demand somewhat if constructed properly. Unfortunately, water main breaks may also assist with decreasing water age by providing unintentional flushing. All things considered, it is impossible to quantify the impact existing piping has on THM formation.

The City utilizes City Point software and GPS equipment to document main breaks and prioritize replacements. However, main break information is more pertinent to rusty water complaints and has little relevance to THM levels. Areas that have been targeted for main replacements include the transmission main from the WTP west to Dupont and south to the West Side reservoir, Fenton Road, Atherton Road, Dort Highway, Averil Street, and Boulevard Drive.

2. Storage

There are 4 finish water storage tanks and 1 raw water tank as tabulated below:

TABLE 8 – STORAGE TANKS

Name	Type	Water	Volume (MG)	Operating		Absolute	
				LWL	HWL	Bottom	OF
Dort Reservoir	Ground	Raw	20	-	-	730	750
WTP Tank	Elevated	Finished	2	883.0	896.0	863.0	898.0
WTP Clear Well – PS #4	Ground	Finished	3	11'	15'	708.5	726.0
Cedar Street Reservoir	Ground	Finished	20	-	11'	737.2	757.2
Westside Reservoir	Ground	Finished	12	-	12'	761.8	779.0

The MDEQ typically recommends providing a minimum finish water storage volume of 1/3 the maximum daily demand (MDD). According to the 2013 MDEQ Sanitary Survey, the 5 and 10 year MDDs are 21.57 mgd and 30.05 mgd respectively. A common rule of thumb for clear well storage volume at a WTP is 10% of the design flow rate. Another general guideline for reliability is to provide total storage to allow for 2 X the average daily demand plus fire flow demand. For this analysis, fire flow is assumed to be 2,500 gpm for either one industrial fire (2,500 gpm) or a combination of one residential (1,000 gpm) and one commercial (1,500 gpm) fire at a 4 hour duration which results in a total volume of 600,000 gallons. These go-by

approximations are summarized below with the applicable flow rates and are compared to the existing storage volumes currently being utilized.

Common Practice	Flow Rate	Recommended Volume by ROT	Volume In Use
Clear well 10% of Design Flow	18 MGD	1.8 MG	3.0 MG
Finish Storage = 1/3 MDD	30.05 MGD	10.0 MG	37 MG
Total Storage = 2 * ADD + FFD	13.87 MGD	28.3 MG	57 MG

Based on the values above, it appears the storage volume used in the Flint system could be decreased without negatively effecting reliability. The appropriate volumes of individual tanks will be further evaluated using the water system model and discussed in Section V (C).

All reservoirs have baffling to minimize stagnant water. Also, all tanks have been maintained and are in reasonable condition. The Westside reservoir has an exposed roof that is in need of rehabilitation, but its current condition has no influence on THM formation.

3. Pump Stations
All pump stations are in good condition but pumps are generally oversized. As an independent consideration, oversized pumps are not a contributing factor to high THM levels. Control of pumps and pressure zones are discussed in detail below.

B. OPERATIONS AND MAINTENANCE

1. Pump Station & Storage Operations
Pump stations and storage tank levels are controlled as shown in Table 9.

TABLE 9 – PUMP STATION CONTROLS

PS Name	Control Point	On Point	Off Point
PS No. 4 Raw	Operator	-	-
PS No. 4 Finish	Match plant flow	-	-
Westside	System pressure (elevated tank)	22.5'	33'
Cedar Street	System pressure (elevated tank)	22.5'	33'
Torrey Road	Distr. – Brown/Bradley	< 45 psi	> 45 psi

Cedar Street and Westside pump stations are operated as needed and they are alternated. Typically, Cedar Street is run in the morning and Westside is run in the evening and reservoirs for each are filled during low demand periods at night.

Westside, Cedar Street and Torrey Road pump stations are used to boost system pressure when high demands warrant it, but there are not well defined pressure zones within the system. Therefore, the possibility exists that water is being recirculated allowing for increased water age.

2. Booster Disinfection Practices
Booster disinfection is provided at the Cedar Street and Westside pump stations. When sustained residuals are not provided by chlorine feed at the WTP, sodium hypochlorite is applied at the reservoirs while being filled.

3. Changes in System Demands

Water demands in the City have been declining since the 1960's as the population has dropped. As a result, many of the water system components are oversized including storage tanks and water mains which both increase the time for water to reach the user.

From a short term perspective, Flint demands tend to increase in summer as is ordinarily expected but also in the winter due to water main breaks. The MDD for Flint often occurs in winter. Regarding THM formation, with lower temperatures and higher flows in the winter, THM levels taken at the distribution sample points are expected to be lower than at other times of the year.

C. WATER SYSTEM HYDRAULIC MODELING

As part of this report, the City provided a hydraulic water model, originally developed by Potter Consulting, for LAN to update. Thus far, LAN has modified the model to be capable of extended period simulations, modified controls to reflect current operations, revised the piping to include known broken valve locations, and developed preliminary water age results throughout the entire system. Water age shown in the updated model corresponds well to TTHM levels at 6 of the 8 sampling sites. However, LAN has also identified several deficiencies within the model that require further adjustments to allow for usable and reliable results. Those model deficiencies include outdated demands, improperly located appurtenances, and incorrect flow patterns. Preliminary water age results are presented in Table 10. Revised results will be provided when the hydraulic model has been fully updated.

TABLE 10 – PRELIMINARY WATER AGE FROM WATER MODEL

Sample Point	Location	Address	Water Age (Hrs)	Aug 2014 THM (ug/l)
1	McDonalds	3719 Davison	23	145
2	BP Gas Station	822 S. Dort Hwy	18	112
3	Liquor Palace	3302 S. Dort Hwy	15	127
4	Taco Bell	3606 Corunna	128	181
5	Univ. Market	2501 Flushing	178	196
6	Salem Housing	3216 MLK	50	112
7	Rite Aid	5018 Clio	78	144
8	N. Flint Auto	6204 N. Saginaw	71	118

It is anticipated that topics shown below in italicized font will be detailed after the model is updated in March 2015.

1. Simulation of Existing System

Match existing conditions. Chlorine and THM data may be used to verify model results. We have chlorine feed data at plant and residuals at 10 locations in each MOR, May 2014 – January 2015.

2. Identification of Water System Deficiencies

Specific issues to look at:

Worst case at minimum daily demands
Water age in entire system
Recirculating water through pump stations
Use of storage tanks – volumes in particular
Indications of broken valves
Effectiveness of booster disinfection

V. RECOMMENDATIONS TO MINIMIZE FUTURE OEL EXCEEDANCES

A. SOURCE

The City of Flint has already committed to the change from the Flint River as the water source to Lake Huron under the KWA system, planned for late 2016. The risk of future TTHM limit violations will decline substantially with the use of water from Lake Huron due to much lower DBP precursors. It is important to recognize that the Flint River will become strictly an emergency supply when the KWA supply becomes available and any investments toward the Flint River should be contemplated accordingly. Recommendations discussed below in this section apply to the Flint River as the source.

Reverting to supply from the DWSD until the KWA supply is available as an option. However, based on information provided by the City of Flint, the annual cost to receive water from the DWSD would be at least $16,000,000/year or $1,333,000/month. Therefore, utilizing the DWSD for interim supply is cost prohibitive under the terms defined by the DWSD.

1. Watershed Management

A volunteer group entitled the Watershed Coalition performs various tasks related to managing the Flint River watershed such as spring cleanups and annual benthic studies to evaluate the river 'health'. No additional action is recommended at this time.

2. Monitoring

The City documents daily raw water flow, pH, alkalinity, carbonate and non-carbonate hardness, chloride, temperature, turbidity and coliform count as part of standard preparation of Monthly Operating Reports (MOR). It is recommended to add raw water TOC and plant tap THM values to daily documented measurements which would provide staff the data needed to establish correlations to predict distribution system THM formation.

3. Intake Operations

The 2002 Treatability Study recommended pre-oxidation in the form of sodium permanganate as a feed at the intake. It is possible the addition of a pre-oxidant such as hydrogen peroxide or some type of permanganate could enhance the ozone process. Veolia evaluated permanganate demand during jar testing the week of February 16th, 2014 and further recommendations will be incorporated when results become available.

4. Seasonal Strategies

Past data indicates the Flint River is influenced by groundwater and in particular, dolomitic spring water. The result is hard water with high concentrations of magnesium and sulfate. Also, hardness and alkalinity are higher during the winter. Upon initiation of supply from the Flint River, the City made the decision to soften with just lime to focus on removal of carbonate hardness. One potential modification that could assist with TOC removal and thus decrease THMFP would be lime and soda ash softening. A temporary caustic soda feed system is recommended to be put in place in case the need for optimized softening arises.

5. Upstream Contamination Issues

Upstream contamination issues are extremely difficult to prevent and even if detected are difficult to locate. Evaluation of raw water data collected for MORs is the easiest

manner in which to detect upstream contamination issues because the data is already collected for treatment purposes. In fact, high total Coliform readings signaled a potential issue recently that the City identified and removed.

An upstream monitoring and warning system could be established to attempt to detect water quality issues or spill event type contamination early enough to adjust treatment procedures or cease intake prior to the contamination reaching the WTP. However, given the imminent conversion to the KWA supply, the period of full time use would likely be far too short to achieve payback on the capital expenditures.

B. TREATMENT PROCESS

1. Operational Recommendations

- Increase ferric chloride dosage: Previous testing in the 2002 Treatability Study, jar testing completed by LAN, and a review of 2014 ferric chloride dosages compared to THM levels leaving the WTP support that increasing the ferric chloride dosage would help reduce THM formation.
- Increased monitoring: Currently, the MDEQ does not require daily reporting of raw water TOC or finished water TTHM levels. However, daily tracking of such levels would allow the City to develop a correlation between the two, thus providing a predictive tool to help manage TTHM levels.
- Coagulation and flocculation polymer aids: The 2002 Treatability Study suggested the use of coagulation and flocculation polymer aids. These polymer aids were shown in the 2002 Treatability Study to increase TOC removal and thereby reduce THMFP. Further evaluation will be completed during jar testing.
- Discontinue softening bypass: The City was previously bypassing a portion of flow around the softening basins because hardness levels did not warrant softening of the full stream. However, this practice was discontinued because it was believed the bypass stream was contributing to chlorine demand and preliminary data has supported that belief. Chlorine demand dropped 0.5 – 1.0 mg/l following elimination of the bypass stream in early November 2014.
- Soften with lime and soda ash: Research has shown that enhanced softening with both lime and soda ash may provide additional TOC removal. The efficacy of this option will be evaluated during jar testing.
- Disinfection of filter beds: In case there has been microbial growth it is recommended the filters be 'shock' treated with chlorine and rinsed. A chlorine injection point was added upstream of the filters during the first segment of Phase II so future growth in the filters should not be an issue.
- Optimization of all existing treatment processes: Depending on bench scale testing conditions and results, slight modifications to all treatment processes might in order to replicate lower DPBFP.
- Discontinue or adjust softening anionic polymer feed: Some anionic polymers have been found to increase TOC. Veolia evaluated the anionic polymer currently being fed during their jar testing and depending on the results, when available, the softening anionic polymer feed should be adjusted accordingly.

2. Infrastructure Change Recommendations

- Fix and/or replace faulty ozone equipment: Since the ozone equipment was installed it has not been used extensively so the hope is that major components remain in good condition and the system can be easily modified to restore proper functionality. The City has scheduled the equipment manufacturer to field inspect the system on December 15, 2014.
- Replace filter media with GAC media: GAC media could help reduce THM levels by reducing both TOC and chlorine demand. For this consideration, the recommended approach would be to first complete small scale testing to verify efficacy. Upon positive results, the next step would be replacement of media in a fraction of the filters following by sampling to measure water quality. Those results would determine the need to replace media in additional filters.
- Change disinfectant to chloramine or chlorine dioxide: If other options prove to be ineffective, conversion to another disinfectant should be fully evaluated. Various characteristics of chloramination indicate an advantage over chlorine dioxide, but a full analysis would provide clarity as to which would be preferred.
- Install pre-oxidant chemical feed: Hydrogen peroxide or a form of permanganate as a pre-oxidant can enhance the activity of the ozone. Chemical feed could be installed at the intake structure or low service pump station, depending on the reaction time required. Use of a pre-oxidant at the intake might also provide the additional benefit of disinfection credit for ozonation with the MDEQ if an ozone residual can be obtained at the ozone process effluent as a result.
- Repair upstream sewer leak: a sewer leak upstream of the WTP intake was discovered and has already been repaired by the City.

C. DISTRIBUTION SYSTEM

Potential distribution issues related to water quality issues discussed in Section IV included old cast iron pipe, oversized infrastructure, and remote storage/pump station locations and operations that might be less than ideal. Recommendations to address those issues are offered in this section.

1. Manage Water Age

a) Storage Tanks

Considering the excess storage capacity discussed in Section IV, in the short term it is recommended that operational changes be implemented immediately to reduce the overall volume of water stored to decrease water age. Immediate operational recommendations include lowering high water levels of reservoirs other than the elevated tank, to reduce the total system wide usable storage volume to 30-36 MG.

In the long term, LAN recommends development of the most ideal options for water model evaluation. Excess storage volume and tank locations within the water system afford Flint numerous options to reduce the amount of storage volume utilized. As a starting point, two recommendations are presented below.

Option 1
- Take West Side reservoir and pump station out of service
- Cut storage volume used in half at Cedar Street reservoir
- Reduce the utilized storage volume of the WTP clearwell from 3 MG to 2 MG
- Adjusted system wide storage volume would be 34 MG

Option 2
- Take Cedar Street reservoir and pump station out of service
- Reduce the utilized storage volume of the WTP clearwell from 3 MG to 2 MG
- Adjusted system wide storage volume would be 36 MG

b) Residence Time in Pipes

Completely redesigning and replacing the water system to match today's demands is not feasible financially and would be a waste of infrastructure with remaining useful life. Going forward, it is recommended that any future main replacement projects be evaluated for possible downsizing. When the water model is fully updated, it will provide a valuable tool in determining which mains can be downsized and to what extent. Replacement of broken valves and valve exercising are also recommended, which are programs that have already been implemented into Flint's regular operations.

Operationally, hydrant flushing is recommended as needed to minimize water age in low flow areas. Again, the updated water model should be used to locate high water age areas and optimal flushing points.

2. Reduce Disinfectant Demand

Recommendations to reduce disinfectant demand are similar to those described above to reduce water age. Replacement of old cast iron pipes would lead to a reduction of disinfectant demand on the distribution side, but realistically can only be accomplished over a prolonged period of time. In the meantime, hydrant flushing is the most viable means of reducing disinfectant demand in piping. From a storage standpoint, all reservoirs and tanks should be regularly inspected and maintained to prevent entrance of any outside contamination that would contribute to disinfectant demand.

3. Water Modeling of Recommendations [yet to be completed]

Determine best flushing locations to reduce water age
Evaluate changes in storage tank operations to reduce water age
Valves to close/add to improve pressure zones, reduce recirculation
Optimization of pump station use – smaller pumps? Shut down?
Evaluate booster disinfection

D. BOOSTER DISINFECTION

Decreasing chlorine feed at the WTP and adding booster disinfection in the distribution system is an alternative intended to reduce the reaction time at higher concentrations of chlorine to reduce DPB formation. Extensive looping and branching within the existing system complicate how to best implement and utilize booster disinfection. Water system modeling is recommended to gage the effectiveness of existing feed point locations and dosages. Further discussion and details will be provided when the distribution evaluation results are available.

E. CATEGORIZATION OF ACTIONS

Considering that the Flint River is being used as the water source only until the KWA supply is available (expected late 2016), options to address high THM formation that require new construction or extensive time to implement are not preferred. On the other hand, the City understands THM sample results to date dictate that some action is necessary. Two categories have been developed to assist the City in prioritizing actions to take. Stage 1 consists of actions that can be completed relatively quickly without major construction and Stage 2 actions are either long term actions or solutions requiring major construction. Stage 1 actions are to be completed first followed by evaluation of the results prior to consideration of Stage 2 actions. Grouping of actions are shown in the table below.

TABLE 11 – ACTION PLAN

	Action	Purpose
Stage 1	Hire water consultant to complete 'water audit'	Third party review of actions and operations to make sure no options are being missed
	Increased water quality monitoring – obtain THM and TOC analyzers	Provide information needed to adjust WTP operations to match changing raw water quality
	Troubleshoot ozone feed system	Reduce chlorine feed and increase TOC removal
	Bench scale jar testing	Optimize treatment process and evaluate possible modifications
	Discontinue softening bypass	Reduce chlorine demand
	Disinfect filters	Reduce chlorine demand
	Increased water main flushing	Reduce water age / stagnant water
	Water system modeling evaluation	Determine areas with high water age and reasons
	Implement coag. & floc. polymer aids, if appropriate	Increase TOC removal
	Modify booster disinfection feeds, if appropriate	Decrease water age
Stage 2	Repair ozone system	Reduce chlorine feed and increase TOC removal
	Continue increased water main flushing	Reduce water age / stagnant water
	Convert to lime and soda ash softening	Increase TOC removal
	Continue valve replacements based on water model	Reduce water age / stagnant water
	Replace filter media with GAC	Reduce TOC and chlorine demand
	Change disinfectant to chlorine dioxide	Reduce THMFP
	Install pre-oxidant feed at intake	Optimize ozone disinfection, reduce chlorine
	Place priority on replacing cast iron water mains	Reduce chlorine demand

Samples were taken the week of February 16th for the 4th round of quarterly testing. The City has implemented many of the Stage 1 actions and THM test results have significantly improved (decreased) each time samples have been taken since August 2014. In addition to the regular compliance monitoring, the City performed a round of sampling on January 27, 2015. All sampling results are shown on Chart 1.

STATUS OF FLINT WATER: October 14, 2015

- Flint Receivership Transition Advisory Board meeting today to consider budget amendments to pay for temporary reconnection to the Detroit water system

- Treasury staff from Bureau of Local Government will be meeting with City officials to review overall budget and cash conditions

- Negotiations between the City of Flint, Genesee County and DWSD remain in progress to finalize the necessary agreements for the City to temporarily reconnect to the Detroit water system

- Both the Kincaid and Shears lawsuits remain in litigation. Potential losses of $30M are possible. The City's request to Treasury for financial assistance for outside legal consul is still pending

RESOLUTION NO.: 150872

PRESENTED: 10-12-15

ADOPTED: _____

RESOLUTION AUTHORIZING A BUDGET AMENDMENT TO INCREASE THE WATER AND SEWER BUDGET BY $12,000,000.00 AND TO ALLOW FOR EXPENDITURES FROM THOSE FUNDS TO FACILITATE THE SWITCH BACK TO THE DWSD WATER SUPPLY

BY THE CITY ADMINISTRATOR:

Due to the serious health threat facing the residents of the City of Flint, the Administration has been diligently working toward a feasible and speedy resolution to the City's water crisis; and

Through the commitment of $6 million from the State of Michigan and $4 million from the C.S. Mott Foundation, a total of $10 million in contributions have been pledged to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department and its successor, the Great Lakes Water Authority, until the City is able to receive water from the Karegnondi Water Authority (KWA).

The City Administrator and the Mayor have agreed to the acceptance of these funds. At this time, the KWA reports that construction is on schedule to be completed by June 30, 2016. The City estimates that the total cost to purchase water through DWSD will be $12 million for 9 months. The balance of $2 million not covered by the generous pledges of State and Local resources is the responsibility of the City.

A budget amendment is necessary to reflect both an increase in revenues for the receipt of $10 million in assistance and $2 million of budgeted Use of Fund Balance and an increase in expenditures of $12 million for the purchase of DWSD water supply.

IT IS RESOLVED that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable. Specific revenue and expenditure line items will be provided by the Chief Financial Officer.

ADOPTED: _____

RESOLUTION AUTHORIZING THE CITY ADMINISTRATOR TO TAKE NECESSARY ACTION TO CONVERT TO THE DETROIT WATER SYSTEM

BY THE CITY ADMINISTRATOR:

In order to promote the health, safety and welfare of this community, it is in the best interests of the City of Flint for the Detroit Water and Sewer Department (DWSD) to supply the City with treated water pending completion of the Karegnondi Water Authority; and

In order for DWSD to supply the City with water, it will be necessary to utilize pipe owned by the Genesee County Drain Commission (GCDC); and

The City, DWSD and GCDC are actively negotiating the terms of the necessary agreements to ensure this transition occurs as soon as possible; and

IT IS RESOLVED that the City Administrator is hereby authorized to enter into agreements with DWSD and GCDC for conversion to the Detroit Water System.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

DATE: October 14, 2015

TO: Nick A. Khouri, State Treasurer

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: Flint RTAB Budget Amendment Recommendations

The Flint Receivership Transition Advisory Board (RTAB) has recommended approval of two budget amendments to the City's adopted two-year budget. Final approval will require amendment to Emergency Manager Order 7 of 2015, which adopted the FY 2015-2016 and FY 2016-2017 biennial budgets. This Order was adopted by the Flint Emergency Manager on April 28, 2015.

The first budget amendment increases the Water and Sewer revenue by $10 million to reflect the pledge of $6 million from the State of Michigan and $4 million from the C. S. Mott Foundation to allow for the expenditures from those funds to facilitate the switch back to the Detroit Water and Sewerage Department (DWSD). The second amendment is a $2 million commitment by the City of Flint of budgeted Use of Water Fund to assist in covering the estimated $12 million cost to purchase water through DWSD.

When the Governor appointed the City of Flint RTAB on April 29, 2015, the RTAB was thereby authorized to recommend amendments, modifications, repeal, or the termination of any Emergency Manager order, subject to final approval by the State Treasurer.

Attached for review is a budget resolution and City Council agenda from October 12, 2015, a memorandum from the City Administrator regarding the budget amendment to increase the water and sewer budget by $12 million and to allow for the expenditures from those funds to facilitate the switch back to the DWSD water supply. Approval of these amendments is being requested.

If additional information is desired, please let me know.

RESOLUTIONS

NOTE: Resolution No. 150828.1 was referred to today's City Council agenda from the Wednesday, September 30th Planning & Development Committee meeting, while Nos. 150863 and 150864 were referred from the Wednesday, October 7th Finance & Administration Committee meeting.

150828.1 Approval/Obsolete Property Rehabilitation District/Lapeer Road and Averill Avenue

Resolution resolving that the legally described parcels of land situated within the City of Flint, Genesee County, and State of Michigan, be and are hereby established as an Obsolete Property Rehabilitation District (3501 Lapeer Road Area District) pursuant to the provision of the Public Act 146 of 2000, as amended. [NOTE: The district encompasses properties located at 3501 Lapeer Road, 3711 Lapeer Road and 1620 Averill Avenue.]

150863 SAW Grant Agreement/City of Flint/Michigan Finance Authority (MFA)/Michigan Department of Environmental Quality (DEQ)/Strategic Water Quality Initiatives Grant Program

Resolution resolving that the City Administrator, a position currently held by Natasha L. Henderson, is designated as the Authorized Representative for purposes of the SAW Grant Agreement, AND, the proposed form of the SAW Grant Agreement between the City of Flint, the MFA and the DEQ is hereby approved and the Authorized Representative is authorized and directed to execute the SAW Grant Agreement with such revisions as are permitted by law and agreed to by the Authorized Representative, AND, the City of Flint shall repay the Grant, within ninety (90) days of being informed to do so, with interest at a rate NOT-TO-EXCEED eight (8) percent per year, to the Authority, if the City of Flint is unable to, or decides not to, proceed with contructing the project or implementing the asset management program for which the funding is provided within three (3) years of the Grant award, AND, the Grant, if repayable, shall be a first budget obligation for the City of Flint and the City of Flint is required, if necessary, to levy ad valorem taxes on all taxable property in the City for the payment thereof, subject to applicable constitutional, statutory and local tax rate limitations, AND, the City of Flint shall not invest, reinvest or accumulate any moneys deemed to be Grant funds, nor shall it use Grant funds for the general local government administration activities or activities performed by municipal employees that are unrelated to the project, AND, the Authorized Representative is hereby jointly or severally authorized to take any actions necessary to comply with the requirements of the MFA and the DEQ in connection with the issuance of the Grant. The Authorized Representative is hereby jointly or severally authorized to execute and deliver such other contracts, certificates, documents, instruments, applications and other papers as may be required by the MFA or the DEQ or as may be otherwise necessary to effect the approval and delivery of the Grant, AND, the City of Flint acknowledges that the SAW Grant Agreement is a contract between the City, the MFA and the DEQ, AND, all resolutions and parts of resolutions insofar as they conflict with the provisions of this resolution are rescinded. [NOTE: Part 52 of the Natural Resources and Environmental Protection Act, as amended, provides that the MFA, in consultation with the DEQ, shall establish a strategic water quality initiatives grant program to provide grants to municipalities for sewage collection and treatment systems or storm water or non-point source pollution control. The City of Flint is requesting $2,000,000.00 to establish an asset management plan.] [NOTE: Agreement is not attached.]

150864 Contract/City of Flint/County of Genesee/Flint Holding Facility Operation

Resolution resolving that the City Administrator authorizes the appropriate city officials to do all things necessary to enter into the attached agreement with Genesee County for operation of the Flint Holding Facility. [NOTE: The City of Flint Police Department includes a 110-person holding facility with the ability to hold detainees for up to 72 hours. The Genesee County Sheriff currently operates the holding facility. The city and the sheriff have agreed to the terms of a contract for the sheriff to continue operating the facility for a contract price NOT-TO-EXCEED $2,764,275.00. The agreement is contingent on the city receiving funding from the State of Michigan to pay the full costs of the contract and the Sheriff receiving a continued waiver from the Michigan Department of Corrections.] [NOTE: Agreement is attached.]

RESOLUTIONS - MAY BE REFERRED FROM COTW

150865 Budget Amendments/FY2016 Budget of the City of Flint/General Fund/Drug Law Enforcement Fund/Public Improvement Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's General, Drug Law Enforcement and Public Improvement Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0982015.]

150866 Budget Amendments/FY2016 Budget of the City of Flint/Water Fund/Sewer Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's Water and Sewer Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0992015.]

150872 Budget Amendment/Water and Sewer Budget/Switch Back to Detroit Water and Sewerage Department (DWSD) Water Supply

Resolution resolving that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable, with specific revenue and expenditure line items to be provided by the Chief Financial Officer. [NOTE: The State of Michigan and C.S. Mott Foundation have committed $6 million and $4 million dollars respectively to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department (DWSD) and its successor, the Great Lakes Water Authority (GLWA), until the City is able to received water from the Karegnondi Water Authority (KWA). At

this time the KWA reports that construction is on schedule to be completed by June 30, 2015 [2016]. The City estimates the total cost to purchase water through DWSD will be $12 million for nine months. The balance of $2 million not covered by the pledges of State and Local resources is the responsibility of the City. A budget amendment is necessary to reflect both an increase in revenues for the receipt of $10 million in assistance and $2 million of budgeted Use of Fund Balance, and an increase in expenditures of $12 million for the purchase of DWSD water supply.]

RESOLUTION NO.: _____

PRESENTED: 10-12-15

ADOPTED: _____

RESOLUTION AUTHORIZING THE CITY ADMINISTRATOR TO TAKE NECESSARY ACTION TO CONVERT TO THE DETROIT WATER SYSTEM

BY THE CITY ADMINISTRATOR:

In order to promote the health, safety and welfare of this community, it is in the best interests of the City of Flint for the Detroit Water and Sewer Department (DWSD) to supply the City with treated water pending completion of the Karegnondi Water Authority; and

In order for DWSD to supply the City with water, it will be necessary to utilize pipe owned by the Genesee County Drain Commission (GCDC); and

The City, DWSD and GCDC are actively negotiating the terms of the necessary agreements to ensure this transition occurs as soon as possible; and

IT IS RESOLVED that the City Administrator is hereby authorized to enter into agreements with DWSD and GCDC for conversion to the Detroit Water System.

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

Jody N. Lundquist, Chief Financial Officer

FOR THE CITY OF FLINT:

Natasha L. Henderson, City Administrator

Subject: RE: Flint Budget Amendment

While the EM likely anticipated when he issued his final order that an RTAB would be appointed, he could not know for certain that one would be appointed. So, the provision you cite makes sense in that light. However, an EM order cannot override a State statute. Nor can an EM order assign duties to the State Treasurer. So, none of this affects my earlier e-mail.

Fred,

I received a copy of your email from Wayne.

I understand the argument you are making.

However, I wish to note that the Order 20, Section a (6) specifically states that the State Treasurer must approve any budget amendments to the two-year budget, which the City is operating under.

I am preparing all of the paperwork to send to the State Treasurer on the assumption that the RTAB will approve this and recommend approval to the State Treasurer.

If that occurs, I can have it submitted today.

Regardless of the final determination on this, we will be prepared to act on either outcome.

I just wanted to point out the Final Order provision prior to the meeting.

If you wish to discuss further, let me know.

Wayne:

Yesterday, Terry asked me the question whether the Flint resolution authorizing the use of $2.0 million of fund balance is subject to State Treasurer's approval after receiving RTAB approval? I believe Terry's question was triggered by the City's Administrator indicating that such dual approval is required.

Act 436 does not require approval by both an RTAB and the State Treasurer of an amendment to an EM's two-year budget. What the Act does require is approval by the State Treasurer if receivership *has been* terminated, or RTAB approval under § 23(5)(c) of the Act if receivership *has not* been terminated. I base my conclusion on § 21 of the Act, which provides as follows:

> (1) Before the termination of receivership and the completion of the emergency manager's term, or if a transition advisory board is appointed under section 23, then before the transition advisory board is appointed, the emergency manager shall adopt and implement a 2-year budget, including all contractual and employment agreements, for the local government commencing with the termination of receivership.
>
> (2) After the completion of the emergency manager's term *and the termination of receivership*, the governing body of the local government shall not amend the 2-year budget adopted under subsection (1) without the approval of the state treasurer, and shall not revise any order or ordinance implemented by the emergency manager during his or her term prior to 1 year after the termination of receivership. Emphasis supplied.

This is the answer I will provide at the RTAB meeting today if the question is posed. So, I wanted to make sure we all are on the same page regarding this. That said, I am aware of nothing in the Act that would preclude the State Treasurer from adding his imprimatur to a budget amendment after RTAB disposition if he wished to do so.

What: Jeff Wright Statement on Flint City Council Approving Resolution to Join KWA.

When: March 26, 2013

Additional Info: Jeff Wright, CEO of the KWA, today praised the Flint City Council for voting to approve a resolution to officially have the City of Flint join the KWA and its' water line.

"I have said from the beginning that this decision must be made by Flint's City Council and Mayor," said Wright. "I appreciate the council voting the way they did, but even more than that, I am glad the residents of Flint were able to have their voices heard via their elected officials." The next step in the process will come with the KWA Board executing the contract for the City.

"The most important aspect from the vote is the fact that we as an Authority can move forward knowing Flint's intentions," said Wright.

Despite Emergency Manager Ed Kurtz publicly supporting the project, Wright had made a vote by council a condition of Flint joining the KWA so the residents would have their say.

"There is a basic tenet that government is best when it has local control. We saw that with the council vote. Nobody, whether they live in Flint, Grand Blanc, Davison, Fenton, or anywhere in Genesee County, should have these types of decisions made by people who live outside of their community," said Wright.

At the next Water and Waste Advisory Board meeting a vote will be taken to award a contract for construction of the intake portion of the water line. All bids were submitted to the board at their last meeting for review.

STATUS OF FLINT WATER: October 14, 2015

- Flint Receivership Transition Advisory Board meeting today to consider budget amendments to pay for temporary reconnection to the Detroit water system

- Treasury staff from Bureau of Local Government will be meeting with City officials to review overall budget and cash conditions
    - Fund Balance in the General Fund is currently projected at $4M by June 30, 2016. This is a projected increase of $1M from FY 2014-2015
    - Fund Balance in the Water Fund is currently projected at $6M, which is a decline of $8M due to non-payment of water bills

- Negotiations between the City of Flint, Genesee County and DWSD remain in progress to finalize the necessary agreements for the City to temporarily reconnect to the Detroit water system
    - Preparation of the pipeline to receive water from DWSD is underway. The City believes that a physical connection can be established this week
    - The City has requested clarification if it should begin receiving water from DWSD before the State Legislature takes action on the request $6M aid package

- Both the Kincaid and Shears lawsuits remain in litigation. Potential losses of $30M are possible. The City's request to Treasury for financial assistance for outside legal consul is still pending

Memorandum
To: Receivership Transition Advisory Board
From: Natasha L. Henderson, City Administrator
Date: Tuesday, October 13th
Re. Emergency Additions to the Agenda

Members of the Receivership Transition Advisory Board:

This memorandum respectfully requests the inclusion of two urgent items on the agenda for the October 14 Receivership Transition Advisory Board Meeting.

As you may be aware, the Genesee County Health Department has issued a public health advisory in regard to the high amount of lead contamination in City water in response to the findings of physicians at Hurley Hospital This was followed by a similar advisory declared by the City.

Seeking to address this emergency, I requested that the City explore the possibility of ceasing the use of the Flint River as the City's water source and to reconnect to the Detroit Water and Sewerage Department (DWSD) until the KWA pipeline can be completed in 2016. This request was followed by a recommendation by the Mayor's Technical Advisory Committee to reconnect to DWSD to improve the City's water quality, thereby safeguarding public health On October 8, 2015, the Governor pledged to provide financial assistance to Flint for the reconnection, in the amount of six million dollars. The Mott Foundation graciously offered to provide an additional four million. Combined with two million dollars provided by the City, a total amount of $12 million can be utilized to reconnect the City to DWSD for a nine month period

In the interests of the public health and welfare, I request that the first item added to the agenda be a resolution (#150872) making available two million dollars from general fund balance to reconnect to DWSD. The second item requested to be added to the agenda is a resolution (#150875) granting the City Administrator the Authority to enter into a contract with DWSD These items have been attached for your review.

I apologize for the sudden request for changes to the agenda, however the City is facing a critical emergency requiring immediate attention. The Administration has had to react with reflexive speed and remain adaptable to try to mitigate the serious consequences already affecting the residents of this community. I ask that you please consider my request to add and approve these items so that we may address this emergency in a timely and responsive manner

Respectfully,

Natasha L. Henderson, City Administrator

Flint, Michigan

Wednesday, September 9, 2015

2:02 p.m.

THE CHAIRPERSON: We'll call our meeting to order.

Item I A, Roll Call. The record can reflect that Members Larkin and McGhee are present along with myself and we do have a quorum. Members McMahan and Walker-Griffea are unable to attend this afternoon. If there's no objection, I'm going to ask that they both have an excused absence.

MR. LARKIN: No objections.

THE CHAIRPERSON: Without objection, both of them are excused from this afternoon's meeting.

Item I B, the approval of the agenda. Are there any additions to be made to the agenda? If not, we'll consider the agenda to be approved.

Item I C, approval of the minutes from the August 12, 2015 RTAB meeting. Hopefully, members have had a chance to review those minutes. Are there any corrections or additions to those minutes?

If not, is there a motion that the minutes of the RTAB meeting of August 12, 2015 be approved?

MR. LARKIN: So move.

MR. McGHEE: Support.

THE CHAIRPERSON: A motion's been made and a second. Those in favor, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

The minutes are approved.

Item II, Old Business. There is none pending from our last meeting.

New Business, Item A, I don't see the mayor.

MS. HENDERSON: He is coming.

THE CHAIRPERSON: I'm sorry?

BOARD MEMBERS: He is coming. He does plan to speak, so --

THE CHAIRPERSON: Mr. Freeman?

MS. HENDERSON: He will not be here.

THE CHAIRPERSON: He will not be?

MS. HENDERSON: No.

THE CHAIRPERSON: Okay. We'll move temporarily on, then, to -- we will tread water for a moment.

Good afternoon, Mayor.

MAYOR WALLING: Good afternoon. Are we to my part of the agenda already?

THE CHAIRPERSON: We are. Perfect timing.

MAYOR WALLING: This is an efficient body.

All right. Well, good afternoon. And,

again, thank you for the opportunity to be part of your agenda, as you consider the matters before you. I'm happy to take any questions you have but I'll just, each meeting, make sure we're sharing a few of the efforts we're making around the high-priority initiatives for the City.

I think the most important right now is the work we'll continue to do with our water system. We're very pleased that the City did come back in compliance with the Safe Drinking Water Act. That's been a team effort, going back to this winter. And the leadership and the City Administrator has been integral in keeping the work on track to get the carbon filter installed so that it was operational during the warmest months of the year where the Flint River water is hardest to treat in regard to the organic content and chemical treatment process and subsequently the TTHM, the trihalomethane challenge that became evident last year.

So with the tests in August, the quarterly tests, those results came back to us from the Michigan Department of Environmental Quality. It's measured on a rolling four quarter average. And based on this quarter's results and the prior three quarters, we're now below the contaminant level in all eight of the City's sites. So a tremendous progress is being made

there on that aspect of our drinking water system.

The capital improvement projects that were already underway before Judge Hayman's preliminary injunction are continuing. Those include the leak detection work that was funded through the Department of Treasury and the fiscally distressed communities grant. That work is critical to ensuring that the system is secure and working efficiently by not having unnoticed leaks that may be otherwise there throughout the system, so that work is proceeding.

We are also managing, with the staff's hard work, the City Administrator and Chief Financial and Chief Legal Officers, to make sure that we're preparing appropriately for the projected effects of Judge Hayman's preliminary injunction.

Rates: Bills did go out to residents on the first few rounds with a lower rate. We also know there is a lower collection level so that's all being projected and taken into account.

Capital improvement projects that weren't yet started were paused so those are still expected to be done in the future but we did pause any new work getting started that we may need to otherwise revisit in the budget year.

MR. LARKIN: Do any of those -- and sorry for

interrupting. Do any of those that have been paused, are any of them receiving grants or sorts of funds where we have time limits and have to use it for reporting measures or anything?

MAYOR WALLING: Not at this time. All of those were -- were being projected to be paid for through local -- local funds. We certainly will continue to seek assistance when we can find that and we will, you know, prioritize, making sure that it gets done. There may be a match requirement and that would be part of managing that on an ongoing basis.

There's been a renewed discussion around lead in drinking water by the time it actually comes out of the tap or a showerhead in a home. That's something that the City, like communities across the State, have tested for many years. In the last approximately year, the City's been required to do two rounds of tests that were six months apart, under the methodology that the Department of Environmental Quality, the EPA, had us using.

You may have seen the reports that the Virginia Tech student researchers, who had a different methodology, came up with a different result. So, of course, our staff is actively engaged in looking at all of that. We have EPA and Department of Environmental

Quality and technical assistance through the Technical Advisory Committee. So we'll continue to work on that issue and continue to answer questions, including those of the Council. We hope to take them additional information on Monday, which is their next regularly scheduled meeting.

We think it's important that we do everything we can to share the information that we have, to answer questions and to assure the community that we have safe drinking water in this community. And where there may be a concern in an individual household, based on testing results, what members in that household can do, the lead comes from the service line and even the internal pipes within a home.

So there are some variables there that aren't related directly to the treatment process or, in this case, even the distribution process. But all of these are important because we want our community to have drinking water that's safe and that they're confident it is safe as well.

So, again, I compliment our team on continuing to work on that and we'll be working with our City Council members at their next meeting to further update them on the efforts that we've -- that we've made.

And there are some new aspects of the treatment process that we'll be working with the Department of Environmental Quality on getting allowed so that there can be some corrosion inhibition within that treatment process, which would be one more thing that would further improve the water.

So, again, thank you. Thank you for the time. And we look forward to continuing to work with you. Thank you.

THE CHAIRPERSON: Thank you.

Item III B, Approval of Resolutions from prior City Council meetings. We'll go in with the Regular City Council meeting of August 10. There were three resolutions from that meeting, Resolutions 783 and 643 were disposed of by this Board at our last meeting. That remains Resolution 605, which I believe deals with CDBG funds and a proposed transfer in the amount of $266,143.

Do members have any questions about that particular resolution?

If not, is there a motion that Resolution 605 from the Regular City Council meeting August 10th be approved?

MR. LARKIN: So move.

MR. McGHEE: Support.

THE CHAIRPERSON: A motion's been made and seconded. Assuming no discussion, those in favor of the motion, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion is adopted.

City Council meeting, Special Meeting, August 11th, there was one item which was previously disposed of by this Board so we'll proceed on to the Regular City Council meeting of August 24th. There were Resolutions from that meeting of 795, 796, 797, 799 and 816. Do members have any questions regarding any of those resolutions?

MR. McGHEE: No.

THE CHAIRPERSON: Is there a motion, then, that previously named resolutions from Regular City Council meeting of August 24th be approved?

MR. McGHEE: So move.

MR. LARKIN: Support.

THE CHAIRPERSON: A motion's made and seconded. Assuming no discussion, those in favor of the motion, please say "aye".

BOARD MEMBERS: Aye.

THE CHAIRPERSON: Opposed?

Motion is adopted.

Item III C, City Administrator Items. One item listed was distributed previously budget-to-actual is attachment three. Any questions from the City Administrator about budget action information?

And did you wish to comment upon that or --

MS. HENDERSON: Not that, in specific.

THE CHAIRPERSON: Okay.

MS. HENDERSON: If I can.

THE CHAIRPERSON: Certainly.

MS. HENDERSON: Unless you all have any questions about the reports that we submitted, the financial reports, I would just report on a few operational things that we have going.

We are in the process of recruiting a Director of Community and Economic Development; that's underway due to a vacancy there.

We do have a request for a proposal for the total property reassessment for the City. This is something that the Tax Commission is commissioning us to do so. And we're also applying for a distressed City's grant for this funding, given our distressful situation, as far as the financial impact that this could have. So we are moving forward on that as that's something that could be detrimental in the future.

So I just wanted to point that out that we

are taking steps to try to curtail that cost by applying for this grant that became open in August. So we are moving forward with that.

Do you all have any questions?

THE CHAIRPERSON: Thank you.

MS. HENDERSON: Thank you.

THE CHAIRPERSON: Without objection, we consider the budget action report to be received.

Item IV, Public Comment.

MR. CLINE: Just one individual. R.L. Mitchell.

MR. MITCHELL: I'm Mr. R.L. Mitchell.

THE CHAIRPERSON: Good afternoon.

MR. MITCHELL: I want to mention in this public comment, this is vital contact, what's going on with the water pollution. But the position of this Judge Hayman is already decided already, sir, and I'm speaking for the Council.

The Council, since we, the people, speaking, I want to put mine in. Before this budget committee commits, I recommend to have the councilmen to speak on this issue before the Mayor takes certain steps because I was in the -- one of the interviews set up, like, the people panic. But you people seem like you don't know what's happening but only Ms. Henderson know but she --

I just wanted to put that in there, to speak.

THE CHAIRPERSON: Thank you.

Any other public comment?

MR. CLINE: No, sir.

THE CHAIRPERSON: Item V, is there any further business to come before this Board this afternoon?

If not, is there a motion that we adjourn?

MR. LARKIN: So move.

THE CHAIRPERSON: Support?

MR. McGHEE: Support.

THE CHAIRPERSON: Without objection, we are adjourned. Thank you, everyone.

(Meeting was concluded at 2:17 p.m.)

ADOPTED: _____

RESOLUTION TO AUTHORIZE BUDGET AMENDMENTS

BY THE CITY ADMINISTRATOR:

Whereas, the City's budget is monitored on an ongoing basis by the Chief Financial Officer and department heads; and

Whereas, the Chief Financial Officer is recommending certain adjustments;

IT IS RESOLVED, that the FY16 Budget of the City of Flint is hereby amended to reflect the proposed budget for the City's revolving loan funds, RLFI & II and CDBG, budget adjustments in the attached list of budget adjustments dated July 27, 2015;

That the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes in to the Budget and to assign the appropriate account numbers.

Peter M. Bade, Chief Legal Officer

Jody N. Lundquist, Chief Financial Officer

Natasha L. Henderson, City Administrator

CITY COUNCIL:

Joshua Freeman, Council President

RECEIVERSHIP TRANSITION ADVISORY BOARD:

STAFF REVIEW

DATE: August 28, 2015

Agenda Item Title: Resolution to Authorize Budget Amendments (City's Revolving Loan Funds)

Prepared By: V. Foster for Dawn Steele

Background/Summary of Proposed Action:

The Finance Department is requesting to amend the budget to reflect the proposed budget for the City's revolving loan funds, RLFI & II and CDBG. This fund was not included in the amended FY16-17 budget that was previously adopted.

The revolving loan funds have been in existence for several years, and funds are designated for specific purposes in accordance with the Economic Development Administration's regulations.

150830 Ordinance/Chapter 50 (Zoning)/N. Grand Traverse, W. Fourth Avenue, Stone Street/Thomas Ayers, Kettering University/PC 15-292

An ordinance to amend Chapter 50 (Zoning) of the Code of the City of Flint as requested by Thomas Ayers, Kettering University (PC 15-292), for a zoning change for property fronting N. Grand Traverse, W. Fourth Avenue, and Stone Street, Parcels No. 40-12-456-003, 40-12-456-004, 40-12-456-005, 40-12-456-010, 40-12-456-011 and 40-12-456-012, from "B" Two Family Residential to "D-2" Neighborhood Business District. [Planning Commission recommends APPROVAL.]

HEARING HELD

Enactment No: 4070

RESOLUTIONS - MAY BE REFERRED FROM COTW

150842 Reprogramming/Unspent HOME Investment Partnership Funds/Contracts/Flint NIPP/Habitat for Humanity/Purchase Rehab Resale/CHDO Operating

Resolution resolving that contracts with Genesee County Habitat for Humanity ($250,000) for Purchase Rehab Resale to rehabilitate and re-sell a duplex, with Flint NIPP ($150,000) for Purchase Rehab Resale to rehabilitate and re-sell up to two homes, and with Flint NIPP ($20,000) to help conduct preliminary planning and feasibility work are approved and that the appropriate City Officials are hereby authorized to do all things necessary to reprogram HOME funds in the amount of $420,000.00, and to process a budget amendment moving said funds to the appropriate Habitat for Humanity and Flint NIPP accounts.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150843 Budget Amendment/USDA Forest Service Grant/Chevy-In-the-Hole

Resolution resolving that the appropriate City Officials are authorized to do all things necessary to process a budget amendment to appropriate funds under grant code FUSDA14CHEVY, Fund Number 296 and Department Number 690.391, in the amount of $200,000.00.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150844 Contract/Flint Community Schools/Police Liaison Officer Services

Resolution resolving the approval of a contract that shall be authorized and executed between the City of Flint and Flint Community Schools for Police Liaison Officer Services for the 2015-2016 school year, with Flint Community Schools financing 50% of the costs for wages, fringe benefits, pensions, supplies, and vehicles.

SEPARATED FROM MASTER RESOLUTION

150845 Budget Amendment/Planning and Development/CDBG Housing and Smith Village Housing/Economic Development Activities

Resolution resolving that the appropriate City Officials are authorized to do all things necessary to process a budget adjustment to move $98,674.67 from 101 Fund Balance to the appropriate account, and to change existing encumbrances, and to make adjustments to any existing purchase orders that are affected by said changes, for the purpose of completing CDBG housing and Smith Village housing, and for unbudgeted economic development activities in the Community and Economic Development Division.

SEPARATED FROM MASTER RESOLUTION

150846 BS&A Software/Annual Service and Support

Resolution resolving that the Mayor and City Administrator do all things necessary to remit payment to BS&A Software for the software and maintenance agreement for FY2016, as requested by the IS Division, in an amount NOT-TO-EXCEED $244,607.25, for a revised four-year contract total of $863,546.00.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150847 Detroit Salt/Bulk Salt

Resolution resolving that the Finance Department is hereby authorized to issue a purchase order to Detroit Salt for bulk salt, as requested by Street Maintenance, in an amount NOT-TO-EXCEED $300,000.00.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150848 JAM Best One/Annual Supply of Tires

Resolution resolving that the Finance Department is hereby authorized to issue a purchase order to JAM Best One for the annual supply of tires, as requested by the Fleet Division, in an amount NOT-TO-EXCEED $120,000.00.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150849 Change Order/Contract/Du All Cleaning/Janitorial Services

Resolution resolving that the Finance Department is hereby authorized to CO#3 to the contract with Du All Cleaning for an additional year of janitorial services, as requested by the Department of Public Works, in an amount NOT-TO-EXCEED $65,700.00, with an aggregate total spend of $325,113.88 to said vendor.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150850 East Jordan Iron Works/Hydrant, Grate and Manhole Covers

Resolution resolving that the Finance Department is hereby authorized to issue a purchase order to East Jordan Iron Works for hydrant, grate and manhole covers, as requested by the Water Service Center, in an amount NOT-TO-EXCEED $180,000.00.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150851 Etna Supply Company/Annual Supply of Water Distribution Pipe Stainless Steel Repair Clamps and Repair Parts

Resolution resolving that the Finance Department is hereby authorized to issue a purchase order to Etna Supply Company for the annual supply of water distribution pipe stainless steel repair clamps and repair parts, as requested by the Water Service Center, in an amount NOT-TO-EXCEED $130,000.00.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150852 Contract/Lake Agency, Inc./Excess Liability Insurance Coverage

Resolution resolving that the appropriate City Officials are authorized to enter into a contract with Lake Agency, Inc. to provide the City with excess liability coverage through the Princeton/Munich Re Insurance Company, as requested by the Finance Department, at a premium amount NOT-TO-EXCEED $322,934.00.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150853 Purchase Agreement/CSX Transportation, Inc./Property for the Grand Traverse Greenway Trail

Resolution resolving that the appropriate City Officials are hereby authorized to enter into an agreement with CSX Transportation, Inc. to purchase 42.72 acres of abandoned rail line for the Grand Traverse Greenway Trail, in an amount NOT-TO-EXCEED $235,000.00, AND, resolving that the City of Flint may withdraw from this agreement at any time prior to closing on the property.

SEPARATED FROM MASTER RESOLUTION

150854 Contract/The Lake Agency/Excess Liability Insurance Coverage

Resolution resolving that the appropriate City Officials are authorized to enter into a contract with The Lake Agency to provide Property, Equipment Breakdown and Crime Insurance through Traveler's Insurance and Harford Steam Boiler, as requested by the Finance Department, in an amount NOT-TO-EXCEED $144,311.00.

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

Passed The Consent Agenda

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, including all the preceding items marked as having been adopted on a Consent Agenda. The motion carried by the following vote:

Aye: 9 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

150855 Relocation/Voting Precincts/November 3, 2015 General Election

Resolution resolving that the Flint City Council approves the relocation of voting precincts previously located at Carpenter Road Elementary School, Cummings Elementary School and Scott Elementary School to Greater Holy Temple Church of God in Christ, Eisenhower Elementary School and Grace Emmanuel Baptist Church, respectively, as requested by the Office of the City Clerk, effective with the November 3, 2015 General Election.

SEPARATED FROM MASTER RESOLUTION

SEPARATED FROM MASTER RESOLUTION

Aye: 9 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

150845 Budget Amendment/Planning and Development/CDBG Housing and Smith Village Housing/Economic Development Activities

Resolution resolving that the appropriate City Officials are authorized to do all things necessary to process a budget adjustment to move $98,674.67 from 101 Fund Balance to the appropriate account and to change existing encumbrances, and to make adjustments to any existing purchase orders that

are affected by said changes, for the purpose of completing CDBG housing and Smith Village housing, and for unbudgeted economic development activities in the Community and Economic Development Division.

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 9 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

150853 Purchase Agreement/CSX Transportation, Inc./Property for the Grand Traverse Greenway Trail

Resolution resolving that the appropriate City Officials are hereby authorized to enter into an agreement with CSX Transportation, Inc. to purchase 42.72 acres of abandoned rail line for the Grand Traverse Greenway Trail, in an amount NOT-TO-EXCEED $235,000.00, AND, resolving that the City of Flint may withdraw from this agreement at any time prior to closing on the property.

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 9 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

150855 Relocation/Voting Precincts/November 3, 2015 General Election

Resolution resolving that the Flint City Council approves the relocation of voting precincts previously located at Carpenter Road Elementary School, Cummings Elementary School and Scott Elementary School to Greater Holy Temple Church of God in Christ, Eisenhower Elementary School and Grace Emmanuel Baptist Church, respectively, as requested by the Office of the City Clerk, effective with the November 3, 2015 General Election.

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 9 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

ORDINANCES - Second Reading

150830 Ordinance/Chapter 50 (Zoning)/N. Grand Traverse, W. Fourth Avenue, Stone Street/Thomas Ayers, Kettering University/PC 15-292

An ordinance to amend Chapter 50 (Zoning) of the Code of the City of Flint as requested by Thomas Ayers, Kettering University (PC 15-292), for a zoning change for property fronting N. Grand Traverse, W. Fourth Avenue, and Stone Street, Parcels No. 40-12-456-003, 40-12-456-004, 40-12-456-005, 40-12-456-010, 40-12-456-011 and 40-12-456-012, from "B" Two Family Residential to "D-2" Neighborhood Business District. [Planning Commission recommends APPROVAL.]

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be PASSED. The motion carried by the following vote:

Aye: 5 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Councilperson VanBuren and Councilperson Kincaid

No: 4 - Vice President Davis, Councilperson Winfrey, Councilperson Galloway and Councilperson Mays

Enactment No: 4070

PRESENTED: 9-11-15

ADOPTED: _____

Resolution to Reprogram Unspent HOME Investment Partnership (HOME) Funds and Enter Into Contracts with Flint NIPP for Purchase Rehab Resale in the amount of $150,000, Flint NIPP for CHDO Operating in the amount of $20,000, and Habitat for Humanity for Purchase Rehab Resale in the amount of $250,000.

BY THE CITY ADMINISTRATOR:

The Department of Planning, Community and Economic Development Division (CED) has identified $420,000 in unspent HOME Investment Partnership (HOME) funds that are available for reprogramming; and

The Division requests to reprogram $250,000 for Purchase Rehab Resale to Genesee County Habitat for Humanity to rehabilitate and re-sell a duplex; and

The Division requests to reprogram $150,000 for Purchase Rehab Resale to Flint NIPP to rehabilitate and re-sell up to two homes; and

The Division requests to reprogram $20,000 for CHDO Operating to Flint NIPP to help conduct preliminary planning and feasibility work for the project; and

Funds are available in the below revenue and expenditure accounts and should be moved to the identified Habitat for Humanity and Flint NIPP accounts; and

Available in HOME Uncommitted Accounts:				To be moved to Accounts:		
Revenue Accounts:				**Revenue Accounts:**		
FHUD14HOME	274-749.104-502.749	$400,000	To	FHUD14HOME	274-749.270-502.749	$250,000
				FHUD14HOME	274-749.332-502.749	$150.000
FHUD14HOME	274-749.102-502.749	$20,000		FHUD14HOME	274-749.334-502.749	$20,000
Expense Accounts:				**Expense Accounts:**

RESOLUTION STAFF REVIEW

Date: August 28, 2015

Agenda Item Title: **Resolution to Reprogram Unspent HOME Investment Partnership (HOME) Funds and Enter Into Contracts with Flint NIPP for Purchase Rehab Resale in the amount of $150,000, Flint NIPP for CHDO Operating in the amount of $20,000, and Habitat for Humanity for Purchase Rehab Resale in the amount of $250,000.**

Prepared by: Suzanne Wilcox, Department of Planning and Development, Community and Economic Development Division (CED)

Summary of Proposed Action:
The Department of Planning and Development, Community and Economic Development Division has identified $420,000 in unspent HOME Investment Partnership (HOME) funds from the HOME 13-14 allocation that are available for reprogramming. The Division requests to reprogram the $250,000 for Purchase Rehab Resale to Genesee County Habitat for Humanity to rehabilitate and re-sell a duplex, $150,000 to Flint NIPP for a purchase rehab resale activity, and $20,000 for CHDO Operating funds to support the eligible purchase rehab resale CHDO activity.

This reprogramming is part of a substantial amendment to the Consolidated Plan and per Citizen Participation requirements, was published in The Flint Journal on July 12, 2015. The comment period ended August 11, 2015 and the City may now enter into contracts, pending receipt of HUD's environmental release of funds.

Financial Implications:
Reprogramming funds to activities that can spend funds, allows CED to draw down funds that are otherwise being unused, and ensures that CED meets its ongoing CHDO requirements.

RESOLUTION

Resolution to Process a Budget Amendment of USDA Forest Service Funds and Increase Budget by $200,000

BY THE CITY ADMINISTRATOR:

The Department of Planning and Development, Planning Division was awarded a grant modification to its USDA Forest Service Grant number 13-DG-11420004-020 to extend through September 30, 2017 and increase by $200,000. The additional time and funding will be used for the purpose of completing work on the City's vegetative cap project for phytoremediation in the Chevy in the Hole area.

The City has accepted the grant and the necessary funds need to be appropriated by way of a budget amendment.

IT IS RESOLVED, that appropriate City of Flint officials are authorized to do all things necessary to process a budget amendment to appropriate funds under grant code FUSDA14CHEVY, fund number 296 and department number 690.391, in the amount of $200,000.

Project Narrative – The Greening of Chevy in the Hole
Northeastern Area State and Private Forestry
FY 2016 Great Lakes Restoration Initiative (GLRI)

Project Applicant: The City of Flint will be the entity responsible for conducting the fiscal and performance accountability of the project.

Project Title: Greening of Chevy in the Hole

Project Location: Project activities will be targeted to the Flint River watershed, a part of the larger Saginaw Bay watershed (one of the state's Areas of Concern), which ultimately drains to Lake Huron. Specifically, the proposed project will occur at an approximately 66-acre parcel in the City of Flint, Genesee County, Michigan, formerly used for automotive manufacturing and known as "Chevy in the Hole".

GLRI Program Area: 3. "Reduce Toxic Substances in Brownfield Sites"

Project Contact: Jonathan Moore
City of Flint
1101 S. Saginaw St.
Flint, MI 48502
Phone: (810) 766-7426, ext. 3060
Fax: (810) 766-7351
jmoore@cityofflint.com

Funding Requested: $200,000

Recipient of Funds: *City of Flint (same as above)*

Project Duration: January 1, 2013 through September 30, 2017

Abstract: Chevy in the Hole consists of 66 acres of blighted urban riverfront. Using phytotechnologies to reduce toxic substances is the foundation of an overall site strategy for the City. Integrated with low impact stormwater management and green infrastructure "capping", this riverfront space is being transformed into a center for recreation and research. Trees such as poplars have and will continue to be planted in contaminated areas for uptake and degradation of toxins. These areas will coincide with storm water runoff infiltration such that storm water is also managed, and, ultimately, the contaminated water vector otherwise fluxing to the river will be managed.

Scope of Work:

In 2011-13 the City of Flint successfully completed phytoremediation plantings via similar United States Department of Agriculture (USDA) Forest Service (FS) GLRI grants. In this effort, approximately 16 acres of the site were vegetated successfully with a mix of native deciduous trees such as sugar maples, river birch, evergreens such as white spruce, and water-loving phreatophytes such as poplars and willows that will provide the bulk of the groundwater uptake in the early years of the phytoremediation program. In addition, the City of Flint has begun a *vegetative cap project via other funding mechanisms, and the phytoremediation plantings using* a variety of trees will be integrated with the "green cap" project to the extent possible.

investigations and plantings confirm the site is an ideal candidate for phytotechnologies. Both the soil conditions and shallow groundwater level at this site are suitable for tree growth and the contaminant concentrations are appropriate for phytoremediation. Finally, the project has the potential to provide wildlife habitat and the aesthetic benefits of a reforestation effort in a riparian environment, both of which complement the toxin reduction benefits.

The project will:

• apply phytoremediation to reduce surface runoff and sediment into the river by establishing a vegetated riparian buffer along the low-lying river's edge;
• improve the quality of soil and ground water by using phytoremediation to sequester, degrade, or stabilize contaminants;
• reduce the quantity of contaminated groundwater discharging to the Flint River using the benefits of phytoremediation; and,
• monitor the effectiveness of phytoremediation for use during the design and implementation of this process at other portions of the subject site and other sites in Flint.

The elements to achieve the objectives identified above include the following:

1. Baseline & Performance Monitoring - This task will include all contaminant and hydrologic monitoring, e.g., precipitation and groundwater level gauging throughout the project, and contaminant testing in groundwater at the conclusion of the project. A comprehensive groundwater sampling event and remote groundwater elevation monitoring at key locations will commence under this task.

2. Plantings – This task will include the planting of over 1,000 trees and shrubs of varying species and sizes across key areas (i.e., areas with the highest contamination and having the greatest influence (decrease) on stormwater runoff. Wherever possible, the plantings will integrate and coincide with plantings and design for the "green cap" project in an effort to green the site as much of the site as possible.

3. Reporting - In compliance with GLRI requirements, reporting will consist of biannual reports in addition to a final report.

Priority Landscape:

Phytoremediation will reduce metals and VOCs in groundwater that would otherwise discharge to the Flint River, which drains to the Saginaw Bay, which is a GLRI-defined AOC. In light of the project's objective of toxin reduction to an AOC, it ties directly to the GLRI Action Plan focus area of Toxic Substances and Areas of Concern. Specifically, this project will remediate and restore the Saginaw Bay, which aligns directly with the GLRI action plan objectives. The project links to the State Forest Action Plan via the following:

1. Reforestation of an urban area - 1,000 trees/shrubs will be planted just blocks from downtown Flint
2. Maintenance and restoration of watersheds - this is accomplished by the addition of eight (8) acres of green infrastructure
3. Enhancement of public benefits from trees and forests
4. Provision of forested ecosystems for biodiversity and wildlife

Measurable Results and On-The-Ground Outcomes:

Assuming 1,000 trees will uptake 30 gallons of groundwater per day over 180 days per year, approximately 5,400,000 gallons of contaminated groundwater per year will be transpired. With an average total contaminant concentration of 1 mg/L, it is expected that approximately 45 pounds of contaminants per year will be kept from discharging to the AOC from this project. This is a conservative performance metric, in that 1,000 phreatophytes have already been planted and survived as an outcome of this project.

Partnerships and Collaboration:

Environmental Consulting & Technology, Inc. (ECT) will provide design/build services for the phytoremediation system, including the development of a baseline monitoring program, final landscape plan design, and construction oversight of planting of trees. ECT will also oversee the maintenance of the phytoremediation system and perform final performance monitoring near the final quarter of the project. It is anticipated that their role will be 25% of the contractual services. The "green cap" contractor (ECT's sub), will perform construction/tree plantings; it is anticipated that their role will be 75% of the contractual services.

Timeline:

We anticipate a USDA FS grant start date of October 1, 2015. In light of the timing of this start date, we anticipate a project duration of October 1, 2015 through September 30, 2017 (schedule below).

FY 2016 Schedule - Schedule is approximate and not tied to a specific start date.

Quarter 1, October - December 2015: Site Preparation and Planning, Baseline Monitoring, Fall Plantings and Initiation of Design
Quarter 2, January - March 2016: Spring Planting Design
Quarter 3, April - June 2016: Spring Construction/Plantings and Irrigation and Maintenance
Quarter 4, July - September 2016: Irrigation and Maintenance
Quarter 5, October - December 2016: Maintenance and Winterization of System
Quarter 6, January - March 2017: Data Analysis and Site Preparation for 2017
Quarter 7, April - June 2017: Irrigation and Maintenance of Plantings
Quarter 8, July - September 2017: Final Performance Monitoring, Irrigation and Maintenance and Final Reporting

RESOLUTION

Resolution to Process a Budget Amendment to move funds from 101 Fund Balance to Planning and Development, Community and Economic Development Division, for the Purpose of Completing Community Development Block Grant (CDBG) Housing and Smith Village Housing and to Fund Economic Development Activities

BY THE CITY ADMINISTRATOR:

The Planning and Development Department, Community and Economic Development Division (CED) has invested significant grant funds to rehabilitate City owned CDBG and Smith Village housing. Vandalism has occurred at multiple properties and the repairs are not grant eligible; and

General funds are also necessary for unbudgeted economic development activities in the Department; and

Additionally, needed repairs funded by existing general fund encumbrances were unable to be completed prior to 2015 fiscal year close and were not requested in the fiscal year 2016 budget under department 690.100. Planning and Development has merged its general fund account into department 371.209 and existing purchase orders should be adjusted to same; and

To complete the repairs and to fund economic development activities, CED requests a Budget Amendment to move $98,674.67 from 101 Fund Balance to 101-371.209-801.000 and to change existing encumbrances to 101-371.209-801.000.

IT IS RESOLVED, that appropriate City Of Flint officials are authorized to do all things necessary to process a budget amendment to move $98,674.67 from 101 Fund Balance to the appropriate account and to make adjustments to any existing purchase orders that are affected by the aforementioned changes.

RESOLUTION STAFF REVIEW

Date: September 15, 2015

Agenda Item Title: **Resolution to Process a Budget Amendment to move funds from 101 Fund Balance to Planning and Development, Community and Economic Development Division, for the Purpose of Completing Community Development Block Grant (CDBG) Housing and Smith Village Housing and to Fund Economic Development Activities**

Prepared by:
Community and Economic Development Division (CED)

Summary of Proposed Action:
The Planning and Development Department, Community and Economic Development Division (CED) has invested significant grant funds to rehabilitate City owned CDBG and Smith Village housing. Vandalism has occurred at multiple properties and the repairs are not grant eligible. CED had requested funds in the FY15 4th Quarter Budget Amendment, but it was not adopted prior to the close of the FY15 and CED was unable to utilize those funds. Planning and Development requested no general funds for vandalism and theft items in the FY16 budget. Additionally, needed repairs funded by existing general fund encumbrances were unable to be completed prior to 2015 fiscal year close and were not requested in the fiscal year 2016 budget.

In addition, City Administration has requested CED staff provide some economic development services, which were not budgeted in FY16. These additional economic development activities, combined with the cost estimates for the repairs and existing encumbrances total $172,179.18. Finance has identified $98,674.67 available to request from FY15 Fund Balance. This, combined with the $73,504.51 identified as available in the FY16 P&D budget, will provide the necessary funds to complete the repairs and provide funding for economic development activities.

To complete the repairs, CED requests a Budget Amendment to move $98,674.67 from 101 Fund Balance to 101-371.209-801.000.

Financial Implications:
Failure to complete these repairs could subject the City to repayment of all federal investment.

RESOLUTION TO BS&A SOFTWARE FOR ANNUAL SERVICE AND SUPPORT

BY THE CITY ADMINISTRATOR

RESOLUTION

On August 7, 2012, the Emergency Manager authorized the Proper City Officials to enter into a four year contractual agreement with BS&A Software for software and maintenance agreements in an amount not to exceed $862,100.00 based on the following payment schedule: year one $132,616.25, years two through four $243,161.25 per year as requested by Information Services; and

Pursuant to the terms of the agreement with BS&A, year four is subject to a price increase based on the Consumer Price Index (CPI). In reviewing said CPI, a 1.01% increase is warranted, which results in a $1,446.00 increase for the FY16 fiscal year. Funding will come from the following account: 636-228.100-814.600; and

IT IS RESOLVED, that the Mayor and City Administrator do all things necessary to remit payment to BS&A Software for the software and maintenance agreement for FY16 in an amount not to exceed $244,607.25 and a revised total of $863,546.00. (Information Services Fund)

RESOLUTION STAFF REVIEW

September 22, 2015

Agenda Item Title: BS&A Software

Submitted By: IS Division

Background/Summary of Proposed Action:

The City of Flint utilizes a software system that has been developed by BS&A. In August 2012 the Emergency Manager authorized the City to enter into a four year contract with said vendor for the purposes of maintain licenses and any maintenance of the software. As part of the terms and conditions of the contract, the City is subject to a price increase during the fourth year that is tied to the Consumer Price Index (CPI). This is the fourth year of this contract and based on the CPI, the City is subject to an increase representing $1,446.00 for a total FY16 invoice of $244,607.25. The IS Division is requesting the Purchasing Division to issue a purchase order to represent said invoice amount.

Financial Implications:

RESOLUTION TO ETNA SUPPLY COMPANY FOR THE ANNUAL SUPPLY OF WATER DISTRIBUTION PIPE STAINLESS STEEL REPAIR CLAMPS AND REPAIR PARTS FOR THE WATER SERVICE CENTER

BY THE CITY ADMINISTRATOR

RESOLUTION

The Finance Department, Purchases and Supplies Division, has solicited a unit pricing proposal for the annual supply of water distribution pipe stainless steel repair clamps and repair parts for the Utilities Water Service Center; and

Etna Supply Company, 529 – 32nd Street, Grand Rapids, Michigan 49548 was the lowest responsive overall unit pricing proposal received from four solicitations for said clamps and repair parts. The funding for this purchase will come from the following account: 591-540.202-726.000; and

IT IS RESOLVED, that the Finance Department is authorized to issue a purchase order to Etna Supply Company for the annual supply of water distribution pipe stainless steel repair clamps and repair parts for the Utilities Water Service Center in an amount not to exceed $130,000.00. (Water Fund)

RESOLUTION AUTHORIZING RETAINING LAKE AGENCY TO PROVIDE EXCESS LIABILITY INSURANCE COVERAGE

BY THE CITY ADMINISTRATOR:

The City of Flint solicited proposals for excess liability insurance coverage; and

The Finance Department is recommending that Lake Agency, Inc. be retained to provide the City with excess liability insurance coverage through the Princeton/Munich Re Insurance Company. Princeton/Munich Re was the more favorable of the two carriers that submitted proposals. The Princeton/Munich Re Insurance Company proposal maintains the same coverage as the prior year at a reduced premium. Additionally, the carrier has offered to maintain the proposed premium for two subsequent years, provided that significant changes do not occur; therefore

IT IS RESOLVED, that the appropriate City officials are authorized to enter into a contract with Lake Agency, Inc. to provide the City with excess liability coverage through the Princeton/Munich Re Insurance Company at a premium amount not to exceed $322,934.00.

RESOLUTION STAFF REVIEW

DATE: 9-4-15

Agenda Item Title: Resolution Authorizing Retaining Lake Agency to Provide Excess Liability Insurance Coverage

Prepared By: V. Foster for Jody Lundquist, Chief Financial Officer

Background/Summary of Proposed Action:

Lake Agency, as the City's insurance broker, obtained quotes for its excess liability insurance policy. Quotes were obtained from Princeton/Munich Insurance Company and Old Republic Union Insurance Company. Seven other carriers declined.

The premium of $322,934.00 quoted by the City's current carrier, Princeton/Munch Re, reflects a total reduction from prior year of $20,500.00 while maintaining the current level of coverage.

Financial Implications: None.

Budgeted Expenditure? x Yes No Please explain if no:

Account No.: 677-174.851-955.000

Pre-encumbered? x Yes No Requisition # 150000896

Other Implications (i.e., collective bargaining): None.

Staff Recommendation: It is the Finance Department's recommendation that the City of Flint *renew the current general liability insurance coverage through the Lake Agency in the amount of* $322,934.00.

Staff Person: V. Foster **Approval:** City Administration

Mycommunityworkplace.org

As a Princeton policyholder, there is a valuable web-based platform designed specifically for public and nonprofit entities. The site offers management-level training including sexual harassment prevention, discrimination preventions and ethical behavior. Model policies and forms are provided as well as a daily article on vital workplace risk issues. Mycommunityworkplace.org is dynamic and can be adapted to meet the City of Flint's needs!

THIRD PARTY ADMINISTRATOR CLAIMS SERVICES

Named Insured: City of Flint
Company Name: York Claims Administration
Policy Term: 9/23/15 to 9/23/16

Claims Services

York will provide claims handling *for claims in excess of $10,000 in incurred value*, at the following rate(s):

Life of Contract Fee Per Feature		
Line of Business	2015-2016	2016-2017
General Liability		
Bodily Injury	$979.00	$1,008.00
Property Damage	$685.00	$706.00
Personal Injury	$613.00	$631.00
Public Officials		
Includes EBL, EPLI, E&O & Zoning	$2,009.00	$2,069.00
Police Professional	$1,906.00	$1,963.00
Auto Liability		
Bodily Injury	$1,802.00	$1,856.00
Property Damage	$567.00	$584.00
PIP	$1,236.00	$1,273.00
Auto Physical Damage (Not Included)	N/A	N/A

Life of Contract applies to claim features occurring during the 12 month contract term and covers handling until conclusion without additional charge as long as the client continues to renew subsequent contracts. If any subsequent contract is cancelled or non-renewed, the client may require York to return all open claims or to continue the administration of open claims for an additional fee per open claim feature or Time and Expense.

THIRD PARTY ADMINISTRATOR CLAIMS SERVICES

General Fees, Services, Terms and Conditions for City of Flint

- The City of Flint agrees to notify York in the following instances:
  1) On a quarterly basis by email of all claims received, regardless of whether they were denied, closed without payment, or paid under the ten thousand dollar ($10,000) authority point;
  2) Immediately of any claim that cannot be settled for less than ten thousand dollars ($10,000);
  3) Immediately of any claim that the City was attempting to settle that exceeds the ten thousand dollar ($10,000) limit;
  4) Immediately of ALL class action demands;
  5) Immediately of ALL Public Official Errors and Omissions (E&O) claims.

- Claim Reporting/Intake: $15 – Telephonic, Web, Fax, Email.
- $8,500 non-erodible, non-refundable annual administration fee payable upon signing of contract. Annual Administration Fee Includes: Account Administration Services; Loss Fund Administration; Live On-Line Access to Claims Information including "Loss Runs," Claims Data Transfer; Monthly Data Transfers to Excess Carrier as required; Regular Claims Reviews
- Outside Activity/Field Investigations will be billed at time and expense.
- Billing: York will issue an electronic invoice monthly, via e-mail. Payments shall be due and payable no later than thirty days from the invoice date.
- This proposal contemplates that York will be entering into a direct contract with the City of Flint. Should York be required to contract with any other party, different terms may apply.
- Pricing for each subsequent year, following this two year contract will be subject to the greater of 3% or the percentage increase as reported by the U.S. Department of Labor Bureau of Labor Statistics (http://www.gls.gov/cpi/home.htm) for the Consumer Price Index for All Urban Consumers (CPI-U) for the U.S. City Average, All Items, covering the prior twelve month period, valued as of the month ending two months prior (to allow time for reports to be published) to the anniversary date of the contract.
- City of Flint will have the right to direct that the services York performs be rendered in a particular or different way or additional services be provided. If such direction increases York's cost of providing the services, York shall be entitled to an equitable adjustment in its compensation.
- Subrogation: York's fee per feature pricing includes placing responsible parties on notice. Pursuit of subrogation beyond this point can be performed at 15% of recovery, plus costs, such as locate searches, skip traces, etc.
- Unless specifically identified, York's General Liability fixed fees are limited to Standard Commercial General Liability Coverage Form coverages. Claims presented to York but excluded from the standard form, coverages will be administered on a time & expense basis or on such other basis as agreed to between York and City of Flint, MI.

**See quote conditions on the following page (item #6) for the quote conditions on covering the Kearsley Creek Dam with Old Republic Insurance Co.*

QUOTE CONDITIONS

Quote Conditions:

1. Payment is due in full at time of binding coverage with a 100% earned premium.
2. It is understood and agreed that the City of Flint shall not make any changes in the Claims Administrator (York Risk Services) without the prior written approval of the insurance company prior to the implementation of any such changes.
3. The carrier may decide to audit the TPA during this policy year. If they want to schedule an audit, they will provide 60 days notice to York Risk Services. Any and all recommendations by Munich Re claims will need to be completed within 90 days notice of receiving written notice.
4. Loss reports must be updated at all times and reported quarterly to York Risk Services.
5. Terrorism coverage is not included. The cost to add this coverage is $3,500 with Princeton Insurance Co. and an additional $5,475 with Old Republic Union Insurance Co.
6. *Before coverage for the Kearsley Creek Dam can be granted with Old Republic Insurance Co., the company must be provided with a detailed plan of how the City of Flint intends to address the outstanding maintenance repair and replacement issues at the Dam, along with an estimated timeline for the repairs.
7. Provide updated loss information on the class action lawsuit filed by the retired employee's for their health care program. Has there been any activity at all on this claim in the last year? What is the status of the class action suit? Has a court date been set up yet?

Lake Agency, Inc.
1537 E Hill Rd
Grand Blanc, MI 48439

PLEASE NOTE .....

- This proposal contains the coverage's, limits and forms of insurance requested in the specifications furnished or as requested by you insofar as it was possible. Known deviations from specifications or coverage's you requested, if any, have been noted.

- Not all forms of available insurance have been recommended, for our endeavor has been to avoid a disproportionately high premium expenditure. In our oral discussions, we will examine this point in greater detail -- explaining the factors which motivated us to omit certain coverage's that are available.

- Your attention should be directed to one further point: We ask that you not accept our brief description of the insurance coverage's as a complete explanation of the policy terms. A narrative description can never replace the policy, of course, and the actual policy language will govern the scope and limit of coverage involved.

..... THANK YOU

Much of your annual budget is allocated to insurance and we wish to thank you for granting us the opportunity to analyze your insurance needs. Those involved in the selection of the companies utilized and the coverage's suggested were:

RESOLUTION AUTHORIZING LAKE AGENCY TO PROVIDE EXCESS LIABILITY INSURANCE COVERAGE

BY THE CITY ADMINISTRATOR:

The City's Property, Equipment Breakdown and Crime coverage is currently provided by Traveler's Insurance Company and Hartford Steam Boiler through the City's insurance broker, the Lake Agency.

The Lake Agency, in consultation with the Finance Department, has evaluated the current coverage amounts and updated the necessary building and equipment lists. Lake Agency is recommending that coverages be continued through Traveler's Insurance Company and Hartford Steam Boiler, for a total premium not to exceed $144,311.00.

IT IS RESOLVED, that the appropriate City officials are authorized to enter into a contract with The Lake Agency to provide Property, Equipment Breakdown and Crime Insurance through Traveler's Insurance and Hartford Steam Boiler at a cost not to exceed $144,311.00.

Peter M. Bade, Chief Legal Officer

RESOLUTION STAFF REVIEW

DATE: September 24, 2015

Agenda Item Title: Lake Agency – Property Insurance and Equipment Coverage

Prepared By: V. Foster, Finance Division

Background/Summary of Proposed Action:

The City's Property, Equipment Breakdown and Crime coverage is currently provided by Traveler's Insurance Company and Hartford Steam Boiler through the City's insurance broker, the Lake Agency. The premium cost for the coverage period 11/1/14-11/1/15 was $143,330.00.

Traveler's Insurance and Hartford Steam Boiler, through Lake Agency, has submitted a proposal for the commercial property, equipment breakdown and crime policy for a total premium of $144,311.00.

The Finance Department, based on the recommendation of Lake Agency, is recommending that the City continue its coverage with Traveler's and Hartford Steam Boiler for the period 11/1/15-11/1/16.

Financial Implications

There are sufficient funds budgeted for this purpose. Failure to pay this premium would result in cancellation of the policy and no property protection for the existing structures and equipment.

Budgeted Expenditure? X Yes No Please explain if no:

Account No.: 677-174.851-955.000

Pre-encumbered? X Yes No Requisition #

Other Implications (i.e., collective bargaining):

Staff Recommendation:

It is the recommendation of the Finance Department that this policy premium be paid and the policy renewed.

Staff Person: V. Foster **Approval:** J. Lundquist

2015 PROPERTY MARKETING

Carrier	Additional Notes:
Travelers Ins. Co.	Provided a quote
Chubb Ins. Co.	Provided a quote with a $.08 rate which is $.03 higher than current rate
Scottsdale Ins. Co. Declined	They declined as they cannot compete with Travelers rate
State Auto Ins. Co. Declined	They declined because they feel that the current building rate of less than $.05 is too low and they would not generate enough premium to pay for a large loss
Allied Insurance Co. Declined	They declined because they would have to get reinsurance due to the property limits in excess of $20Million
EMC Ins. Co. Declined	They declined as they cannot compete with Travelers rate
Lexington Ins. Co. Declined	They declined due to the ongoing financial issues and Travelers low rate

COMMERCIAL PROPERTY COVERAGE

Named Insured: City of Flint
Company Name: Travelers Insurance Co.
Policy Term: 11/01/2015 to 11/01/2016

Description/Location	Limit of Insurance
Buildings - All Locations:	$234,637,552
Business Personal Property:	$ 7,315,729
Business Personal Property in the Open:	$ 1,889,225
Blanket Totals:	**$243,842,506**

Building & Business Personal Property:
[X] Special Form
[X] Deductible - $250,000
[X] Voting Machines – $297,600 Limit
Deductible - $1,000
[X] Replacement Cost up to 120% (see below)
[X] Blanketed (see below)*

Flood & Earthquake Coverage:

Limit:	$10,000,000**
Aggregate:	$10,000,000
Deductible:	$ 250,000

**Coverage does not apply to any location(s) designated by the Federal Emergency Management Agency (FEMA) as a Flood Zone A, AE, A1-30, AO, V, VE, V1-30. These properties are considered within the 100 year flood plain.

Note: Insurance applies on a blanket basis only to a coverage for which a limit of insurance is shown on the statement of values. The most the company will pay for loss or damage in any one occurrence at any one premises location is 120% of the value(s) for each building or structure and separately for the total of personal property (including but not limited to furniture and fixtures, machinery and equipment, "stock", all other personal property owned by you and used in your business and your use interest in improvements and betterments) and personal property of others at each location as shown on the latest statement of values filed with the company and at each premises location as subsequently reported to and agreed by the company to insure.

*Coverage Change: The North Building located at 1101 S. Saginaw St. has been removed from the blanket limit. When loss control went out to inspect the building, they determined that only 10% of the building is used for normal business activities. Under the policy language the building is considered vacant and not allowed under blanket coverage or replacement cost up to 120%.

PROPERTY COVERAGE CONDITIONS

- Blanket loss payees will not be provided because of potential problems in event of a loss. Any loss payees will need to be scheduled as well as their interest.
- All other property consisting of bridges, road and sidewalks/paths, sewers are NOT included.
- Utility Interruption is NOT included. Coverage may be considered based on submission of the City of Flint's disaster plan in event of a loss.
- Radioactive Contamination is NOT included.
- Mold is not included.
- Terrorism coverage is provided.

Direct Coverage's (4500 N. Dort Highway & G-4652 Beecher Rd.)	$ 10,000
Direct Coverage's (All Other Locations)	$ 5,000
Data Compromise	$ 1,000
Identity Recovery	$ 250

Other Conditions	
Newly Acquired Locations to a Maximum of	365 Days
Interruption of Service Waiting Period	24 Hours

Note: A description of each coverage is listed on the following page

EQUIPMENT BREAKDOWN COVERAGE - Continued

Coverage	Description
♦ Property Damage	Pays for the cost to repair or replace damaged equipment or other covered property, including computers due to a covered accident
♦ Extra Expense	Pays for additional costs you incur after a covered loss to maintain normal operations
♦ Perishable Goods	Covers spoilage of covered property resulting from a change in controlled conditions that results from a breakdown of equipment or equipment owned by a utility supplier
♦ Data or Media Restoration	Coverage pays to restore data that is lost or damaged due to a covered loss
♦ Ordinance or Law	Pays for additional costs due to local ordinances or law, including demolition and increased cost of construction
♦ Hazardous Substances	Additional damage, loss of income or additional expenses due to a hazardous substance which is the direct result of a breakdown
♦ Expediting Expense	Pays for the extra cost of temporary repairs or to expedite permanent repairs to restore business operations
♦ Newly Acquired Locations	Automatically provides coverage during a specified time for new locations until they are reported to the Co.
♦ Data Compromise	Coverage is provided in the event of a data breach of the personal data of employees and customers. Response expense coverage responds to the cost and service obligations resulting from a breach of personal information. Pays for notifications and services to affected individuals along with credit monitoring and identity restoration service. Coverage provides a separate $50,000 aggregate for defense coverage for suits brought against the insured by an affected individual as a result of a breach of personal information
♦ Identity Recovery	Combines identity theft insurance with services that help victims restore their credit history and identity records to pre-theft status. Provides reimbursement for certain out of pocket expenses and the restoration service uses licensed investigators to perform much of the work on behalf of the insured.

CRIME

Named Insured: City of Flint
Company Name: Travelers Insurance Co.
Policy Term: 11/01/2015 to 11/01/2016

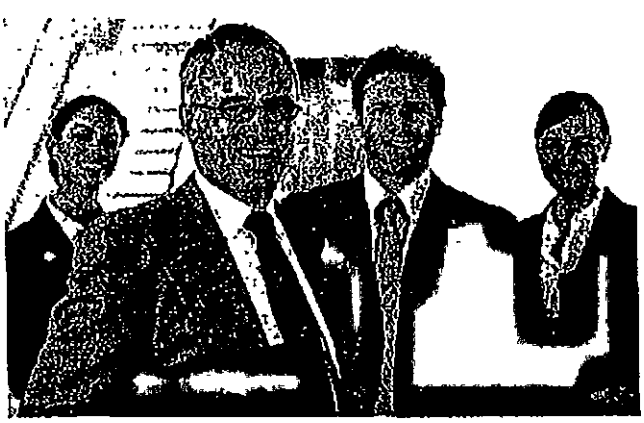
- Signed statement of values.
- Verify the list of locations and the total value of computer equipment where the values are over $75,000.

Solutions for All Your Insurance Needs

Comprehensive Consulting and Brokerage Services for All Lines of Coverage

Take advantage of the benefits of partnering with Lake Agency, Inc. for your Property & Casualty, Employee Benefits and Personal Lines needs.

We have insurance solutions for all facets of your business. Say goodbye to the confusion of multiple brokers and discover the benefits of placing all your business with Lake Agency, Inc. Understanding all sides of your business will enable us to develop a strategic, comprehensive insurance plan that addresses your unique needs and ensures there are no gaps in coverage. With a single point of contact, you'll never have to worry about who you should call for a claim. Plus, you'll have access to our full range of exciting P&C and Benefits tools and resources. Our comprehensive initiatives work harmoniously to benefit all aspects of your business and your bottom line.



Professional Services

Custom Communications
We can provide you with employee handbooks, newsletters, payroll stuffers, flyers, posters and more on topics ranging from retirement planning and wellness flyers to safety manuals and risk management resources.

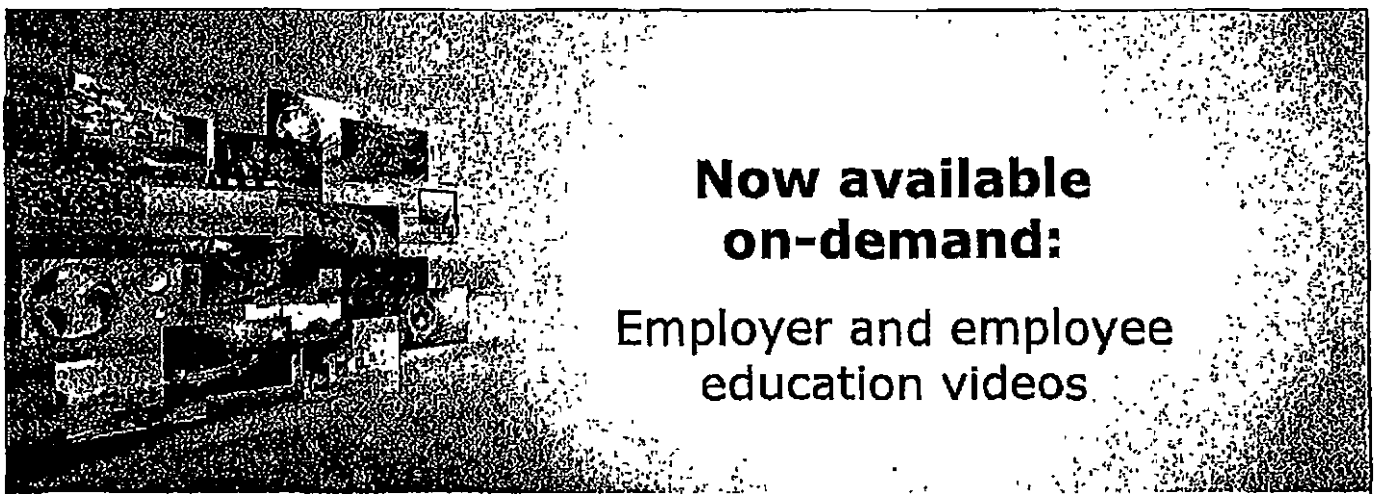
Client Resource Portal
You'll have electronic access to these materials and other resources through a unique client portal site. The site includes an expansive library of HR and risk management resources, including legislative guides and newsletters. Plus, you'll have online access to a variety of valuable OSHA resources, including an easy-to-use OSHA reporting and analysis tool.

Loss Control Strategies
Our mission is to help you to reduce your total cost of risk, including insurance costs, and promote continuous improvement in safety. We can achieve this by providing strategic planning, program development and execution through loss control evaluation, preventive action planning and active safety program support.

Cost Containment Resources
Our claims cost containment resources will help you minimize losses and protect your bottom line. This includes proper reporting, accident investigation, implementing a return to work program, educating employees and more.

Employee Portal
This customizable online communication portal provides your employees access to important company and HR information. You can tailor the site to offer information your employees will value, such as company policies, announcements, benefit plan information, an employee directory, vacation tracking and more.

Wellness Team
Our wellness team strives to maximize the health and productivity of your workforce by helping you implement targeted wellness initiatives. These programs will not only promote employee health and help lower medical claims costs, but can also support your safety initiatives and reduce workers' compensation claims.



Now available on-demand:

Employer and employee education videos

Lake Agency, Inc. consistently strives to provide valuable services and resources for our valued clients. Today, we are happy to announce that a **variety of videos are now available on-demand from Lake Client Connect.**

Among our video offerings, you will find:

- Educational videos to help business owners and risk managers better understand complex business and legal topics, such as OSHA, workers' compensation and risk management.
- Engaging videos for employees that educate on vital topics such as workplace safety, DOT standards and workers' compensation rights.

If you have questions or would like a Lake Client Connect refresher, please contact us today. Lake Agency, Inc. is dedicated to providing you with the services and resources to support your business needs. We thank you for your continued business.

Lake Agency, Inc.
(810) 694-2050

Lake Agency, Inc.
1537 E Hill Rd
Grand Blanc, MI 48439

PLEASE NOTE .....

- This proposal contains the coverage's, limits and forms of insurance requested in the specifications furnished or as requested by you insofar as it was possible. Known deviations from specifications or coverage's you requested, if any, have been noted.

- Not all forms of available insurance have been recommended, for our endeavor has been to avoid a disproportionately high premium expenditure. In our oral discussions, we will examine this point in greater detail -- explaining the factors which motivated us to omit certain coverage's that are available.

- Your attention should be directed to one further point: We ask that you not accept our brief description of the insurance coverage's as a complete explanation of the policy terms. A narrative description can never replace the policy, of course, and the actual policy language will govern the scope and limit of coverage involved.

..... THANK YOU

Much of your annual budget is allocated to insurance and we wish to thank you for granting us the opportunity to analyze your insurance needs. Those involved in the selection of the companies utilized and the coverage's suggested were:

Account Executive:	**John S. Racine, CPCU** **jsracine@lakeagency.com**
Account Manager:	**Sue Hawk** **shawk@lakeagency.com**

This TEAM is here to serve you, so please feel free to call should you have any questions regarding this proposal or other insurance matters.

RE: Budget to Actual Revenue and Expenditure Report

Please find attached the Budget to Actual Revenue and Expenditure Report and Cash and Investment Summary for the period ending August 31, 2015 for your review and submission to the RTAB per Emergency Manager Order 20.

As noted with the transmission of the reports for the August 12, 2015 and September 9, 2015 meetings of the RTAB, please be aware that the City is still in the process of closing the fiscal year ended June 30, 2015. The activity shown for the prior fiscal year is unaudited and subject to change as a result of that process. The City's annual audit is scheduled to be conducted by an external CPA firm during the month of October 2015. As required by Public Act 2: Uniform Budget and Accounting Act and City Ordinance #3855, audited financial statements for the fiscal year ending June 30, 2015 will be available no later than December 31, 2015.

Please let me know if any additional information is necessary or if you have any questions.

Follow Up Flag: Follow up
Flag Status: Flagged

Rob,

I received the following from the City's Treasurer. His calculation based on a reduced collections by 22.84% estimate that cash will end $13.7M lower than my estimate in the prior transmission of $12M. As stated on the phone, the results of our collection efforts will be known in approximately 30 days as we begin shut-off notices and enforcement.

Please let me know if you have any questions.

Per Doug Bingaman:

Over the past 3 years, we have an average collection rate for water/sewer revenue of 94%. Last year, we collected 99% or our revenue. Which I contribute to our water thief program and aggressively interrupting service for non-pay.

Since 8/1/15, our collections are off 22.84%. If this continues through out FY16, our water/sewer cash will be reduced by $13,731,790, if all else stays the same.

$35,500,000 Water Revenue
30,084,895 Sewer Revenue

$65,584,895
x 91.67% 11 months
$60,121,673
x 22.84%
$13,731,790

Subject: PRESS RELEASE: RTAB Approves Resolution for the Use of $2 Million in Fund Balance to Reconnect to Detroit Water

For Immediate Release

RTAB Approves Resolution for the Use of $2 Million in Fund Balance to Reconnect to Detroit Water

Flint, Michigan – October 14, 2015 – The City of Flint's Receivership Transition Advisory Board has today approved a resolution that directs $2 Million in fund balance from the Water and Sewer funds be used to fund Flint's portion of the reconnection to Detroit as the City's water source. The Board voted unanimously to approve the measure which will compliment commitments by Governor Snyder in the amount of $6 million and the Charles Stewart Mott Foundation in the amount of $4 million, respectively, for a total reconnection cost of $12 million.

"Flint is one step closer to switching back to Detroit water with the board's approval," said Mayor Dayne Walling. "Now we need approval from the state treasurer and support from the state legislature and I urge them to act immediately." Approval from the legislature is required to finalize the negotiations with the Great Lakes Water Authority, formerly Detroit Water and Sewerage (DWSD). Once the contract between the Authority, Genesse County and the City are complete, Flint can once again begin receiving treated Lake Huron water from Detroit.

Flint – Oct. 14 – N. Henderson, Mayor Walling, J Freeman, F Headen, Wendy, R. Byrne, E. Cline, P. Dostine

- **Priorities**
  - Henderson bringing two amendments to Oct 14 RTAB: $2M budget adjustment (money from the Water Fund fund balance) and Agreements needing execution between Flint and DWSD, and Flint and Genesee County.
  - The city anticipates connecting to DWSD in the next few days.
- **Lawsuit**
  - Miller Canfield still representing Flint in both the Kincaid and Shears lawsuits. Henderson repeated again that Flint will need assistance in maintaining Miller Canfield as counsel.
- **Public Safety**
  - Fires are down in Flint. Because of that, Flint no longer qualifies for some grant dollars.
  - Tier1 crimes (homicide, rape, armed robbery) are down in Flint.
  - Chief of Police (and Flint) is participating in Violence Reduction Network (VRN), a Dept. of Justice initiative that provides technical assistance and other in-kind crime prevention assistance to cities with higher than average violent crime.

STATUS OF FLINT WATER: October 14, 2015

- Flint Receivership Transition Advisory Board meeting today to consider budget amendments to pay for temporary reconnection to the Detroit water system

- Treasury staff from Bureau of Local Government will be meeting with City officials to review overall budget and cash conditions
    - Fund Balance in the General Fund is currently projected at $4M by June 30, 2016. This is a projected increase of $1M from FY 2014-2015
    - Fund Balance in the Water Fund is currently projected at $6M, which is a decline of $8M due to non-payment of water bills

- Negotiations between the City of Flint, Genesee County and DWSD remain in progress to finalize the necessary agreements for the City to temporarily reconnect to the Detroit water system
    - Preparation of the pipeline to receive water from DWSD is underway. The City believes that a physical connection can be established this week
    - The City has requested clarification if it should begin receiving water from DWSD before the State Legislature takes action on the request $6M aid package

- Both the Kincaid and Shears lawsuits remain in litigation. Potential losses of $30M are possible. The City's request to Treasury for financial assistance for outside legal consul is still pending

Weekly Critical Issues —October 14, 2015

- **Allen Park**— I have been advised that two new RTAB members are being appointed. They are Mark Wollenweber and Scott Lites. I have asked Eric to schedule an orientation for the new members before the next RTAB meeting on November 4th. The brownfield issue.....
- **Benton Harbor**-The lawsuit with the former Public Safety Director and two former employees is a major issue for the City. Darwin has indicated that it will cost the City $1.7M to settle these three cases. They are only partially insured. I have advised Darwin to seek the City Commission's approval for the Finance Director's Search. The cost is $10,000 for the MML Proposal. The City
- **Ecorse** – The City is proposing a part-time fire department. Their five year financial plan has been revised, according to the City Administrator it is balanced. We are checking to see if the City Council has approved.
- **Flint** – Lawsuit on water rates and the lead issues have Flint in a crisis mode. The City believes that they have reached an understanding with the Genesee County Drain Commission to reconnect to DWSD Natasha has sent me a revised cost ($250K to $350K) from Miller Canfield to represent the City in the Shears and Kincaid cases. Treasury is determining the level of support, if any, to provide the City in this matter. I informed Natasha this morning that the legal representation is still being "discussed". Flint RTAB meeting next week.
- **Hamtramck**-We have several names for the RTAB position to replace Cathy. Segal has developed a work plan for phase 3 of the pension study that is being discussed. The City has hired Alan Young for audit services but that decision was rejected by the RTAB. Katrina wants to reorganize staff. Overtime last month was $60K, we are asking her to get quotes for a police study. Treasury will pay $25,000 for the study.
- **Highland Park**-The City hired a collection firm to collect the past due water and sewer bills. Hiring a collection firm is a requirement of the loan agreement. Cathy has indicated that the OPEB savings of approximately $750K will be implemented by October 1. I will be receiving an OPEB report from Meadowbrook soon. The City has purchased $300,000 of new water meters as part to the FDCVT grant award and are installing them. The City Council conditionally approved the DWSD agreement but no word from DWSD or Great Lakes Water Authority. Regular billing of water and sewer customers has begun. The plans for the demolition of the High School Building are being reviewed. I expect the project will take place in the spring.
- **Lincoln Park**-Brad is placing a PA 345 request on the November Ballot seeking approval of 6 mills to fund the City's pension system. More City Council members are supporting the millage request. Brad has prepared a four month plan which is being updated. His exit will be in the first week of January. The new city manager, Matt Coppler is fitting in the organization. We will be discussing the final order with Brad next week. We are hoping to find several RTAB candidates soon.
- **Inkster**- the City won its appeal on the water billing lawsuit. Mark said the city will be discussing its options. The City is negotiating with Wayne County on its $4.9M sewer debt. A judgement levy for several years will be likely be placed on the July 2016 tax roll. Patrick and I will be

meeting Mark next week. Mark has indicated that the City is updating its Park and Rec Master Plan. I have encouraged Mark to meet with the ministers.

- **Pontiac**-Jane Di Sessa will start on October 26. A contract has been drafted but not signed as of yet. The Mayor and I will be meeting with two council members to discuss the hiring of an executive secretary and other issues. The Pontiac RTAB exit plan is nearing completion. The Mayor would like to do a study of the Phoenix Center. Problem with the GERS Board.
- **River Rouge**—the five year financial plan is not balanced yet. Do we want to exit without a balanced five year financial plan? The Mayor has drafted a revised plan that is even more favorable to Ecorse. The City was chosen by the Governor to be a part of the Rising Tide Initiative.
- **Royal Oak Township**- We may receive a proposal from Oak Park for police service. Additional discussions with Ferndale and Hazel Park are needed. The Township needs to submit another grant application for police funding. We have received Robert's six month plan. Patrick will be assisting Robert on several items. Montgomery and Co. the accounting firm has submitted an invoice for $17,000. Robert has begun discussion on the new budget. He wants to hire Mr. Fedewa for accounting.
- **Miscellaneous Items**—the draft of the October Governor's Memo is finished. Staffing update and lunch on Monday with staff. RTAB candidates are being vetted by the Governor's Office. The draft exit plan for several communities is nearing completion. I sent a consent agreement template for your review. FOIA request from ACLU. I sent you a document on the date(s) the newly elected officials will take office in the distressed local units. Giarmarco contract update. Upcoming Town Hall Meeting

Subject: Flint telephone call this morning

Tom and Wayne:

During our telephone call today, Mayor Walling indicated that they have received the go ahead from the Drain Commissioner and are performing the bacti tests on the eight mile waterline. If all goes well, they may be able to begin to use DWSD water soon. The Mayor wanted to know if they can use DWSD water before the Legislature takes action on the $6M assistance package? Please advise.

Thanks,

Randy

If I can ask what is your cost to have them on contract for flint? Can you change it? I'm not sure where Parks are from.

I have three refrigeration guys in the east zone. But at the very least we could pm it and change the filters for you.

Just my thoughts

Mayor, The state appropriation is being made to the DEQ. I have copied Director Wyant and his Chief Deputy Jim Sygo on this. We recommend a conference call with DEQ, Mott and the City to agree on payment procedures. It will be necessary to have a list of expenditure amounts for water and any other equipment, services and supplies that will total up to the $12,000,000 budget. Treasury will participate and help any way, but it is important DEQ , Mott and the City agree on the process. We can participate in a call today or Friday. Wayne

Subject: Contract for Water

Gentlemen, I have asked City Administrator Natasha Henderson to reach out to you at Treasury Wayne about the contract for Detoit water. The Mott Foundation has questions about payments and ensuring all parties are contributing to the monthly costs as well as how an escrow fund would work to ensure funds are solely for this purpose. Time is of the essence as you know and the City is prepared to do all things necessary for the water to begin flowing as quickly as possible as we have agreed. Thanks for your tremendous efforts on this and we look forward to finalizing the agreements hopefully today or tomorrow.

Subject: contract between Flint and Genesee County

Drain Commissioner Jeff Wright wanted you to have a copy of the contract signed today.

LICENSE TO TRANSMIT WATER

This License to Transmit Water ("License") entered into on October 14, 2015, (the "License Date" and "Effective Date") is made between the City of Flint, a Home Rule City (the "City"), and the Genesee County Drain Commissioner, as County Agency, a county agency pursuant to the County Public Improvement Act 342 of 1939, as amended, ("GCDC"). The City and GCDC may be referred to individually as a "Party" or collectively as the "Parties."

RECITALS

WHEREAS, the City has requested the Detroit Water and Sewerage Department ("DWSD") to provide the City with potable water; and

WHEREAS, DWSD water distribution system has no physical connection to the City water distribution system; and

WHEREAS, GCDC is currently purchasing potable water from DWSD and GCDC is receiving DWSD water at the water meter GN-01 near Baxter and Potter Roads, located in Genesee County and more fully set forth in Exhibit 1 (hereinafter known as "GCDC/DWSD Connection"); and

WHEREAS, GCDC has a physical connection to the City water distribution system near Center Road and Pierson Road in Genesee Township, Genesee County, Michigan, which is more fully set forth in Exhibit 2 (hereinafter known as "GCDC/City Connection"); and

WHEREAS, GCDC owns nine (9) miles of water transmission pipeline ("Pipeline") that connects the GCDC/DWSD Connection to the GCDC/City Connection; and

WHEREAS, GCDC has the ability to allow Flint to transmit water through the Pipeline from the GCDC/DWSD Connection to the GCDC/City Connection so DWSD may service the City with DWSD treated potable water; and

WHEREAS, this License shall govern the terms and conditions of Flint transmitting water through the Pipeline from the DWSD/GCDC Connection to the GCDC/City Connection; and

WHEREAS, the Parties hereto acknowledge and agree that DWSD may assign its contract to provide potable water to the City to another entity, including, but not limited to, the Great Lakes Water Authority, and, if DWSD assigns its contract to provide water to the City, all reference to DWSD in this License shall be replaced by the party to whom DWSD assigns its contract

NOW, THEREFORE, THIS LICENSE is hereby made and mutually entered into by the City and GCDC for the mutual consideration stated herein and the Parties agree to the following:

1. **Adoption of Recitals.** All of the matters stated in the Recitals of this License are true and correct and are hereby incorporated into the body of this License as though fully set forth in their entirety herein. However, in cases of conflict, provisions of this License shall prevail over the matters stated in the Recitals.

2. **Contract for Water.** As a condition precedent to this License being effective, the City shall enter into a contract with DWSD for DWSD to supply the City with water and said contract shall require the City to pay DWSD directly for all water consumed by the City and any applicable charges, fees, or other amounts charged by DWSD. The City shall hold GCDC harmless from any and all debts the City incurs from receiving water from DWSD and any and all costs that DWSD may impose on GCDC as a result of the City receiving water from DWSD.

3. **Term.** The Parties hereto understand and acknowledge that GCDC needs the Pipeline to transmit its potable water to its customers once GCDC starts receiving raw water from KWA. The Parties agree and acknowledge that this License shall expire sixty (60) days after the City has received notice from KWA that raw water is available for the City for treatment; however, the City may request GCDC to extend this License until GCDC starts receiving raw water from KWA. The City shall not transmit water through the Pipeline after GCDC begins to transmit its potable water to its customers. The City acknowledges and consents to GCDC terminating any water transmission in the Pipeline for the benefit of the City once GCDC begins to produce and sell its potable water to its customers. The City may terminate this License by providing GCDC with thirty (30) days written notice of termination.

4. **Consideration.** In exchange for GCDC allowing the City to transmit water through the Pipeline, the City shall pay GCDC one dollar ($1.00) per month for the term of this License. The City is allowed to pay the first nine (9) months in a lump sum payment.

5. **Meters and Billing.** The City hereby grants GCDC complete access to and upon verbal request by GCDC complete control of Station 2, including, but not limited to, all meters, valves, structures, and appurtenances until the Karegnondi Water Authority ("KWA") has notified the City that water is available to the City for treatment or GCDC has provided the City with thirty (30) days notice that GCDC no longer requires access to Station 2. GCDC shall have the meter calibrated within fifteen (15) days of the execution of this License and all costs for the calibration shall be the responsibility of the City. The City shall be entitled to all data, meter reads, and other information that is collected by GCDC at Station 2. The City shall be responsible for all utility costs associated with the operation of Station 2. The City shall be responsible for all repairs to the meter and meter pit. GCDC shall notify DWSD of the monthly meter read for Station 2.

6. **Transmission of Water.** GCDC shall use reasonable diligence to allow the City regular and uninterrupted transmission of water through the Pipeline from the GCDC/DWSD Connection to the GCDC/City Connection; however, Flint shall hold harmless and indemnify GCDC for any damages, breach of contract, or otherwise for interruption of service or curtailment of supply for any cause beyond the control of GCDC. These could include, but are not limited to, Acts of God, strikes, lockouts or other industrial disturbances, acts of public enemy, orders of any kind of the Government of the United States or the State, or any civil or military authority, insurrection, riots, epidemics, landslides, lightning, earthquake, fires, hurricanes, storms, floods, washouts, droughts, arrests, restraint of government and people, civil disturbances, explosions, breakage or accidents to machinery, pipelines or canals, partial or failure of the Pipeline or appurtenances. The City shall further hold GCDC harmless from any claim for damages related to continuity of service by third parties, including DWSD, for GCDC's inability to allow the transmission of water due to any cause beyond the control of GCDC.

7. **Water Quality.** The City shall hold GCDC harmless from any water quality related claim for damages by third parties, including DWSD, served by the City, which are asserted against, or are imposed upon or incurred by GCDC and which result from, relate to, or arise out of a claim regarding the treatment of water or the quality of water.

8. **Volume Available.** The City shall hold GCDC harmless in the event that DWSD cannot meet the volume demands of both GCDC and the City. GCDC shall be entitled to receive the quantity of water requested by GCDC and the City shall be entitled to any remaining volume of water. The City shall notify GCDC daily of its anticipated water volume for that day and GCDC shall be responsible for notifying DWSD of the water volume demands for both GCDC and the City.

9. **Pipeline Malfunction.** If the Pipeline shall malfunction for any reason while the City is transmitting water through the Pipeline, GCDC shall notify the City within two (2) hours of verifying the Pipeline malfunction. Thereafter, the malfunction shall be promptly repaired by GCDC and a detailed invoice for one-half (1/2) of the total cost of the repair shall be submitted to the City. The City shall have thirty (30) calendar days to process and authorize the payment for the repair to GCDC. Payment shall be made to GCDC within thirty–two (32) calendar days by either check or wire transfer. Wire transfer instructions are available from the GCDC Chief Financial Officer. The City shall indemnify and hold GCDC harmless for any and all claims from the City or third parties that relate to the City not being able to supply water to its customers due to the malfunction.

10. **Severability.** The Parties hereto specifically agree that in case any one or more of the sections, subsections, provisions, clauses or words of this License or the application of such sections, subsections, provisions, clauses or words to any situation or circumstance should be, or should be held to be, for any reason, invalid or unconstitutional, under the laws or constitutions of the State or the United States of America, or in contravention of any such laws or constitutions, such invalidity, unconstitutionality or contravention shall not affect any other sections, subsections, provisions, clauses or words of this License or the application of such sections, subsections, provisions, clauses or words to any other situation or circumstance, and it is intended that this License shall be severable and shall be construed and applied as if any such invalid or unconstitutional section, subsection, provision, clause or word had not been included herein, and the rights and obligations of the Parties hereto shall be construed and remain in force accordingly.

11. **Governing Law and Venue.** It is specifically agreed among the Parties to this License that Genesee County, State of Michigan is the place of performance of this License. In the event that any legal proceeding is brought to enforce this License or any provision hereof, the same shall be brought in the Genesee County Circuit Court.

12. **Interpretation and Construction.** For purposes of interpretation and construction of this License, both the City and GCDC shall be deemed to have been the drafter of this License and this License shall not be construed against any Party to this License.

13. **Modification.** This License shall not be modified, altered, or amended except through a written amendment signed by the Parties.

14 **No Third Party Beneficiaries.** This License is not intended to confer upon any person or entity, other than the Parties hereto, any rights or remedies of any kind or nature whatsoever.

15. **Notices.** Other than invoices and payments, any notice, communication, request, reply or advice (herein severally and collectively, for convenience, called "Notice") herein provided or permitted to be given, made or accepted by any Party to any other Party must be in writing and may be given or be served by depositing the same in the United States mail postpaid and registered or certified and addressed to the Party to be notified, with return receipt requested, or by delivering the same to an officer of such Party, or by prepaid telegram when appropriate, addressed to the Party to be notified. Notice deposited in the mail in the manner described above shall be conclusively deemed to be effective, unless otherwise stated herein, from and after the expiration of three (3) days after it is so deposited. Notice given in any other manner shall be effective only if and when received by the Party to be notified. For the purposes of notice, the addresses of the Parties shall, until changed as hereinafter provided, be as follows:

To GCDC: **Genesee County Drain Commissioner's Office, Division of Water and Waste Services, G-4610 Beecher Road, Flint, Michigan 48532.**

To the City: **City of Flint, 1101 South Saginaw Street, Flint, Michigan 48502.**

The Parties hereto shall have the right from time to time and at any time to change their respective addresses and each shall have the right to specify as its address any other address by at least fifteen (15) days written notice to the other Party hereto.

IN WITNESS WHEREOF, the Parties hereto acting under authority of their respective governing bodies have caused this License to be duly executed in several counterparts, each of which shall constitute an original, all as of the day and year first above written, which is the License and Effective Date.

RESOLUTION NO.:_____

PRESENTED: 10-12-15

ADOPTED:_____

RESOLUTION AUTHORIZING THE CITY ADMINISTRATOR TO TAKE NECESSARY ACTION TO CONVERT TO THE DETROIT WATER SYSTEM

BY THE CITY ADMINISTRATOR:

In order to promote the health, safety and welfare of this community, it is in the best interests of the City of Flint for the Detroit Water and Sewer Department (DWSD) to supply the City with treated water pending completion of the Karegnondi Water Authority; and

In order for DWSD to supply the City with water, it will be necessary to utilize pipe owned by the Genesee County Drain Commission (GCDC); and

The City, DWSD and GCDC are actively negotiating the terms of the necessary agreements to ensure this transition occurs as soon as possible; and

IT IS RESOLVED that the City Administrator is hereby authorized to enter into agreements with DWSD and GCDC for conversion to the Detroit Water System.

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

Jody N. Lundquist, Chief Financial Officer

FOR THE CITY OF FLINT:

Natasha L. Henderson, City Administrator

APPROVED BY CITY COUNCIL:

PRESENTED TO CITY COUNCIL: 10/12/2015

ADOPTED BY CITY COUNCIL: 10/12/2015

Subject: Flint - water

Jim – as you know Treasury (thru its EM) is engaged in Flint. Obviously the recent stories re their water quality have raised some concerns. Wayne who is the overall lead for us on this had a conversation with the City today including some of their public works staff. Is there someone we could talk to @ DEQ to get your perspective & corroborate what we are hearing from Flint ? Thanks

++++**Weekly Critical Issues —October 16, 2015**

- **Allen Park**— I have been advised that two new RTAB members are being appointed. They are Mark Wollenweber and Scott Lites. I have asked Eric to schedule an orientation for the new members before the next RTAB meeting on November 4th. The brownfield issue concerning the Southfield Lease Properties is under discussion.
- **Benton Harbor**-The lawsuit with the former Public Safety Director and two former employees is a major issue for the City. Darwin has indicated that it will cost the City $1.7M to settle these three cases. They are only partially insured. I have advised Darwin to seek the City Commission's approval for the Finance Director's Search. The cost is $10,000 for the MML Proposal. The City is discussing the purchase of public works vehicles ($160 -$200 K)for winter snow removal
- **Ecorse** – The City is proposing a part-time fire department. Their five year financial plan has been sent to us for review. They want the RTAB to approve on November10th. The City Council has approved. One additional RTAB member is needed (Joan Brophy).
- **Flint** – Lawsuit on water rates and the lead issues have Flint in a crisis mode. The City may be able to reconnect to DWSD by today. Natasha has sent me a revised cost ($250K to $350K) from Miller Canfield to represent the City in the Shears and Kincaid cases. Treasury is determining the level of support, if any, to provide the City in this matter. I informed Natasha yesterday that the legal representation is still being "discussed". Brian has asked me to prepare a FY15 Performance Report of the $1.1M public safety grant. Telephone call between the City, Mott Foundation, and DEQ is being scheduled.
- **Hamtramck**-the RTAB position to replace Cathy. Phase 3 of the pension study will begin soon. The City has hired Alan Young for audit services but that decision was rejected by the RTAB. Greg Terrell is their next choice. The City Council is fighting about filling the vacancy on Council. The Circuit Court is now involved. Katrina released a Confidentiality Agreement with the former Police Chief due to a FOIA request. Two RTAB members are needed.
- **Highland Park**-The collection firm that has begun to collect past due ($7M) water and sewer bills. Cathy has indicated that the City has over 500 aged payables including a DTE bill of $200K for the water pumping station. I will be receiving an OPEB report from Meadowbrook soon. The City has purchased new water meters and will be installing them. Wade Trim has opened their water/sewer customer service office on Woodward Avenue.
- **Lincoln Park**-His exit will be in the first week of January. I have a revised EM exit schedule for you. We will be discussing the final order with Brad next week. We are hoping to find several RTAB candidates soon. E-Loan may be necessary? Five RTAB members are needed.
- **Inkster**- the City won its appeal on the water billing lawsuit. Mark said the city will be discussing its options. The City is negotiating with Wayne County on its $4.9M sewer debt. A judgement levy for several years will be likely be placed on the July 2016 tax roll. Patrick and I will be meeting Mark on Tuesday.
- **Pontiac**-Jane Di Sessa will start on October 26. A contract has been signed and has been mailed. The Mayor and I will be meeting with two council members to discuss the hiring of an executive secretary and other issues. The Pontiac RTAB exit plan is nearing completion. The Mayor would

like to do a study of the Phoenix Center. Problem with the GERS Board financial advisor. Six million may be in jeopardy. One RTAB member is needed.

- **River Rouge**—the five year financial plan is not balanced yet. Do we want to exit without a balanced five year financial plan? The Mayor has drafted a revised plan that is even more favorable to Ecorse. The City was chosen by the Governor to be a part of the Rising Tide Initiative.
- **Royal Oak Township**- We may receive a proposal from Oak Park for police service. Additional discussions with Ferndale and Hazel Park are needed. The Township needs to submit another grant application for police funding. Patrick and I will be meeting with Robert on Tuesday. Montgomery and Co. the accounting firm has submitted an invoice for $17,000. Robert has begun discussion on the new budget. He has hired Mr. Fedewa for accounting. According to Robert, he is doing a good job and is well liked by the Clerk and Treasurer.
- **Miscellaneous Items**—the draft of the November Governor's Memo will be finished and sent to Angela by Thursday. If any updates are necessary, please give to Eric. The RTAB candidates list has been revised. The draft exit plan for several communities is nearing completion. I sent a consent agreement template for your review. FOIA request from ACLU. Ed is attempting to get Giarmarco on a SAAG contract. Wayne County and the Downriver Sewage Disposal System update. The FDCVT grant submission deadline was yesterday. New staff members should have cell phones and laptops.

Apologies for that. See the attached.

This morning, you asked if there was anything we wanted to add, etc. I would only add...as I mentioned in my Thursday e-mail...that Flint's is not a situation where the Mayor and Council wanted to utilize one system with the EM completely reversing course. Everyone involved in the decision-making process agreed KWA was the best long-term option for the City of Flint.

Subject: RE: EM law

Paul—

I understand you recently chatted with Sara W on this issue and she asked me to reach out as well.

I can work toward setting up a phone conversation between you, Wayne Workman (Deputy Treasurer for Local Government), and me tomorrow morning, around 10 or 10:30...if that works for you.

I'm not sure how much background info you have on the issue, so wanted to get you the following, most of which I have previously shared with Nancy Kaffer or John Wisely. I apologize in advance, for the length of the information, but believe it all pertinent to your inquiry.

To you first question...the unfortunate situation in Flint is in no way an indictment (your term) of Public Act 436, The Local Financial Stability and Choice Act. It's my understanding that discussions about the possible development of a Flint-area/Genesee County water system had been on-going since the early 2000's and that the City of Flint had been in discussions about the possibility of joining KWA for much of that time, certainly prior to the appointment of an emergency manager in December 2011. The following M-Live articles show the city was looking at a possible move to KWA, which Genesee County strongly supported, well before a manager was appointed.

http://www.mlive.com/news/flint/index.ssf/2010/02/detroit_tells_genesee_county_w.html
http://www.mlive.com/news/flint/index.ssf/2011/01/water_pipeline_vs_flint_river.html

http://www.mlive.com/news/flint/index.ssf/2011/04/city_of_flint_still_mulling_wa.html
http://www.mlive.com/news/flint/index.ssf/2011/09/flint_officials_to_be_presente.html
http://www.mlive.com/news/flint/index.ssf/2011/12/so_far_so_good_genesee_county_1.html

Additionally, The Flint Journal supported the move to KWA in an editorial in Sept. 2011, again, prior to the appointment of a manager.
http://www.mlive.com/opinion/flint/index.ssf/2011/09/our_voice_its_decision_time_fo.html

Prior to the decision to move to KWA, which the Mayor and City Council fully supported (March 2013 Flint Journal story cites 7-1 City Council vote to join KWA); http://blog.mlive.com/newsnow_impact/print.html?entry=/2013/03/flint_city_council_approves_re.html the city's emergency manager (Mike Brown in June 2012; Ed Kurtz in Sept. 2012) twice requested permission from DWSD to blend river water with DWSD water to ensure high quality, safe drinking water for residents, while saving the city an estimated $2-3 million annually (DWSD was proposing a 5x rate increase for the City of Flint).

It is also important to note that the Genesee County Drain Commissioner, who had been heading up the KWA project, **required** that Flint's elected leaders approve of and sign-off on the transition to KWA as he believed it was important to have the city's elected officials make the decision and not an emergency manager (see attached).

Under PA 436, an emergency manager's approval is required for transactions of $50,000 or more, and thus Ed Kurtz did approve the eventual move to KWA, again with full support and urging from the Mayor and City Council. Kurtz's letter, detailing that decision after consideration of DWSD's "last, best offer" is attached.

I also believe it's important to note that this **is not** a situation where the Mayor and Council wanted to utilize one system with the EM reversing course. All involved in the decision-making process agreed KWA was the best long-term option for the City of Flint.

With Flint's decision to go with KWA, DWSD chose to terminate Flint's contract, effective April 17, 2014 (letter attached). Given that termination, Flint had two "options:"

-sign a long-term (30 year) agreement with DWSD, which was not economically feasible given the city's decision to go with KWA
-Use Flint River as an interim source (it had long been the city's backup) until KWA was on-line

http://www.mlive.com/news/flint/index.ssf/2014/03/flint_drinking_water_to_come_f.html

It is also important to note that the current situation in Flint has been exacerbated by years of neglect and a lack of maintenance to the decades-old system.

All that said, the most important issue now is moving things forward, through the collaborative State, City, and Foundation effort to ensure safe drinking water for the residents of Flint.

As for the "broader picture" of PA 436...as recently as August of 2013, six emergency managers were in place in municipalities experiencing a financial emergency. Today, only one remains; Brad Coulter in the City of Lincoln Park.

While Receivership Transition Advisory Boards (RTABS) are in place in Pontiac, Benton Harbor, Allen Park, Hamtramck, and Flint and the Financial Review Commission is in place in the City of Detroit, local control has been restored in each of those municipalities.

Going forward, elected leaders in those communities will likely face difficult decisions on how best to maintain the financial footing they have today, and to balance revenues with expenditures, but clearly the toolbox available under PA

436 has allowed several managers to remedy local government financial emergencies and restore local control as quickly and efficiently as possible...as was the goal when PA 436 was signed into law.

Subject: EM law

Hi Terry/Sara: I am working on a story for the weekend that examines the question of whether the contaminated Flint water situation is an indictment of Michigan's emergency manager law.
Is there someone in state government you can arrange for me to interview who can address that question and also discuss what they see as the successes/shortfalls of the EM law in terms of the broader picture?
Thanks, Paul

WATER SERVICE CONTRACT
BETWEEN
CITY OF DETROIT
AND
CITY OF FLINT

This Water Service Contract ("Contract") is made between the City of Detroit, a municipal corporation, by its Water and Sewerage Department and Board of Water Commissioners (the "Board"), and the City of Flint, a municipal corporation ("Customer"). The Board and Customer may be referred to individually as "Party" or collectively as the "Parties."

Whereas, the City of Detroit owns a public water supply system ("System") operated by the Board; and

Whereas, the Board supplies water service to numerous governmental entities in the Board's water service area; and

Whereas, Customer is experiencing a public health emergency and desires to obtain water service from the Board in order to abate this emergency; and

Whereas, the purpose of this Contract is to provide potable water to Customer on an emergency basis; and

Whereas, because Customer shall receive water through a Board-owned master meter that also meters water usage by the Genesee County Drain Commissioner ("GCDC"), Customer has entered into a metering agreement with GCDC whereby GCDC agrees to report to the Board the volume of water attributable to Customer; and

ACCORDINGLY, THE PARTIES AGREE AS FOLLOWS:

Article 1.
Definitions

1.01 The following words and expressions, or pronouns used in their stead, shall be construed as follows:

"Adjusted Prevailing Water Rate" shall have the meaning ascribed in Article 3 herein.

"Allocation Flow Rate" shall mean the value that is established as a result of a breach of Section 5.03 herein and which value shall replace the contractual Maximum Flow Rate in the rate calculation process in the event that Section 5.04(C) herein is applied by the Board.

"Annual Volume" shall mean the actual volume of water used by Customer for the period of July 1st to June 30th as measured on bills issued from August 1st through July 31st.

"Board" shall mean the City of Detroit Board of Water Commissioners.

"City" shall mean the City of Detroit, a municipal corporation, acting through its Board of Water Commissioners.

"Contract" shall mean each of the various provisions and parts of this document, including all attached Exhibits and any amendments thereto, as may be executed and approved by Customer's governing body and the Board of Water Commissioners.

"Contract Term" shall have the meaning ascribed in Article 2 herein.

"Customer" shall mean the Party that enters into a contract with the City of Detroit by way of this Contract, whether an authority, city, township, village or other municipal corporation recognized by the State of Michigan.

"Customer Maximum Day Demand" shall mean the Customer's recorded water usage on the DWSD Maximum Day. Customer Maximum Day Demand shall, in conjunction with Customer Peak Hour Demand, be a component of its Maximum Flow Rate.

"Customer Peak Hour Demand" shall mean the Customer's recorded water usage during the DWSD Peak Hour. Customer Peak Hour Demand, in conjunction with Customer Maximum Day Demand, shall be a component of its Maximum Flow Rate.

"DWSD" shall mean the City of Detroit Water and Sewerage Department.

"DWSD Maximum Day" shall mean the maximum reported water production day for the System during any twenty-four hour period as measured from 12:00 a.m. Eastern Standard Time in any given calendar year, as determined by DWSD in reviewing water production and storage reports.

"DWSD Peak Hour" shall mean the hour during the DWSD Maximum Day in which the most water is delivered to the System, measured from top-of-the-hour to top-of-the-hour (e.g. 7:00 a.m. to 8:00 a.m.), and as determined by DWSD in reviewing water production and pumping reports. In calculating the DWSD Peak Hour, the time period from 11:00 PM to 5:00 AM Eastern Standard Time (EST) shall not be considered provided, however, that if Customer has an approved Filling Schedule, the time period specified in the Filling Schedule shall supersede the time period of 11:00 PM to 5:00 AM EST.

"Early Termination Costs" shall have the meaning ascribed in Article 3 herein.

"Filling Schedule" shall have the meaning ascribed in Article 22 herein.

"Maximum Flow Rate" shall mean the aggregate amount of water usage that Customer commits not to exceed, as determined by the Customer Maximum Day Demand and the Customer Peak Hour Demand, collectively.

"Meter Facilities" shall mean a location in which a water meter is housed including, without limitation, meter pits and meter vaults.

"Minimum Annual Volume" shall mean fifty percent of Customer's Projected Annual Volume.

"Notices" shall mean all notices, consents, approvals, requests and other communications required to be given under the terms of this Contract.

"Pressure Problem" shall have the meaning ascribed in Article 5 herein.

"Pressure Range" shall have the meaning ascribed in Article 5 herein.

"Projected Annual Volume" shall mean the projected annual water sales to Customer as set forth in Exhibit B.

"Service Area" shall mean the mutually agreed upon area where Customer is permitted to distribute water received from the Board under the terms of this Contract which (a) may be entirely within the corporate limits of Customer or may exceed the corporate limits of Customer and (b) which may or may not include the entire geographical area within the Customer's corporate limits.

"System" shall mean the public water works system owned and operated by the City of Detroit, acting through its Board of Water Commissioners and its Water and Sewerage Department.

"Technical Advisory Committee" shall mean the committee consisting of representatives of the Detroit Water and Sewerage Department, wholesale water customers of the Detroit Water and Sewerage Department and their respective representatives, and shall include its successor or replacement if altered or discontinued. The Technical Advisory Committee or its successor shall remain in existence for a minimum term of January 1, 2008 until December 31, 2038 unless the committee determines otherwise.

"Water Distribution Points" shall have the meaning ascribed in Article 4 herein.

Article 2.
Contract Term

2.01 Term. The Board shall sell and supply water to Customer from the System in accordance with the terms of this Contract for a period of nine months from the effective date of this Contract (the "Contract Term"), subject to Article 3 herein. The effective date of this Contract shall be the date that this Contract is approved by the Customer's governing body or the Board whichever is later.

2.02 Extension of Term. Should the concern for public health continue beyond the initial Contract Term and a reasonable alternative to the temporary service provided by the Board does not readily exist, the Contract Term may be extended for any mutually agreeable period through a letter which sets forth the emergent circumstances signed by the Parties.

2.03 Reserved.

Article 3.
Early Termination Costs

3.01 Early Termination Costs. In addition to any other remedies provided for by law or by the terms of this Contract, Customer shall be liable to the Board for the payment of any costs incurred by the Board related to providing water to Customer in the event Customer terminates this Contract before the conclusion of a Contract Term ("Early Termination Costs"), unless Customer terminates this Contract for cause in accordance with Article 10; provided, however, that payment of such Early Termination Costs by Customer shall not entitle Customer to receive water service from the Board.

3.02 Calculation of Costs. Payment of Early Termination Costs will be calculated by applying the Adjusted Prevailing Water Rate to the Minimum Annual Volume requirements for the remainder of the Contract Term. The Adjusted Prevailing Water Rate shall be the rate charged by the Board to Customer as of Customer's effective termination date, adjusted annually to reflect projected inflationary increases utilizing a locally based wholesale price index. The Parties may agree upon another standardized price index. The Board may seek a recommendation from the Technical Advisory Committee on the amount of the Early Termination Costs.

3.03 Specifically Constructed Facilities. If the Board has constructed facilities specifically for the benefit of Customer, additional costs may be included in the calculation of the Early Termination Costs, provided that any such facilities shall be identified in a written agreement between the Board and Customer at or near the time of construction.

3.04 Formation of Water Authority. Customer may join with another authority, city, township, village or other municipal corporation recognized by the State of Michigan to form a water authority for the sole purpose of collectively contracting for water service from the Board. The exercise of this right shall not be construed as an early termination of this Contract and this Contract shall be voided upon the approval of a new water service contract by Customer's governing body and the Board.

3.05 Customer Annexation or Consolidation. In the event the territory of Customer is annexed or consolidated with another Michigan municipal corporation and if said municipal corporation is a current customer of the Board, then such an annexation or consolidation shall not be construed as an early termination of this Contract and this Contract shall be voided upon the approval of a new or amended water service contract with the annexing or consolidating municipal corporation.

Article 4.
Service Area

4.01 Delivery Location. Water shall be delivered by the Board to Customer at the location(s) identified in Exhibit A (collectively, the "Water Distribution Points"), and at other locations as may be mutually agreed upon in writing by the Board and Customer. The Board shall not require Customer to pay any fee to reconnect to the System. The Customer shall bear any and all actual costs, including without limitation capital and labor costs, associated with any work required to reconnect Customer to the System.

4.02 Limit of Responsibility. The Board shall have no responsibility for distributing, operating, repairing, replacing and maintaining any portions of the Customer's water supply system downstream of the Water Distribution Points shown in Exhibit A, provided, however, that this Section 4.02 does not prevent the application of the provisions of Section 11.02 herein.

4.03 Board Responsibility. The Board owns and is responsible for operating and maintaining all parts of its System upstream from Customer's Water Distribution Points. Should the Board fail to maintain its Meter Facilities and/or any Board owned and maintained equipment within the Meter Facilities, Customer shall provide written notice to the Board which describes the objectionable condition of the Meter Facility and/or the equipment within, and its intent to take reasonable steps to maintain the condition and charge the reasonable cost of doing so to the Board. Upon receipt of the notice and subject to Section 11.01, the Board shall have thirty calendar days to repair the condition specified in the notice, unless a force majeure event prevents the repair within the thirty-day period. If the Board has not repaired the condition at the conclusion of the thirty-day period and has not provided a written explanation to Customer explaining the reason for the delay (e.g. necessary parts are on order or occurrence of a force majeure event specified in Section 11.01), then Customer may take reasonable steps to maintain the specified condition and charge the reasonable cost of doing so to the Board.

4.04 Extension of Service Area. Customer's distribution of water supplied by the Board shall be limited to the Service Area stated in Exhibit A. The Parties agree that situations may arise in which Customer desires to extend its Service Area, either temporarily or permanently, beyond its corporate limits. Should such a situation arise, Customer shall provide written notice to the Board explaining the nature, duration and extent of the requested Service Area extension. The Board shall have the option, which it may exercise at any time, of requiring a written amendment to this Contract to accommodate the change in Service Area. Should the Board determine that an immediate amendment is required, the Parties shall, within thirty calendar days of Customer's request, meet to negotiate mutually agreeable terms for the extension of the Service Area. The Board shall not unreasonably deny a request to extend the Service Area.

4.05 Change or Addition of Water Distribution Points. Water Distribution Points may be added or changed only by the express written agreement of the Board and Customer and shall be embodied in a written amendment to this Contract.

4.06 Sole Supplier. Except as provided in Article 17 herein, the Board shall be the sole supplier of public potable water to Customer's Service Area.

Article 5.
Pressure; Maximum Flow Rate; Minimum Annual Volume

5.01 Pressure Range. The Board shall use its best efforts to deliver water at the Water Distribution Points at a pressure range ("Pressure Range") adequate to meet the reasonable requirements of Customer. For purposes of evaluating this effort, water pressure shall be determined by reviewing the average hourly pressure measured from top-of-the-hour to top-of-the-hour (e.g. 7:00 a.m. to 8:00 a.m.). The Pressure Range to be provided by the Board to Customer's Water Distribution Points is specified in Exhibit B. The location at

which the water pressure will be measured shall be specified in Exhibit A and identified as point "P". A Pressure Range will not be established for water meters that are not located on a DWSD transmission main, or which are located on a DWSD transmission main and are downstream of and subject to the flow demands of a water meter for another Board customer.

5.02 Remedy for Non-Compliance with Pressure Range. If the water pressure at Customer's Water Distribution Points is above or below the Pressure Range, at Customer's request the Parties shall meet within thirty calendar days to discuss the reasons for the non-compliance and, if agreed necessary, develop and implement a mutually agreeable written corrective action plan within sixty calendar days of the meeting, or as otherwise agreed. The corrective action plan shall include a timetable for resolution of the non-compliance issue(s).

A. If it is determined that another customer's exceedance of the rates of flow established by that customer's Maximum Flow Rate caused or contributed to the Board's inability to meet its Pressure Range agreement with Customer, then the corrective action plan shall provide for the resolution of the issue.

B. If Customer is exceeding the rates of flow established by its Maximum Flow Rate on a day other than the DWSD Maximum Day at the time Customer experiences a variation from the Pressure Range, then the Board shall be relieved from its obligation to provide water to Customer within the Pressure Range for that period of time during which Customer is exceeding the rates of flow established by its Maximum Flow Rate.

5.03 Maximum Flow Rate. Customer's Maximum Flow Rate is specified in Exhibit B. Customer shall not exceed the Maximum Flow Rate specified in Exhibit B, as measured in million gallons on the DWSD Maximum Day and during the DWSD Peak Hour.

A. The Board shall notify all customers in writing on or before October 1 of each calendar year if Customer or any other wholesale customer is alleged to have exceeded its Maximum Flow Rate in a given calendar year. The notice shall state the day and/or hour that Customer or any other wholesale water customer is alleged to have exceeded its Maximum Flow Rate.

B. If Customer is alleged to be in breach of its obligations under this Section 5.03, the Board and Customer shall endeavor to meet before November 1 of the current calendar year, or as soon as practicable, for the purposes of validating the breach, reviewing and analyzing the causes, and to negotiate a possible remedy pursuant to Sections 5.04 and 5.05 herein.

C. The Technical Advisory Committee's Analytical Work Group, or its successor shall review any alleged breach of this Section 5.03.

i. The Analytical Work Group shall meet once, at a minimum, on or before November 1 of each calendar year to review the alleged breaches, if any,

and may thereafter schedule subsequent meetings as necessary to conclude its review.

ii. The Board will seek a recommendation from the Analytical Work Group on (1) an Allocation Flow Rate, if any, and/or (2) concurrence with the remedy tentatively negotiated between Customer and the Board, if any. Customer and the Board shall have the right to present any information related to the alleged breach a Party deems necessary to the deliberations.

iii. Any recommendation submitted by the Analytical Work Group shall be received by the Board on or before December 1 of each calendar year.

5.04 Remedy for Non-Compliance with Maximum Flow Rate. The Board has no obligation to supply to Customer more than the Maximum Flow Rate. If Customer exceeds its Maximum Flow Rate on the DWSD Maximum Day or during the DWSD Peak Hour, the Board and Customer may, as needed, take one or more of the following actions set forth in this Section 5.04. The applicability of any particular action shall be evaluated by the Board on a case-by-case basis.

A. The Board may require that Customer take all reasonable steps to reduce its consumption to the Maximum Flow Rate. Such steps may include water conservation measures, outdoor water use restrictions, water loss studies and remediation, and an internal system operation evaluation.

B. The Parties may meet to negotiate a new Maximum Flow Rate. If so negotiated, Customer shall pay the rate associated with the new Maximum Flow Rate in the subsequent rate year.

C. For ratemaking and cost allocation purposes only, the Board may recalculate Customer's rate for the current and/or subsequent fiscal years utilizing a revised cost allocation formula as follows:

i. The Board shall, as set forth below, establish an Allocation Flow Rate to replace the contractual Maximum Flow Rate in the rate calculation process.

ii. The Allocation Flow Rate shall be applied from no earlier than the first exceedance date forward.

iii. The Allocation Flow Rate will be at least equal to the flow rate demonstrated by Customer on the DWSD Maximum Day, and may be higher than the actual flow rate demonstrated by Customer.

iv. Pursuant to Section 5.03(C), if the Board receives a recommendation on the Allocation Flow Rate to be applied from the Analytical Work Group and the recommendation is higher than twice the amount by which the demonstrated flow rate exceeded the original Maximum Flow Rate, then the Board shall be limited to establishing an Allocation Flow Rate that is at least equal to the flow rate demonstrated by Customer on the DWSD Maximum

Day and no higher than the recommendation provided by the Analytical Work Group.

v. If no recommendation on the Allocation Flow Rate to be applied is received by the Board, or if the Board receives a recommendation and the recommendation is less than twice the amount by which the demonstrated flow rate exceeded the original Maximum Flow Rate, then the Board shall be limited to establishing an Allocation Flow Rate that is at least equal to the flow rate demonstrated by Customer on the DWSD Maximum Day and no higher than twice the amount by which the demonstrated flow rate exceeded the original Maximum Flow Rate.

vi. The Allocation Flow Rate will continue to be applied to each subsequent year's rate calculation process until the Maximum Flow Rate is renegotiated.

vii. If a rate has been approved for the subsequent fiscal year (July 1st to June 30th) but the rate has not yet been applied, the Board may modify Customer's rate for that subsequent fiscal year to account for an exceedance of its Maximum Flow Rate.

viii. If the Board has built capital facilities based upon Customer's negotiated Maximum Flow Rate and Customer consistently exceeds its Maximum Flow Rate, then the Board may re-calculate the amount of Customer's percentage of the capital cost of such facilities

5.05 Procedure for Non-Compliance with Maximum Flow Rate. In addition to the remedies specified in Section 5.04, if Customer has failed in its obligations under Section 5.03, the Parties shall meet to discuss the reasons for the non-compliance and if agreed necessary, develop a mutually agreeable written corrective action plan by December 31 of the year in which the non-compliance occurred, or as otherwise agreed. Any corrective action plan required under this Section 5.05 shall include a timetable for resolution of the non-compliance issue(s).

A. If the Parties determine that a corrective action plan is not required and an incident of non-compliance occurs in the subsequent calendar year, the Parties shall meet to develop a mutually agreeable written corrective action plan by December 31 of the year in which the non-compliance occurred, or as otherwise agreed.

B. In the event the reason for Customer's non-compliance under Section 5.03 is due to a Customer water main break, fire or meter calibration performed by DWSD, these events will be taken into consideration in determining (1) whether a corrective action plan is warranted and (2) the extent to which, if any, the steps specified in Section 5.04 should apply.

5.06 Minimum Annual Volume. Customer shall purchase from the Board not less than the Minimum Annual Volume of water specified in Exhibit B. If Customer's Annual Volume is less than the Minimum Annual Volume, Customer shall pay to the Board an amount

computed by applying the current rate to the Minimum Annual Volume less any amounts already billed to the Customer by the Board.

5.07 Periodic Review. For Customer and System planning purposes and, with regard to the Minimum Annual Volume, enforcement of the provisions of Article 3, a Maximum Flow Rate, Pressure Range, Projected Annual Volume and Minimum Annual Volume shall be established by mutual agreement for the Contract Term. If the Contract Term exceeds two years, a contractually binding Maximum Flow Rate, Pressure Range, Projected Annual Volume and Minimum Annual Volume shall be established by mutual agreement for first two years of the Contract Term. If the Contract Term exceeds two years, not later than the second year of the Contract Term, the Board and Customer shall negotiate a contractually binding Maximum Flow Rate, Pressure Range, Projected Annual Volume and Minimum Annual Volume for the succeeding three years of the Contract Term. If the Contract Term exceeds five years, not later than the fifth year of the Contract Term, and every five years thereafter, the Board and Customer shall negotiate a contractually binding Maximum Flow Rate, Pressure Range, Projected Annual Volume and Minimum Annual Volume for the succeeding five years of the Contract Term. If the Parties do not negotiate new or revised Maximum Flow Rates, Pressure Ranges, Projected Annual Volumes and Minimum Annual Volumes according to the aforementioned schedule, then the figures established for planning purposes (as shown in italicized type in Exhibit B) shall become contractually binding for the then-current three or five year term.

5.08 Remedy for Excessive Rate(s) of Flow Causing Pressure Problem(s). Customer acknowledges that Customer's rates of flow may cause and/or contribute to the Board's inability to meet its Pressure Range agreements with Customer and/or the Board's other customers (hereinafter, "Pressure Problem"). The Board may review or monitor Customer's daily rates of flow if a Pressure Problem occurs and the Board's Pressure Range agreement with Customer and/or another customer of the Board is alleged to have been breached. The approximate rate of flow by individual meter location used to establish the Pressure Range and Maximum Flow Rate is specified in Exhibit B. If a Pressure Problem occurs, the Parties shall meet to discuss the reasons for the Pressure Problem and develop and implement a mutually agreeable written corrective action plan within sixty calendar days of the Pressure Problem, or as otherwise agreed. The corrective action plan may require one or both of the following steps:

A. The Board may require that Customer take all reasonable steps to reduce its consumption to the rate of flow established by the Maximum Flow Rate. Such steps may include water conservation measures, outdoor water use restrictions, water loss studies and remediation, and an internal system operation evaluation. In addition, the Board may require that Customer adjust its rate of flow at individual meters, including the establishment of a not-to-exceed flow rate for individual meters.

B. The Parties may meet to negotiate a new Maximum Flow Rate. If so negotiated, Customer shall pay the rate associated with the new Maximum Flow Rate in the subsequent rate year.

If the Parties determine that a corrective action plan is not required and a subsequent Pressure Problem occurs, the Parties shall meet to develop and implement a mutually agreeable written corrective action plan within sixty calendar days of the subsequent Pressure Problem, or as otherwise agreed. Any corrective action plan required under this Section 5.08 shall include a timetable for resolution of the Pressure Problem. In the event the reason for the Pressure Problem is due to a Customer water main break, fire or meter calibration performed by DWSD, these events will be taken into consideration in determining (1) whether a corrective action plan is warranted and (2) the extent to which, if any, the steps specified above in this Section 5.08 should apply.

5.09 Board Costs for Corrective Action Plan. If at any time the Board is required under the terms of this Article 5 to develop and implement a corrective action plan and the plan involves incurring capital costs, the Board will determine whether the costs will be charged as a System cost or whether the cost will be borne by a specific customer or customers. If the Board determines that all or part of the costs should be borne by a specific customer or customers, the Board will seek a recommendation from the Technical Advisory Committee on the assessment of the costs.

5.10 Customer Costs for Corrective Action Plan. If at any time Customer is required under the terms of this Article 5 to develop and implement a corrective action plan, Customer shall be so informed in writing and Customer will pay all costs related to the corrective action plan.

Article 6.
Technical Advisory Committee

6.01 Establishment. The Technical Advisory Committee is formed to facilitate a cooperative working partnership between the Board and its wholesale water customers by facilitating the development of recommendations regarding System planning and supply to DWSD management and the Board. The Technical Advisory Committee shall maintain bylaws that govern the way it conducts its business. In the event of a conflict between the terms of the bylaws adopted by the Technical Advisory Committee and the terms of this Contract, the terms of this Contract shall control.

6.02 General Responsibilities. The Technical Advisory Committee shall periodically review and evaluate the rates, rate methodology, and performance of the System. The Technical Advisory Committee shall review and evaluate flow rates, pressures and Annual Volumes for the System at a minimum of every five years to assist the Board in its System planning effort. The Technical Advisory Committee shall have the opportunity each year to review the Capital Improvement Program as prepared by DWSD, prior to its adoption by the Board. The Technical Advisory Committee may consider Customer proposals for improving the operation of Customer's water system and/or the System. The Board will supply the Technical Advisory Committee with information the Board deems reasonably necessary to accomplish the general responsibilities defined in this Section 6.02.

6.03 Annual Report by Board. The Board will present an annual report to the Technical Advisory Committee which shall consist of (1) all instances of non-compliance with the Parties' obligations contained in Article 5 herein, including Customer and Board responses

thereto; (2) a general report on System operation and maintenance; and (3) a report that lists those contracts, if any, that have been entered into by the Board and another customer(s) where the terms of the contract(s) invoke the application of Article 14 herein.

6.04 Notification of Rates. The Board shall provide Customer and the Technical Advisory Committee with notice of the proposed rates for each fiscal year as early as possible before the implementation of the rates.

6.05 Disclosure of Rate Information by Board. Each year, the Board will disclose to Customer and the Technical Advisory Committee information related to wholesale rates.

6.06 Disclosure of Rate Information by Customer. Each year, Customer will disclose to its customers information related to its retail rates and other charges, and information regarding what portion of those costs is related to charges from DWSD and/or other major service providers.

6.07 Work Groups. The Technical Advisory Committee may create work groups to address specific issues facing the System. The work groups in existence as of January 1, 2008 are the Analytical Work Group, the Best Practices Work Group, the Contract Work Group, the Customer Service Work Group, the Emergency Preparedness Work Group, and the Rates Work Group. Any reference to a particular work group in this Contract shall include its successor or replacement if altered or discontinued.

Article 7.
Rates

7.01 Rates. Customer agrees to pay for all water supplied by the Board at such rates as the Board may establish. Rates shall be reasonable in relation to the costs incurred by the Board for the supply of water and shall conform to Public Act 34 of 1917, Michigan Compiled Laws, Sec. 123.141, et seq., as amended. The Board shall give written notice of any changes in the rates. Notice shall be made in accordance with Section 5e of Public Act 279 of 1909, Michigan Compiled Laws, Sec. 117.5e, as amended, ("Act 279").

7.02 Notification of Rates. As soon as possible in the ratemaking process, the Board shall provide information on proposed rates and the draft data and information used in the calculation of proposed rates in a format that will enable Customer to assist in the ratemaking process. Not less than thirty calendar days prior to the hearing required by Act 279, the Board shall provide Customer with written notice of a proposed rate and the underlying data used to calculate the rate. The Board shall meet with Customer to review the rate and the data.

7.03 Estimate of Usage. In the event that the Board-owned master meter known as GN-01 fails to correctly measure the quantity of water supplied to Customer for any period of time, the Board shall provide a reasonable estimate of the quantity of water supplied to Customer for such period provided that there is a reasonable basis for the estimate. Customer and the Board shall, either through their respective technical representatives and/or the Technical Advisory Committee, seek agreement upon a method to estimate such quantities. In the event the Parties are unable to agree upon a method to estimate such quantities, the

Board's determination of a method shall be conclusive and the Customer agrees to accept the estimate established by the Board.

7.04 Rate Methodology. The Board agrees to provide to Customer a description of the current methodology for rate making in the form of the "Rates 101" document produced by the Technical Advisory Committee, as may be periodically updated. The "Rates 101" document, entitled *DWSD Rates: Understanding DWSD Wholesale Water Rates*, and any updates thereto shall be provided to Customer via posting on the DWSD website.

Article 8.
Meters and Meter Facilities

8.01 Metering Requirement. All water furnished by the Board to Customer shall be measured by water meters installed in Meter Facilities at Customer's Water Distribution Points unless, in the Board's determination, it is not feasible to install water meters due to the configuration of Customer's water system. Customer's water usage shall be measured by the Board-owned master meter known as GN-01. Because GN-01 also measures the water usage of GCDC, Customer has a separate metering agreement with GCDC (attached as Exhibit C) whereby GCDC will report to Customer and the Board on a monthly basis the volume of water attributable to Customer through the GN-01 master meter. Customer shall ensure that GCDC provides the monthly meter information, specifying the unit of measurement used, on or before the 5th day of each calendar month. Customer shall ensure that the Board has the right at any time to audit the metering information provided by GCDC.

8.02 Existing Distribution Points. As of the effective date of this Contract, the Board shall own, operate and maintain all water meters and Meter Facilities for all existing Water Distribution Points, unless specifically indicated otherwise in Exhibit A.

8.03 Customer Maintenance Responsibilities. Customer shall be responsible for maintaining at its Water Distribution Points any and all appurtenances as may be designated as Customer's responsibility in Exhibit A. Should Customer fail to maintain the appurtenances shown in Exhibit A, the Board may take reasonable steps to maintain the appurtenances and charge the reasonable cost of doing so to Customer. Prior to the Board taking action to maintain the appurtenances, the Board shall give Customer thirty days written notice to complete the required maintenance. Notice to the Customer shall not be required if, in the Board's determination, there exists an emergency condition affecting the operation of the System or if the health, safety and welfare of the general public may be jeopardized.

8.04 New Distribution Points. For any new Water Distribution Points that may be constructed or installed after the effective date of this Contract, Customer shall furnish at Customer's expense, a water meter and Meter Facility that meets the Board's specifications. Thereafter, the Board shall furnish any replacement water meters for new Water Distribution Points and the expense shall be recovered through the Board's rates as a System cost. The Board shall own, operate and maintain all water meters and Meter Facilities after construction, installation or replacement, unless specifically indicated otherwise in Exhibit A.

8.05 Meter Repair and Replacement. If the Board initiates a meter repair or meter replacement, the cost shall be recovered through the Board's rates as a System cost. If Customer requests a meter replacement for reasons other than malfunction or disrepair, Customer shall pay the cost of the replacement.

8.06 Pressure Regulating Facilities. After the effective date of this Contract, all newly installed Customer-owned pressure regulating facilities shall be installed in a facility that is separate from the Board's Meter Facility.

Article 9.
Reserved

Article 10.
Reserved

Article 11.
Force Majeure, Hold Harmless and Other Events

11.01 Force Majeure. No failure or delay in performance of this Contract, by either Party, shall be deemed to be a breach thereof when such failure or delay is caused by a force majeure event including, but not limited to, any Act of God, strikes, lockouts, wars, acts of terrorism, riots, epidemics, explosions, sabotage, breakage or accident to machinery or lines of pipe, the binding order of any court or governmental authority, or any other cause, whether of the kind herein enumerated or otherwise, not within the control of a Party, except that no cause or contingency shall relieve Customer of its obligation to make payment for water delivered by the Board.

11.02 Board Held Harmless. Customer is experiencing a public health emergency which has resulted in the necessity of entering into this Contract. The Parties do not know the extent of the claims and/or damages which may result from the emergency, nor if the provision of water services by the Board will abate, improve or otherwise alleviate this emergency. As such, the Board shall not be held liable or accountable for any alleged water source or supply issues, or bursting, leakage, breakage, damage or accident of any kind that may occur to Customer's water works system, or any alleged damages of any kind or nature, including, but not limited to, injury to persons or damage to property, resulting from or alleged to result from such water source or supply issues, or bursting, leakage, breakage, damage or accident that may occur to water mains or pipes located downstream of the Water Distribution Points specified herein, or located within Customer's distribution system. Furthermore, to the extent permitted by law, Customer shall indemnify, defend and hold harmless the City of Detroit and the Great Lakes Water Authority from and against any and all alleged liabilities, obligations, damages, penalties, claims, costs, charges, losses and expenses (including, without limitation, fees and expenses for attorneys, expert witnesses and other consultants) that may be imposed upon, incurred by or asserted against the City of Detroit or the Great Lakes Water Authority and their respective departments, officers, employees or agents by reason of any of the following alleged to be attributable to the provision of water services under the terms of this Contract:

A. Any and all alleged injury to persons or damage to property; and

B. Any alleged failure by Customer or its agents to perform its obligations, either express or implied, under this Contract; and

C. Any alleged act, error or omission of Customer or its agents with regard to (i) Customer's distribution of water supplied by the Board downstream of the Water Distribution Point, and (ii) any alteration by Customer or its agents to the water supplied by the Board downstream of the Water Distribution Point, including without limitation any chemical additions to the water as set forth in Section 17.05.

11.03 Discontinuance of Service. In the event the public health, safety and welfare requires the Board to discontinue temporarily all or part of the supply of water to Customer, no claims for damages of any kind or nature for such discontinuance shall be made by Customer against the Board. The Board will provide notice to Customer of any temporary discontinuance of the water supply.

Article 12.
Timely Payment

12.01 Billing and Payment. Bills for water service shall be rendered to Customer on a monthly basis. Notwithstanding the provisions of this Article 12, all such bills shall be due and payable within forty-five calendar days from the date shown on the bill. Any portion of the charges that are not paid by the due date shall be subject to a finance charge at a rate of 1.5% per month for each month that they remain unpaid. Any portion of the total bill, plus any finance charges applied to the bill which are not paid by the next billing date, shall be shown on the next bill as arrears.

12.02 Dispute. The Board may disconnect water service in accordance with the terms of this Contract, including without limitation Sections 12.03 and 12.04. The Board shall not terminate water service if there is a good faith dispute concerning the accuracy of billings. If the accuracy of a bill is in dispute, Customer shall have ten (10) business days in which to provide written notice to the Board of its dispute with the bill and shall place the disputed amount in an escrow account pending resolution of the dispute. Accrued interest on the escrow account shall belong to the Party that prevails in the resolution of the dispute.

12.03 Estimated Prepayment for Services. Customer shall deposit with the Board as an estimated prepayment for services for the term of this Contract certain funds as follows: (a) on or before October 16, 2015, an amount equal to Two Million and 00/100 Dollars ($2,000,000.00), and (b) on or before October 19, 2015, an amount equal to Eight Million and 00/100 Dollars ($8,000,000.00). Collectively, the Ten Million and 00/100 Dollars ($10,000,000.00) shall be referred to as the "Estimated Prepayment". The Estimated Prepayment will be credited to Customer's suburban billing account with the Board. Each month, the Board shall be entitled to draw down from the Estimated Prepayment a sum equal to the amount of the then-current billing. If at any time the Board determines in its sole and reasonable discretion that the remaining amount of the Estimated Prepayment will be insufficient to cover the next monthly billing and/or the remainder of the Contract Term,

Customer shall be required to replenish within thirty (30) days the estimated prepaid funds in the amount required by the Board provided, however, that the Parties shall endeavor to mutually agree upon the amount. Failure to so replenish the estimated prepaid funds shall permit the Board to terminate services to Customer. At the conclusion of the Contract Term, if Customer is in good standing with the Board and there are funds remaining from the Estimated Prepayment, Customer shall be entitled to the prompt return of all such funds. The Estimated Prepayment made by Customer shall not relieve Customer of its obligation to make payment in full for all water delivered by the Board to Customer.

12.04 Account Stated. Notwithstanding the provisions of this Article 12, if Customer fails to make timely payment on invoices due as set forth in this Contract, in addition to terminating services to Customer, the Board shall be entitled to have a judgment entered against Customer for the entire unpaid balance, together with late fees, finance charges, interest, and the costs and reasonable attorney fees required to obtain that judgment. The Board shall be entitled to file this Contract in a court of proper jurisdiction as evidence of Customer's agreement to the existence of the debt stated and Customer's agreement to its liability for that debt.

Article 13.
Assignment

13.01 The Board shall be permitted to assign this Contract to any successor in interest without the prior consent of Customer. Thereafter, and as soon as practicable, the Board shall provide written notice to Customer of the assignment.

Article 14.
Reserved

Article 15.
Amendment

15.01 The Parties may periodically consider it in their best interests to change, modify or extend a term, condition or covenant of this Contract for reasons which may include, but are not limited to, the creation, expansion or closing of industry or other business. Any change, addition, deletion, extension or modification that is mutually agreed upon by the Board and Customer shall be incorporated in a written amendment to this Contract. Such amendments shall not invalidate this Contract nor relieve or release either Party of any of its respective obligations under this Contract unless so stated in the amendment.

15.02 No amendment to this Contract shall be effective and binding upon the Parties unless it expressly makes reference to this Contract, is in writing, is signed and acknowledged by duly authorized representatives of both Parties.

Article 16.
Notices

16.01 Except as otherwise specified herein, all notices, consents, approvals, requests and other communications (collectively, "Notices") required or permitted under this Contract shall be given in writing and mailed by first class mail to the Parties and at the addresses identified in Exhibit B.

16.02 All Notices shall be deemed given on the day of post-marked mailing. Any Notice given by a Party hereunder must be signed by an authorized representative of such Party.

16.03 Notwithstanding the requirement above as to the use of first-class mail, change of address notices, termination notices, and other Notices of a legal nature, shall be sent by certified first-class mail, postage prepaid, return receipt requested.

Article 17.
Water Quality

17.01 Contamination. For the protection of the health of all consumers supplied with water from the System, Customer agrees to guard carefully against all forms of contamination. Should contamination occur, the area or areas affected shall immediately be shut off and isolated, and shall remain so until such conditions shall have been abated, and the water declared safe and fit for human consumption by the properly constituted governmental health agencies having jurisdiction of the area affected. Customer shall immediately notify the Board, and the Board shall immediately notify Customer, of any emergency or condition that may affect the quality of water in either Party's system.

17.02 Co-mingling of Water Sources. Except in cases of emergency other than the specific public health emergency addressed by this Contract, Customer will not permit water from any other source of supply to be mixed or mingled with water from the System without prior written approval from the Board. In cases of emergency, only such water from sources other than the Board shall be used as shall meet the requirements of the Michigan Department of Environmental Quality, and then only in such quantities as shall be necessary to relieve the emergency.

17.03 Emergency Connections. During emergencies other than the specific public health emergency addressed by this Contract, Customer's water facilities may be used and connected, at the discretion of the Board, to water facilities serving other communities for flow in either direction to provide an adequate water supply from the System to Customer and to other areas and other units of government. Customer shall be permitted to immediately make an emergency connection when the connection point to be used has been previously approved for emergency use by the Board in writing, provided that Customer shall, after making the connection, promptly notify the Board of such event. When the emergency has been abated, the emergency connection must be severed as soon as practicable. The Board, or its designee, must approve, in writing, the continuation of any emergency connection that is required for longer than seven calendar days. If an approved emergency connection continues for more than seven calendar days, Customer must

provide the Board with weekly updates on the emergency and a schedule for abatement of the emergency that must be approved by the Board in writing.

17.04 Water Quality. The Board shall endeavor to remain in compliance with all applicable Michigan and Federal laws, rules and regulations regarding drinking water quality.

17.05 Chemical Additions, Public Relations. Customer has advised the Board that in order to more effectively address its public health emergency, it may inject additional chemical treatments into the water it receives from the Board. Customer shall prevent the backflow of any water containing additional chemical treatments by Customer from entering into the System and any other water systems utilizing water provided by the System. Customer acknowledges that such additional chemical treatments may result in chemical, biological and/or physical changes to the water provided by the Board. In order that the public be kept fully informed as to the explanation for any chemical, biological and/or physical changes and to ensure that the Board's long established and award winning brand is not diminished in any way, Customer agrees to coordinate with and seek the approval of the Board regarding its public relations communications on these issues.

Article 18.
Rights-of-Way

18.01 Use of Rights-of-Way. The Customer shall assist the Board to obtain permission to use streets, highways, alleys, and/or easements in the local governmental units within the Customer's jurisdiction for the purpose of constructing, maintaining, and operating water facilities to adequately service the Customer's jurisdiction and other areas. This assistance shall include obtaining the consent of the local governmental units, as provided in Article 7, Section 29, Michigan Constitution of 1963. In the event of such construction, the Board shall request the Customer and local governmental units within the Customer's jurisdiction to execute such separate instruments granting rights-of-way in its streets, highways, and alleys as may be reasonably required by the Board. The Board shall give the Customer notice of any construction work in the Customer's jurisdiction. The Board shall comply with any of Customer's ordinances that apply to the construction. Customer shall inform the Board of the applicable ordinances. The Board and Customer shall meet to review the construction and its impact on their respective operations. The Board shall restore all existing structures and/or improvements laying in the right-of-way of construction to as good a condition as before the construction took place. Any such facilities constructed, maintained and operated under this section shall remain the property of the Board and shall not be operated or maintained by any entity other than the Board or its authorized representatives.

18.02 Relocation of Facilities. Should future construction by any city, township, village, or county require relocation of a water transmission main, Meter Facility ,or other Board facility, the cost incurred by the Board for such relocation, if not reimbursed by the entity requiring the relocation, will be charged in future rates as a common-to-all cost to all System users.

18.03 Easements. Subject to the provisions of Section 18.01 herein and to the extent that Customer has jurisdiction, the Board shall be granted temporary and permanent easements,

and shall be permitted to use the streets, alleys and highways within Customer's legal jurisdiction for the purpose of constructing, operating and maintaining the System, including the relocation of water transmission mains, Meter Facilities or other Board facilities. This consent by Customer is given in compliance with Article 7, Sec. 29 of the Michigan Constitution of 1963, provided that the Board shall provide Customer with a written explanation of the type of easement required and the duration thereof.

Article 19.
Access to Towers and Antennas

19.01 Where possible, each Party shall give to the other Party access to towers and antennas under its respective jurisdiction for the purpose of transmitting information recorded in the Meter Facilities. Access shall not be unreasonably denied by either Party.

Article 20.
Relationship to Wastewater Services

20.01 Customer and the Board acknowledge that future growth in the System may place additional burdens on their respective wastewater systems. Customer, if it is also a wastewater disposal services customer of the Board, understands that any increase in the volume of water it receives from the System is not a guarantee of increased capacity in the Board's wastewater disposal system.

Article 21.
Construction Standards

21.01 The Board shall have the right to review and approve Customer's construction plans for Meter Facilities at new Water Distribution Points, water mains sized twenty-four inches and larger, pump stations, reservoirs, water towers, and any other construction that will cross, or be within close proximity to, or have influence upon the Board's infrastructure. The Board's approval of construction plans shall be timely and shall not be unreasonably withheld.

Article 22.
Operation of Storage

22.01 Prior to Customer's operation of any new or existing water storage facility, Customer shall seek the Board's written approval of the filling schedule ("Filling Schedule") of the storage facility. The Board may periodically require Customer to change or adjust a previously approved Filling Schedule. The Parties shall collaborate on devising a mutually beneficial Filling Schedule. If the Parties are unable to agree upon a Filling Schedule, the Board's determination of a Filling Schedule shall be final. All Filling Schedules shall be for a period of six consecutive hours. Customer shall at all times abide by the then-current Board approved Filling Schedule. The Board shall act promptly in approving Filling Schedule requests. Nothing in this Article 22 shall prevent Customer from operating its storage facility at any time, provided that any storage operation that falls outside of the approved Filling Schedule shall not be exempt from the terms of Article 5 herein.

Article 23.
Miscellaneous

23.01 If any provision of this Contract or its application to any person or circumstance shall to any extent be invalid or unenforceable, the remainder of this Contract shall not be affected and shall remain valid and enforceable to the fullest extent permitted by law.

23.02 This Contract contains the entire agreement between the Parties and all prior negotiations and agreements are merged into this Contract. Neither Party has made any representations except those expressly set forth in this Contract, and no rights or remedies are, or shall be, acquired by either Party by implication or otherwise unless expressly set forth in this Contract.

23.03 Unless the context otherwise expressly requires, the words "herein," "hereof," and "hereunder," and other words of similar import, refer to this Contract as a whole and not to any particular section or subdivision.

23.04 The headings of the sections of this Contract are for convenience only and shall not be used to construe or interpret the scope or intent of this Contract or in any way affect the same.

23.05 The rights and remedies set forth in this Contract are not exclusive and are in addition to any of the rights or remedies provided by law or equity. This Contract and all actions arising under it shall be governed by, subject to, and construed according to the law of the State of Michigan.

23.06 The Great Lakes Water Authority is an acknowledged third party beneficiary to this Contract and this Contract shall not be construed to benefit any persons other than the Board, the Great Lakes Water Authority and Customer.

23.07 This Contract may be executed in any number of originals, any one of which shall be deemed an accurate representation of this Contract. Promptly after the execution of this Contract, the Board shall provide a copy to the Customer.

23.08 The rights and benefits under this Contract shall inure to the benefit of and be binding upon the respective Parties hereto, their agents, successors, and assigns.

23.09 Any and all documents, memoranda, reports, exhibits or other written material referred to in this Contract are and shall be incorporated by reference herein.

23.10 This Contract shall be deemed to be mutually drafted.

Projected Annual Volume and Minimum Annual Volume (Table 1)
Pressure Range and Maximum Flow Rate (Table 2)
Flow Split Assumptions (Table 3)
Addresses for Notice (Table 4)

Table 1 and Table 2 set forth the agreed upon Projected Annual Volumes, Minimum Annual Volumes, Pressure Ranges and Maximum Flow Rates for the term of this Contract provided that figures in bold type face are immediately enforceable pursuant to the terms of Section 5.07 and italicized figures are contained for planning purposes only but will become effective absent the negotiated replacements anticipated in Section 5.07.

The approximate rate of flow by individual meter set forth in Table 3 is the assumption upon which the Pressure Range commitments established in Table 2 have been devised. Should Customer deviate from these assumptions at any meter(s), the Board may be unable to meet the stated Pressure Range commitments in this Contract or in the contract of another customer of the Board and Section 5.08 of this Contract may be invoked.

Subject: RE: Use of SRF to replace lead service lines

Hi Sonya,
Because it is an eligibility question, there is probably no specific regulation to address it, but HQ issued a memo (attached). Although is not dated, it was still draft in 2012, so is probably 2012/2013. We may be able to find a more precise date from HQ. Just FYI, there is a reference on page 2 to a 2003 memo – the link to the 2003 memo is: http://water.epa.gov/grants_funding/dwsrf/upload/2008_04_10_dwsrf_memos_memo_dwsrf_policy_2003-07-25.pdf.

I hope this helps.
Please let me know if you have any questions.
Thanks.
Laura

From: Hedman, Susan [mailto:hedman.susan@epa.gov]
Sent: Monday, September 28, 2015 4:36 PM
To: Wyant, Dan (DEQ)
Subject: Use of SRF to replace lead service lines

Hi Dan –

Here's a quick answer to your question about using SRF to replace lead service lines. Under the federal SRF program, SRF funds can be used to replace lead service lines on both public and private property. (We don't know if Michigan rules allow for the use of SRF funding on private property, but presumably you know whether that's the case.) If you have additional questions, your staff can follow up with Steve Marquardt, Chief of the R5 Water Division State and Tribal Program Section. His number is 312-353-3214.

Please keep me posted on the time for the event later this week.

Thanks,

Susan

MEMORANDUM

SUBJECT: Eligibility of Replacement of Lead Service Lines on Private Property Under the DWSRF.

FROM: Joanne Hogan
Attorney- Advisor
Civil Rights and Financial Law Office
Office of General Counsel

THROUGH: Wendel Askew
Assistant General Counsel
Civil Rights and Financial Law Office
Office of General Counsel

Ken Redden
Deputy Associate General Counsel
Civil Rights and Financial Law Office
Office of General Counsel

TO: Peter Shanaghan
Team Leader
Drinking Water State Revolving Fund Team
Office of Ground Water and Drinking Water, Office of Water

Question Presented.

You have asked whether financial assistance from a State's Drinking Water State Revolving Loan Fund can be used by eligible entities to fund projects that involve replacing lead service lines that may be on private property and that connect to private dwellings.

Brief Answer

We believe that lead service line projects, regardless of the ownership of the property on which the pipe is placed, may be funded by a State's DWSRF so long as the loans are made to an eligible entity and all other requirements of the DWSRF are met.

Analysis

The statute and the regulatory provisions governing the use of State DWSRF funds, though defining which entities may receive funds, do not require the Public Water System to have control over all portions of a project that is funded by the DWSRF. Congress gave EPA's Administrator the clear authority to determine which projects would be eligible under §1452: "Financial assistance. . . may be used. . . only for expenditures of a type or category which the Administrator has determined, through guidance, will facilitate compliance with national primary drinking water regulations." PHSA §1452 (a)(2). The only broad statutory limitations on the types of projects that cannot be funded are projects which include monitoring, operation, or maintenance expenditures, or projects for the acquisition of real property unless the purchase is made from a willing seller and the acquisition is integral to the project.

40 CFR §35.3520 (b)(2) sets forth the categories of projects that can be funded by a DWSRF. This provision includes the transmission and distribution of water to be a category of eligible projects. Specifically, the regulation provides examples of such projects to include: "installation or replacement of transmission and distribution pipes to improve water pressure to safe levels or to prevent contamination caused by leaks or breaks in the pipes." See 40 CFR §35.3520 (2)(ii).

Lead pipes can contaminate water at any point, including on its way to a private home. Allowing a public water system to use its funds to replace such pipes is consistent with this allowable category of projects, and is similarly consistent with the overall health protections of the Safe Drinking Water Act. See PHSA 1452 (a)(1)(A). Note that if a Public Water System wishes to purchase and retain an easement so that it maintains control of such infrastructure, that purchase is authorized as well: "Funds shall not be used for real property or interests therein unless the acquisition is integral to the project authorized... and the purchase is from a willing seller. . ." PHSA 1452(a)(2).

This determination that replacement of lead pipes on privately owned property is an eligible project cost so long as it otherwise complies with the PHSA is consistent with prior approved eligible projects, such as water efficiency projects, that do not require all elements of a project to be under the control of a Public Water System. In a Memorandum dated July 25, 2003, then Assistant Administrator for Water G. Tracy Mehan III informed Water Division Directors in the regions that projects such as the installation or retrofit of plumbing fixtures and appliances, installation of water meters, and implementation of incentive programs to conserve water, such as rebates or conservation rate structures were all eligible projects under the DWSRF. Therefore, so long as the assistance is given to an eligible entity, and the project otherwise meets the requirements of the DWSRF, the project may be funded regardless of ownership or control of the resulting infrastructure.

For Immediate Release

City of Flint Reconnects to Detroit Water

Flint, Michigan – October 16, 2015 – Flint has reconnected to Detroit water. reached an agreement with the Detroit Water and Sewerage Department (DWSD) for the temporary provision of treated Lake Huron water to Flint. Work to establish the reconnection will begin immediately in a coordinated effort between the City of Flint, Genesee County and the DWSD.

A tremendous effort by all three partners, along with the efforts of the Governor and the State Legislature, ensured that this action occurred as quickly as possible. "The money from the state to begin fixing Flint water by reconnecting to Detroit is just a start – a down payment,' said Mayor Dayne Walling. "I am not going to stop until every drop of drinking water in Flint is 100% safe."

Detroit water will be introduced into the Flint system throughout the evening. It is expected that the thorough replacement from Flint River water to Detroit water will happen after approximately three weeks. Residents in Flint may see discoloration as well as noticing some taste and odor issues during the transition.

Water provided by DWSD will contain corrosion control agents to hinder the leaching of lead from old pipes into the water; however, the City will also be adding additional corrosion control agents to further minimize the risk presented by lead pipes.

–CONTINUE–

Dayne Walling
Mayor

Natasha L. Henderson
City Administrator

The contract between the City and DWSD calls for the provision of 12.5 million gallons per day (mgd) of treated water from Lake Huron at a cost of $1.1 million per month. DWSD Director Sue McCormick noted that the talks between Flint, DWSD and the GLWA Board were very cordial: "everyone acted in a spirt of cooperation in order to come to this agreement." Flint will purchase water from Detroit until the Karegnondi Water Authority (KWA) pipeline can be completed in 2016. At that time, the KWA will become the primary water source for the City and the Flint River will remain as a backup system.

Residents with questions or concerns about the hydrant flushing in their area can call the Water Service Center at 810-766-7202. Continuing information on water will be provided via the City of Flint's website, cityofflint.com.

Subject: RE: Use of SRF to replace lead service lines

I have not seen anything in terms of a bill draft. I did respond to Sonya regarding the e-mail below and we also discussed on the phone and she said she would keep me in the loop. I will follow up today though.

Sonya,

With a change in State law, I believe we would be able to make loans to communities for the replacement of private sewer lines. I did want to note that any loan for this purpose would have to be done on a taxable basis along the same lines as the SWQIF and therefore loans for this purpose could not be leveraged in the future to provide additional program capacity.

Please let me know if I can be helpful in developing program policy regarding this issue.

Thank you
John

To: Shekter Smith, Liane (DEQ); Butler, Sonya (DEQ)
Subject: Statutory changes to Part 54
Importance: High

If we are going to clarify that Part 54 can cover replacement of private service lines, is this the best way to do? I made changes to the definition of waterworks systems to include private service lines, and changes the requirement the water supplier had to maintain and operate the private service lines.

Please let me know ASAP what you think.

Thanks,
Maggie

324.5403 Definitions; P to W.

Sec. 5403.

As used in this part:

(a) "Priority list" means the annual ranked listing of projects developed by the department in section 5406.

(b) "Project" means a project related to the planning, design, and construction or alteration of a waterworks system.

(c) "Project refinancing assistance" means buying or refinancing the debt obligations of water suppliers if construction activities commenced, and the debt obligation was incurred, after the effective date of this part.

(d) "Public water supply" means a waterworks system that provides water for drinking or household purposes to persons other than the supplier of the water, except for those waterworks systems that supply water to only 1 house, apartment, or other domicile occupied or intended to be occupied on a day-to-day basis by an individual, family group, or equivalent.

(e) "State drinking water standards" means rules promulgated under Act 399 that establish water quality standards necessary to protect public health or that establish treatment techniques to meet these water quality standards.

(f) "Water supplier" or "supplier" means a municipality or its designated representative accepted by the director, a legal business entity, or any other person who owns a public water supply. However, water supplier does not include a water hauler.

(g) "Waterworks system" or "system" means a system of pipes and structures through which water is obtained or distributed and includes any of the following that are actually used or intended to be used for the purpose of furnishing water for drinking or household purposes:

(i) Wells and well structures.

(ii) Intakes and cribs.

(iii) Pumping stations.

(iv) Treatment plants.

(v) Storage tanks.

(vi) Pipelines and appurtenances.

(vii) Private residential service lines.

~~(vii)~~ (viii) A combination of any of the items specified in this subdivision.

324.5409 Application for fund assistance; contents; availability of revenue sources; acceptance of applications by department; liability for incurred costs.

Sec. 5409.

(1) A water supplier whose project plan is approved or under review by the department under section 5407 may apply for assistance from the fund by submitting an application to the department. A complete application shall include all of the following, if applicable, as determined by the department:

(a) If assistance is in the form of a loan, financial documentation that a dedicated source of revenue is established, consistent with obligations of debt instruments existing at the time assistance is requested, and pledged to both of the following purposes:

(i) The timely repayment of principal and interest.

(ii) Adequate revenues to fund the operation and maintenance of the project.

(b) Evidence of an approved project plan.

(c) A certified resolution from a water supplier that is a municipality, or a letter of appointment from a water supplier that is not a municipality, designating an authorized representative for the project.

(d) A certification by an authorized representative of the water supplier affirming that the supplier has the legal, institutional, technical, financial, and managerial capability to build, operate, and maintain the project. The water supply does not need certify it will operate and maintain any portion of the project that funds the replacement residential private service lines.

Subject: RE: Use of SRF to replace lead service lines

Hi Sonya,
Because it is an eligibility question, there is probably no specific regulation to address it, but HQ issued a memo (attached). Although is not dated, it was still draft in 2012, so is probably 2012/2013. We may be able to find a more precise date from HQ. Just FYI, there is a reference on page 2 to a 2003 memo – the link to the 2003 memo is: http://water.epa.gov/grants_funding/dwsrf/upload/2008_04_10_dwsrf_memos_memo_dwsrf_policy_2003-07-25.pdf.

I hope this helps.
Please let me know if you have any questions.
Thanks.

To: Wyant, Dan (DEQ)
Subject: Use of SRF to replace lead service lines

Hi Dan –

Here's a quick answer to your question about using SRF to replace lead service lines. Under the federal SRF program, SRF funds can be used to replace lead service lines on both public and private property. (We don't know if Michigan rules allow for the use of SRF funding on private property, but presumably you know whether that's the case.) If you have additional questions, your staff can follow up with Steve Marquardt, Chief of the R5 Water Division State and Tribal Program Section. His number is 312-353-3214.

Please keep me posted on the time for the event later this week.

Thanks,

Susan

Weekly Conference Call Notes – Oct. 19, 2015

Allen Park –Oct. 16 –Mayor Matakas, M. Kibby, R. Byrne, E. Cline, P Dostine

Priorities

- White Hall auditors will be starting approximately Nov. 6. Audit should wrap up by end of December.

Bond tender update

- An institution which holds approximately 20% of the bonds that were tendered recently wants to sell. Tentatively a special council meeting and RTAB meeting is scheduled for Oct. 27 & 28 respectively to address the proposed acceptance of the offer.

Park Street construction

- Finished paving today. Walk through tomorrow with city engineers. If all goes well, road will be open next week. City said there are a few issues that have to be addressed by contractor.

FDCVT Grant

- The City submitted its grant Oct. 14.

Retiree Health Changeover

- B Cady said there have been some minor issues. Otherwise, 99% of the people are satisfied. Overall, actives saw an increase in their healthcare cost of 3.2%. Police realized an increase of 5.5%.

Retiree healthcare lawsuit

- Retirees filed an appeal. Allen Park is working with its attorneys. A hearing date has been set for Nov. 5.

Miscellaneous

- Allen Park was informed that the Governor may be appointing a new member to the RTAB.

Benton Harbor –Oct. 8 – D. Watson, R. Byrne, R. Widigan

- **Weekly Priorities:**
  - Negotiations ongoing with ASFME and FOP – should be wrapped up shortly.
    - FOP is asking for everything EM Saunders took away.

- **Election:** Two for mayor, and there is a write-in candidate challenging every commission seat that is up for re-election.
- **Audit:** Auditors will be on site next week, should be out by mid-November.
- **Budget amendments:** Two amendments will go to the commission on the 19th, reallocation of dollars, no change in bottom line.

- **Lange, O'Brien/Unruh Lawsuits:** Plunkett & Cooney will hold a closed session on October 19 to update the Commission.
  - Lange still is asking for $595K
  - Timeframe: Noting will be done before the election is over – Treasury will set up a date for Darwin and the Mayor to come to Lansing to discuss the lawsuits.

- **Update on Vacant Positions:** Personal committee approved the MML search proposal and moved it along to the full Commission.
  - **Water Department Superintendent:** Fleis & Vandenbrink Engineering, Inc. is asking for $2,500/week to provide the City with 4 individuals to run the plant.
  - **Assessor:** The City has identified an individual to hire, meetings are scheduled to discuss details.

- **FDCVT Grant Applications:** The City will be submitting 4 grant applications shortly.

- **City Manager Evaluation Discussion**: One commissioner was hoping to "bridge the peace" between Darwin and the Commission.
  - The Commissioner wanted an update from the evaluation that took place six months ago.

Ecorse – Oct. 06 – W. O'Neal, L. D'Onofrio R. Byrne, D. Van de Grift, P. Dostine

Priorities

- Budget and 5-year budget. New controller has finished revising the budget and the 5-year budget. O'Neal said Ecorse council has approved the revised '15/'16 budget. Going to the Nov. RTAB. The revised 5-year budget has a projected fund balance of $1.5MM in 2021. Capital projects were revised in the '15/'16 budget as well as in the 5-year.

Fire consolidation

- O'Neal said today that Ecorse is counting on the $2MM FDCVT request to make the transition to an all part time fire department work. He asserts that the 5-year is balanced with this deal.

OPEB benefit audit

- O'Neal said that the OPEB benefit audit, which Ecorse did in-house, will be done in a few days.

Miscellaneous

- Water rates. O'Neal said the city will be raising water rates. Plans on hiring an engineering firm to audit all the customers.
- O'Neal promised to get Drew Van de Grift contract disclosure forms for: auditor, insurance, purchase of car, and Miller / Canfield legal services.
- O'Neal said Ecorse is working on the list from the Wayne Workman memo dated Aug 10. Items include: developing a business plan for DPW; OPEB audit; Savings in fire department; budget for fill ARC payments.
- O'Neal has a meeting with US Steel to discuss the company selling a piece of property to the city to use for parking.
- Treasury will meet with O'Neal in the coming weeks.

Flint – Oct. 14 – N. Henderson, Mayor Walling, J. Freeman, F Headen, Wendy, R. Byrne, E. Cline, P. Dostine

- **Priorities**
  - Henderson bringing two amendments to Oct 14 RTAB: $2M budget adjustment (money from the Water Fund fund balance) and Agreements needing execution between Flint and DWSD, and Flint and Genesee County.
  - The city anticipates connecting to DWSD in the next few days.
- **Lawsuit**
  - Miller Canfield still representing Flint in both the Kincaid and Shears lawsuits. Henderson repeated again that Flint will need assistance in maintaining Miller Canfield as counsel.
- **Public Safety**
  - Fires are down in Flint. Because of that, Flint no longer qualifies for some grant dollars.
  - Tier1 crimes (homicide, rape, armed robbery) are down in Flint.
  - Chief of Police (and Flint) is participating in Violence Reduction Network (VRN), a Dept. of Justice initiative that provides technical assistance and other in-kind crime prevention assistance to cities with higher than average violent crime.

Hamtramck – Oct. 8 – K. Powell, R. Byrne, R. Cline, P. Dostine, D. Van de Grift

Priorities

- Hamtramck has commenced work on the park in front of City Hall, Pope Park, and Veteran's Park.

- Katrina and the City Council successfully attended the MML training in Traverse City, in compliance with EM Square's final order and the directive of the RTAB.
- At last month's RTAB meeting, the Board denied the city's current contract with their auditor of choice; the City must find another auditor.
- Following the death of Councilman Walters, the Council disagrees about how the vacancy will be filled.

Police Study

- Katrina has only one potential study proposal; Treasury has requested additional proposals for comparison.
- Ann Moise likely will be appointed to full-time chief after the election.

Pension Study

- Phase II will be skipped; Phase III is expected to begin soon.

City Treasurer

- Has been busy on some projects.

Highland Park– Oct. 14 – C. Square, R. Byrne

- The collection firm has approximately $7M in past due accounts to collect. However, many of these accounts are no longer active.

- Meadowbrook will be providing an updated report on OPEB costs which show a substantial reduction of the annual costs. The new estimated annual costs will be between $200K and $300K.

- New water bills with the new water and sewer rates have been sent out to the customers.

- Wade-Trim has opened its customer service center on Woodward Avenue.

- BSA software installation has been completed.

- The City will be submitting several FDCVT grant applications including master water meters, LED streetlights, and building improvements.

- Wade-Trim has received several shipments of residential water meters that will be installed soon.

Inkster – Sept 16 – M. Stuhldreher, R. Byrne, P. Dostine

Priorities

- Redevelopment Ready Community program. Inkster is interested in following through with MEDC to achieve RRC certification. Treasury to forward brief report on the program's requirements.

Police chief

- New chief is fully engaged. He's attended several community events. He's been in the neighborhoods. Chief is in the process of hiring an officer to work narcotics. Inkster Police administration has lots of training dollars. Mark said Inkster has $47K remaining from the FDCVT grant earmarked for training as well.

Pastors

- Mark had a meeting with Rev. George Williams, an outspoken critic of the upcoming Parks & Recreation millage. Mark stressed the importance of millage passing and that Rev Williams should at most remain neutral on the matter.

'16 FDCVT grant

- Inkster has not started its application process yet, but does plan to apply. Last year the city received $900K in grant monies from Treasury.

Lincoln Park – Oct. 7 – B Coulter, R Byrne, E Cline, D. Van de Grift, P Dostine

Priorities

- PA 345. Another councilman has endorsed the millage. Three councilmen have now officially endorsed the millage, and one other councilman quietly supports it. Unions are behind the millage. The fire union has been doing mailings, meeting with residents. More neighborhood town hall meetings are planned.

City Manager Matt Coppler

- Brad stated that the new city manager is a "good fit" in the city. Transition is very smooth. Coppler will be sitting on the Downriver Sewage committee, taking over for Brad.

Lincoln Park Retiree Lawsuit

- A status conference will take place Oct. 20.

FDCVT grant

- LP is applying for grant to help with DTE street lighting change over. DTE said city would save $100K. LP contemplating using grant funds in police department.

RTAB recruitment membership

- Coulter has one name thus far. It has not been easy for Brad to find willing participants.

Final Order

- Treasury told Brad it should have a draft FO soon. With the new city manager on board, Brad said a lot more time will be freed up for him to focus on other projects.

Gabriel Roeder Smith lawsuit

- Not a priority until after the election results and PA 345 is decided. City is conserving money for other legal matters at the moment. Attorneys for Lincoln Park will be drafting a demand letter for a cost of $7K to $10K.

MEDC / MSHDA

- LP meeting MSHDA Oct. 12 in Lansing. Treasury is invited to the meeting.

Miscellaneous

- City pursuing $1.5MM SRF funding for sanitary sewer line projects.
- MML declined coverage in the retiree lawsuit because the issue at hand deals with modification of healthcare benefits.
-

Pontiac – Oct. 16 - J. Sobota, N. Nazarko, R. Byrne, R. Widigan, P. Dostine

- **Weekly Priorities:**
  - **District Court Decision:** On Oct 7 the City received an Adverse Arbitration Ruling. Can Treasury ask AG to get Letter from Treasury to the City and Court instructing them not to pay the amount decided by the arbitrator. Email sent 10/07 @ 11:25, it has been forwarded to Randy and Eric for review.
  - **Next week's call:** CA and the Mayor will be at a homeland security conference. Should cancel next week's.
  - **Comprehensive Compensation Study:** Sobota is looking for bids from Mark Notley, and the MML and Fox for the projects. Are there any other companies to get bids from?
  - **City Demolitions:** Information is handed off to At-Well. Have demolished 427 of 944 identified. 53 Have been repaired by owners, 56 were dismissed. 303 condemned to be demolished, 50 of the 303 are with hardest hit. That leaves 250 within the City, of that 40 are occupied.
    - Once completed, the blight issues will be mostly resolved.
  - Cemetery Endowment Funds: City is still responsible for cemetery still, would like to re-establish it and deposit $1M. The fund was drained by EFM Stampfler. Possibly do $500K each year over two years.
    - Note for future EMs, may wish to tell them not to touch endowment funds.

- **$6M with Gray Financial Group:** No updates. Nevrus has talked with the director of the pension board and raised concerns.
  - The Director is going to speak with the GERS Board attorney.
  - The City Council being kept up-to-date on the issue.

- **Two-year Rolling Budget/Audit:**
  - **Two-year**: Not been addressed due to the Council not acting on the budget amendment and no agreement on the Sherriff's contract.
    - President Waterman said that Council will vote on the budget amendment this Thursday.
  - **Audit**: Last few details are being inputed, bulk is done.
    - **Fund balance will be $10.8M**

- **Community Development Positions**: HR director had identified 12 candidates total. Sent resumes and questions to the Mayor. The Mayor has asked Joe and HR Director to conduct the interviews. Joe would rater the Mayor be involved.

Royal Oak Township – Oct 5 – R. Burgess, R. Byrne, P. Dostine

- **Priorities for the Week/Miscellaneous Items**
  - Hired an accountant – Nicholas Fedewa -- approximately $55 to $60 /hr. Fedewa was recommended by Pontiac Finance Director. He initially will work full time to catch the township up in the books. Produce a cash flow analysis from Aug till Dec. Work up till the end of the year. Treasury recommended the new accountant stay on pass the end of the fiscal and perhaps even longer. The work is needed.
  - Montgomery has reduced its price from $17K to $10K. Still no deal, no close out of this invoice. Robert requested an Order so he can void the contract. Treasury noted that Montgomery could still take the township to court over the matter.
  - There is an office employee that the township must provide rights and benefits under the union contract. Robert did not budget for these costs. The township attorney has counseled against eliminating her position or denying her benefits because she will grieve the case.

- **FY '16 budget**
  - Robert said a draft of the budget is completed. He's met with all the directors and elected officials regarding their budgets. He's ready to show it to the Board at the next meeting (Oct. 15) or maybe earlier for review. In the budget are CIPs which have $50,000 place holders.
  - Robert has distributed project applications for FY 16 CIPs to all the dept directors. That process is underway.
  - Robert said tax revenues will be slightly higher in FY '16 budget.
  - Oakland Co told Robert that chargebacks for 2016 will be small.
  - In 2017, the Fire, Street and Disposal funds should all break even.
  - The projected fund balance for Year End FY 16 is approximately $200K, which is less than the 15 percent recommended of the total budget amount ($2MM).
  - No money budgeted for township offices. Robert said he would have to do an amended budget should the issue arise in '16.
  - Treasury requested a copy of the draft budget.

- **Police Update**

- Robert met with Oak Park regarding police services. Last week Robert gave Oak Park a written proposal. Oak Park has promised a response in two to three weeks.

Grant School

- Robert said this is not a priority until ROT gets a police contract first.

Township-owned house

- Update: This property has not been sold yet for $975. At its last meeting, the Board approved the ***selling*** of the property, not the ***sale*** of it. At the same meeting, the Board did not approve of the rehabbing of the house for $3K. Municipal Risk (sp) sent a crew in to dry the basement out (the basement experienced water damaged due to clogged drains from area restaurants using them as grease bins) remove damaged drywall etc. It has been estimated that $3K of rehab on the house would elevate the house in price on the market from $10K to $30K.

McKenna

- In 2014 the township paid approximately $100K for McKenna's services. This year, the figure is approximately $64K. Robert has talked to the DDA and Parks about what their share in the cost will be going forward. He hopes to get a reduced price from McKenna for FY '16.

++++**Weekly Critical Issues —October 22, 2015**

- **Allen Park**— I have been advised that two new RTAB members are in the process of being appointed. They are Mark Wollenweber and Scott Lites. Wayne wants a special RTAB meeting on Monday to approve the tender. City Council approved it last night.
- **Benton Harbor**-The City Council tabled several items during the last City Council meeting. I may send someone to attend the November 2nd meeting.
- **Ecorse** – Their five year financial plan has been sent to us for review. They want the RTAB to approve on November10th. The City Council has approved. One additional RTAB member is needed (Joan Brophy). Wayne O'Neal will call at 2:30 today to discuss his concerns for the staff regarding the election. A retiree health care audit was performed internally.
- **Flint** – Lawsuit on water rates and the lead issues have Flint in a crisis mode. The City stated the State owes them a lot of money. They want the remainder of the $6M ASAP. We will be scheduling a meeting at Treasury with city officials to discuss the City's water-sewer fund, probably in early November. Brian has asked me to prepare a FY15 Performance Report of the $1.1M public safety grant, Natasha will provide information. They are concerned that we have not agreed to provide legal assistance.
- **Hamtramck**-the City ended the year with $1M in GF operating surplus. Phase 3 of the pension study will begin soon. The City Council is at odds about filling the vacancy on Council. The Circuit Court is now involved. Katrina released a Confidentiality Agreement with the former Police Chief due to a FOIA request. Two RTAB members are needed.
- **Highland Park**- Cathy has indicated that the City has over 500 aged payables including a DTE bill of $200K for the water pumping station. She said that they information in the 2014 Audit indicated that there is approximately $1.2M of accounts payable. The OPEB report from Meadowbrook indicates that the City reduced OPEB costs by $1.25M for the upcoming 12 month period.
- **Lincoln Park**-His exit will be in December. We will be discussing the final order with Brad next week. We are hoping to find several RTAB candidates soon. E-Loan may be necessary? Five RTAB members are needed. Brad feels that the 345 ballot request has a good chance of success. The MERS pension funding issue.
- **Inkster**- the City has reached an agreement with Wayne County on its $4.9M sewer debt. A judgement levy for several years will be likely be placed on the July 2016 tax roll. The City will end its fiscal year with a $1.5M fund balance. The Parks and Rec. millage may be successful.
- **Pontiac**-Jane Di Sessa will start on October 26. The Mayor and I will be meeting with two council members to discuss the hiring of an executive secretary and other issues. The Pontiac RTAB exit plan is nearing completion. The Mayor would like to do a study of the Phoenix Center. Problem with the GERS Board financial advisor and Board Members. One RTAB member is needed. Annual RTAB evaluation soon.
- **River Rouge**- the City was chosen by the Governor to be a part of the Rising Tide Initiative. An exit memo is being drafted
- **Royal Oak Township**- I will be contacting MSHDA regarding housing opportunities in the Township. Additional police discussions with Ferndale and Hazel Park are needed. Patrick and I

met with Robert on Tuesday. Montgomery and Co. the accounting firm has submitted an invoice for $17,000 and has sent me two emails. Robert has begun discussion on the new budget and will send us a draft for review. He has hired Mr. Fedewa for accounting.

- **Miscellaneous Items**—the draft of the November Governor's Memo has been sent to Angela. If any updates are necessary, please give to Eric. Discussion regarding community eligibility for FDCVT funding. The draft exit plan for several communities is nearing completion. FOIA request from Mr. Washington. Ed is attempting to get Giarmarco on a SAAG contract.

RE: Budget to Actual Revenue and Expenditure Report

Please find attached the Budget to Actual Revenue and Expenditure Report and Cash and Investment Summary for the period ending September 30, 2015 for your review and submission to the RTAB per Emergency Manager Order 20. 2015-2016 Amended Budget Amounts reflect all amendments adopted by City Council and approved by the RTAB as of September 30, 2015.

The activity shown for the prior fiscal year is unaudited and subject to change as the City continues to record annual year-end items. The City's annual audit is being conducted by Yeo & Yeo. The on-site audit work began on October 12, 2015. As required by Public Act 2: Uniform Budget and Accounting Act and City Ordinance #3855, audited financial statements for the fiscal year ending June 30, 2015 will be available no later than December 31, 2015.

Please let me know if any additional information is necessary or if you have any questions.

CITY OF FLINT

Subject: RE: Former Flint EMs
Attachments: GenCo DrComm release.pdf; Kurtz KWA.pdf; DWSD Termination Ltr.pdf

Hey Lindsey...

I can provide you with a list of the managers who worked in Flint, though I cannot promise I will be able to put you in contact with anyone directly.

I do think it is important for you to have the following background...and to reiterate that **the decision to move to KWA**, and thus the decision to use the Flint River as a temporary source (until KWA came on line) **was a decision made collectively by local officials...they mayor, city council, and others**

Please see the information below and attached for additional background on timing, decision-making, etc.

Discussions about the possible development of a Flint-area/Genesee County water system had been on-going since the early 2000's and the City of Flint had been in discussions about the possibility of joining KWA for much of that time, certainly prior to the appointment of an emergency manager (Mike Brown) in December 2011. The following M-Live articles show the city was looking at a possible move to KWA, which Genesee County strongly supported, well before a manager was appointed.

http://www.mlive.com/news/flint/index.ssf/2010/02/detroit_tells_genesee_county_w.html
http://www.mlive.com/news/flint/index.ssf/2011/01/water_pipeline_vs_flint_river.html
http://www.mlive.com/news/flint/index.ssf/2011/04/city_of_flint_still_mulling_wa.html
http://www.mlive.com/news/flint/index.ssf/2011/09/flint_officials_to_be_presente.html
http://www.mlive.com/news/flint/index.ssf/2011/12/so_far_so_good_genesee_county_1.html

Additionally, The Flint Journal supported the move to KWA in an editorial in Sept. 2011, again, prior to the appointment of a manager.
http://www.mlive.com/opinion/flint/index.ssf/2011/09/our_voice_its_decision_time_fo.html

Prior to the decision to move to KWA, which the Mayor and City Council fully supported (March 2013 Flint Journal story cites 7-1 City Council vote to join KWA); http://blog.mlive.com/newsnow_impact/print.html?entry=/2013/03/flint_city_council_approves_re.html the city's emergency manager (Mike Brown in June 2012; Ed Kurtz in Sept. 2012) twice requested permission from DWSD to blend river water with DWSD water to ensure high quality, safe drinking water for residents, while saving the city an estimated $2-3 million annually (DWSD was proposing a 5x rate increase for the City of Flint).

*It is also important to note that the Genesee County Drain Commissioner, who had been heading up the KWA project, **required** that Flint's elected leaders approve of and sign-off on the transition to KWA as he believed it was important to have the city's elected officials make the decision and not an emergency manager (see attached).*

Under PA 436, an emergency manager's approval is required for transactions of $50,000 or more, and thus Ed Kurtz did approve the eventual move to KWA, again with full support and urging from the Mayor and City Council. Kurtz's letter, detailing that decision after consideration of DWSD's "last, best offer" is attached.

*This **is not** a situation where the Mayor and Council wanted to utilize one system with the EM reversing course. **All involved** in the decision-making process agreed **KWA was the best long-term option for the City of Flint**. With Flint's decision to go with KWA, DWSD terminated Flint's contract, effective April 17, 2014 (letter attached). Given that termination, Flint had two "options:"*

-sign a long-term (30 year) agreement with DWSD, which was not economically feasible given the city's decision to go with KWA
-Use Flint River as an interim source (it had long been the city's backup) until KWA was on-line

http://www.mlive.com/news/flint/index.ssf/2014/03/flint_drinking_water_to_come_f.html

It is also important to note that the current situation in Flint has been exacerbated by years of neglect and a lack of maintenance to the decades-old system. All this said, the most important issue now is moving things forward, through the collaborative State, City, and Foundation effort to ensure safe drinking water for the residents of Flint.

Subject: Former Flint EMs

Hi Terry, Hope you're well.

We're producing a one hour documentary/podcast on Flint's water issues. Would really love to hear from the former EMs on this. Correct me if I'm wrong, but it seems there wasn't just one guy who decided to switch water sources, but maybe a few different people. Is there any way you can help me get interviews with the former EMs of Flint to talk about the decision and the issues that lead to it? Big ask, I know. But I need help if I'm going to do this right. I'm traveling now, so if you want to chat a bit, call my cell 810.923.5839.

All the best,
--

Follow Up Flag: Follow up
Flag Status: Flagged

Flint – Oct. 21 – N. Henderson, Mayor Walling, J. Freeman, F Headen, Wendy, R. Byrne, E. Cline, P. Dostine

- **Priorities**
  - Flint is publicizing today its participation in the Violence Reduction Network (VRN).
  - Flint is close to filling the planning director position. Approximately 18 applicants sought the position. A significant portion of the position will be paid by CDBG dollars.
  - 1st Quarter update Budget to Actual is completed. Henderson will be bringing it to the RTAB for review.
  - Flint submitted its FDCVT grant on time. The city is requesting grant monies for Dupont and an assessment.
  - Mayor Walling reported that the city is looking good, especially along the corridors where mowing and other general blight efforts are paying off.
- **Water**
  - Henderson reported that the transition to DWSC water was "smooth." The connection was made last Friday, Oct. 16.
  - It will take 2 to 3 weeks for DWSD water to make its way through the entire Flint water infrastructure.
  - The city of Flint will be going to Lansing next week to discuss its Water and Sewer Fund and the resources committed by the State Legislature for the DWSD re-connection.
- **Lawsuit**
  - No new developments. Henderson believes a decision will be made in November.
- **Charter Commission**
  - Still meeting regularly. The Commission will meet on a regular basis for the next 9 months or so. Mayor Walling said there is an opportunity for outside entities to provide technical assistance and other in-kind assistance to the commission as it focuses on the Charter.
- **Economic Development**
  - Mayor Walling reported that there are between 30 to 40 (smaller) economic development prospects for the city of Flint. Flint meets weekly with the MEDC and the local Chamber regarding economic development. The U of M-Flint is purchasing a building, located downtown, from First Merit Bank. Henderson said she is pursuing with the U of M-Flint a payment in lieu of

taxes because the deal would remove the building from the tax roll. The justification is although the university has its own police force, the City of Flint would still be providing fire service to the building and area.

++++**Weekly Critical Issues —October 22, 2015**

- **Allen Park**— I have been advised that two new RTAB members are in the process of being appointed. They are Mark Wollenweber and Scott Lites. Wayne wants a special RTAB meeting on Monday to approve the tender. City Council approved it last night.
- **Benton Harbor**-The City Council tabled several items during the last City Council meeting. I may send someone to attend the November 2nd meeting.
- **Ecorse** – Their five year financial plan has been sent to us for review. They want the RTAB to approve on November10th. The City Council has approved. One additional RTAB member is needed (Joan Brophy). Wayne O'Neal will call at 2:30 today to discuss his concerns for the staff regarding the election. A retiree health care audit was performed internally.
- **Flint** – Lawsuit on water rates and the lead issues have Flint in a crisis mode. The City stated the State owes them a lot of money. They want the remainder of the $6M ASAP. We will be scheduling a meeting at Treasury with city officials to discuss the City's water-sewer fund, probably in early November. Brian has asked me to prepare a FY15 Performance Report of the $1.1M public safety grant, Natasha will provide information. They are concerned that we have not agreed to provide legal assistance.
- **Hamtramck**-the City ended the year with $1M in GF operating surplus. Phase 3 of the pension study will begin soon. The City Council is at odds about filling the vacancy on Council. The Circuit Court is now involved. Katrina released a Confidentiality Agreement with the former Police Chief due to a FOIA request. Two RTAB members are needed.
- **Highland Park**- Cathy has indicated that the City has over 500 aged payables including a DTE bill of $200K for the water pumping station. She said that they information in the 2014 Audit indicated that there is approximately $1.2M of accounts payable. The OPEB report from Meadowbrook indicates that the City reduced OPEB costs by $1.25M for the upcoming 12 month period.
- **Lincoln Park**-His exit will be in December. We will be discussing the final order with Brad next week. We are hoping to find several RTAB candidates soon. E-Loan may be necessary? Five RTAB members are needed. Brad feels that the 345 ballot request has a good chance of success. The MERS pension funding issue.
- **Inkster**- the City has reached an agreement with Wayne County on its $4.9M sewer debt. A judgement levy for several years will be likely be placed on the July 2016 tax roll. The City will end its fiscal year with a $1.5M fund balance. The Parks and Rec. millage may be successful.
- ***Pontiac***-*Jane Di Sessa will start on October 26. The Mayor and I will be meeting with two* council members to discuss the hiring of an executive secretary and other issues. The Pontiac RTAB exit plan is nearing completion. The Mayor would like to do a study of the Phoenix Center. Problem with the GERS Board financial advisor and Board Members. One RTAB member is needed. Annual RTAB evaluation soon.
- **River Rouge**- the City was chosen by the Governor to be a part of the Rising Tide Initiative. An exit memo is being drafted
- **Royal Oak Township**- I will be contacting MSHDA regarding housing opportunities in the Township. Additional police discussions with Ferndale and Hazel Park are needed. Patrick and I

met with Robert on Tuesday. Montgomery and Co. the accounting firm has submitted an invoice for $17,000 and has sent me two emails. Robert has begun discussion on the new budget and will send us a draft for review. He has hired Mr. Fedewa for accounting.

- **Miscellaneous Items**—the draft of the November Governor's Memo has been sent to Angela. If any updates are necessary, please give to Eric. Discussion regarding community eligibility for FDCVT funding. The draft exit plan for several communities is nearing completion. FOIA request from Mr. Washington. Ed is attempting to get Giarmarco on a SAAG contract.

Ms. Henderson,

Please find attached the City of Flint RTAB reports for the period ended September 30, 2015. Budget amounts reflect amendments that had been adopted by Council and approved by the RTAB prior to September 30. Per our conversation with Mayor Walling last month, I have added rows illustrating Fund Balance for each fund as required by ordinance.

In your review of the attached report, please let me know if you have any questions or if any additional information is required.

Best regards,

Jody N. Lundquist

Subject: Water/Sewer Cash Position

Follow Up Flag: Follow up
Flag Status: Flagged

Rob,

I received the following from the City's Treasurer. His calculation based on a reduced collections by 22.84% estimate that cash will end $13.7M lower than my estimate in the prior transmission of $12M. As stated on the phone, the results of our collection efforts will be known in approximately 30 days as we begin shut-off notices and enforcement.

Please let me know if you have any questions.

Per Doug Bingaman:

Over the past 3 years, we have an average collection rate for water/sewer revenue of 94%. Last year, we collected 99% or our revenue. Which I contribute to our water thief program and aggressively interrupting service for non-pay.

Since 8/1/15, our collections are off 22.84%. If this continues through out FY16, our water/sewer cash will be reduced by $13,731,790, if all else stays the same.

$35,500,000 Water Revenue
30,084,895 Sewer Revenue

$65,584,895
x 91.67% 11 months
$60,121,673
x 22.84%
$13,731,790

City of Flint, Michigan

RESOLUTION NO.: 150872

PRESENTED: 10-12-15

ADOPTED: _____

RESOLUTION AUTHORIZING A BUDGET AMENDMENT TO INCREASE THE WATER AND SEWER BUDGET BY $12,000,000.00 AND TO ALLOW FOR EXPENDITURES FROM THOSE FUNDS TO FACILITATE THE SWITCH BACK TO THE DWSD WATER SUPPLY

BY THE CITY ADMINISTRATOR:

Due to the serious health threat facing the residents of the City of Flint, the Administration has been diligently working toward a feasible and speedy resolution to the City's water crisis; and

Through the commitment of $6 million from the State of Michigan and $4 million from the C.S. Mott Foundation, a total of $10 million in contributions have been pledged to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department and its successor, the Great Lakes Water Authority, until the City is able to receive water from the Karegnondi Water Authority (KWA).

The City Administrator and the Mayor have agreed to the acceptance of these funds. At this time, the KWA reports that construction is on schedule to be completed by June 30, 2016. The City estimates that the total cost to purchase water through DWSD will be $12 million for 9 months. The balance of $2 million not covered by the generous pledges of State and Local resources is the responsibility of the City.

A budget amendment is necessary to reflect both an increase in revenues for the receipt of $10 million in assistance and $2 million of budgeted Use of Fund Balance and an increase in expenditures of $12 million for the purchase of DWSD water supply.

IT IS RESOLVED that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable. Specific revenue and expenditure line items will be provided by the Chief Financial Officer.

150875

RESOLUTION NO.: _____

PRESENTED: 10-12-15

ADOPTED: _____

RESOLUTION AUTHORIZING THE CITY ADMINISTRATOR TO TAKE NECESSARY ACTION TO CONVERT TO THE DETROIT WATER SYSTEM

BY THE CITY ADMINISTRATOR:

In order to promote the health, safety and welfare of this community, it is in the best interests of the City of Flint for the Detroit Water and Sewer Department (DWSD) to supply the City with treated water pending completion of the Karegnondi Water Authority; and

In order for DWSD to supply the City with water, it will be necessary to utilize pipe owned by the Genesee County Drain Commission (GCDC); and

The City, DWSD and GCDC are actively negotiating the terms of the necessary agreements to ensure this transition occurs as soon as possible; and

IT IS RESOLVED that the City Administrator is hereby authorized to enter into agreements with DWSD and GCDC for conversion to the Detroit Water System.

Subject: state money for detroit water

Sara:
I was at a City Council meeting last night when Flint City Administrator Natasha Henderson said the state has only wired Flint $2 million of the $6 million approved by the state Legislature.
She said the city has been told it will receive an additional $2 million in January and another $2 million in April.

Henderson said she's asked that the money be sent immediately because the city was required to pay Detroit the entire $12 million upfront, before the water was reconnected, and its water and sewer fund balance has dropped significantly as a result.
Several council members also spoke about this, and Council President Josh Freeman called the payment plant "beyond ridiculous" given the city's financial position.
Is there someone who can talk to us about this?

Dempkowski, Angela (Treasury)

From: Muchmore, Dennis (GOV)
Sent: Thursday, October 22, 2015 10:27 AM
To: Workman, Wayne (TREASURY); Saxton, Thomas (Treasury)
Subject: RE: state money for detroit water

I don't know why she would say this after all the work we've done to get it to this point. We set up the new deal with GLWA, got the money, along with the leadership of Ananich and that of the Republican leadership and Approps. folks, and Treasury is administering. We gave the city the $2M earlier so what's she talking about?

Please see below.

No good deed goes unpunished. This looks like may be next big issue.

I thought GLWA-DWSD was NOT going to require the entire sum all up front?

To: Wurfel, Sara (GOV) <Wurfels@michigan.gov>
Subject: state money for detroit water

Sara:
I was at a City Council meeting last night when Flint City Administrator Natasha Henderson said the state has only wired Flint $2 million of the $6 million approved by the state Legislature.
She said the city has been told it will receive an additional $2 million in January and another $2 million in April.
Henderson said she's asked that the money be sent immediately because the city was required to pay Detroit the entire $12 million upfront, before the water was reconnected, and its water and sewer fund balance has dropped significantly as a result.
Several council members also spoke about this, and Council President Josh Freeman called the payment plant "beyond ridiculous" given the city's financial position.
Is there someone who can talk to us about this?
Thanks,

Ron Fonger

To: Wurfel, Sara (GOV)
Cc: Weiss, Kurt (DTMB); Wurfel, Brad (DEQ)
Subject: Issue

Just spoke with Wayne. He has calls in to Flint and we are awaiting written confirmation that the city made the up-front payment to DWSD.

If you need to respond before we receive that (from the city admin. or the mayor) he suggests something along the lines of the following:

Our understanding of the original plan to re-connect with DWSD called for monthly payments from the city. Without consulting the State or the Mott Foundation, the city agreed to an up-front payment to DWSD (of the full amount).

Upon receiving written confirmation that the full payment was made to DWSD, the State will wire to the city, the remainder of the $6m appropriation for the reconnection to DWSD.

Cary,

Randy and I were just discussing, given the apparent growing financial stress in Flint (especially in the Water/Sewer funds), that an experienced review of their monthly financial reports might be helpful.

Is this something that your team could possibly do. We are not looking for an extensive analysis, but more of a quick evaluation.

I have attached a copy of the latest reports, so you can see an example of what we are receiving.

I am sure that we will need to discuss further, so just let me know.

Thanks.

RE: Budget to Actual Revenue and Expenditure Report

Please find attached the Budget to Actual Revenue and Expenditure Report and Cash and Investment Summary for the period ending August 31, 2015 for your review and submission to the RTAB per Emergency Manager Order 20.

As noted with the transmission of the reports for the August 12, 2015 and September 9, 2015 meetings of the RTAB, please be aware that the City is still in the process of closing the fiscal year ended June 30, 2015. The activity shown for the prior fiscal year is unaudited and subject to change as a result of that process. The City's annual audit is scheduled to be conducted by an external CPA firm during the month of October 2015. As required by Public Act 2: Uniform Budget and Accounting Act and City Ordinance #3855, audited financial statements for the fiscal year ending June 30, 2015 will be available no later than December 31, 2015.

Please let me know if any additional information is necessary or if you have any questions.

Workman, Wayne (TREASURY)

From:	Christenson, Elysse (TREASURY)
Sent:	Thursday, October 22, 2015 4:11 PM
To:	Fielek, Joseph L. (Treasury); Workman, Wayne (TREASURY); Byrne, Randall (Treasury)
Cc:	Sygo, Jim (DEQ); Saxton, Thomas (Treasury); Gross, Sara (Treasury); Lindsay, Brenda (Treasury)
Subject:	RE: Wire Transfer Information
Attachments:	3703 - New Template.pdf

To initiate the wire request, please complete the attached form and fax it to Treasury's Office of Financial Services at (517) 636-5401. Being that this is a non-repetitive wire, we will need to obtain Joe Fielek or Tom Saxton's approval prior to processing. In addition to the form, please provide us with a brief memo explaining the reason for the wire.

Staff is available to process wires until 4:30 each day; however, being that we will need to obtain approvals on our end, we encourage you to fax the requested memo and form to us by 1:30.

Feel free to contact me if you have further questions or would like assistance in completing the form.

Thanks,

Elysse Christenson, Departmental Analyst
Banking and Disbursements Section
Office of Financial Services
Michigan Department of Treasury
Ph: 517.636.5384
Christensone1@michigan.gov

Jim:

I have been asked by Wayne Workman to forward this to you. This is the documentation from Flint regarding their payment to DWSD of the $10M deposit. I understand that you will forward to Joe Fielek to complete the reimbursement transaction.

Thanks,
Randy

Good afternoon, Gentlemen.

Please find the City's wire transfer information below.

Bank Name: JPMorgan Chase
Routing [redacted]
Acct# [redacted]
Account Name: [redacted]
Contact: Amanda Trujillo

A copy of the outgoing wire transfer confirmations totaling $10 million is attached. The first wire was sent to DWSD on Friday, October 16, in the amount of $2 million. The remaining balance of $8 million was sent on Monday, October 19, in two separate transactions of $3 and $5 million due to max transfer limitations.

Please let me know if you have any questions or if I may be of any further assistance.

Best regards,

Rep. Neely-
The city made a deal with the DWSD without informing us beforehand. It required an upfront payment, which as I'm sure you are aware isn't the right way to conduct the transaction as expectations were that it would be paid out over time with use. We are taking care of the misstep to get it all back on track.

Ms. Henderson,

Please find attached the City of Flint RTAB reports for the period ended September 30, 2015. Budget amounts reflect amendments that had been adopted by Council and approved by the RTAB prior to September 30. Per our conversation with Mayor Walling last month, I have added rows illustrating Fund Balance for each fund as required by ordinance.

In your review of the attached report, please let me know if you have any questions or if any additional information is required.

Changes to Flint Water System Made By Local Leaders, Not Emergency Managers
Author: Darnell Earley, ICMA-CM, MPA

It is critically important that the record be set straight about the decision-making and approval processes that led to Flint joining the Karegnondi Water Authority (KWA) with the use of Flint River water as the interim water supply. The fact is, that the river has served and been used as the back-up supply for decades, and this was the rationale given to me by staff and Mayor Walling, who also serves as chairperson of the KWA board. Contrary to reports in the media and rhetoric being espoused by individuals, the decision was made at the local level, by local civic leaders.

The decision to separate from Detroit Water and Sewerage Department and go with the KWA, which included the decision to pump Flint River water in the interim, were both a part of a long-term plan that was approved by Flint's Mayor, and confirmed by a City Council vote of 7-1 on March 25, 2013. This plan was presented to me when I was appointed as Flint Emergency Manager in October 2013 - a full seven months after City Council's affirmative vote.

Genesee County Drain Commissioner Jeff Wright also made the affirmative vote by the City Council a necessary condition of joining the KWA, and applauded the decision in a March 26, 2013 news release, saying, "...I have said from the beginning that this decision must be made by Flint's City Council and Mayor...I am glad that the residents of Flint were able to have their voices heard via their elected officials."

The Mayor's approval of the plan, and the subsequent near unanimous vote by City Council were in no way coerced, forced or demanded by the State, nor any Emergency Manager. Council's affirmative vote was supported and officially signed into EM Executive Order by then Emergency Manager Edward Kurtz on March 29, 2013. A subsequent order Kurtz signed on June 26, 2013, speaks specifically to the, "... upgrading of the Flint Water Plant to ready it to treat water from the Flint River to serve as the primary drinking water source for approximately two years and then converting to KWA delivered lake water."

When I began my term as Emergency Manager, it fell to me to oversee the implementation of the previously accepted and approved plans, as the DWSD terminated the contract with Flint in April 2014. It did not fall to me to question, second guess or to invalidate the actions that were taken prior to my appointment.

At the time the decision was made there was no way to predict such an unfortunate outcome. I would also offer that had local leaders known then what they know now, parts of their decision may have been entirely different. What the City of Flint and the State of Michigan are now dealing with is the management of an unintended consequence resulting in a negative outcome from an otherwise sound public policy decision. There is no "blame" to affix on any Emergency Manager for that.

As the solutions are put into place to address the serious concerns at hand, I believe that everyone's attention should now turn toward another serious concern -- what is being done in the long-term to replace the aged and crumbling water distribution systems that exists throughout Flint and Genesee County, which was a major contributing factor to this serious issue in the first place.

I am a strong believer that the truth supported by fact, speaks for itself. This was a local decision that was made by local civic leaders. Anyone who says otherwise is being disingenuous for whatever reason.

Sincerely,

Darnell Earley, ICMA-CM, MPA

Good afternoon, Gentlemen.

Please find the City's wire transfer information below.

Bank Nam
Routing #
Acct#:
Account Name:
Contact: Amanda Trujillo

A copy of the outgoing wire transfer confirmations totaling $10 million is attached. The first wire was sent to DWSD on Friday, October 16, in the amount of $2 million. The remaining balance of $8 million was sent on Monday, October 19, in two separate transactions of $3 and $5 million due to max transfer limitations.

Please let me know if you have any questions or if I may be of any further assistance.

Best regards,

Jody N. Lundquist

Mike,

Below is a link to the service manual for the ice machine. The preventative maintenance is on page 18 of the manual, which needs to be done every 6 months. There is also a bin cleaning procedure that should be done every 3 months. Let me know if this is something that your staff could do for us.

If I can ask what is your cost to have them on contract for flint? Can you change it? I'm not sure where Parks are from.

I have three refrigeration guys in the east zone. But at the very least we could pm it and change the filters for you.

Just my thoughts

Good evening Tom,

Normally when DEQ sends a wire, we work with our MDOT Accounting Service Center (ASC) to process. Obviously this scenario is a tad different from the normal practice but it is my understanding from the conversation below, that Treasury is processing the payment on our behalf. Therefore, I believe my request to the ASC should be to process the MAIN accounting entries to reflect the wire only.

Please advise.

Hi all,

We've received the Flint wire request from Jennifer Dingman for $4,000,000. I've forwarded to Joe for his approval. Once we receive his approval, we'll process the request and send fax confirmation to Jennifer Dingman. The payment will be processed today.

Feel free to contact me with questions.

Thanks,

Subject: RE: Wire Transfer Information

To initiate the wire request, please complete the attached form and fax it to Treasury's Office of Financial Services at (517) 636-5401. Being that this is a non-repetitive wire, we will need to obtain Joe Fielek or Tom Saxton's approval prior to processing. In addition to the form, please provide us with a brief memo explaining the reason for the wire.

Staff is available to process wires until 4:30 each day; however, being that we will need to obtain approvals on our end, we encourage you to fax the requested memo and form to us by 1:30.

Feel free to contact me if you have further questions or would like assistance in completing the form.

Dear Robert,

The Flint water crisis is a failure of government at every level, and I am committed to increasing transparency and finding answers to ensure that these failures never happen again. That's why I have called for an investigation into the causes of water problems in Flint.

Simply put, high lead levels in Flint's drinking water are unacceptable, and there must be accountability.

As part of my ongoing efforts, I am holding a **telephone town hall with constituents on Wednesday, October 28th, at 7 p.m. ET** to provide an update on my efforts. I'll be joined by both Dr. Mona Hanna-Attisha and Dr. Marc Edwards, who both conducted critical tests that exposed unacceptable lead levels in Flint. On the live call, we will also answer questions from Flint residents.

If you're interested in joining our conversation, please RSVP here, or fill out the form below.

What is your preferred Prefix (Mr./Mrs./Ms./Dr., etc)?

For months, I have been pressing state and federal agencies for immediate resources and action to improve and restore confidence in water quality At the federal level, I am pushing for resources to ensure the safety of water, but also make much-needed repairs to our city's aging water system and infrastructure. *The Flint Journal* covered these federal efforts in March. You can view them here.

Additionally, I welcome the announcement recently that the U.S. Environmental Protection Agency will send technical advisors to Flint to assist the city and state. I have repeatedly asked the EPA to send these much-needed experts to help improve the water quality and hopefully restore some public confidence in the safety of our water.

Serious issues remain, and there is a long way to go before complete confidence in the city's drinking water is restored. I am committed to working to ensure that Flint residents get a thorough investigation and answers to their questions.

I hope you'll join me next Wednesday for a telephone town hall update on Flint water.

Sincerely,

Dan Kildee

Subject: PRESS RELEASE: City of Flint Department of Public Works Publishes October Water Quality Report
Attachments: 3rd Quarter CoF Water Quality Report (2).pdf; October 2015 Water Quality Report.pdf

For Immediate Release

City of Flint DPW Publishes and Distributes October Water Quality Report to Water Customers

Flint, Michigan – October 26, 2015 – The City of Flint Department of Public Works has published its Quarterly Water Quality Report for October, 2015. The Quarterly Water Quality Report provides important information about Flint's drinking water, including information about the water source, current drinking water issues, lead information, water filters, testing, 3rd quarter news, and temporary expectations when changing water sources. The report is being mailed to all City of Flint water customers and contains the following highlighted events by month:

July

- Completed the evaluation of over 8000 valves in the system and identified over 2300 that are currently inoperable. The repair of these valves will be budgeted and worked into our multi-year Capital Improvement Plan.

August

- Successfully completed the installation of Granulated Activated Carbon at the water treatment plant which reduced the TTHM level in the water and helped bring the City back into compliance with the Safe Drinking Water Act.

September

- Leak Detection on all 600 miles of the distribution system has started and is over halfway complete. Several dozen leaks have been identified and repairs continue as more leaks are found. This has decreased the amount of water loss existing in the system.

- Construction of a load out facility at our wastewater plant is on target for completion by November and will allow the City to eliminate the use of the incinerator resulting in significant annual savings.

- Over 3500 new water meters have been installed this year creating better accuracy, accountability, and decreasing the number of estimated reads on utility bills.

The report is the last to be issued showing the Flint River as a primary drinking water source and contains information on what temporary issues residents can expect during the change in water source, including hydrant flushing and possible discoloration as the water goes through the system. The report also references the submittal of a plan to the MDEQ for the addition of corrosion control agents to treated water delivered from Detroit.

Recent issues with lead leaching into drinking water as the reason for the switch in water source are mentioned in the report along with information regarding lead safety, free in-home water testing and free filters available to residents. A table containing all of the third quarter "Regulated Detected Contaminants", a feature of every water quality report, appears at the end of the publication.

Residents with questions or concerns about water quality can call the Water Treatment Plant at 810-787-6537 or email flintwater@cityofflint.com. Continuing information on water will be provided via the City of Flint's website, cityofflint.com.

The Quarterly Water Quality Report provides important information about your drinking water. This report includes information about the water source, current drinking water issues, lead information, water filters, 3rd quarter work accomplished, and a water timeline of events. The City of Flint Department of Utilities is dedicated to providing quality drinking water to the residents of the community. The Flint Water Plant operates and maintains a certified drinking water laboratory to assure compliance with all state and federal regulations, and is committed to prompt and thorough notification to the consumers if there is any reason for concern about the quality of the drinking water. Information about your drinking water is available on the City of Flint web page at www.cityofflint.com or by calling the City of Flint Water Plant at **(810) 787-6537**. The Safe Drinking Water Hotline at **(800) 426-4791** is a resource for health related questions and water quality issues. General drinking water information can also be found on the U.S. Environmental Protection Agency (EPA) web site at www.epa.gov/safewater/.

Water Source

The City of Flint began using the Flint River as a water source in May of 2014. After 16 months of treating water from the Flint River, the City became aware that the level of corrosiveness found in Flint River water could result in more lead leaching from service lines and household plumbing. Reports of elevated blood lead levels in children and expert analysis resulted in the City's Technical Advisory Committee making a recommendation to return to the previous source of water while waiting for the KWA to provide water from Lake Huron.

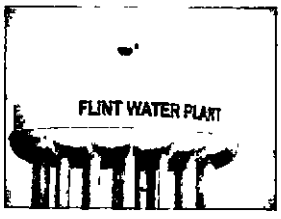
On Friday October 16th, 2015, with the consent of Governor Snyder, the City returned to Detroit as the primary source of drinking water. The decision, along with the Technical Advisory Committee's recommendation followed two consecutive lead and copper test periods that exceeded 5ug/L which calls for additional action. In addition to the switch, the City has submitted a final corrosion control design to the DEQ for comments and approval. The City has requested to use the corrosion control as an additive to treated water it will be required when the city begins treating raw water from the Karegnondi Water Authority which is anticipated to begin in the summer of 2016.

In order to make the transition possible, the City contributed $2 Million dollars, the Mott Foundation contributed $4 Million dollars, and the State of Michigan contributed $ 6 Million dollars.

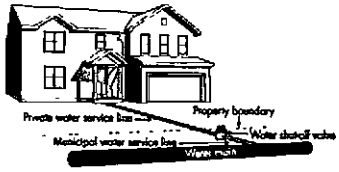
Current Drinking Water Issues & Lead Information

There has been a heightened awareness of lead leaching into drinking water through service lines and household plumbing. The City's Technical Advisory Committee has enlisted the support of EPA lead experts and is working with State of Michigan representatives to increase testing, rebuild public confidence, and implement long-term solutions to lead. It is recommended that everyone get their water tested, obtain a water filter, and check with a plumber to evaluate the type and condition of your household plumbing. The City is currently mapping all of its lead service lines and working to develop a program to get lines changed over time.

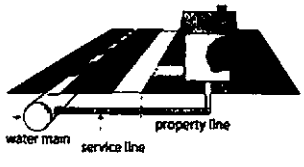
If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Flint is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 5 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.



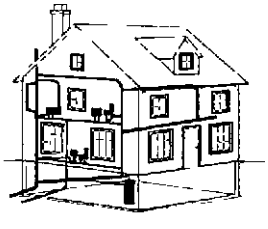
No lead in water leaving the Treatment Plant.



Little or no lead in water in the transmission mains.



Lead can leach into water through service lines.



Lead can leach into water through household plumbing.

Water Filters & Testing

Free water filters have been made available to current Flint residents at several locations. The MDHHS and the Genesee County Community Action Resource Department (GCCARD) are providing Free National Sanitation Foundation certified water filters at the following locations.

Residents receiving MDHHS assistance are encouraged to visit either the **125 E. Union St.** or **4809 Clio Rd. MDHHS** office location to obtain a free, certified home water filter. Residents who are not currently enrolled in MDHHS assistance programs should visit the (GCCARD) offices located at **2727 Lippincott** and **601 N. Saginaw** in Flint.

Staff will be onsite at all four locations from **9 a.m. to 4 p.m., Monday through Friday**, to distribute filters and assist residents who have questions about proper installation.

If you want more information on obtaining a water filter, please call 211.

Other suggestions related to water safety and testing:

- We recommend that everyone get their water tested. Call us at (810)-787-6537.
- Contact the Health Department about having your child's blood tested (810)-257-3612.
- It is advisable to have a plumber check your household plumbing.
- Check your faucet aerator (large lead solder particles can occasionally get lodged in here).

Temporary issues to be aware of when Changing Water Sources

Changing water sources back to Detroit will not fully eliminate the lead concerns. The potential for lead to leach off of certain water service lines or household plumbing will continue to exist regardless of the water source. The City is committed to increased testing, better communication, and developing a lead service line map to identify all of the City owned lead service lines.
As the city changes water sources you can expect the following:

- It could take up to three weeks for the switch in water source to reach all taps in the City.
- Over the next several weeks, we will be winterizing our hydrants which will result in discoloration of the water but will also help accelerate the water flowing through the system.
- Lead will continue to leach off of certain service lines and household plumbing.
- Main breaks could result as a change in source water occurs.
- Water could have discoloration or cloudiness, if this happens, run your faucet until the water clears, if this lasts longer than 20 minutes please report it to our water service center at (810)-766-7202.

Water Timeline

A timeline of events, beginning with signing the KWA contract leading up to the current status of switching back to our previous source of water is available on the City website and can be found by visiting the "water" page located under "residents". Please email flintwater@cityofflint.com with your questions or to request a water test or, call the Water Plant at (810)-787-6537.

3rd Quarter Events

July

- Completed the evaluation of over 8000 valves in the system and identified over 2300 that are currently inoperable. The repair of these valves will be budgeted and worked into our multi-year Capital Improvement Plan.

August

- Successfully completed the installation of Granulated Activated Carbon at the water treatment plant which reduced the TTHM level in the water and helped bring the City back into compliance with the Safe Drinking Water Act.

September

- Leak Detection on all 600 miles of the distribution system has started and is over halfway complete. Several dozen leaks have been identified and repairs continue as more leaks are found. This has decreased the amount of water loss existing in the system.
- Construction of a load out facility at our wastewater plant is on target for completion by November and will allow the City to eliminate the use of the incinerator resulting in significant annual savings.
- Over 3500 new water meters have been installed this year creating better accuracy, accountability, and decreasing the number of estimated reads on water & sewer bills.

Contact Information

Water Treatment Plant - (810)-787-6537
Request a water test.
Request a tour of the Plant.
Ask questions about water quality.

Water Service Center - (810)-766-7202
Report a water leak or other system issues.

Water Pollution Control - (810)-766-7210
Inquiries related to wastewater treatment.
Inquiries related to converting methane gas into energy.

Customer Service – (810)-766-7015
Questions about your water & sewer bill.

Water Filters – 211
Questions about water filters.

2015 3rd Quarter Regulated Detected Contaminants – **Flint River as Source**

Inorganic & Organic Chemicals, Metals, and Pesticides – Monitored at treatment plant						
Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Inorganic Chemicals						
Fluoride	mg/L	4	4	0.84	0.64 – 0.84	No
Nitrate	mg/L	10	10	N.D.	N/A	No
Metals						
Barium	mg/L	2	2	0.02	N/A	No

More than 100 other chemicals were monitored from July through September that were not detected.

The various classification groups of these chemicals include metals, carbamates, herbicides, pesticides, organics, and radiologicals.

Total Organic Carbon, TOC - Monitored at treatment plant			
Regulated Contaminant	Required Monthly % Removal	Minimum Monthly % Removal	Monthly % Removal Ranges
Total Organic Carbon	50	60	60 - 87

Turbidity - Monitored at treatment plant		
Highest Single Measurement (Cannot exceed 1NTU)	Lowest Monthly % of Samples Meeting Turbidity Limit (0.3 NTU in 95% of samples)	Violation
0.18	100 %	No

Disinfectant Residuals – Monitored in the distribution system						
Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Total Chlorine Residual	mg/L	4.0	4.0	4.0	0.2 – 4.0	No

Microbiological Contaminants - Monitored in the distribution system				
Regulated Contaminant	MCLG	MCL	Highest Number detected (in 1 month)	Violation
Total Coliform bacteria	0	The presence of coliform bacteria in > 5% of monthly samples	1	No
E. coli Bacteria	0	0	0	No

Lead & Copper – Monitored from consumers tap					
Regulated Contaminant	Unit of Measure	MCLG	Action Level AL	Number of samples over AL	Total # of Samples Tested from January - September
Lead	ug/L	0	15	16	189
Copper	mg/L	1.3	1.3	0	189

Disinfection By-Products - Monitored in the distribution system and from treatment plant						
Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Total Trihalomethanes (TTHM)	ug/L	n/a	80	90.3	42.6 – 90.3	N/A*
Haloacetic Acids (HAA)	ug/L	n/a	60	15.0	2.0 – 15.0	N/A*
Bromate	ug/L	10	10	N.D.	N/A	N/A*

*Violation based on locational running annual average for TTHM & HAA5, violation for bromate based on yearly average.

Key to the Detected Contaminant Tables		
Symbol	**Abbreviation for**	**Definition/Explanation**
>	Greater than	
AL	Action Level	The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements which a water system must follow.
HAA5	Haloacetic Acids	HAA5 is the total of bromoacetic, chloroacetic, dibromoacetic, dichoroacetic, and trichloroacetic acids. Compliance is based on the total .
LRAA	Locational Running Annual Average	
MCL	Maximum Contaminant Level	The highest level of a contaminant that is allowed in water. MCLs are set as close to the MCLG's as feasible using the best available treatment technology
MCLG	Maximum Contaminant Level Goal	The level of contaminant in drinking water below which there is no known or expected risk to health.
mg/L	Milligrams per Liter	A milligram = 1/1000 gram 1 milligram per liter is equal to 1ppm
MRDL	Maximum Residual Disinfectant Level	The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MRDLG	Maximum Residual Disinfectant Level Goal	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRLDG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.
n/a	Not Applicable	
ND	Not Detected	
NTU	Nephelometric Turbidity Units	Measures the cloudiness of water.
pCi/L	Picocuries per Liter	A measure of radioactivity. Picocurie (pCi) means the quantity of radioactive material producing 2.22 nuclear transformations per minute.
ppb	Parts Per Billion (one in one billion)	The ppb is equivalent to micrograms per liter. A microgram = 1/1000 milligram.
ppm	Parts Per Million (one in one million)	The ppm is equivalent to milligrams per liter. A milligram = 1/1000 gram.
RAA	Running Annual Average	
TT	Treatment Technique	A required process intended to reduce the level of a contaminant in drinking water.
TTHM	Total Trihalomethanes	Total Trihalomethanes is the sum of chloroform, bromodichloromethane, dibromoochloromethane and bromoform. Compliance is based on total.
ug/L	Micrograms per Liter	A microgram = 1/1,000,000 gram 1 microgram per liter is equal to 1ppb

For Immediate Release

City of Flint DPW Publishes and Distributes October Water Quality Report to Water Customers

Flint, Michigan – October 26, 2015 – The City of Flint Department of Public Works has published its Quarterly Water Quality Report for October, 2015. The Quarterly Water Quality Report provides important information about Flint's drinking water, including information about the water source, current drinking water issues, lead information, water filters, testing, 3rd quarter news, and temporary expectations when changing water sources. The report is being mailed to all City of Flint water customers and contains the following highlighted events by month:

July

- Completed the evaluation of over 8000 valves in the system and identified over 2300 that are currently inoperable. The repair of these valves will be budgeted and worked into our multi-year Capital Improvement Plan.

August

- Successfully completed the installation of Granulated Activated Carbon at the water treatment plant which reduced the TTHM level in the water and helped bring the City back into compliance with the Safe Drinking Water Act.

–CONTINUE–

Dayne Walling
Mayor

Natasha L. Henderson
City Administrator

September

- Leak Detection on all 600 miles of the distribution system has started and is over halfway complete. Several dozen leaks have been identified and repairs continue as more leaks are found. This has decreased the amount of water loss existing in the system.
- Construction of a load out facility at our wastewater plant is on target for completion by November and will allow the City to eliminate the use of the incinerator resulting in significant annual savings.
- Over 3500 new water meters have been installed this year creating better accuracy, accountability, and decreasing the number of estimated reads on utility bills.

The report is the last to be issued showing the Flint River as a primary drinking water source and contains information on what temporary issues residents can expect during the change in water source, including hydrant flushing and possible discoloration as the water goes through the system. The report also references the submittal of a plan to the MDEQ for the addition of corrosion control agents to treated water delivered from Detroit.

Recent issues with lead leaching into drinking water as the reason for the switch in water source are mentioned in the report along with information regarding lead safety, free in-home water testing and free filters available to residents. A table containing all of the third quarter "Regulated Detected Contaminants", a feature of every water quality report, appears at the end of the publication.

Residents with questions or concerns about water quality can call the Water Treatment Plant at 810-787-6537 or email flintwater@cityofflint.com. Continuing information on water will be provided via the City of Flint's website, cityofflint.com.

CALL TO ORDER

ROLL CALL

PLEDGE OF ALLEGIANCE

PRESENTATION OF COMMITTEE/COUNCIL MINUTES

150883 Summary Minutes/Flint City Council/Regular Meeting/October 12, 2015

Summary Minutes of the Flint City Council regular meeting held Monday, October 12, 2015, at 6:20 p.m., in the City Council Chambers, 3rd Floor, City Hall.

PUBLIC HEARINGS

PUBLIC COMMENT

Per the amended Rules Governing Meetings of the Council (as adopted by the City Council on Monday, April 27, 2015), members of the public may address the Council for three (3) minutes on ANY ITEM PERTAINING TO THIS AGENDA.

PETITIONS AND UNOFFICIAL COMMUNICATIONS

150884 Government Affairs Organization/Comcast

Communication dated October 16, 2015, Comcast to Flint City Clerk, re: Mr. John P. Gardner, Director, External Affairs, is the new Comcast government affairs liaison for the City of Flint.

COMMUNICATIONS FROM CITY OFFICIALS

150885 Traffic Engineering/Closure Permits

Lane Closures (3) dated October, 2015, re: (1) Selby Street (installing gas services-Nov. 6th); (2) Court Street (water tap-Nov. 2nd); and (3) Selby Street (installing gas main-Oct. 26th).

RESOLUTIONS

RESOLUTIONS - MAY BE REFERRED FROM COTW

150886 Brown & Sons Co./Annual Supply/Brake Parts, Bulbs, Breakers, Sprays and Filters

Resolution resolving that the Finance Department is hereby authorized to issue purchase orders for FY2016, FY2017, and FY2018 to Brown & Sons Co. for the annual supply of brake parts, bulbs, breakers, sprays, and filters, as requested by Fleet, in an annual amount NOT-TO-EXCEED $140,000.00, for an aggregate amount of $420,000.00 (pending adopting of the FY18 Budget), AND, resolving that the Finance Department has the discretion to spend an additional amount of NO-MORE-THAN 5% of the annual requested spend amount to Brown & Sons Co. for unanticipated requests that may be submitted during the next three years [Fleet/Central Garage Fund Acct. No. 661-000.000-110.400]. [City Administrator Submission No. CA1022015]

150887 CO#1/Contract/Zito Construction/Water Main Cut-In Project

Resolution resolving that the Mayor and City Administrator do all things necessary to enter into change order #1 to the contract with Zito Construction to extend the contract into the current fiscal year and pay additional work that was needed to complete the project, as requested by the Water Plant, in an amount NOT-TO-EXCEED $19,570.00, for a revised contractual amount of $695,870.00 [Water Fund Acct. No. 591-536.100-801.000]. [City Administrator Submission No. CA1032015]

150888 Contract/Stansley Industries/Biosolids Sludge Transportation-Hauling Services

Resolution resolving that the Mayor and City Administrator are authorized to enter into a three-year contract with Stansley Industries for [a] biosolids sludge cake transportation/hauling agreement, as requested by the Water Pollution Control, for a FY2016 amount of $60,000.00, and pending adoption of FY2017 [Budget] of $80,000.00, and FY2018 Budget amount of $85,000.00, for a total award of $225,000.00 [Sewer Fund Acct. No. 590-550.100-801.500]. [City Administrator Submission No. CA1042015]

150889 Contract/Waste Management-Venice Park Landfill/Biosolids Sludge Disposal Services

Resolution resolving that the Mayor and City Administrator are authorized to enter into a three-year contract with Waste Management/Venice Park for the disposal of the biosolids sludge cake, as requested by the Water Pollution Control, for a FY2016 amount of $150,000.00, and pending adoption of FY2017 and FY2018 Budget amounts of $200,000.00 each year, for a total award of $550,000.00 [Sewer Fund Acct. No. 590-550.100-801.500]. [City Administrator Submission No. CA1052015]

150890 Budget Amendment/Department of Public Works (DPW)/Michigan Department of Transportation (MDOT) Contracts

Resolution resolving that the Department of Public Works' FY2016 Budget shall be amended with the transfer of $189,301.57 from fund balance to Professional Services Line Item No. 202-441.702-801.000. [NOTE: In order to comply with the contractual agreement between MDOT and DPW for bridge work on I-69, and the contractual agreement between MDOT, the City of Flint, and Rowe Professional Services for the Leith Street-Stewart Avenue Bridge Project, it is necessary to replace funds liquidated during the year-end closing process and increase the FY2016 Budget with those remaining funds, for remaining project funding in the amounts of $101,432.82 and $87,868.75, respectively.] [City Administrator Submission No. CA1062015]

150891 Contract/Fleis & Vandenbrink/Preliminary Design and Engineering Services/Fenton Road Project

Resolution resolving that the Mayor and City Administrator are authorized to enter into a contract with Fleis & Vandenbrink using TIP funds for the preliminary design and engineering services for the Fenton Road Project, as requested by Transportation, in an amount NOT-TO-EXCEED $156,748.60 [Major Street Fund Acct. No. 202-441.702-801.000]. [City Administrator Submission No. CA1072015]

150892 Contract/Wade Trim, Inc./Preliminary Design and Engineering Services/Kearsley Street Rehabilitation Project

Resolution resolving that the Mayor and City Administrator are authorized to enter into a contract with Wade Trim, Inc. using TIP funds for the preliminary design and engineering services for the Kearsley Street Rehabilitation Project, as requested by Transportation, in an amount NOT-TO-EXCEED $94,000.00 [Major Street Fund Acct. No. 202-441.702-801.000]. [City Administrator Submission No. CA1082015]

150893 Charitable Gaming License/State of Michigan Lottery Charitable Gaming Division/Flint Cultural Center Corporation, Inc./Raffle

Resolution recognizing the Flint Cultural Center Corporation, Inc. as a non-profit organization operating in the City of Flint for the purpose of obtaining a charitable gaming license, issued by the Michigan Lottery Charitable Gaming Division, relative to conducting a raffle during their "Night at the Museum" event on November 14, 2015, as allowed by Act 382 of the Public Acts of 1972, as amended. [City Administrator Submission No. CA1092015]

SUMMARY FOR 10/26/2015 CITY COUNCIL AGENDA

150873 Summary Minutes/Flint City Council/Regular Meeting/September 28, 2015

Summary Minutes of the Flint City Council regular meeting held Monday, September 28, 2015, at 6:01 p.m., in the City Council Chambers, 3rd Floor, City Hall.

A motion was made by Councilperson Mays, seconded by Councilperson Kincaid, that this matter be Placed on File. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 1 - Councilperson Winfrey

150874 Traffic Engineering/Closure Permit

Short-Term Street/Lane Closure Permit dated October 7, 2015, re: Kearsley, Robert T. Longway, Horrigan, Court, and Crapo Streets on Saturday, October 10th (Making Strides Against Breast Cancer Walk).

A motion was made by Councilperson Mays, seconded by Councilperson Nelson, that this matter be Placed on File. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 1 - Councilperson Winfrey

150828.1 Approval/Obsolete Property Rehabilitation District/Lapeer Road and Averill Avenue

Resolution resolving that the legally described parcels of land situated within the City of Flint, Genesee County, and State of Michigan, be and are hereby established as an Obsolete Property Rehabilitation District (3501 Lapeer Road Area District) pursuant to the provision of the Public Act 146 of 2000, as amended. [NOTE: The district encompasses properties located at 3501 Lapeer Road, 3711 Lapeer Road and 1620 Averill Avenue.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150863 SAW Grant Agreement/City of Flint/Michigan Finance Authority (MFA)/Michigan Department of Environmental Quality (DEQ)/Strategic Water Quality Initiatives Grant Program

Resolution resolving that the City Administrator, a position currently held by Natasha L. Henderson, is designated as the Authorized Representative for purposes of the SAW Grant Agreement, AND, the proposed form of the SAW Grant Agreement between the City of Flint, the MFA and the DEQ is hereby approved and the Authorized Representative is authorized and directed to execute the SAW Grant Agreement with such revisions as are permitted by law and agreed to by the Authorized Representative, AND, the City of Flint shall repay the Grant, within ninety (90) days of being informed to do so, with interest at a rate NOT-TO-EXCEED eight (8) percent per year, to the Authority, if the City of Flint is unable to, or decides not to, proceed with contructing the project or implementing the asset management program for which the funding is provided within three (3) years of the Grant award, AND, the Grant, if repayable, shall be a first budget obligation for the City of Flint and the City of Flint is required, if necessary, to levy ad valorem taxes on all taxable property in the City for the payment thereof, subject to applicable constitutional, statutory and local tax rate limitations, AND, the City of Flint shall not invest, reinvest or accumulate any moneys deemed to be Grant funds, nor shall it use Grant funds for the general local government administration activities or activities performed by municipal employees that are unrelated to the project, AND, the Authorized Representative is hereby jointly or severally authorized to take any actions necessary to comply with the requirements of the MFA and the DEQ in connection with the issuance of the Grant. The Authorized Representative is hereby jointly or severally authorized to execute and deliver such other contracts, certificates, documents, instruments, applications and other papers as may be required by the MFA or the DEQ or as may be otherwise necessary to effect the approval and delivery of the Grant, AND, the City of Flint acknowledges that the SAW Grant Agreement is a contract between the City, the MFA and the DEQ, AND, all resolutions and parts of resolutions insofar as they conflict with the provisions of this resolution are rescinded. [NOTE: Part 52 of the Natural Resources and Environmental Protection Act, as amended, provides that the MFA, in consultation with the DEQ, shall establish a strategic water quality initiatives grant program to provide grants to municipalities for sewage collection and treatment systems or storm water or non-point source pollution control. The City of Flint is requesting $2,000,000.00 to establish an asset management plan.] [NOTE: Agreement is not attached.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150864 Contract/City of Flint/County of Genesee/Flint Holding Facility Operation

Resolution resolving that the City Administrator authorizes the appropriate city officials to do all things necessary to enter into the attached agreement with Genesee County for operation of the Flint Holding Facility. [NOTE: The City of Flint Police Department includes a 110-person holding facility with the ability to hold detainees for up to 72 hours. The Genesee County Sheriff currently operates the holding facility. The city and the sheriff have agreed to the terms of a contract for the sheriff to continue operating the facility for a contract price NOT-TO-EXCEED $2,764,275.00. The agreement is contingent on the city receiving funding from the State of Michigan to pay the full costs of the contract and the Sheriff receiving a continued waiver from the Michigan Department of Corrections.] [NOTE: Agreement is attached.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150865 Budget Amendments/FY2016 Budget of the City of Flint/General Fund/Drug Law Enforcement Fund/Public Improvement Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's General, Drug Law Enforcement and Public Improvement Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0982015.]

SEPARATED FROM MASTER RESOLUTION

150866 Budget Amendments/FY2016 Budget of the City of Flint/Water Fund/Sewer Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's Water and Sewer Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0992015.]

SEPARATED FROM MASTER RESOLUTION

150872 Budget Amendment/Water and Sewer Budget/Switch Back to Detroit Water and Sewerage Department (DWSD) Water Supply

Resolution resolving that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable, with specific revenue and expenditure line items to be provided by the Chief Financial Officer. [NOTE: The State of Michigan and C.S. Mott Foundation have committed $6 million and $4 million dollars respectively to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department (DWSD) and its successor, the Great Lakes Water Authority (GLWA), until the City is able to received water from the Karegnondi Water Authority (KWA). At this time the KWA reports that construction is on schedule to be completed by June 30, 2015 [2016]. The City estimates the total cost to purchase water through DWSD will be $12 million for nine months. The balance of $2 million not covered by the pledges of State and Local resources is the responsibility of the City. A budget amendment is necessary to reflect both an increase in revenues for the receipt of $10 million in assistance and $2 million of budgeted Use of Fund Balance, and an increase in expenditures of $12 million for the purchase of DWSD water supply.]

SEPARATED FROM MASTER RESOLUTION

150875 Authorization/Agreements/City Administrator/Conversion to Detroit Water System

Resolution resolving that the City Administrator is authorized to enter into agreements with the Detroit Water and Sewerage Department (DWSD) and Genesee County Drain Commission (GCDC) for conversion to the Detroit Water System.

SEPARATED FROM MASTER RESOLUTION

150876 Establishment/Indigenous Peoples Day

Resolution resolving that the City of Flint shall recognize Indigenous Peoples Day on the second Monday in October and use it to reflect upon the invaluable contributions made by Indigenous Peoples to our community.

SEPARATED FROM MASTER RESOLUTION

150865 Budget Amendments/FY2016 Budget of the City of Flint/General Fund/Drug Law Enforcement Fund/Public Improvement Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's General, Drug Law Enforcement and Public Improvement Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0982015.]

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 7 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 2 - Vice President Davis and Councilperson Winfrey

150866 Budget Amendments/FY2016 Budget of the City of Flint/Water Fund/Sewer Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's Water and Sewer Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0992015.]

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 1 - Councilperson Winfrey

150872 Budget Amendment/Water and Sewer Budget/Switch Back to Detroit Water and Sewerage Department (DWSD) Water Supply

Resolution resolving that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable, with specific revenue and expenditure line items to be provided by the Chief Financial Officer. [NOTE: The State of Michigan and C.S. Mott Foundation have committed $6 million and $4 million dollars respectively to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department (DWSD) and its successor, the Great Lakes Water Authority (GLWA), until the City is able to received water from the Karegnondi Water Authority (KWA). At this time the KWA reports that construction is on schedule to be completed by June 30, 2015 [2016]. The City estimates the total cost to purchase water through DWSD will be $12 million for nine months. The balance of $2 million not covered by the pledges of State and Local resources is the responsibility of the City. A budget amendment is necessary to reflect both an increase in revenues for the receipt of $10 million in assistance and $2 million of budgeted Use of Fund Balance, and an increase in expenditures of $12 million for the purchase of DWSD water supply.]

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 1 - Councilperson Winfrey

150875 Authorization/Agreements/City Administrator/Conversion to Detroit Water System

Resolution resolving that the City Administrator is authorized to enter into agreements with the Detroit Water and Sewerage Department (DWSD) and Genesee County Drain Commission (GCDC) for conversion to the Detroit Water System.

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 1 - Councilperson Winfrey

150876 Establishment/Indigenous Peoples Day

Resolution resolving that the City of Flint shall recognize Indigenous Peoples Day on the second Monday in October and use it to reflect upon the invaluable contributions made by Indigenous Peoples to our community.

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

RESOLUTION TO BROWN & SONS CO. FOR THE ANNUAL SUPPLY OF BRAKE PARTS, BULBS, BREAKERS, SPRAYS AND FILTERS

BY THE CITY ADMINISTRATOR

RESOLUTION

The Finance Department, Purchases and Supplies Division, has solicited a bid for brake parts, bulbs, breakers, sprays and filters for a three year period as requested by the Fleet Division; and

Brown & Sons Co., 1720 Davison Rd., Flint, Michigan was the lowest responsive bidder from nine solicitations for said supplies. The funding for this purchase will come from the following account: 661-000.000-110.400; and

IT IS RESOLVED, that the Finance Department is authorized to issue purchase orders for FY16, FY17, and FY18 to Brown & Sons Co. for the annual supplies of brake parts, bulbs, breakers, sprays and filters in an annual amount not to exceed $140,000.00 which results in an aggregate amount of $420,000.00 over the three year period. (Fleet/Central Garage Fund) $140,000 for FY16, $140,000 for FY17, and $140,000 pending adoption of the FY18 budget.

BE IT FURTHER RESOLVED, that the Finance Department has the discretion to spend an additional amount of no more than 5% of the annual requested spend amount to Brown & Sons Co for unanticipated requests that may be submitted during the next three years.

Agenda Item Title.
Annual Supply of Brake Parts, Bulbs, Breakers, Sprays and Filters

Prepared By:
Mike Rule

Background/Summary of Proposed Action:
The Fleet Garage is requesting a purchase order for our annual supply of aftermarket vehicle replacement parts. Parts to be purchased include brakes, bulbs, filters, sprays, steering, and suspension related items. These aftermarket parts allow the garage to repair our fleet of vehicles at a lower cost than purchasing OEM components

RESOLUTION TO ZITO CONSTRUCTION FOR WATERMAIN CUT-IN PROJECT

BY THE CITY ADMINISTRATOR

RESOLUTION

The Finance Department, Purchasing and Supplies Division, solicited a bid in March 2014 for an initial watermain cut-in at the Water Plant and Zito Construction, 8033 Fenton Rd., Grand Blanc, Mi was the sole bidder to submit a bid; and

On March 26, 2014, the Emergency Manager authorized the Proper City Officials to enter into a contract with Zito Construction for said watermain project in an amount not to exceed $676,300.00; and

The Water Plant is requesting the issuance of change order #1 to said contract in order to extend the contract into the current fiscal year (July 1, 2015 – June 30, 2016) and to pay for additional work that was needed to complete the project in an amount not to exceed $19,570.00. Funding will come from the following account: 591-536.100-801.000; and

IT IS RESOLVED, that the Mayor and City Administrator do all things necessary to enter into change order #1 to the contract with Zito Construction to extend the contract into the current fiscal year and pay additional work that was needed to complete the project in an amount not to exceed $19.570.00 for a revised contractual amount of $695,870.00. RESOLUTION TO STANSLEY INDUSTRIES FOR THREE (3) YR. BIOSOLIDS SLUDGE TRANSPORTATION/HAULING SERVICES

BY THE CITY ADMINISTRATOR

RESOLUTION

The Finance Department, Purchases & Supplies Division, has solicited proposals for a three (3) yr. biosolids sludge disposal and waste hauling services agreement for removal of the sludge cake from the Utilities Water Pollution Control Facility's new biosolids loading facility; and

Stansley Indutries, 3793 Silica Road, Sylvania, OH was the lowest responsive proposal for transportation/hauling fees for a three (3) year period from five proposals received. The funding for this request will come from the following account number: 590-550.100-801.500; and

IT IS RESOLVED, that the Mayor and City Administrator are authorized to enter into a three (3) yr. contract with Stansley Industries for biosolids sludge cake transportation/hauling agreement for an FY16 amount of $60,000.00 and pending the adoption of FY17 of $80,000.00 and FY18 budget amount of $85,000.00 for a total award of $225,000.00 (Sewer Fund)

RESOLUTION STAFF REVIEW

September 2, 2015

Agenda Item Title: Biosolids Cake Hauling and Disposal Services

Prepared By: Robert J. Case, WPC Supervisor

Background/Summary of Proposed Action:

WPC is abandoning its multiple hearth incinerators to dispose of sewage sludge, and henceforth will send it to a landfill, as a cost-saving measure. A new Biosolids Loadout Facility under construction will soon enable offsite disposal. Contracts are now needed with a suitable licensed landfill and a trucker to transport and dispose of the cake offsite.

Financial Implications:

A significant reduction in utility and manpower costs will result, and also avoid the need to spend millions to bring the incinerators into compliance with new regulations. Please approve a three year agreement for Sludge Hauling and Disposal for fiscal years 2016, 2017, and 2018. The approved FY2016 budgeted amount is $210,000.00 ($150,000 Landfill, $60,000 Sludge Hauling), future allocations to be determined upon budget adoption. Use account number 590-550.100-801.500.

Budgeted Expenditure: Yes: ☑ No: Please explain if no:

RESOLUTION TO WASTE MANAGEMENT/VENICE PARK LANDFILL FOR THREE (3) YR. BIOSOLIDS SLUDGE DISPOSAL SERVICES

BY THE CITY ADMINISTRATOR

RESOLUTION

The Finance Department, Purchases & Supplies Division, has solicited proposals for a three (3) yr. biosolids sludge disposal and waste hauling services agreement for removal of the sludge cake from the Utilities Water Pollution Control Facility's new biosolids loading facility; and

Waste Management/Venice Park, 9536 Lennon Road, Lennon, Michigan was the best total cost solution for landfill disposal fees in conjunction with transportation/hauling fees with the city's recommended sludge hauling contractor for a three (3) year period from five proposals received. The funding for this request will come from the following account number: 590-550.100-801.500; and

IT IS RESOLVED, that the Mayor and City Administrator are authorized to enter into a three (3) yr. contract with Waste Management/Venice Park for the disposal of the biosolids sludge cake for an FY16 amount of $150,000.00 and pending the adoption of FY17 and FY18 budget amounts of $200,000.00 each year for a total award of $550,000 00 (Sewer Fund)

FOR THREE (3) YEAR BIOSOLIDS WASTE HAULING & DISPOSAL SERVICES
PROPOSAL #16-525

DISPOSAL SERVICES

VENDOR	Republic - Citizens 2361 W. Grand Blanc Rd. Grand Blanc, MI	***Waste Management** **9536 E. Lennon Rd.** **Lennon, MI**	Brent Run 8385 Vienna Rd. Montrose, MI
Yr. 1	$18.00/ton	**$19.00/ton**	$26.93/ton
Yr. 2	$18.00/ton	**$19.79/ton**	$27.86/ton
Yr. 3	$18.00/ton	**$20.61/ton**	$28.83/ton

*An Alternate Proposal from Waste Management was included in its sealed proposal and reviewed. This proposal appears to offer the lowest cost and best value solution for the City. Waste Management offers to accept 11,000 tons per year of biosolids cake at the Venice Park landfill with no tip fee. In exchange, the City WPC Facilities would accept 11,000,000 gallons per year of leachate trucked in from two other landfills owned by Waste Management. As a result of this trade in services, the City will incur no cost landfill biosolid cakes.

Resolution Authorizing Appropriate City of Flint Officials to Do All Things Necessary to Process a Budget Amendment to Transfer $189,301.57 From Fund Balance Into the 202-441.702-801.000 Ledger Account

BY THE CITY ADMINISTRATOR:

EM2332014 authorized the City of Flint to enter into contract with MDOT to perform reconstruction, bridge widening, and bridge replacement work on I-69 In order to comply with the contractual agreement between MDOT and Department of Public Works, it is necessary replace funds liquidated during the year-end closing process and increase the FY16 budget by those remaining funds. Funding remaining on this project is $101,432.82.

EMO742013 authorized the City of Flint to enter into contract with Rowe Professional Services for preliminary and construction engineering services on the MDOT Leith St.-Stewart Ave Bridge project. In order to comply with the contractual agreement between City of Flint, MDOT, and Rowe Professional Services, it is necessary replace funds liquidated during the year-end closing process and increase the FY16 budget by those remaining funds. Funding remaining on this project is $87,868.75.

IT IS RESOLVED, that Department of Public Works' FY16 budget shall be amended with the transfer of $189,301.57 from fund balance to line item 202-441.702-801-000 Professional Services.

RESOLUTION STAFF REVIEW

DATE: October 21, 2015

Agenda Item Title: Budget Amendment

Prepared By: Shawanda Roebuck for Howard Croft, Director of Department of Public Works

Background/Summary of Proposed Action: On April 11, 2014, resolution number EME2332014 was adopted giving the City of Flint authorization to enter into contract # 14-020 with MDOT to perform reconstruction, bridge widening, and bridge replacement work on I-69. The local share of the construction project estimated at $343,000.00, however, the project was not completed in FY15, and the remaining authorized funds were rolled into fund balance. Approval for use of fund balance is needed to comply with contractual terms of the contract.

In addition, on July 13, 2013 resolution number EMO742013 authorized the City of Flint to enter into contract # 15-083 with Rowe Professional Services to provide preliminary and construction engineering services for the MDOT Leith St. -Stewart Ave Bridge project for $137,940.00. The project was not completed in FY14, and the authorized funds were rolled into fund balance. Approval for use of fund balance is needed to comply with contractual terms of the contract.

Financial Implications: MDOT has the authority under Public Act 51 of 1951 to request the Treasurer to withhold the City's MTF payment to secure the City's participation in the I-69 project, as well as being in breach of contract for failure to comply with payment terms of the Leith St.-Stewart Ave Bridge project.

Date: October 21, 2015

Agenda Item Title: Resolution to Fleis & Vandenbrink for PE services for Fenton Rd. rehabilitation project

Prepared By: Kathryn Neumann on behalf of Howard Croft

Background/Summary of Proposed Action:

The City of Flint has four pre-qualified engineering firms. Fleis & Vandenbrink was selected to submit a proposal for the Fenton Rd. rehabilitation project.

The Fenton Rd. rehabilitation project will include design in accordance with MDOT standards and specifications and will be completed in accordance with MDOT's Local Agency Program Plan Preparation and 3R Design Guidelines. Proposed work will include reducing Fenton Rd. from four lanes to three lanes, resurfacing the roadway, storm sewer improvements, curb repairs/replacements as needed, joint repairs, structure adjustments, driveway approaches, sidewalk repairs/replacements as needed as well as ADA sidewalk ramps at all controlled intersections.

Financial Implications: The City must expedite the design of the project in order for the project to be submitted to MDOT for review and approval prior to the funding obligation deadline. If the plans are not completed and approved, MDOT cannot obligate federal funds to the project.

RESOLUTION STAFF REVIEW

Date: October 21, 2015

Agenda Item Title: Resolution to Wade Trim for PE services for Kearsley St. rehabilitation project

Prepared By: Kathryn Neumann on behalf of Howard Croft

Background/Summary of Proposed Action:

The City of Flint has four pre-qualified engineering firms. Wade Trim was selected to submit a proposal for the Kearsley Street rehabilitation project.

The Kearsley Street rehabilitation project will include design in accordance with MDOT standards and specifications and will be completed in accordance with MDOT's Local Agency Program Plan Preparation and 3R Design Guidelines. The project will consist of work from Chevrolet Avenue to Beach Street. Proposed work will include resurfacing the roadway, storm sewer improvements, curb repairs/replacements as needed, joint repairs, structure adjustments, driveway approaches, sidewalk repairs/replacements as needed as well as ADA sidewalk ramps at all controlled intersections.

Financial Implications: The City must expedite the design of the project in order for the project to be submitted to MDOT for review and approval prior to the funding obligation deadline. If the plans are not completed and approved, MDOT cannot obligate federal funds to the project.

Budgeted Expenditure? **Yes** **X** **No** **Please explain if no:**

RESOLUTION NO.: CA 10920 15

PRESENTED: 10-15-15

ADOPTED: _____

RESOLUTION RECOGNIZING THE FLINT CULTURAL CENTER CORPORATION, INC. AS A NON-PROFIT ORGANIZATION OPERATING IN THE CITY OF FLINT FOR THE PURPOSE OF OBTAINING A CHARITABLE GAMING LICENSE, ISSUED BY THE MICHIGAN LOTTERY CHARITABLE GAMING DIVISION, RELATIVE TO CONDUCTING A RAFFLE ON NOVEMBER 14, 2015

BY THE CITY ADMINISTRATOR:

The Flint Cultural Center Corporation, Inc. is a Michigan non-profit organization whose purpose is to foster cultural activity and community vitality through history, science and the arts; and

The City of Flint, being the local governing body with authority to recognize said organization as a non-profit located within the city as a charitable organization, and the Flint Cultural Center Corporation, Inc., a Michigan non-profit organization, having made proper application for a Charitable Gaming License through the State of Michigan's Charitable Gaming Division to conduct a raffle on November 14, 2015, during their event "Night at the Museum," submit this resolution in accordance with the qualification process pursuant to the State of Michigan, Bureau of State Lottery, as allowed by Act 382 of the Public Acts of 1972, as amended.

IT IS RESOLVED that the Flint Cultural Center Corporation, Inc. is recognized as a non-profit organization operating in the City of Flint for the purpose of obtaining a charitable gaming license, issued by the Michigan Lottery Charitable Gaming Division, relative to conducting a raffle on November 14, 2015, during their event "Night at the Museum," as allowed by Act 382 of the Public Acts of 1972, as amended.

CERTIFICATE OF AMENDMENT TO THE ARTICLES OF INCORPORATION

OF

THE COMMITTEE OF SPONSORS FOR THE FLINT COLLEGE AND CULTURAL DEVELOPMENT, INC., a Michigan nonprofit corporation

Effective Date: November 15, 1992

Pursuant to the provisions of Act 162, Public Acts of 1982, as amended, the undersigned corporation executes the following Certificate:

1. The present name of the corporation is THE COMMITTEE OF SPONSORS FOR THE FLINT COLLEGE AND CULTURAL DEVELOPMENT, INC.

2. The corporation identification number (CID) assigned by the Bureau is 832381.

3. The location of its registered office is:

352 S. Saginaw Street, Ste. 707
Flint, MI 48502-1923

4. Article I of the Articles of Incorporation is hereby amended to read as follows:

Article I.

The name of the Corporation is FLINT CULTURAL CENTER CORPORATION, INC.

5. Article IX of the Articles of Incorporation is hereby amended to read as follows:

Article IX.

a. The members of the Corporation shall be Flint Institute of Arts, Flint Institute of Music, Flint Public Library, Flint Youth Theatre, Longway Planetarium, Sloan Museum, and WFBE-FM.

b. The Board of Directors may approve other area cultural organizations as members of the Corporation.

c. The members of the Corporation shall have no authority with respect to the business of the Corporation and shall have no vote.

6. The Articles of Incorporation are hereby amended by the addition of the following Articles:

Article XI.

The Corporation is organized on a directorship basis.

Article XII.

The Board of Directors of the Corporation shall have charge, control and management of the business, property, affairs and funds of the Corporation and shall have the power and authority to do and perform all acts and functions permitted for an organization described in Section 501(c)(3) of the Internal Revenue Code of 1986, as amended, not inconsistent with these Articles of Incorporation, or with the laws of the State of Michigan. The Board of Directors of the Corporation shall be elected or appointed and removed as provided in the Bylaws of the Corporation.

Article XIII.

To the fullest extent permitted under the Michigan Nonprofit Corporation Act, as amended, the Corporation assumes all liability to any person, other than the Corporation, for all acts or omissions of a volunteer Director incurred in the good faith performance of the volunteer Director's duties as such; provided, however, the Corporation shall not be considered to have assumed any liability to the extent such assumption is inconsistent with the Corporation's status as an organization described in Section 501(c)(3) of the Code. Any repeal, amendment or other modification of this Article will not adversely affect any right or protection of a Director of the Corporation existing at the time of such repeal, amendment or other modification.

Article XIV.

The Corporation shall indemnify to the fullest extent authorized or permitted by the Michigan Nonprofit Corporation Act, as amended, in accordance with the procedures of the Michigan Nonprofit Corporation Act, as amended, any person who is or was made or threatened to be made a party to any action, suit or proceeding (whether civil, criminal, administrative or investigative) by reason of the fact that such person is or was a Director, officer, employee or agent of the Corporation or served or served any other enterprise at the request of the

Corporation. The indemnification provided herein and by the laws of the State of Michigan shall not be deemed exclusive of any other rights to which any person indemnified may be entitled under any agreement, vote of disinterested Directors, or otherwise.

Article XV.

The Board of Directors shall have the power to purchase and maintain insurance on behalf of any person who is or was a Director, officer, employee or agent of the Corporation, or is or was serving at the request of the Corporation as a trustee, director, officer, partner, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against any liability asserted against him or her and incurred by him or her in such capacity or arising out of his or her status as such, whether or not the Corporation would have the power to indemnify him or her against such liability under any applicable laws or governmental regulations.

Article XVI.

Any action required or permitted by the Michigan Nonprofit Corporation Act to be taken at an annual, regular or special meeting of the Directors may be taken without a meeting, without prior notice and without a vote if all of the Directors entitled to vote thereon consent in writing. Such written consents shall be filed with the minutes of the Corporation and shall have the same effect as a vote of the Directors for all purposes.

7. This Certificate of Amendment shall become effective November 15, 1992.

7. The foregoing amendment to the Articles of Incorporation was duly adopted on the 12TH day of October 1992. The amendment was duly adopted in accordance with Section 611(2) of the Act by the vote of the members. The necessary votes were cast in favor of the amendment.

Signed this 19 day of October, 1992.

ARTICLES OF INCORPORATION

These Articles of Incorporation are signed and acknowledged by the incorporators for the purpose of forming a nonprofit corporation under the provisions of Act No. 327 of the Public Acts of 1931, as amended, as follows:

ARTICLE I.

The name of the corporation is:

FLINT COMMITTEE OF SPONSORS FOR
THE FLINT COLLEGE AND CULTURAL DEVELOPMENT, INC.

ARTICLE II.

The purpose or purposes for which the corporation is formed are as follows:

To plan and encourage the development of an area in the City of Flint upon which the central Cultural and Education facilities of the city are to be located, including a museum, auditorium, theater, library, art institute, planetarium, the buildings of the Flint Junior College and the Flint College of the University of Michigan and other similar educational and cultural facilities. To acquire and assist in acquiring the site for such center. To supervise and cooperate in the supervision of the location, planning and construction of such structures. To encourage gifts to the Board of Education of the City of Flint for the foregoing purposes. To receive gifts for such purposes and to transmit the same unto the said Board of Education. To establish a trust fund for the purpose of maintenance of such buildings and grounds and to receive gifts on behalf of such trust fund. To conduct such other educational and cultural activities as may be related to the foregoing purposes. To conduct campaigns and drives to accomplish the foregoing purposes. To conduct or to cooperate with others in the conduct of civic celebrations for the purpose of publicizing the plans, purposes and accomplishments of this corporation. To cooperate with, enlist, and develop the cooperation of and between all persons, corporations, and other organizations and agencies, both public and private, engaged or interested in, or in any manner connected with, any or all of the foregoing purposes. To do any and all lawful acts which may be necessary, useful, suitable, desirable, and proper for the furtherance, accomplishment and attainment of any or all of the foregoing purposes. No assets of the corporation (including earnings) shall inure to the benefit of any member or any individual. This corporation shall not carry on propaganda or otherwise attempt to influence legislation.

ARTICLE III.

The location of the first registered office is:

200 East Kearsley Street, Flint 2, Genesee County, Michigan

The mailing address of the first registered office is:

200 East Kearsley Street, Flint 2, Michigan

ARTICLE IV.

The name of the first resident agent is Robert T. Longway.

ARTICLE V.

Said corporation is organized upon a non-stock basis.

(b)

The amount of assets which said corporation possesses is: NONE

Said corporation is to be financed under the following general plan:

Contributions of individuals, associations and corporations.

ARTICLE VI.

ARTICLE VIII.

The term of the corporate existence is thirty years.

ARTICLE IX.

Each contributor of the sum of $25,000.00 or more to the College and Cultural Development fund of the Flint Board of Education, or to this corporation, shall be a member of this corporation. Each member shall have one vote for the election of directors or upon any other corporate matter. In the event of a contribution in such amount by a corporation, or other organization, such corporation or other organization shall delegate an individual to vote its membership. In the event of such contribution by two or more individuals, such contributors shall delegate one of their number to hold the membership in this corporation. In the event of the death of a member of this corporation, the Board of Directors of this corporation may determine who among the survivors or heirs of such member shall thereafter hold such membership.

ARTICLE X.

In the event of the termination of this corporation by expiration of its charter or otherwise, or upon any type of liquidation of its assets, all assets, after payment of its debts, shall be distributed to the Flint Board of Education for the development, operation, and maintenance of its College and Cultural Development. This provision is irrevocable, and shall not be subject to alteration or amendment.

We the incorporators, sign our names this 10th day of October A.D. 1958.

BYLAWS

OF

FLINT CULTURAL CENTER CORPORATION, INC.

ARTICLE I

NAME & PRINCIPAL OFFICE

Section 1. Name: The name of this Corporation shall be Flint Cultural Center Corporation, Inc.

Section 2. Offices: The Corporation shall maintain in the State of Michigan a registered office and a registered agent at such office and may have other offices within the State of Michigan.

ARTICLE II

STATEMENT OF PURPOSE

Section 1. Mission: To foster cultural activity and community vitality through history, science and the arts.

Section 2. Vision: The Flint Cultural Center Corporation will position the Flint Cultural Center as the premier regional destination, educational resource, and entertainment venue for history, science and the arts.

Section 3. Purpose: The purpose of the Corporation is to operate exclusively for charitable, scientific and educational purposes as set forth in the Articles of Incorporation. The Corporation shall be operated exclusively for the not-for-profit purposes set forth herein and in its Articles of Incorporation, and no part of its net earnings shall insure to the benefit of or be distributed to its Board of Directors, officers or any other individuals.

Section 4. Non-Discrimination: The Corporation shall not discriminate in its policies or programs, membership of its Board of Directors, employees or officers on the basis of race, creed, color, gender, age, religion, disability, veteran's status, national origin, sexual orientation, gender identity or gender expression or any other protected class as required by Federal and Michigan law.

Section 5. Political Campaigning/Lobbying: No substantial part of the activities of the Corporation shall consist of carrying on propaganda or otherwise attempting to influence legislation. Nor shall the Corporation participate in or intervene in (including the publication or distribution of statements) any political campaign on behalf of (or in opposition to) any candidate for public office.

ARTICLE III

BOARD OF DIRECTORS

Section 1. General Powers: The Corporation is organized on a directorship basis. A Board of Directors shall govern the business and affairs of the Corporation. The Board of Directors shall exercise all such powers of the Corporation and do all such lawful acts and things as are not by statute, the Articles of Incorporation or by these Bylaws prohibited. This may include without limitation, employing such staff, agents and individuals, as the Board deems appropriate.

Section 2. Number, Tenure and Appointment: The number of at-large Directors shall be not less than fifteen (15) and no more than twenty-one (21). Directors shall be appointed for a three-year term at the Annual Meeting as determined by resolution of the Board of Directors. Each Director shall hold office until their successor has been appointed, or until their death, resignation or removal. A Director may be re-appointed by a majority vote of the Directors in attendance at a meeting of the Board of Directors to serve an additional three years. There shall be a term limitation of three consecutive terms that a Director may be appointed to serve. A director, whose term has been terminated because of the term limitation, shall be eligible for reappointment to serve three more terms after one year of absence from the Board. Terms shall be staggered so that approximately one-third (1/3) of the Board's total composition expires in the same year. Notwithstanding the provisions of this Section, a term limited Director holding the position of Board Chair, may, by majority vote of the Directors, be reappointed to the Board for an extended one (1) year term in the capacity of Immediate Past Chair.

Section 3. Resignation: Any Director may resign at any time by written notice delivered or sent by mail, email or facsimile transmission to the Chair or Secretary of the board. Such resignation shall take effect at the time specified therein, and unless specifically requested, acceptance of such resignation shall not be necessary to make it effective.

Section 4. Removal: Any Director may be removed from office by an affirmative vote of seventy-five (75%) percent of the Board of Directors of the Corporation in attendance at any special or regular meeting (where a quorum is present), provided that the notice of such meeting included such removal as an item of business to be undertaken at the meeting. Any Director of this Corporation may be removed by such affirmative vote if, in the opinion of such majority, the best interest of the Corporation would be served thereby, or if, in the opinion of such majority, other sufficient cause exists for removal.

Section 5. Vacancies: Any vacancies occurring in the Board of Directors shall be filled by affirmative vote of the majority of the remaining Directors then in office at a special or regular meeting of the Board of Directors, for the unexpired portion of the term. A director so appointed shall be eligible for three (3) additional 3-year terms.

Section 6. Compensation: No salary or other compensation shall be paid to any Director for services rendered as such Director, but this shall not preclude any Director from performing any other service for the Corporation and receiving appropriate compensation.

Directors will abstain from voting on any issues where there may be a conflict of interest including any issue where that Director may personally benefit financially. (see Article VIII).

Section 7. Affiliate Membership: The membership of the Flint Cultural Center Board of Directors shall be composed of a majority of at large members and appointed individuals from the following affiliate organizations:

1. One (1) Flint Board of Education Member
2. One (1) Flint Institute of Arts Board Member
3. One (1) Flint Institute of Music Board Member

7 a. Removal by Affiliate Organizations: Any Director appointed by the Flint Board of Education, Flint Institute of Arts or the Flint Institute of Music may be replaced at any time by the sponsoring organization.

ARTICLE IV

BOARD MEETINGS

Section 1. Annual Meeting: The Annual Meeting of the Board of Directors shall be held each year in the month preceding the first day of the new fiscal year. The annual meeting shall be at such time and place as may be designated by the Chair of the Board of Directors with two weeks advance written notice to all Directors. At the Annual Meeting, the Board of Directors shall elect Officers for the ensuing year and Directors for their appropriate terms, and transact such other business as may come before the meeting.

Section 2. Regular Meetings: The Board of Directors shall establish a schedule of regular meetings as it deems necessary for the efficient conducting of its business.

Section 3. Special Meetings: Special meetings of the Board of Directors may be called by the Chair or Secretary on four (4) days notice to each Director by mail, electronic mail or other electronic transmission. Special meetings shall be called by the Chair or Secretary in like manner on the written request of a majority of the Directors then in office. The meeting notice requirement may be waived from time to time by the Chair if the purpose of the meeting is of urgent nature as determined by the Chair. No other business, other than what was defined in the meeting notice, may be conducted at a special meeting.

Section 4. Notice of Meetings: Notice of each meeting of the Board of Directors shall be given by written notice, or electronic mail notice delivered to each Director at their address as it appears on the books of the Corporation, or by facsimile, or other electronic means. Except where otherwise required by law or by these Bylaws notification of meetings shall be not less than three (3) days prior to the time appointed for the meeting.

Section 5. Quorum: A majority of the Directors then serving shall constitute a quorum for the transaction of business unless the greater or lesser number is required by law, the Articles of Incorporation or these Bylaws. The act of a majority of the Board of Directors present at any meeting at which a quorum is present, or on written consent of a majority of all directors without a meeting, shall be an act of the Board of Directors, unless act of the greater number is required by law, the Articles of Incorporation or these Bylaws. Directors may be deemed present for the purposes of a quorum, and may vote, if such Directors are in contact

with each other by telephone call or other electronic conferencing during the meeting. If a quorum shall not be present at any meeting of the Board of Directors, The Board of Directors present may adjourn the meeting without notice other than announcement at the meeting, until a quorum shall be present. At all meetings of the Board of Directors, each Director shall be entitled to one vote.

ARTICLE V

OFFICERS

Section 1. Number, Election & Term: The officers of the Corporation shall be Chair, Vice Chair, Secretary and Treasurer. Such officers shall be elected by the majority vote of the Board of Directors at the Corporation's Annual Meeting. Each officer shall hold office for not less than one (1) year and not more than three (3) consecutive years, unless death, resignation, removal or until their successors have been duly elected and qualified.

Section 2. Qualifications, Removal & Vacancies: The officers shall be members of the Board of Directors. The Board of Directors may remove any officer or agent whenever in its judgment the best interest of the Corporation will be served. Removal shall be by the affirmative vote of a majority of the Directors in attendance at any meeting at which a quorum is present, provided that notice of the meeting included such removal as an item of business. Vacancies in any Officer position of the Corporation because of death, resignation, removal, disqualification or otherwise shall be filled by a then current Director duly elected to the position by majority vote of the Board of Directors for the unexpired portion of the term.

Section 3. Duties of the Chair: The Chair of the Board of Directors shall preside over all meetings of the Board of Directors and the Executive Committee. The Chair shall have the responsibility to appoint individuals to serve on standing committees as are necessary to efficiently conduct the affairs of the Corporation. The Chair shall be an ex-officio member of all committees of the Corporation. The Chair shall perform such other duties and have authority as from time to time may be assigned by the Board of Directors.

Section 4. Duties of the Vice-Chair: In the absence of the Chair, the Vice-Chair shall perform the duties of the Chair and when so acting shall have all the powers of and be subject to all other restrictions imposed upon the Chair. The Vice-Chair shall perform such duties and have such authority as from time to time may be assigned by the Chair or by the Board of Directors.

Section 5. Duties of the Secretary: The Secretary of the Corporation shall chair the meetings of the Board Governance Committee and shall be the official keeper of the Corporate records and as such, shall countersign the minutes of the regular and special meetings of the Board for accuracy, and perform all duties incident to the office of Secretary and have such other duties and exercise such authority as from time to time may be delegated or assigned by the Chair or by the Board of Directors. A portion of the above duties may be delegated to a staff member, or Assistant Secretary as approved by the Board.

Section 6. Duties of the Treasurer: The Treasurer shall chair the meetings of the Finance Committee and oversee the financial well-being of the corporation, and perform all duties incident to the office of Treasurer and have such other duties and exercise such

authority as from time to time may be delegated or assigned by the Chair or by the Board of Directors. A portion of the above duties may be delegated to a staff member or Assistant Treasurer, as approved by the Board.

ARTICLE VI

STANDING COMMITTEES OF THE BOARD OF DIRECTORS

Section 1. Executive Committee: The Officers and chairs of the standing committees as defined in this article will constitute an Executive Committee. This Executive Committee shall have power to make decisions between meetings of the whole board. Meetings will be called by the Chair and any decisions made by the Executive Committee will be presented to the whole board for ratification at its next regular meeting.

Section 2. Finance Committee: The Chair of the Board may at any time appoint members to serve on the Finance Committee. Such appointments shall be in such numbers as the Chair of the Board may determine advisable, with such duties and such functions as the Board may determine, provided that a majority of the Finance Committee is comprised of current Directors in good standing. The Treasurer of the Board of Directors shall serve as Chair of the Finance Committee. Duties of the Finance Committee include, recommending to the Board of Directors an Annual Budget for the next fiscal year that is presented prior to the Annual Meeting. The committee shall maintain oversight of all fiscal matters pertaining to the Corporation and report to the Board of Directors on a regular basis the financial condition of the Corporation. The committee will also be responsible for developing and recommending employment policies and procedures for the Corporation and monitoring compliance with applicable Federal and State Laws. Any recommendations made by the Finance Committee shall be reported to the full Board at its next regularly scheduled meeting.

Section 3. Strategic Planning Committee: The Chair of the board may at any time appoint a Chair of the Strategic Planning Committee and members to serve on this Committee. Such appointments shall be in such numbers as the Chair may determine advisable, with such duties and such functions as the Board may determine, provided that a majority of the Strategic Planning Committee is comprised of current Directors in good standing. It shall be the function and scope of this committee to evaluate service delivery, develop short and long term organizational strategies, and monitor and evaluate the progress of those strategies in achieving organizational goals. The Strategic Planning Committee shall make recommendations to the Board of Directors regarding any activity within its scope for necessary action.

Section 4. Fund Development Committee: The Chair of the board may at any time appoint a Chair of the Fund Development Committee and members to serve on this Committee. Such appointments shall be in such numbers as the Chair may determine advisable, with such duties and such functions as the Board may determine, provided that a majority of the Fund Development Committee is comprised of current Directors in good standing. It shall be the function and scope of this committee to provide strategic and creative thinking, community intelligence, advocacy and advice to help shape/support the fundraising efforts of the FCCC with a particular focus on collaborative fundraising activities

for the benefit of campus operations and identified capital needs. The Fund Development Committee shall make recommendations to the Board of Directors regarding any activity within its scope for necessary action.

Section 5. **Board Governance Committee:** The Board Governance Committee, chaired by the Secretary of the Corporation, shall consist of the Chair of the Board, the Immediate Past Chair of the Board, and two or four other Directors appointed by the Chair of the Board and confirmed by majority vote of the Board. The Board Governance Committee shall conduct an annual evaluation of the Board, Board continuing education as needed and new Board member orientations. Based on the results of the annual board evaluation, the Board Governance Committee will recruit and review candidates for appointment to the Board and shall forward their recommendations to the full Board of Directors for consideration. It shall nominate individuals from among the Board to serve as Officers of the Board, during which process any committee member under consideration as an Officer shall recuse himself/herself from committee deliberations.

Section 6. Institutional Governing Councils: A Governing Council for each of Sloan*Longway and The Whiting shall provide strategic oversight and direction for the respective operations of each institution. The Chair of the Board may at any time appoint a Chair of either or both Governing Councils and Directors to serve on each respective Council. The Councils, by and in a manner of their choosing, may elect non-Directors to serve on each Council, provided however, that each Council shall be comprised of a majority of FCCC Directors, unless an alternate composition of the Councils is approved by majority vote of the FCCC Board. Except as provided in this Section, the Institutional Governing Councils shall make recommendations to the Board of Directors regarding any activity within its scope for necessary action.

Section 7. **Campus Collaboration Committee:** The Chair of the Board may, in consultation with the affiliate members of the FCC campus, at any time appoint a Chair of the Campus Collaboration Committee and may invite other Directors and institutional representatives to serve on the Committee, such that each affiliate organization holds only two (2) voting seats on this Committee. The campus affiliate organizations include Sloan*Longway, The Whiting, Flint Institute of Arts, Flint Institute of Music, Flint Cultural Center Corporation. It shall be the scope of this committee to provide strategic and creative thinking, and advocacy to shape and support collaboration among the key institutions regarding campus-wide operational and business matters. The Campus Collaboration Committee shall make recommendations to the Board of Directors (and, where appropriate, to the Governing Boards of other campus institutions) regarding any activity within its scope for necessary action.

Section 8. Other Standing or Special Committees:

8a. Other Standing Committees: The Board of Directors, by resolution adopted by affirmative vote of a majority of Directors, may designate other standing committees, each committee to be comprised of a majority of Directors.

8b. Special or Ad Hoc Committees: A special or ad hoc committee may be appointed by the Chair for a special task as the circumstances may warrant. At least one (1) member of the Board shall be appointed to each special committee. A special committee shall limit its activities to the accomplishment of the task for which it is appointed, and shall have no power to act except as is specifically conferred by action of

the Board of Directors. Upon completion of the tasks for which appointed, such special committee shall stand discharged

ARTICLE VII
CHIEF OPERATING OFFICER AND INSTITUTIONAL EXECUTIVE DIRECTORS

Section 1. Chief Operating Officer

a. **General Authority:** The Chief Operating Officer (COO) shall be the paid chief administrative officer of the Corporation and shall have general supervision over the business of the Corporation and over its corporate staff. The COO shall act as the duly authorized representatives of the Board of Directors in all matters in which the Board of Directors has not formally designated some other person or committee to act. Duties include:

   i. The COO may sign and execute in the name of the Corporation and/or its Member Organizations, grant applications, leases, employment agreements, contracts and, from time to time, other instruments which are authorized by the Board of Directors;

   ii. The COO, subject to general policies of the Corporation, shall manage the corporate staff of the Corporation, and have full authority to hire and fire corporate (shared service) employees;

   iii. The COO shall represent the Corporation in its exchanges with the public and with governmental agencies, corporations; and

   iv. The COO in general shall perform all duties incidental to the management of the Corporation and such other duties from time to time may be assigned by the Board of Directors or by any of its committees to which the Board has delegated power for such actions.

b. **Method of Appointment:** The COO shall be appointed and employed by and directly accountable to the Board of Directors of the Corporation.

c. **Board and Committee Membership:** The COO shall serve as an *ex-officio*, non-voting members of the Board of Directors and all of its Committees.

d. **Evaluation and Compensation:** No less than annually, the Executive Committee of the Board shall review the performance and compensation of the COO. Determination of compensation shall be based upon considerations such as organizational and individual performance, length of service, and any other factors the Committee may reasonably consider.

Section 2. Institutional Executive Directors

a. **General Authority:** The Institutional Executive Directors shall be the paid chief administrative officer of the respective Member Institutions of the Corporation and shall have general supervision over the business of the Institution and over its institutional staff. The Executive Director(s) shall act as the duly authorized representatives of the respective Institutions in all matters in which the Board of Directors has not formally designated some other person or committee to act. Duties include:

   i. The Executive Directors may sign and execute in the name of the respective Member Institutions, grant applications, leases, employment agreements, contracts and, from time to time, other instruments which are authorized by the Board of Directors; in the absence of the COO, the Executive Directors, individually or jointly, may sign and execute in the name of the Corporation any document or instrument approved by the Board of Directors or an authorized Committee of the Corporation;

   ii. The Executive Directors, subject to general policies of the Corporation and the respective Institutions, shall manage the institutional staff of the Member Organizations, and have full authority to hire and fire institutional employees;

   iii. The Executive Directors shall represent their respective institutions in its exchanges with the public and with governmental agencies, corporations; and

   iv. In general shall perform all duties incidental to the management of the Member Institution and such other duties from time to time may be assigned by the Board of Directors or by any of its committees to which the Board has delegated power for such actions.

b. **Method of Appointment:** The Executive Directors shall be employed by the Corporation and directly accountable to the respective Governing Councils of the Member Institutions.

c. **Evaluation and Compensation:** No less than annually, the Chair of each Governing Council (and other members of the Governing Council at the Chair's discretion) shall review the performance and compensation of the respective Executive Directors. The Governing Councils shall make recommendations to the Executive Committee of the Corporation on Executive Director compensation.

ARTICLE VIII

CONFLICT OF INTEREST

Section 1. Conflict of Interest: All members of the Flint Cultural Center Corporation Board of Directors should act in the best interest of the FCCC. Any Director or committee member who has, or who represents an organization that has a material, financial interest in a

contract or other transaction presented to the Board of Directors or a committee thereof for authorization, approval, or ratification, shall make a prompt, full and frank disclosure of such person's interest to the Board or committee prior to its acting on such contract or transaction. Such disclosure shall include any relevant and material facts known to such person about the contract or transaction.

*(1a.) **Conflict Resolution:** The absence or existence of a conflict by a Director shall be determined by the vote of the majority of the Board in attendance. The Director with a potential conflict shall abstain from the voting and may be excused from the meeting by the person chairing the meeting.*

ARTICLE IX

NEGOTIABLE INSTRUMENTS

Section 1. Checks, etc.: All checks, drafts, orders for payment of money and negotiable instruments shall be signed by such corporate officers and employees as the Board of Directors may by resolution or special order prescribe.

Section 2. Securities: Such officers as from time to time shall be designated by the Board of Directors shall have the power to control and direct the disposition of any securities or property of the corporation deposited in the custody of any financial institution and sign any endorsements or transfers thereof.

ARTICLE X

FISCAL YEAR & SEAL

Section 1. Fiscal Year: The Fiscal year of the Corporation shall be **July 1st through June 30th**, and may be changed by resolution of the Board.

Section 2. Seal: The Board may adopt a corporate seal, which shall be in the form of a circle and shall bear the full name of the Corporation and the year of its incorporation.

ARTICLE XI

INDEMNIFICATION AND INSURANCE

Section 1. Nonderivative Actions: Subject to all of the provisions of this Article, the Corporation shall have the power to indemnify any person who was or is a party to, or is threatened to be made party to, any threatened, pending or completed action, suit or proceedings by reason of the fact that the person is or was a Director, officer, employee, volunteer, or agent of the Corporation. This includes any civil, criminal, administrative or investigative proceedings, whether formal or informal, other than an action by or in the right of the Corporation. Such indemnification may also apply to a person who is or was serving at the request of the Corporation as a director, officer, employee, volunteer or agent of another foreign or domestic corporation, partnership, joint venture, trust or other enterprise, whether for profit or not for profit. The person may be indemnified and held harmless against

expenses (including attorney fees), judgments, penalties, fines and amounts paid in settlement actually and reasonably incurred by the person in connection with such action, suit or proceeding, if the person acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of the Corporation. With respect to any criminal action or proceeding, the person must have had no reasonable cause to believe his or her conduct was unlawful. The termination of any action, suit or proceeding by judgment, settlement or conviction or on a plea of nolo contendere or its equivalent shall not itself create a presumption that (a) the person did not act in good faith and in a manner the person reasonably believed to be in or not opposed to the best interests of the Corporation, or (b) with respect to any criminal action or proceeding, the person had reasonable cause to believe that his or her conduct was unlawful.

Section 2. Derivative Actions: Subject to all of the provisions of this Article, the Corporation shall have the power to indemnify any person who was or is a party to, or is threatened to be made a party to, any threatened, pending or completed action or suit by or in the right of the Corporation to procure a judgment in its favor because (a) the person was or is a Director, officer, employee, volunteer or agent of the Corporation, or (b) the person was or is serving at the request of the Corporation as a director, officer, employee, volunteer or agent of another foreign or domestic corporation, partnership, joint venture, trust or other enterprise, whether or not for profit. The person may be indemnified and held harmless against expenses (including actual and reasonable attorney fees) and amounts paid in settlement incurred by the person in connection with such action or suit if the person acted in good faith and in a manner the person reasonably believed to be in or not opposed to the best interests of the Corporation. Indemnification shall not be made for any claim, issue or manner in which the person has been found liable to the Corporation, unless and only to the extent that the court in which such action or suit was brought has determined on application that, despite the adjudication of liability but in view of all circumstances of the case, the person is fairly and reasonably entitled to indemnification for the expenses that the court considers proper.

Section 3. Expenses of Successful Defense: To the extent that a person has been successful on the merits or otherwise in defense of any action, suit or proceeding referred to in Sections 1 or 2 or this Article, or in defense of any claim, issue or matter in the action, suit or proceeding, the person shall be indemnified against expenses (including actual and reasonable attorney fees) incurred in connection with the action and in any proceeding brought to enforce the mandatory indemnification provided by this Section 3.

a. **Determination that Indemnification is Proper:** Any indemnification under Sections 1 or 2 of this Article (unless ordered by a court), shall be made by the Corporation only as authorized in the specific case. The Corporation must determine that indemnification of the person is proper in the circumstances because the person has met the applicable standard of conduct set forth in Sections 1 or 2, whichever is applicable. Such determination shall be made in any of the following ways:

   (1) By a majority vote of a quorum of the Directors consisting of Directors who were not parties to such action, suit or proceeding.

   (2) If the quorum described in the clause (1) above is not obtainable, then by a committee of Directors who are not parties to the action.

(3) By independent legal counsel in a written opinion.

b. **Proportionate Indemnity:** If a person is entitled to indemnification under Sections 1 or 2 of this Article for a portion of expenses, including attorney fees, judgments, penalties, fines and amounts paid in settlement, but not for the total amount, the Corporation shall indemnify the person for the portion of the expenses, judgments, penalties, fines or amounts paid in settlement for which the person is entitled to be indemnified.

Section 4. Expense Advance: Expenses incurred in defending a civil or criminal action, suit or proceeding described in Sections 1 or 2 of this Article may be paid by the Corporation in advance of the final disposition of the action, suit or proceeding, upon receipt of an undertaking by or on behalf of the person involved to repay the expenses, if it is ultimately determined that the person is not entitled to be indemnified by the Corporation. The undertaking shall be an unlimited general obligation of the person on whose behalf advances are made, but need not be secured.

Section 5. Nonexclusivity of Rights: The indemnification or advancement of expenses provided under this Article is not exclusive of other rights to which a person seeking indemnification or advancement of expenses may be entitled under a contractual arrangement with the Corporation. However, the total amount of expenses advanced or indemnified from all sources combined shall not exceed the amount of the actual expenses incurred by the person seeking indemnification or advancement of expenses.

Section 6. Former Directors and Officers: The indemnification provided in this Article continues for a person who ceases to be a director, officer, employee, volunteer or agent and shall insure to the benefit of the heirs, executors and administrators of that person.

Section 7. Insurance: The Corporation may purchase and maintain insurance on behalf of any person who (a) was or is a director, officer, employee, volunteer or agent of the Corporation or (b) was or is serving at the request of the Corporation as a director, officer, employee, volunteer or agent of another corporation, partnership, joint venture, trust or other enterprise. Such insurance may protect against any liability asserted against the person and incurred by him or her in any such capacity or arising out of his or her status as such, whether or not the Corporation would have power to indemnify against such liability under this Article or the laws of the State of Michigan.

Section 8. Changes in Michigan Law: If there are any changes in the Michigan statutory provisions applicable to the Corporation and relating to the subject matter of this Article, then the indemnification to which any person shall be entitled shall be determined by such changed provisions, but only to the extent that any such change permits the Corporation to provide broader indemnification rights than such provisions permitted the Corporation to provide before any such change.

ARTICLE XII

DISSOLUTION

Section 1. Dissolution of the Corporation: In the event of the dissolution of the Flint Cultural Center Corporation, the building contents and fixtures of those organizations governed by the FCCC, and any funds remaining in the FCCC's possession, shall be turned over to the Community Foundation of Greater Flint for management, investment, or distribution. Those assets thus provided to the Community Foundation of Greater Flint shall be used in a manner consistent with the original intentions of the incorporators of the FCCC, as determined by the Community Foundation of Greater Flint's Board of Directors. In addition, pursuant to the property transfer agreement signed between the School District of the City of Flint and the Corporation, the Cultural Center properties and buildings will revert to the Flint Board of Education.

ARTICLE XIII

AMENDMENTS AND PARLIAMENTARY AUTHORITY

Section 1. Amendment: These bylaws may be amended at any regular or special meeting by a two-thirds vote provided that the board has been given all amendments in writing at least two weeks before the meeting.

Section 2. Parliamentary Authority: The rules contained in the current edition of *Roberts Rules of Order Newly Revised* shall govern the Corporation in all cases in which they are applicable and in which they are not inconsistent with these bylaws, any special Rules of Order which the Corporation may adopt and Michigan law.

RESOLUTIONS

None

RESOLUTIONS - MAY BE REFERRED FROM COTW

150886 Brown & Sons Co./Annual Supply/Brake Parts, Bulbs, Breakers, Sprays and Filters

Resolution resolving that the Finance Department is hereby authorized to issue purchase orders for FY2016, FY2017, and FY2018 to Brown & Sons Co. for the annual supply of brake parts, bulbs, breakers, sprays, and filters, as requested by Fleet, in an annual amount NOT-TO-EXCEED $140,000.00, for an aggregate amount of $420,000.00 (pending adopting of the FY18 Budget), AND, resolving that the Finance Department has the discretion to spend an additional amount of NO-MORE-THAN 5% of the annual requested spend amount to Brown & Sons Co. for unanticipated requests that may be submitted during the next three years [Fleet/Central Garage Fund Acct. No. 661-000.000-110.400]. [City Administrator Submission No. CA1022015]

SEPARATED FROM MASTER RESOLUTION

150887 CO#1/Contract/Zito Construction/Water Main Cut-In Project

Resolution resolving that the Mayor and City Administrator do all things necessary to enter into change order #1 to the contract with Zito Construction to extend the contract into the current fiscal year and pay additional work that was needed to complete the project, as requested by the Water Plant, in an amount NOT-TO-EXCEED $19,570.00, for a revised contractual amount of $695,870.00 [Water Fund Acct. No. 591-536.100-801.000]. [City Administrator Submission No. CA1032015]

SEPARATED FROM MASTER RESOLUTION

150888 Contract/Stansley Industries/Biosolids Sludge Transportation-Hauling Services

Resolution resolving that the Mayor and City Administrator are authorized to enter into a three-year contract with Stansley Industries for [a] biosolids sludge cake transportation/hauling agreement, as requested by the Water Pollution Control, for a FY2016 amount of $60,000.00, and pending adoption of FY2017 [Budget] of $80,000.00, and FY2018 Budget amount of $85,000.00, for a total award of $225,000.00 [Sewer Fund Acct. No. 590-550.100-801.500]. [City Administrator Submission No. CA1042015]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150889 Contract/Waste Management-Venice Park Landfill/Biosolids Sludge Disposal Services

Resolution resolving that the Mayor and City Administrator are authorized to enter into a three-year contract with Waste Management/Venice Park for the disposal of the biosolids sludge cake, as requested by the Water Pollution Control, for a FY2016 amount of $150,000.00, and pending adoption of FY2017 and FY2018 Budget amounts of $200,000.00 each year, for a total award of $550,000.00 [Sewer Fund Acct. No. 590-550.100-801.500]. [City Administrator Submission No. CA1052015]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150890 Budget Amendment/Department of Public Works (DPW)/Michigan Department of Transportation (MDOT) Contracts

Resolution resolving that the Department of Public Works' FY2016 Budget shall be amended with the transfer of $189,301.57 from fund balance to Professional Services Line Item No. 202-441.702-801.000. [NOTE: In order to comply with the contractual agreement between MDOT and DPW for bridge work on I-69, and the contractual agreement between MDOT, the City of Flint, and Rowe Professional Services for the Leith Street-Stewart Avenue Bridge Project, it is necessary to replace funds liquidated during the year-end closing process and increase the FY2016 Budget with those remaining funds, for remaining project funding in the amounts of $101,432.82 and $87,868.75, respectively.] [City Administrator Submission No. CA1062015]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150891 Contract/Fleis & Vandenbrink/Preliminary Design and Engineering Services/Fenton Road Project

Resolution resolving that the Mayor and City Administrator are authorized to enter into a contract with Fleis & Vandenbrink using TIP funds for the preliminary design and engineering services for the Fenton Road Project, as requested by Transportation, in an amount NOT-TO-EXCEED $156,748.60 [Major Street Fund Acct. No. 202-441.702-801.000]. [City Administrator Submission No. CA1072015]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150892 Contract/Wade Trim, Inc./Preliminary Design and Engineering Services/Kearsley Street Rehabilitation Project

Resolution resolving that the Mayor and City Administrator are authorized to enter into a contract with Wade Trim, Inc. using TIP funds for the preliminary

design and engineering services for the Kearsley Street Rehabilitation Project, as requested by Transportation, in an amount NOT-TO-EXCEED $94,000.00 [Major Street Fund Acct. No. 202-441.702-801.000]. [City Administrator Submission No. CA1082015]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

Passed The Consent Agenda

A motion was made by Councilperson Mays, seconded by Councilperson Nelson, including all the preceding items marked as having been adopted on a Consent Agenda. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Winfrey, Councilperson Galloway, Councilperson VanBuren and Councilperson Mays

Subject: Darnell Earley - Professional Liability Coverage: Dec 18, 2014/ 2015

Hi Randy,

We have provided professional liability coverage for a few Emergency Managers. In the case of Mr. Ealey, the carrier did not renew his policy and there is concern about the potential claim related to the City of Flint water issues. Below is an email form our account manager discussing the renewal of the policy.

Question- does the State of Michigan provide any protection from liability for actions taken while the Emergency Manager? Can we discuss this question?

Thanks

Subject: Darnell Earley - Professional Liability Coverage: Dec 18, 2014/ 2015

Dave / Steve

I now have Mr. Earley's email address (below). As you know, ACE / Westchester has sent Notice of Non-Renewal on the $1 Mil Primary layer of coverage due to a claim presented against Mr. Earley as EM of Detroit Public Schools. Although the case was closed, the carrier incurred $3,000 of legal expenses. We are searching for a carrier to replace the primary limit of coverage, which will be needed in order to renew the excess $2 mil layer currently with Ironshore. With the article in Sunday's Free Press and the mention of Mr. Earley as the EM of Flint who was allegedly involved in the decision to use the Flint Water Treatment Plant as an interim source until the Karegnodi pipeline is completed, we may have difficulty finding a replacement carrier.

Do you know if the State of Michigan would provide primary defense for Mr. Earley if a claim ensues against him as the EM of Flint? If so, this will certainly give us some hope of finding replacement coverage for Mr. Earley.

Subject: Flint 10-28-15 Call Notes

Hello all,

Here are my call notes from the call we just had:

City of Flint
Weekly Call Notes – 10/28/15

Present:
Mayor Walling, N. Henderson, F. Headen, E. Cline, P. Dostine, A. Heimann, D. Hudson

Priorities

1. Crime/Safety

- Flint is preparing for this weekend (Halloween/Devil's Night) with an crime/arson prevention program that utilizes a volunteer citizen network
- Violence Reduction Network – National program to use analytics to help reduce crime by helping to identify individuals who are likely to accelerate crime. Had a press conference that was very well received to announce this partnership with the FBI
- Police Recruitment – Going well, have already hired some staff, and will be sending 5 people to the Police Academy. Also, will be using the KRAM (?) to hire some part-time community officers. The KRAM is a dedicated funding source and will have a net neutral impact on the budget.

Status of Water Situation

1. Revenues/Expenditures

- Flint is continuing to lose money, they are currently down about $11Million this period, and even after the shut off notices are sent out, they anticipate that they will still have a roughly $6-8 Million loss
- Will be amending the budget to show the revenue loss, will be sending along a spreadsheet that has their cash flow estimates

2. Litigation

- Flint is currently absorbing the entire cost of the litigation against the City, and they feel as though the state should pay for part of these costs considering that the State has "some responsibility on this". They say that the decisions that led to this litigation were made in part by Mike Brown and that the State should offer to help pay some of the extra litigation costs. She intends to discuss this further with the Treasury Department when she makes her visit to Lansing in November.

3. KWA Bond Payment

- N. Henderson was unclear when this payment was actually due. Does know that it is around $6M, and that the payment will need to be made in this fiscal year. N. Henderson agreed to follow up with Eric when she comes across the due date for the payment.

Miscellaneous

1. Mayoral Election

- Mayor Walling stated that the elected Mayor will be sworn into office the Monday following the election (November 9th) and as such, this may be his last phone call with the group. He expressed that this group has developed a very positive working relationship, and that he has enjoyed working with the people on the call

Subject: Water and Sewer Cash and Fund Balances Information
To: "Natasha Henderson" <nhenderson@cityofflint.com>
Cc: "Dawn Steele" <dsteele@cityofflint.com>

Ms. Henderson:

In response to your request for additional information regarding the City's cash and fund balance positions in its Sewer and Water Funds, I have attached the 9/30/2015 RTAB Reports which include the City's cash balances and Budget to Actual Revenues and Expenditures. The 9/30 Report includes fund balance information with a comparison to the requirement as set forth by City Ordinance.

As of October 21, 2015 the City's Water and Sewer Fund Cash accounts were as follows:

Sewer Fund	29,770,766
Water Fund	18,953,346
Transfer to DWSD	(10,000,000)
Reimbursement from Treasury	2,000,000
Total Water Fund	10,953,346
Total Sewer/Water Funds	**40,724,111**

Please keep in mind that total cash balance does not reflect restricted amounts. For this purpose, I have included a summary of unrestricted fund balance information. The FY2016 budget information in the RTAB report only reflects budget amendments approved by both Council and RTAB through 9/30. It does not reflect the amendments passed in October. The unrestricted fund balance information below illustrates the impact of those amendments. The City has historically reviewed the financial position of the Water and Sewer Funds together as a Utility Services System. For instance, the budget adopted by EM Ambrose projected an operating deficit for FY16 in the Sewer Fund of $1,091,873 and an operating surplus in the Water Fund of $1,065,715.

FY2016 Beginning Sewer Unrestricted Fund Balance*	15,866,408
Drawings Approved by Budget Amendment	(2,883,373)
FY2016 Projected Ending Unrestricted Fund Balance	12,983,035
FY2016 Beginning Water Unrestricted Fund Balance*	5,789,448
Drawings Approved by Budget Amendment	(7,287,125)
DWSD Budget Amendment	(2,000,000)
FY2016 Projected Ending Unrestricted Fund Balance	(3,497,677)
Total COMBINED FY2016 Projected Ending Unresticted Fund Balance	**9,485,358**

I believe that you had intended to provide the Memo regarding the first quarter budget amendments to RTAB with the RTAB packet for November. For ease of reference, if you would like to provide it to them to support the "Drawings Approved by Budget Amendment" as referenced above, I have attached it to this message.

A comprehensive 12-month cash flow that will more clearly outline the timing of revenue and expenditure items is under development. In the interim, I have attached the cash flow provided by the Treasury department on a monthly basis. As of today, Utility collections are down $3,318,835 for the period August 10-October 20 compared to the same time last year. Foot traffic and online activity is down by approximately 138 transactions per day. This continues to be monitored closely.

In an effort to enforce collections and bolster cash flow, the City will be resuming shut off notices. We currently anticipate first mailings to occur at the end of October/beginning of November.

Please let me know if there is any additional information I may provide or if you have any additional questions.

Best regards,

Jody N. Lundquist

RE: City of Flint FY2016 First Quarter Budget Amendments

The attached FY2016 First Quarter Budget Amendments are being submitted for review and discussion at the City of Flint's Finance and Administration Committee meeting on October 7, 2015.

The City of Flint has adopted a biennial budget for fiscal years 2015 and 2016 and is committed to ongoing review of revenues and expenses in compliance with City Ordinance and Michigan's Public Act of 1968, Uniform Budgeting and Accounting Act. While much of the City's ongoing operations are aligned with budget projections for the fiscal year to date, the first quarter budget amendments being proposed attempt to adjust for the following items: reallocation of estimated expenditures, use of fund balance for projects and capital improvements outstanding at June 30, 2015, and reduction in revenue projections.

Attached is the City's Proposed First Quarter Budget Amendments for your review. For the purposes of review, discussion and approval, the amendments have been presented in two resolutions. The first resolution contains the General, Drug Enforcement and Public Improvement Funds. The second resolution contains the Sewer and Water Funds.

RESOLUTION I:

General Fund

The Police Department is partnering with the Crim Foundation to provide 5 part-time officers. The Crim Foundation will be reimbursing the City for all expenses associated with these officers. There is no Use of Fund Balance in the 101 Fund for these expenditures.

The Fire Department's budget reflects a budget amendment for the Charter Pension account and

an adjustment to the Pension Defined Benefit and Defined Contribution plans. The original budget had 3 firefighters in the Defined Contribution plan, however the positions are actually participants in the Defined Benefit plan. An adjustment is necessary to cover the additional defined benefit contribution expense. The additional expense will be offset by a reduction in Fleet charges to the department therefore the net impact is zero.

The Planning and Zoning budget reflects an increase in the revenue budget for fees already collected but not budgeted in the amount of $20,000. This revenue was used to fund the increase in the Equipment budget for the purchase of lawn equipment for neighborhood weed abatement efforts.

Drug Enforcement Fund

The Police Department is requesting to add a full-time police officer to be funded with the Drug Enforcement Fund (265). This Officer is currently working at the DEA and his wages are eligible for Forfeiture funds. The City has confirmed that this position is eligible for up to 18 months. This budget amendment reflects the Use of Fund Balance of $42,273 in the Drug Forfeiture Fund.

Permanent Public Improvement Fund

The Public Improvement Fund (402) is being amended to reflect a decrease in revenues and expenditures. The first item reflects a reduction in the revenue received from the DDA for the parking debt bond. The reimbursement revenue was recorded in a prior year with a corresponding account receivable. Receipt of payment will reduce the previously recorded receivable. At the time of adoption, the FY2016 budget included repayment of the long term liability owed to the Sewer Fund. This liability was subsequently repaid in its entirety through the receipt of an emergency loan in FY2015.

RESOLUTION II:

On August 7, 2015 Genesee County District Court Judge Archie Hayman issued a Preliminary Injunction Order (the "Order") against the City. Upon issuance of the Order, the City was immediately enjoined from charging and collecting water and sewer rates that include the September 16, 2011 35% rate increases and disconnecting water service for its delinquent water and sewer customers wherein the delinquency arose between September 16, 2011 and the date of the Order. This immediately resulted in a decrease in cash collections on outstanding and current water bills and a decrease in total billed revenue.

The following budget amendments reflect a decrease in revenue projections as a result of monthly billing activity for the period September 2015-June 2016. The first month of billing since the Order has confirmed preliminary estimates with $670,000 less in billed usage from the same period in 2014. The City has assumed and average decrease of $616,147.64 in monthly billed revenue, or $6,161,476 by fiscal year end.

The City had total accounts receivable due of $13,738,190 for all active and inactive accounts at August 7, 2015. It is highly probable that a large percentage of that balance will have to be written off as uncollectible without the ability to enforce payment. The proposed amendments

reflect an estimated uncollectible balance at this time of $8,340,823.

The City is working diligently to review the FY2016 operating budgets for additional sources of savings. A spending and hiring freeze for all non-critical items is in effect. The City has redeveloped its FY2016 capital improvement plan and has now canceled or postponed many planned projects and purchases until financial stability can be regained.

Changes to appropriations reflect the carry forward of projects in progress but not completed at June 30, 2015 for the Sewer and Water Funds of $41,796 and $1,456,922, respectively. This carry forward is largely offset by decreases to the City's capital improvement plan.

The City's emphasis at this time continues to be on providing safe, clean water to the City's residents and moving forward with preparations for the KWA pipeline to come online. As a result of this re-prioritization, the budget amendments reflect a reduction to budget capital improvements of $5,564,804.

Sewer Fund

The Sewer Fund budget (590) reflects a decrease in projected revenue of $6,741,475 and increase in Use of Fund balance of $2,883,373. The Sewer Fund was paid in full by the 101 fund at the end of FY2015, therefore the budgeted payment of $800,000 from the Public Improvement Fund must be removed. As noted previously, the decrease in Charges for Services of $5,941,475 is a result of the combined impact of inability to enforce collections on balance prior to August 7 and decrease in billed revenue per Court ordered rate reductions.

The roll forward of incomplete FY2015 projects of $41,796 is reflected by a corresponding decrease in cancelled and postponed capital improvement projects of $3,899,898.

Water Fund

The Water Fund budget (591) reflects a decrease in projected revenue of $8,560,824 and increase in Use of Fund balance of $7,287,125. Again, as noted previously, the decrease in Charges for Services are a result of the combined impact of inability to enforce collections on balance prior to August 7 and decrease in billed revenue per Court ordered rate reductions.

The roll forward of incomplete FY2015 projects of $1,456,922 is reflected by a corresponding decrease in cancelled and postponed capital improvement projects of $1,664,906. The City had just begun its much need meter replacement program at the end of FY2015. A significant portion of the roll forward reflects outstanding purchase orders and invoices related to this project prior to the spending freeze. The reduction in FY2016 budgeted improvements reflects the reprioritization of the KWA project and postponement of other significant projects such as the Dupont Street Pipeline Project and Hamilton Dam Sheet Piling.

Subject: New reports on Flint and local government issued by MSU

Good Morning,

Please find attached some new reports from MSU regarding the Flint EM years (2011-2014) which is a follow-up to our 2011 report on Flint.

Find here the original Flint report:
https://www.cityofflint.com/wp-content/uploads/Reports/MSUE_FlintStudy2011.pdf

The second report documents the role of state government in the fiscal affairs of Local Government. In particular, you will note:

- Page 9, figure 4 that Michigan escalated its local tax limitations more than almost any state except Colorado

- Page 11, figure 5, Michigan is a stick state in regards to local aid

- Page 14, figure 6, MI is ranked as being high cost and high revenue pressure (meaning revenue restrictions) which is the worst of both worlds

Our research points to the fact that Michigan policies are a major part of the cause of local fiscal distress, not the only cause but a major contributing factor. This is the first time we are aware of being able to quantify this conventional wisdom and place it in the fifty state context.

Thank you

Eric

Beyond State Takeovers:
Reconsidering the Role of State Government in Local Financial Distress, with Important Lessons for Michigan and its Embattled Cities

MSU Extension White Paper

By:

Joshua Sapotichne, Department of Political Science

Erika Rosebrook, Department of Political Science

Eric A. Scorsone, Department of Agricultural, Food and Resource Economics

Danielle Kaminski, Department of Agricultural, Food and Resource Economics

Mary Doidge, Department of Agricultural, Food and Resource Economics

Traci Taylor, Anderson Economic Group

Financial support for this research was provided by the C.S. Mott Foundation. Sapotichne and Rosebrook received support from the Department of Political Science at Michigan State University. Daniel Casey-Dunn, Madeline Mangan and Sean Fitzpatrick provided valuable assistance with the collection, coding and analysis of data for this research.

Executive Summary

One provocative pattern to emerge from the Great Recession is that instances of acute local fiscal distress have clustered in certain states and not others. As recently as last year in Michigan, a state appointed Emergency Manager was operating in each of 17 local governments and school districts. A recent California Policy Center report suggests that more than a dozen cities and counties in California – a state that has already experienced three recent, high-profile municipal bankruptcies and a near-bankruptcy in San Jose, the "capital of Silicon Valley" – are on the cusp of defaulting on general obligation bonds

With the generous support of the C.S. Mott Foundation and Michigan State University, we have engaged in a multi-pronged, multi-method research program to assess the crucial but often overlooked role of state governments in shaping the ways in which cities respond to financial difficulties. This report, based on our analysis of a unique, nearly half-century-long dataset of state and local financial and policy information and correspondence with state officials, analysts and legal experts involved in state-local fiscal affairs, elaborates several key findings:

- **Municipal fiscal distress is not simply a *local* problem. State laws and policies provide state governments with extraordinary influence over the ability of cities to balance revenue and expenditure flows.** The common perception that critical taxing and spending decisions are largely within a city government's control tends to conceal this fundamental detail about American state-local fiscal relations.
- **The ways in which state lawmakers act on this influence varies from state to state and over time.** We refer to the complex mix of laws and policies that prescribe the powers, rights and capacities of local lawmakers to respond to their financial conditions as the **state context for local fiscal distress.** Section 1 of this report assesses key elements of this state context for the lower 48 states since 1970.
- **Some states incubate local financial stress by simultaneously driving up spending pressures on their cities while curtailing their capacity to raise critical revenue.** Since the 1970s, the proliferation of state-imposed tax revenue limitations, coupled with recurring cuts to state aid, has fostered a system that limits a city's ability to fund critical services. Some state governments further undermine the fiscal capacity of their cities via state laws and policies that engender steep expenditure-side pressures (e.g., devolving program responsibilities or driving up labor costs). We classify these states as **incubators of fiscal distress.**
- **Michigan incubates financial stress among its local governments.** Michigan's particular mix of stringent limitations on local revenue and its relatively low level of financial assistance to cities, coupled with spending pressures stemming from spiking local service burdens and increased labor costs, creates conditions that drive up the potential for local fiscal distress.
- **Because state governments can foster dramatically different state contexts for local fiscal stress, there is no single model policy for state intervention in distressed cities or for prevention of local fiscal distress.** A policy that does not address a state's unique context is unlikely to help cities escape financial trouble over the long term. State lawmakers must decide which legal and political tradeoffs they are willing to make to support city fiscal health. Michigan lawmakers, for instance, must recognize that the state context contributes to the problem of local fiscal distress. An aggressive intervention policy does little to curtail the consequences of this state-imposed context. Section 2 of this report draws policy lessons from comparable states in an effort to illustrate alternative approaches to state involvement in local fiscal affairs.

This report's practical recommendations are aimed at assisting the C.S. Mott Foundation, state and local officials, and Michigan residents in identifying a more effective policy and legal approach to local fiscal crises. These are not overly startling recommendations, yet they are easy to neglect because policymakers tend to focus more on short-term political gain rather than the histories and unintended consequences of policies that, over time, become increasingly difficult to alter. Some key recommendations:

- **Creating a state agency that coordinates services to local governments and offers technical support and fiscal monitoring.**
- **Raising awareness among citizens and state decision makers that the causes of fiscal distress are not solely at the local level. Though state governments are certainly part of the solution, they can be a big part of the problem as well.**

Introduction

A recent spate of research and media reports suggest that as the fiscal consequences of the Great Recession continue to subside, state and local fiscal conditions are on the upswing. American cities and locales, however, are not yet out of the woods. A recent analysis from the National League of Cities strikes the proper tone of caution when reporting that, though indeed *state* governments have recovered (albeit slowly), "...*local* fiscal health has not yet fully returned to pre-recession levels. ... While tax revenues continue to improve, increases in service costs, long-term infrastructure needs, employee wages, and pension and healthcare obligations, along with decreased levels of state and federal aid, continue to constrain the [local] fiscal outlook" (McFarland and Pagano, 2014, p. 1, emphasis added).

One thought-provoking pattern to emerge from the aftermath of the Great Recession is that the fiscal outlook seems to be particularly bleak among local governments in certain states. The city of Detroit's bankruptcy proceedings may have indicated that Michigan is something of a hotbed for local financial disaster. Yet a far more damning indicator is the prevalence of financial distress among the state's other local governments. As recently as last year, 17 local governments and school districts were operating under the control of a state-appointed emergency financial manager. Recently, Michigan's most populous county, Wayne, was recently designated for financial emergency status as well. Michigan does not stand alone. News from California, a state that has already seen four cities enter the municipal bankruptcy process since 2008, is equally discouraging. The authors of a recent report conducted for the California Policy Center argue that more than a dozen cities and counties in California are statistically far more likely than "a typical U.S. city or county" to enter bankruptcy proceedings or default on general obligation bonds, with several cities – such as Compton, King City, Sutter Creek and Ione – are a whopping 20 to 40 times more likely to experience acute financial crisis (Joffe and Larkedring, 2015).

What is it with local governments in these states? When it comes to urban fiscal problems, there is much blame to go around. Some blame a mixture of national and global economic forces beyond the control of state and local policymakers. Others contend that the cities facing severe budget crises have only themselves to blame. The goal of this report is to refocus attention on the crucial but often overlooked role of state governments in determining the ways in which cities respond to financial difficulties. How and in what specific ways do state governments structure this local response? Is it possible to assess the fiscal value that all states – via their mix of policies, laws and institutions – may add to or take away from local fiscal decision making? Is it truly more challenging to gain and maintain fiscal sustainability in certain states than it is in others? And in light of this consideration of the role that state governments play in structuring local fiscal decision making, in what ways do state governments choose to – or choose not to – internalize their role in the design and administration of their fiscal distress intervention policy? In other words, can we identify policy self-awareness among state governments that place particularly onerous fiscal pressures on their local lawmakers?

To respond to these important questions, we, with the generous support of the C.S. Mott Foundation and Michigan State University, set out on a multi-pronged, multi-method research program at a critical time in which a new era seems to be dawning for state-local fiscal relations. This report summarizes the findings of the first stage of this ongoing project.

Section 1 of this report develops an indicator for the state context for local fiscal distress based on the mix of state laws and policies that directly influence the revenue and spending decisions of local governments. This section uncovers a number of compelling patterns in the state imposition of revenue and spending pressures over the past quarter-century. Chief among these patterns is that, although a number of states have taken measures to severely limit the revenue capacity of their local governments (thus reducing the resources available to maintain critical services) and several states have devolved greater service responsibilities (and higher spending burdens) to their local governments, only a small handful of states simultaneously drive up spending pressures while aggressively curtailing local governments' capacity to raise revenue. Taken independently, state-imposed revenue- and expenditure-side pressures can play a determinative role in local fiscal decision making. Taken together, as in states such as Michigan and California, they incubate local fiscal distress and can serve to foster fundamental budgetary imbalances that more fiscally challenged local communities are ill-equipped to overcome.

In Section 2, we draw on interpersonal communications with key personnel in several states to assess key elements of state policies for intervening in fiscally distressed local governments. We set out to identify similarities in intervention policies – of which Michigan's is the poster child – and to learn how other states approach local fiscal crises differently. From our work with the state officials, we illustrate how state governments can more effectively align policy with the nature of the problems faced by cities in distress, as well as how state-imposed constraints hamper cities' abilities to balance revenues and expenditures over the long-term. In Section 3, we combine the lessons from Sections 1 and 2 to outline recommendations that can assist the C.S. Mott Foundation, state and local officials, and Michigan residents in identifying a more effective approach to local fiscal crises.

Section 1: Assessing How States Set the Context for Local Fiscal Distress: Revenue Squeezes and Expenditure-side Pressures

Two essential powers that local officials enjoy are their authority to raise revenues and their power to allocate those revenues as they see fit via public expenditures. In local media and policy research, city officials are sometimes lauded for what are perceived as exciting local policy outcomes, such as when a city makes a significant move up the "America's Greenest Cities" or "Child Well-being and Health" rankings. More commonly, they are chastised for decisions deemed detrimental to the city's future, such as providing generous benefits to the municipal workforce, slashing essential services, enacting a rigid historical preservation agenda or raising licensing fees. Yet the common perception that critical taxing and spending decisions – and, by extension, the apportionment of blame and credit associated with the outcomes of such decisions – are largely within a city government's control conceals a fundamental detail about American state-local fiscal relations: state laws and policies provide state governments with extraordinary influence over nearly every aspect of city budgeting. From the type and level of financial assistance that state governments deliver to state-imposed controls over local revenues; to the growing practice and use of state mandates, preapproval and preemption; to minimum service standards; to the formal or informal consultations, advice or technical assistance that state governments may (or may not) provide, local governments in America, in the words of influential legal scholars Gerald Frug and David Barron (2008, p. 75), simply "do not have anything like the kind of local fiscal autonomy often attributed to them."

States influence local governments' capacity to balance revenue and expenditure flows in a variety of ways. In this report, we focus on two core dimensions of this state context for local financial distress.[1] The first is the degree to which states participate in adding or reducing local revenue capacity via the policy balance between the buoyancy of state-granted aid and shared revenue, and the severity of state-imposed controls over city tax revenues. Although most states exhibit a relatively balanced policy approach to local revenue capacity, some state governments have responded to local revenue challenges by granting greater access to state intergovernmental aid while mostly suppressing financial controls over local taxes. These are revenue "carrot" states. Another group – revenue "stick" states, of which Michigan is a prime example – have responded to local revenue challenges by ratcheting financial controls while offering thin or uncertain compensatory aid. Simply put, we expect it to be far more challenging to maintain a sustainable fiscal outlook in states that simultaneously suppress own-source revenue capacity and transfer very little aid to municipalities, particularly during national or state economic downturns.

State policies and actions also burden the opposite end of local budgetary processes: decisions over public expenditures. Few, if any, local spending responsibilities exist because cities choose to take them on. The state decides.[2] Spending pressures can be subtler. For instance, local labor costs, which account for a large slice of most cities' budgets, are heavily influenced by state policies and regulations concerning municipal employees' wages and level of retirement and health care benefits.[3] This basic fact should give pause to those who instinctively attribute chronic local fiscal distress to "profligate spending on public employees" (Greenhut, 2012, pp. 1-2) or "spiraling labor and pension costs" (Rozansky, 2012). To borrow again from Frug and Barron's seminal work (2008, p. 199), "Although cities are often criticized for granting overly generous pensions and health care to their employees, sometimes they become supporters of municipal employees' benefits because the state requires them to do so." Our more general argument here is that it is foolish to claim to correctly diagnose the causes of local fiscal distress without careful examination of the spending context in which states place their cities. In this paper, we aim to capture a large slice of this expenditure-side context by assessing state public sector collective bargaining policies (specifically, those covering municipal police, firefighters, teachers and other local employees) and public employee union membership coverage.

1 Formally defined as the complex, multidimensional, legal-policy frameworks that prescribe the powers, rights and capacities of local lawmakers to respond to their financial conditions.

2 Via specific provisions (or the absence of such provisions) regarding local statutory authorization, budgetary constraints or more general interpretations of local governments' home rule authority.

3 For instance, Michigan, even after the adoption of right-to-work legislation in late 2012, mandates binding arbitration for public safety officers in the event that involved parties in a labor contract dispute cannot reach an agreement. Massachusetts pays out benefits to local employees through the State-Boston Retirement System via formulas established by state law. Illinois law does not mandate city or employee benefit or contribution levels, instead favoring local flexibility in the control over pension costs.

The final segment of this section considers how these revenue- and expenditure-side pressures interact within and across all U.S. state governments. As one might expect (or at least hope), these two competing dimensions tend to work against one another. States that are more revenue stick (meaning local tax limitation increases outpace the distribution of state aid) tend not to impose equally exacting expenditure-side pressures, at least in relation to local labor costs. For many states that do drive up labor and service costs via their mixture of policies, these costs are at least partially offset via a more resilient and vibrant aid environment, coupled with limited own-source revenue restrictions. A few states, such as Michigan and California, place strict limits on local own-source revenues while at the same time providing only meager intergovernmental aid and imposing costly labor and service obligations. We contend that these states have structured local fiscal policymaking in a way that effectively incubates local financial distress. These state contexts are the most egregious in hampering the exercise of local fiscal power; yet the nature of the problem for cities may be much worse – state-imposed budgetary imbalances can engender recurring structural deficits and diminished local service capacity, particularly among the states' older, industrial urban areas.

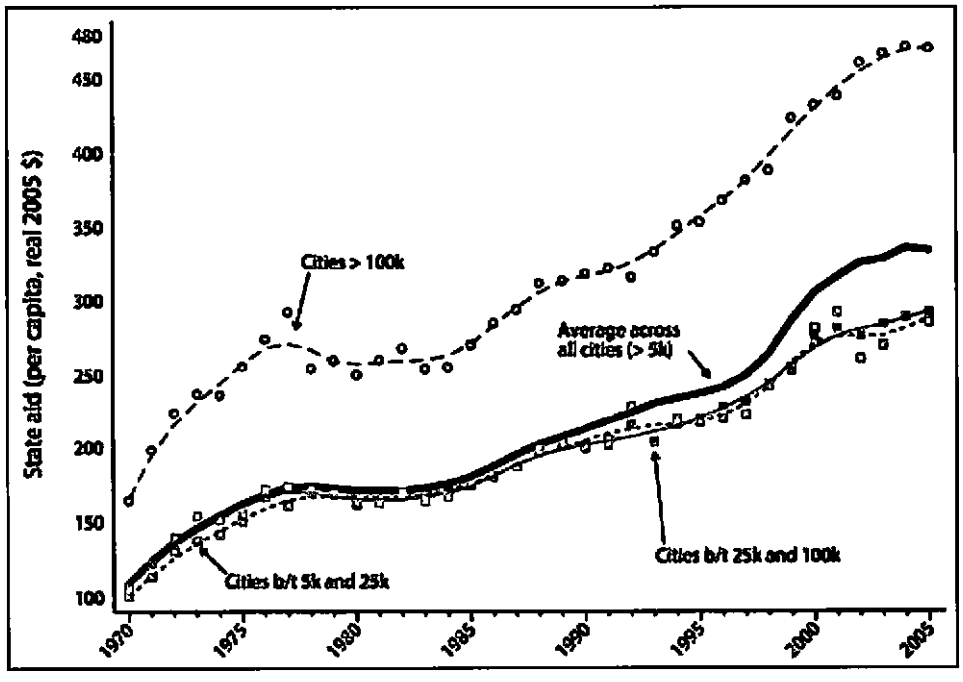
(1) Squeezing Local Revenue Capacity: Thin and Fragile State Aid; Escalating Local Tax Limits

State governments, by virtue of their superior constitutional position, have sweeping legal powers to regulate local finance. Central to our assessment of the state's role in local fiscal distress are state controls over the two dominant sources of city revenue: state aid and local taxes. Local governments occupy a weak position in the American federal system, causing local officials to rely heavily on, in the words of one analyst, "whatever sources of income the states are willing to let them tap into" or "whatever financial assistance" the states are willing to provide (Berman, 2003, p. 89). Sbragia (1983) aptly refers to the condition of American federalism as "the municipal money chase," and in the absence of a vibrant federal aid environment in the United States, state aid – in the form of shared taxes (typically sales, income and gasoline) and restricted or unrestricted grants – continues to be a major source of local government revenue, accounting for roughly a third of local revenue, on average, during the past two decades (Berman, 2003; Urahn et al., 2012).[4]

The importance of a well-designed state aid system is hard to overstate. It allows local officials greater flexibility in responding to economic pressures and the service needs of residents. This flexibility is particularly valuable during periods of economic downturn. Because local governments vary widely in their tax bases and in their ability to raise critical own-source revenues, influential research illustrates the equalizing potential of state aid, particularly in helping to smooth out revenue gaps between wealthier and poorer local jurisdictions (Pelissero, 1984; Stein and Hamm, 1987). In the past few decades, very few states target aid to local governments as a function of local need (Stein and Hamm,

4 Though formulas for the distribution of local aid can vary significantly across states (as well as within states over time), all states provide some form of aid to local governments – often from a historical exchange in which cities would forgo the right to collect certain taxes in exchange for the states returning revenues from those taxes in some form. States typically allocate shared revenue for specific purposes or link it to particular functions of local government. Some shared revenue, however, is unhindered by such state restrictions and can be spent as local lawmakers see fit.

Figure 1. Mapping the Average State Aid Environment Since 1970

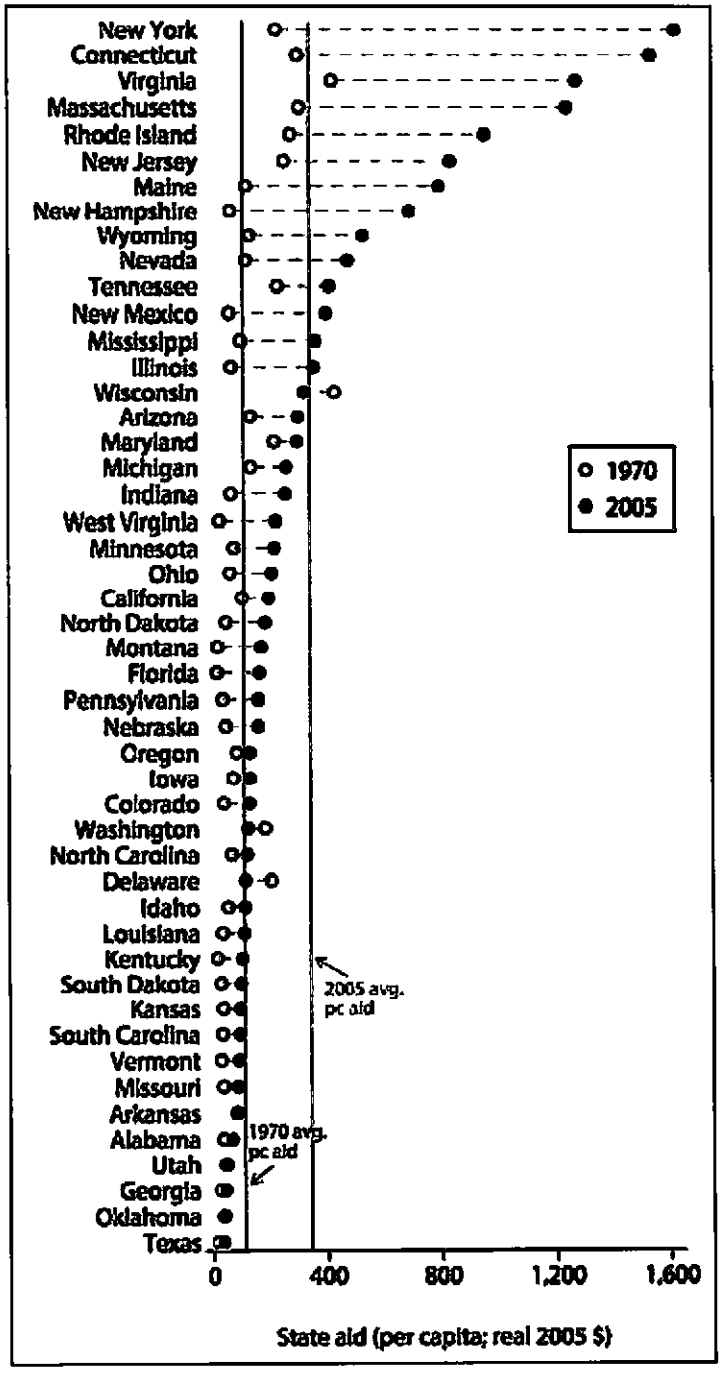


1994). The level of state aid that is available can make it possible for certain jurisdictions – for instance, older, industrial cities experiencing significant job loss coupled with a much reduced tax base – to at least afford minimum levels of services and possibly respond to growing service demands on the heels of a crippling state or national recession (see Ladd and Yinger, 1994).

How then can we characterize the critical state aid portion of the state-controlled revenue environment for American cities? Figure 1, which illustrates trends in per capita state aid to three classes of city governments, shows a steady upward trend in transfers (per capita) received from state governments. Though it is beyond the scope of this project to analyze specific revenue-sharing rules and aid formulas over time and across state contexts, our city financial data allow us to compare important trends in what the Census of Governments classifies as "Total Intergovernmental Revenue from the State Government."[5] In other words, we plot data indicating the fiscal outputs of these rules and decisions. As Figure 1 illustrates, the positive trend over time is particularly strong for cities with populations over 100,000.[6] On average, it would seem that state governments have helped at least larger cities meet increasingly difficult financial conditions through the extension of intergovernmental transfers.

Figure 2, which compares levels and growth of per capita state aid across the contiguous 48 states, paints a bleaker portrait. Consistent with the findings presented in Figure 1, 43 of the 48 states exhibit positive growth rates, meaning that roughly 90 percent of the lower 48 states provided higher levels of aid in the current era than in the early 1970s (mean increase = 256 percent). Figure 1, however, masks the considerable unevenness with which state governments deliver aid. This unevenness is on display in Figure 2, where fewer states provide above average levels of aid, and most states exhibit relatively flat growth in the distribution of state aid.[7]

Figure 2. The Uneven Development of State Aid Environments



5 This includes state grants-in-aid, regardless of basis of distribution; local share of state-collected taxes; payments in lieu of taxes on state property; and reimbursement for services performed for state government (e g., care of state prisoners in local jails, construction or maintenance of state highway facilities, etc.) (U.S. Bureau of the Census, 2006).

6 In 1970, these cities received roughly $160 per capita (in real 2005 dollars) in state intergovernmental revenue; in 2005, the most recent year in our time series, average per capita aid was $470. Though the growth rate for small and medium-sized cities is not as steep, the steady uptick in average per capita state aid exemplifies a healthier state aid environment than in the past.

7 As is indicated by the maroon-colored vertical line, the average per capita aid provided to local governments in 2005 was just over $340. Texas, Oklahoma, Georgia and Utah provided around $40 per person, on average. New York, Connecticut, Virginia, Massachusetts and Rhode Island, on the other hand, distributed intergovernmental revenue at an annual rate at or around $1,000 per resident.

One key reason for this unevenness is that state aid tends to ebb and flow with changing state-level economic conditions (Berman, 2003, pp. 100-102). More generally, state intergovernmental aid – particularly those discretionary resources distributed via statutory aid policies and unprotected by state constitutions – is inextricably linked to state legislative budget battles. State legislatures and governors, scrambling to balance their own budgets, are simply more likely to risk citizen backlash from significant aid cuts during periods of widespread budget shortfalls. What is more, state lawmakers across the country seem to be looking with decreasing favorability on the idea of, in the derisive words of one Wisconsin legislator, "being an ATM machine for local governments" (Rinard, 1999, p. 1).

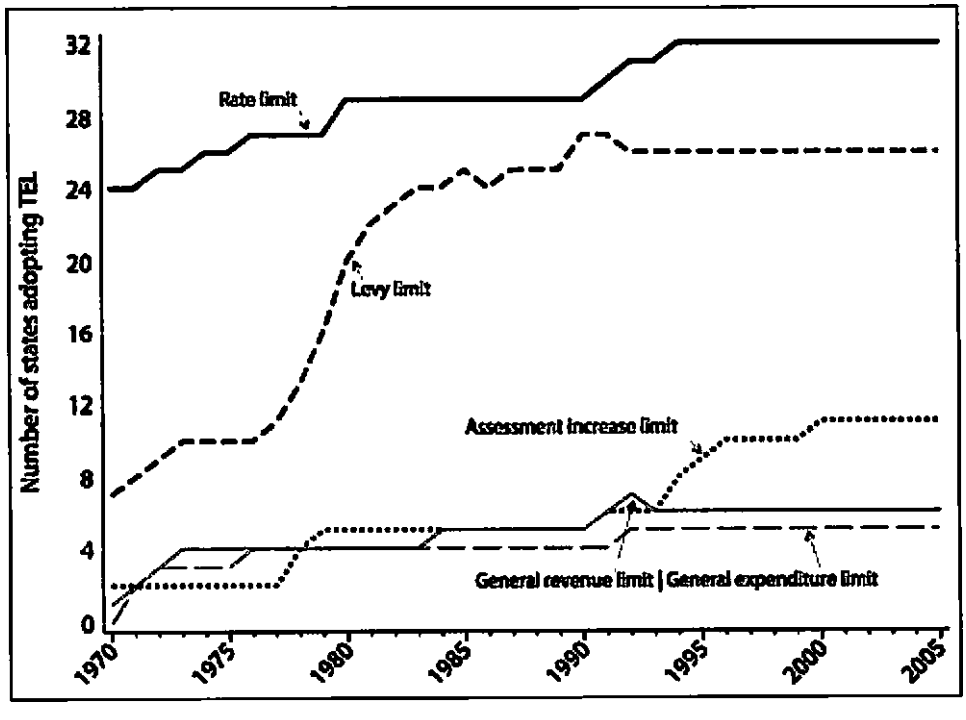
Figure 2, however, illustrates that not all states have chosen to respond to their revenue difficulties by making cuts to intergovernmental aid. A study from Pew's American Cities Project reports that Connecticut, which provides one of the more vibrant aid environments in the country, chose to slightly bolster intergovernmental aid to its local governments on the heels of the Great Recession (in fiscal year 2010) and has not reported a cut since then. Nebraska, on the other hand, canceled all funding to its local governments in 2011; Maryland, California, Arizona, Nevada, Minnesota, Texas, Virginia and Wyoming made 5 to 6 percent cuts that same year. All else being equal, we would expect it to be far less onerous to balance revenue and expenditure flows in city governments in states such as Connecticut, New York or Massachusetts – i.e., states where key state decision makers seem less inclined to shift service costs to local governments via cuts in state aid during times of state financial stress – than in cities facing similar sets of environmental, political or managerial conditions in states that provide lower or more volatile levels of intergovernmental aid.

State policies regarding levels and delivery of state aid are but one piece of an increasingly complex set of structures that govern local revenue capacity. In a classic textbook on American intergovernmental relations, Stephens and Wikstrom (2006, p. 196) remark, "Without doubt, the most important mechanism that the state has for influencing the political behavior of local officials involves financial assistance." This may have been true in the 1970s or 1980s, and to be sure it is a fundamental tenet of traditional models of fiscal federalism, but the most important mechanism for controlling local fiscal behavior in the past quarter-century is the tax and expenditure limit (TEL) – a label that broadly captures state attempts to limit the taxing and/or spending authority of its local governments through constitutional amendment or legislative enactment.

State governments have long imposed some manner of TEL.[8] Figure 3 tracks the adoption of TELs since 1970 across the four most common categories: *rate limits* – which are overall or specific tax rate limits that set the ceiling on the aggregate tax rate, which cannot be exceeded without a vote of the electorate; property tax *levy limits*, which constrain the total amount of revenue that can be raised from the property tax (independent of the property tax rate); *assessment increase limits*, which cap the growth rate of assessed values and is intended to control the ability of local government to raise revenue either by reassessment of property or through escalation of property values; and

8 For instance, the first states to establish property tax rate limits were Rhode Island (1870), Nevada (1895), Oklahoma (1907) and Ohio (1911).

Figure 3. Proliferation and Layering of TELs Since 1970

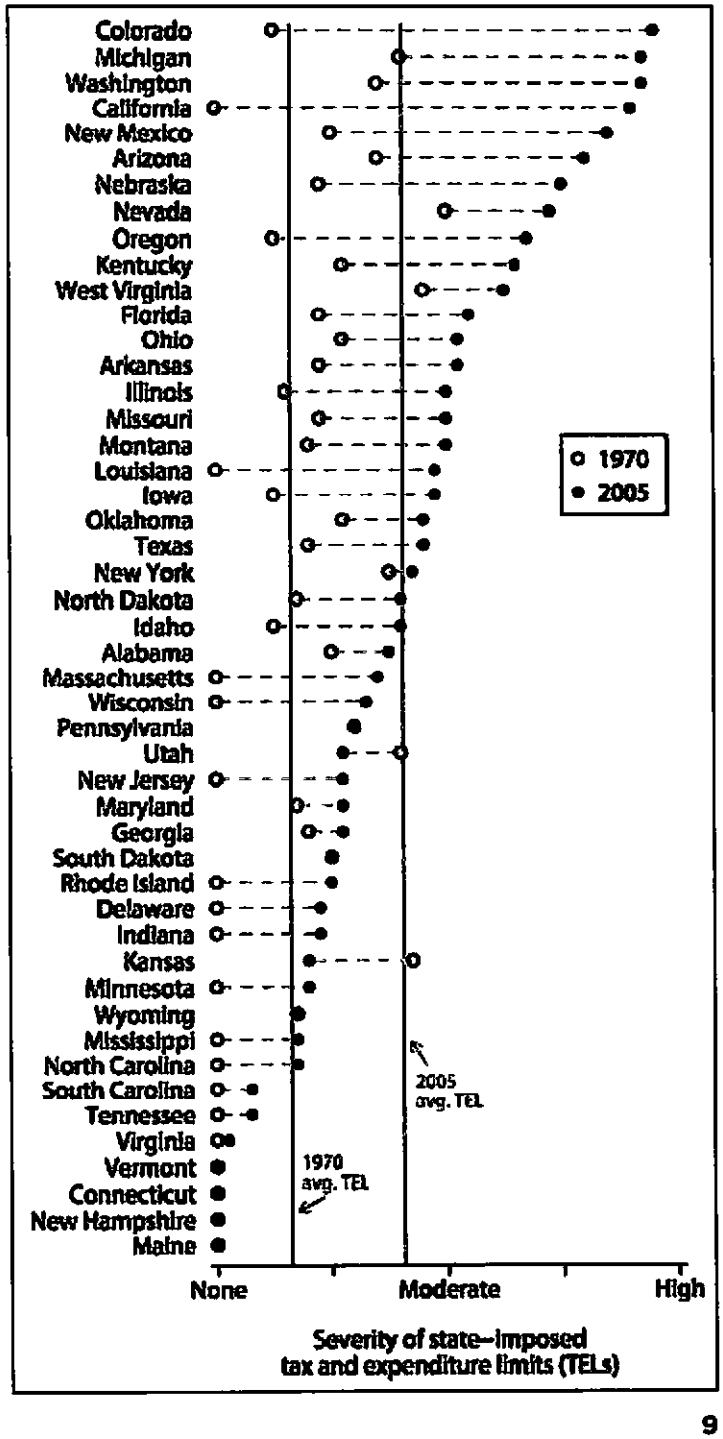


limits on *general revenue* or *general expenditure* increases, which set the maximum growth rate of total revenue or total spending.

Whereas a great deal of research has shown that the appearance of even a single TEL constrains the capacity of local officials to generate revenues on their own (see Poterba and Rueben, 1995; Shadbegian, 1996, 1999; it is the accumulation or layering of fiscal constraints that can be particularly damaging to the revenue capacity of local lawmakers.[9] In single-TEL states, for instance, raising assessments might be employed to circumvent property tax rate limits and vice versa; in states that impose only an assessment cap, this single limitation could potentially be overcome by adopting a higher rate. These methods of circumvention were common early in the 1970s, when 24 of the 29 states adopting some form of TEL imposed only one constraint (mostly rate limits), and a mere five states imposed two revenue TELs. Today, at least 27 of the contiguous 48 states impose multiple revenue TELs. Nineteen states impose two, and eight states – Arizona, California, Colorado, Michigan, Nebraska, Nevada, New Mexico and Washington – apply three local tax limitations.

The number of TELs in a state does not necessarily capture the severity of the limitation(s), though it is reasonable to expect a higher frequency of TELs to create a more restrictive local tax environment. Figure 4 displays a measure of TEL severity (see appendix regarding our research approach beginning on page 25), with the open point illustrating the severity of the state's TEL in 1970, the closed (maroon) point plotting restrictiveness in 2005, and the dashed horizontal line representing the change in severity of the state's tax limitations.[10] Figure 4 reveals some noteworthy patterns that illustrate the reality of state policy choices regarding local tax structures. Michigan, a state that imposes one of the more onerous sets of revenue restrictions, achieved this status via a one-two punch of major constitutional amendments enacted by voters: the Headlee Amendment in 1978 and Proposal A in 1994.[11] The Headlee Amendment capped local property tax millage rates to the rate of inflation. Proposal A – a constitutional amendment quite similar to Proposition 13 in California, a state with a similarly restrictive fiscal relationship with its locales – further limited local property tax revenue growth

Figure 4. TEL Escalations by State



9 Rising adoption rates are on display in Figure 3. So, too, is the increasingly common phenomenon of TEL layering, meaning the imposition of state-imposed controls on multiple elements of the local tax structure And those controls are growing: in 1970, 29 of the contiguous 48 states had at least one revenue TEL; today, some 41 of 48 states have at least one local revenue limit.

10 The measure of TEL severity, initially proposed by Amiel, Deller and Stallmann (2009), indexes six key characteristics: the type of TEL (see discussion above), if the TEL is statutory or constitutional, growth restrictions, method of TEL approval, TEL overrides and exemptions, and method of override. For a more detailed discussion of this measure, see Amiel, Deller, and Stallmann (2009) and Maher and Deller (2013).

11 Constitution of the State of Michigan, Sections 25-33.

by changing the system of assessment to cap individual property values and prohibiting cities from "rolling up" a millage to the rate of inflation if actual property value growth was lower than inflation.[12] Taken together, these two large TEL ratchets, which came 17 years apart and layered on top of an already aggressive property tax rate limit, placed tremendous pressure on local lawmakers' ability to generate critical revenue (Brunori et al., 2008). Contrast Michigan's approach to that of Massachusetts's Prop 2½, a similarly infamous state-imposed TEL, which was passed by referendum in 1980 and effectively caps local property tax levies at 2.5 percent of real property value. Massachusetts's relatively moderate position on the severity index owes much to the state's choice to apply no corresponding rate, revenue or assessment limits on local lawmakers.

TELs, taken alone, are neither inherently good nor bad. They have been alternately portrayed as necessary evils for taming "Leviathan" city governments (Brennan and Buchanan, 1979; Craw, 2008; Downes and Figlio, 1999), or as just plain evils that stifle cities' abilities to pursue innovative visions for their futures (Frug and Barron, 2008).[13] However, over three decades after the tax revolt movement took hold in a major way in states such as California and Michigan, the widespread adoption of local TELs depicted in Figures 1 and 2 has had two overarching effects: the first is the loss of local revenues; the second is decreasing local reliance on property taxes.[14] There is little evidence to suggest that TELs, however, promote local fiscal sustainability. The reason is that local spending mostly goes unaffected by revenue limits (Dye and McGuire, 1997), particularly in the absence of state-imposed spending lids, which exist in only a small handful of states.[15]

In sum, the proliferation of state-imposed TELs has helped to create a national state-local fiscal system that is simply less conducive to local governments' abilities to fund their own activities.[16] States with more aggressive local TELs – such as Michigan, Colorado and California – hinder the revenue capacity of their local governments. This capacity is vital during even the most moderate of economic downturns because service demands tend to rise and state aid tends to drop. Revenue slack, however, was particularly vital during the most recent recession. In previous downturns, home prices mostly remained stable, thus steadying property tax revenues (particularly in relation to sales and income taxes). In the 2009 recession, property tax revenues, already slowed in certain states via state-imposed TELs, plummeted in simultaneity with state aid. The good news, as we illustrate below, is that a relatively small number of states impose such crippling revenue constraints from both ends: meaning states that both limit own-source revenue capacity while also providing far from vibrant levels of state aid. The bad news is that, for local officials who must operate within those state environments, even small declines in revenues can present tremendous budgetary challenges.

Mapping the Revenue Squeeze: Revenue "Carrot" and Revenue "Stick" States

As property tax revenues continue to erode as a function of state-imposed TELs and local governments have become more reliant on state aid, some observers have suggested that state governments have responded to their expanding role in local fiscal affairs by providing greater levels of intergovernmental revenues (Berman, 2003; Sokolow, 2000; Dye and McGuire, 1997b).[17] This reading of state-local fiscal dynamics is somewhat supported by comparing trends in average levels of state aid to local governments exhibited in Figure 1 and total revenue limit adoptions depicted in Figure 3. However, our data allow for a far more detailed look at how local revenue capacity is being affected by state policies for local governments within each of the lower 48 states.

Figure 5 depicts a rough state-level indicator of the severity of state restrictions on local revenue capacity. States for which our standardized measure of per capita state aid far exceeds our standardized measure of the severity of local revenue limits – such as Connecticut, New York, Massachusetts, New York, Rhode Island and New Jersey – are depicted in orange and labeled revenue carrot states. All else being equal, we would expect the revenue capacity of local governments in these states to be buttressed by their state context. As was pointed out above, a well-structured state aid environment increases the overall fiscal capacity of local governments and, according to Pagano and Hoene (2010, p. 260), can provide "a level of equalization and base support for municipalities that may lack other resources." Additional value to local revenue capacity stems from the fact that critical own-source revenues are

12 Many other provisions of both the Headlee Amendment and Proposal A are related to other parts of the state finance system, and a detailed examination of the depth of both laws would be a paper unto itself. We will discuss the impacts of these types of laws, generally and in Michigan, later in the paper.

13 To be sure, they are a frequent source of local consternation, particularly as fixed costs occupy a larger share of local budgets and demand for services – driven by postrecession unemployment rates, population changes and other factors – continues to rise.

14 Indeed, in many state contexts, forgone property tax revenues have at least partially been recovered via more regressive revenue sources – such as fees and, where allowed, sales taxes.

15 This is an important point that is often obscured by the frequent reliance on the TEL acronym (Tax and *Expenditure* Limits).

16 Amidst the national clamor for government austerity and fiscal responsibility, it is important to point out that these activities – particularly in the states that impose the most formidable set of revenue constraints, such as Michigan, California and Colorado – include essential local services such as public safety and infrastructure maintenance, which are critical functions of local government.

17 Greater local reliance on state aid does not necessarily mean that state officials have "anteed up," a point that, mainly because of data constraints, is too often overlooked.

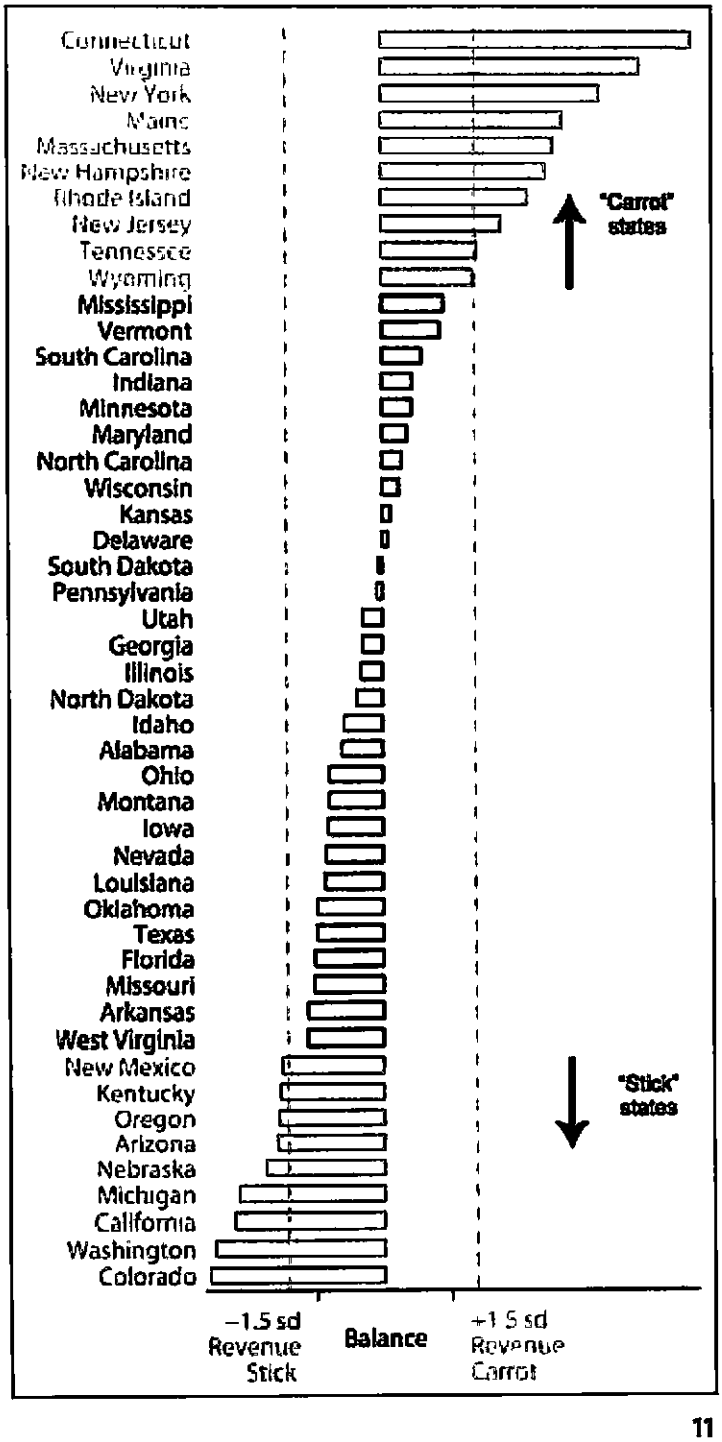
either altogether unencumbered by the absence of state TELs, as in Connecticut; limited only on the margins, as in Rhode Island or Tennessee; or limited via more aggressive TELs offset via significant funding from the state, as in Massachusetts.

Revenue stick states – such as Michigan, Colorado, Washington and California – are depicted in brown. These state governments (or state citizens via the referendum or initiative process) constrain the fiscal autonomy of local government officials rather than buttress it via state aid. An extensive body of research on the local effects of state-imposed TELs strongly suggests that revenue limits have worked: local own-source revenues have been reduced in the states that impose such limitations. Though there is some historical evidence that state legislatures in certain states have offset these limitations via state aid (Mullins and Joyce, 1996), revenue stick states tend to be far less generous in the allocation of intergovernmental revenue. All else being equal, we would expect the revenue capacity of local governments in these states to be constrained by their state context.

Michigan, for instance, has a TEL score well above the most recent annual state average, coupled with slightly below average state aid. The problem with local fiscal sustainability in revenue stick states such as Michigan stems from local governments' heightened reliance on state revenues, which in Michigan is a function of two large TEL ratchets and, in the post-Great Recession period, sharply declining property tax revenues. This high degree of dependency remains in place today. Yet, much like the way that Michigan's Proposition A has exposed critical local education funding to state budgetary battles (Cullen and Loeb, 2004), the state's unyielding property tax rate limits, coupled with special features of the Headlee Amendment that forbid the use of some alternative revenue sources employed in other states (e.g., income, sales and motor fuel taxes), have had the unfortunate side effect of essentially entwining local fiscal health with state legislative politics. As the state economy faltered under a one-state recession throughout much of the 2000s (Darga, 2011), the past decade has seen both clear declines in statutory revenue sharing and heightened levels of uncertainty over revenue-sharing rules (Lavelle, 2014, pp. 2-3).

Michigan's is a precarious fiscal context even for the most well-managed city government. It is particularly onerous for lawmakers in older, industrial cities such as Flint, which has been dealing for some time with sustained job and population loss, waning bureaucratic capacity, and increasingly daunting economic, social and physical challenges (see Doidge et al., 2015). In the words of one local official, if aid is reduced, "It's not rocket science ... pretty much raise taxes or cut services. That's what it boils down to" (McDermott and Powers, 2002, p. 12). Local lawmakers in a state such as Michigan, where they operate

Figure 5. Revenue "Carrot" and Revenue "Stick" States



with very limited discretion over revenue capacity, can boil it down even further: reduce or eliminate services or face the prospects of possible financial meltdown. All cities face political constraints on raising tax revenue. And certainly, some cities have managed their financial affairs in the face of economic decline better than others. However, for those seeking to fully grasp the nature of local fiscal health, we must continue to focus on ways in which states effectively create a mismatch between fiscal needs and available resources into their cities' local fiscal decision-making environment.

(2) Expenditure-side Pressures: Labor Costs and State Regulation of Local Public Employee Collective Bargaining

In addition to the revenue squeeze that some states impose on their local governments, state governments also impose a range of expenditure-side pressures that can drive up local costs.[18] As state governments continue to streamline bureaucracies and downsize operations, service burdens have been shifted onto local governments, often "without careful consideration whether this was the correct course" (Gold and Wallin, 1999, p. 73). As one prominent National League of Cities report argues (2003, p. 23), the transference of "program responsibilities from state and federal government, as well as the imposition of state and federal mandates, increase the roles and responsibilities of municipal governments, often without corresponding fiscal capacity or authority." Observers and analysts interested in the expenditure-side burdens that state policies place on local officials typically focus on the effects that costly mandates in areas such as health care and pollution abatement have on local government budgets (see Berman, 2003, pp. 77-83). Far less attention is paid to what we might call *de facto* spending pressures – the hidden but potentially damaging state-level decisions, policies and institutions that can destabilize local governments' fiscal capacity.

Consider, as we do in this report, local governments' large and increasing burden to pay for previously obligated labor costs. Labor costs, including wages and benefits for current employees as well as pensions and other postemployment benefits (OPEB) such as retiree healthcare, currently make up the largest category of operating costs for local governments. As pointed out in a recent MSU white paper (Scorsone and Bateson, 2013), municipalities were not required to measure the total costs of OPEB until an accounting standard was issued in 2004, with implementation beginning in 2007. Now that local governments have calculated and accounted for OPEB, many are faced with a massive commitment. Indeed, MSU's review of Michigan cities facing severe fiscal stress revealed that each city was confronted with a substantial unfunded OPEB liability (Scorsone and Bateson, 2013).

Though local government employee pensions and OPEB are seemingly always in the headlines, few seem to be asking why observers are more able to link labor costs to local fiscal distress in certain states than in others. Why do we hear so much about Michigan, Pennsylvania, California, Rhode Island and New Jersey? The answer, not surprisingly, is that, although city lawmakers are often criticized for overly cozy relationships with public employee labor unions (see, for instance, Gillette, 2014a; Rozansky, 2012; Greenhut, 2012), critical elements of employee benefit costs are structured by state law. State law may require bargaining by the employer, may provide only for a bargaining forum without requiring it or, alternatively, may simply prohibit collective bargaining altogether. State laws vary in the coverage of certain types of local employees. These rules address the types of items that may be bargained over, such as work rules, pay and benefits. Finally, the collective bargaining laws may include a process for dealing with impasses, such as binding arbitration rules. In line with the framework proposed at this report's outset, we view the mix of these rules as a set of processes and constraints that directly influence a municipality's fiscal capacity.

Table 1 places the local public employee collective bargaining environment of the contiguous 48 states into a five-category classification scheme ranging from very weak to very strong. (See the research approach appendix for a more detailed explanation of this measure.) As Table 1 makes plain, states vary with respect to the collective bargaining environment for local public employees. Not surprisingly, states with strong and very strong collective bargaining environments (e.g., those that impose a duty to bargain with strong union security provisions) have comparatively high union membership rates as well, with New York, Rhode Island, New Jersey, Connecticut, Massachusetts, California, Illinois, Oregon, Minnesota, Pennsylvania and Michigan each holding union membership rates in excess of 50 percent of state public employees. Unionization rates in weak and very weak states, such as Mississippi, South Carolina, North Carolina, New Mexico, Wyoming, Utah, Georgia and Virginia, on the other hand, tend to fall around 10 percent.[19]

State laws concerning pensions and health benefits illustrate, in part, how state-imposed structures affect city expenditure choices. Yet recent attention to employee compensation, pension system funding/underfunding and, especially, the cumulative impact of local government employee costs on current municipal cash flows have

18 This general phenomenon has been termed "second-order devolution" – meaning the transfer of program administration and/or substantive policy powers from the federal and state governments to America's cities and municipalities (see Bowman and Kearney, 2011).

19 Statistics from Union Membership and Coverage Database (see Hirsch and Macpherson, 2003)

brought these issues, in particular, into national focus. To be clear, we do not suggest that a non-unionized workforce is the key to a fiscally sustainable city. City governments must compete with other employers for workers, and rules governing bargaining are part of a state's larger labor culture. Our simple argument is that, in light of the sizeable role for local labor costs in local budgeting as well the implementation of new accounting standards, city governments operating within states with more permissive collective bargaining provisions are more likely to face budgetary constraints. It is easy to pin these constraints on lousy decision making, yet these constraints owe much to higher labor costs and the cumulative costs of payment decisions that are, to a large degree, governed by state policy.

(3) The State Context for Local Fiscal Distress: Tension Between Revenue and Expenditure Pressures

Analysis of the interplay of revenue and expenditure pressures allows for a more detailed assessment of the nature of the fiscal context in which states place their local lawmakers. We offer this analysis as something of a corrective to the typical perception that a city's financial destiny is either entirely within or entirely outside of its control. When assessing why certain local governments seem to respond more effectively to their financial problems than others, our research suggests that identifying on Figure 6 (see page 14) the state in which the city is located is a good place to start. The state's coordinates represent an empirical measure of the state context for local fiscal distress – meaning the tension for local lawmakers between state-imposed revenue-side pressures (captured on the horizontal axis) and state-imposed expenditure-side pressures (captured on the vertical axis).[20]

20 More technically, the horizontal axis captures our measure of the revenue pressures that states inflict upon their local governments (standardized TEL severity score minus standardized average per capita aid score). The vertical axis represents a standardized measure of public employee union coverage, an approximation of the severity of the average city's relatively fixed labor costs. The light gray shading represents the distance between one quartile above and one quartile below the median; thus states that appear outside these two intersecting ranges are quite different from average on both elements of the state context. Dark shaded points indicate state governments that authorize state intervention in financially distressed local governments.

Table 1. State Collective Bargaining Environments for Local Public Sector Employees

Collective bargaining environment	States		Brief description
Very strong	Illinois Minnesota Montana Ohio	Oregon Pennsylvania Vermont Wisconsin	Duty to bargain Strong union security provisions Strikes are permitted with qualifications
Strong	California Connecticut Delaware Maine Massachusetts Michigan	New Hampshire New Jersey New York Rhode Island Washington	Duty to bargain Strong union security provisions Strikes are prohibited
Moderate-mix	Florida Idaho Iowa Kentucky	Nebraska Nevada Oklahoma South Dakota	Some bargaining rights Weak union security Strikes are prohibited
Weak	Arizona Arkansas Indiana Kansas Louisiana Missouri	New Mexico South Carolina Texas Utah West Virginia Wyoming	Limited collective bargaining rights Right to work Strikes are prohibited
Very weak	Alabama Colorado Georgia Maryland Mississippi	North Carolina North Dakota Tennessee Virginia	Collective bargaining is prohibited Right to work Strikes are prohibited

Figure 6. Assessing the State Context for Local Fiscal Distress

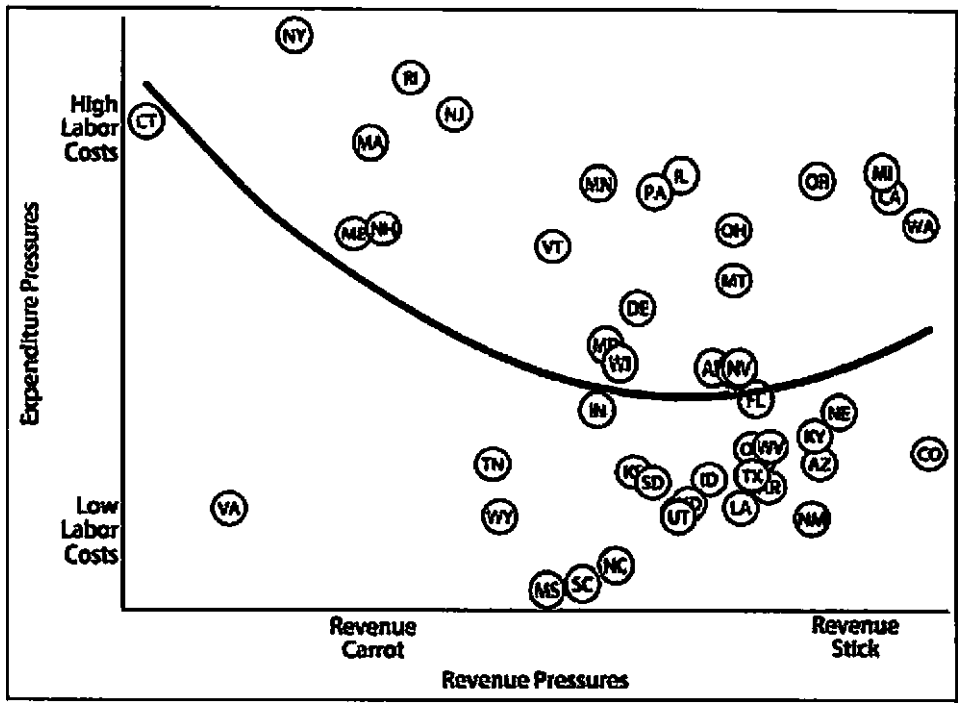


Table 2. Tabulating the State Context for Local Fiscal Distress

State-Imposed Expenditure Pressures	State-Imposed Revenue Pressures		
	Carrot	Balance	Stick
High	Connecticut Massachusetts New Jersey New York Rhode Island	Illinois Minnesota Pennsylvania	California Michigan Oregon Washington
Moderate	Maine New Hampshire Tennessee Vermont	Alabama Delaware Florida Indiana Iowa Kansas Maryland Montana Nevada Ohio Oklahoma Wisconsin	Arizona Colorado Kentucky Missouri Nebraska West Virginia
Low	Mississippi Virginia Wyoming	Georgia Idaho Louisiana North Carolina North Dakota South Carolina South Dakota Texas Utah	Arkansas New Mexico

If state-imposed revenue pressures increased with the severity of expenditure pressures, or vice versa, we would expect a positive "best fit" line (the dark curving line in Figure 6) moving from the lower left-hand quadrant to the upper right. As one might expect (or at least hope), these two elements of the state context tend to offset each other. States such as Colorado and New Mexico – i.e., more revenue stick states (local tax limitation increases outpace growth in the distribution of state aid) – avoid equally exacting expenditure-side pressures, at least when it comes to local labor costs. For states that do structure local collective bargaining in a way that favors higher local labor costs – such as New York, Connecticut and Rhode Island – these costs are at least partially offset by a more resilient and vibrant aid environment, coupled with limited own-source revenue restrictions.

The relationship between these two elements of the state context is negative, but it is not a purely linear relationship. Figure 6's most striking feature is its illustration that states placing extreme limitations on local revenue capacity (meaning they are more than one standard deviation above the state average on the horizontal axis) also tend to impose costly labor and service obligations (more than one standard deviation above the state average on the vertical axis). This relationship between revenue and expenditure pressures creates a best-fit line that resembles a backwards "J". This small handful of states that pull the line upward – which include Michigan and California – cluster in the upper right-hand quadrant of Figure 6. It is no surprise that acute financial emergencies have clustered in these states. We contend that they have structured local fiscal policymaking in a way that effectively incubates financial distress. Table 2 classifies the states in an effort to clearly represent the position of each of the lower 48 states along these two dimensions.

The threat of recurring structural deficits is "baked in" to the state-imposed legal and policy context in which local governments choose how to respond to fiscal problems. For lawmakers in America's older, industrial cities who must operate within these states, that choice is often not theirs to make. As we point out above, these states apply revenue and expenditure pressures on the front end, while also fostering a fiscal environment that exacerbates fiscal stress, links local fiscal health to budgetary battles, and all in all restricts the policy "space" for local fiscal policymaking. Michigan, however, is the only state among the incubators in the top right quadrant of Table 2 and Figure 6 that also intervenes "on the back end" by assertively implementing one of the nation's most powerful fiscal distress intervention policies (Anderson, 2011; Scorsone, 2014).

In light of the clustering of distressed localities within Michigan's borders, it comes as little surprise that Michigan lawmakers would value a policy that allows state officials to help struggling local governments meet conditions of chronic fiscal stress (Scorsone and Bateson, 2011; Doidge et al., 2015). However, as we discuss below, what is quite striking is the relationship between the policy's goals and design – which favors state takeover of local government – and the nature and underlying causes of the problem of acute fiscal distress. The financial consequences of deep-rooted economic and social forces are unlikely to be fully alleviated via temporary suspension of local self-government. Neither are the often overlooked but critically important state-imposed causes analyzed above. In what follows, we survey the state governments with more holistic and self-aware views of local financial distress in an effort to draw important lessons for Michigan lawmakers as they continue to struggle with chronic fiscal stress among the state's localities.

Section 2: If Takeover is the Solution, then what is the Problem? What Michigan Can Learn from the Ways in Which Other States Tackle Problems of Local Fiscal Distress

In the previous section, we make the case that state governments influence how local officials meet their financial problems via a combination of laws and policies that add or take away intergovernmental or own-source revenue capacity and drive up expenditure pressures via the allocation of policy authority over government functions and labor costs. In certain instances, such as when a state government caps property tax revenue and sets near insurmountable override standards, the effects of certain elements of the state context may be more or less direct. A city facing a near identical set of political, institutional, economic and social circumstances that operates in a neighboring state with no such revenue cap at least has the potential to capitalize on this capacity, assuming local political and economic constraints allow for the imposition of a property tax increase. But mostly the effects of this state context are more indirect. The policy balance between revenue restrictions and state aid, for instance, is not so much a direct measure of state policy choice as it is an outcome of a variety of state policy choices – e.g., revenue-sharing rules and formulae, the outcomes of citizen initiatives involving local TELs, legislative-executive budgetary processes, bureaucratic turf battles and so on.

Since as far back as the late 19th century, when the proliferation of railroad bankruptcies prompted states to take action to assist struggling localities (see Dimock, 1935 and 1940), state lawmakers, for fear that "a failing municipality will lower the credit rating of other localities and the state itself" (Berman, 2003, p. 113), have played a far more direct role in responding to local financial distress. The current menu of state policy options for intervening in distressed communities has been reviewed in two recent reports, one by Pew Charitable Trust researchers (Atwell et al., 2013) and a second by one of the authors of this report (Scorsone, 2014). One key shortcoming of these reports is the absence of detailed consideration of state context. Simply put, some states are part of the problem – they incubate financial distress via stringent restrictions on local revenue capacity and state policies precipitating local spending pressures. In other states, local policy options regarding the balance of revenue and expenditure flows are less encumbered by state policies and institutions. This diversity among state contexts is particularly important when reflecting on "best practices" for states dealing with acute local fiscal distress. For instance, close followers of issues of local finance often hear and read about North Carolina's strong oversight and monitoring mechanisms as standards to which state governments should aspire (see, for instance, Mattoon, 2014). But does it make sense for a state such as Michigan or New Jersey, for instance, to adhere to similar policy principles when local fiscal policymaking is structured in such dramatically different ways?

A second shortcoming of these reports is the dearth of detailed comparison among the 18 state governments that currently have an intervention policy. We refer readers to these reports for their quality in cataloguing the formal policy powers of state lawmakers on paper. Neither, however, is as useful at considering these policies in practice. This is a key tension in policy analysis generally and in instances of intervention in particular. The choice of the state's appointed and elected officials to employ the power they have at their disposal and intervene in a distressed community (often meaning the temporary suspension of democratic processes) presents a particular type of implementation dilemma imbued with questions of racial bias, social and economic imbalances, and the legal and political culture that guides state-local relations.

To fully assess the role of state governments in financial distress, we held a workshop for state government officials, analysts and experts with deep knowledge of state operations in local financial affairs. The Workshop on State Intervention in Distressed Communities, held in the fall of 2014 in Detroit, ultimately brought together a diverse group of 28 practitioners and policy experts from six states facing similar sets of local fiscal problems: Michigan, Rhode Island, New Jersey, Pennsylvania, New York and Ohio.[21] The appendix provides a detailed overview of the structure of the event and the types of discussions that were held.

Our primary goal was to provide a venue facilitating the open exchange of ideas and techniques for approaching the complicated problems facing cities in fiscal crisis. Indeed, as we discuss below, one recommendation of this research

21 This portion of the process focused specifically on how states approach intervention. Though many of the participants in the workshop were intimately involved in making decisions at the city level, we intentionally chose participants representing the state perspective rather than that of local decision makers.

report is to continue to advance this and similarly minded endeavors as a means of facilitating what Peter May (1992) refers to as "instrumental policy learning," which can improve state officials' understanding of the benefits and limitations of particular policy approaches or administrative designs. A second goal centers on learning more about the states' implementation processes for deciding whether to designate a city in distress, take it over temporarily or, in the most extreme cases, help shepherd its path to municipal bankruptcy. Our final goal was to investigate the types of "causal stories" (Stone, 2011) that state officials and experts used when considering the fiscal conditions facing their local governments. We held structured discussions about how the problem of local fiscal distress is defined (i.e., who or what bears the responsibility) and the ways in which state governments enshrine this problem definition via the design and implementation of financial emergency policies.

In what follows, we begin with a brief outline of Michigan's approach to local financial emergencies, paying special attention to linkages between the state's policy solutions, the nature of fiscal stress in Michigan's municipalities and the "front-end" context identified in Section 1. We then turn to alternative approaches employed in other key states. We begin with North Carolina, a state whose Local Government Commission, which administers the policy for dealing with financially challenged communities, has received a great deal of national credit. We then move to states facing more comparable sets of local conditions – i.e., with many older, industrial and fiscally vulnerable local governments suffering from population and job loss – that also have a history of state intervention in fiscally distressed communities. The goal here is not comprehensive overview. Rather, we set out to identify key dissimilarities with the new generation of intervention policies – of which Michigan's current policy is the poster child – and to illustrate how state governments facing similar sets of challenges can more effectively align their policy regarding direct involvement in fiscally distressed communities with the nature of problems that these communities face, as well as with state-imposed constraints that hamper their capacity to balance revenue and expenditure flows.

We designed Table 3 (see page 18) to help guide this discussion. The first two columns summarize the state context analyzed in Section 1 of this report. The four rightmost columns depict information summarizing the design and administration of the state's local financial emergency policy. The column labeled "causal story" reflects our assessment of how a state government, via its legislation of state intervention, comes down on the debate over the causes of local financial failure. For some states, the focal point is internal causes – poor management, the incompetence of local leaders, political corruption, the dominance over policymaking by narrow interests, and/or "antidemocratic" structures and processes that favor the whims of local officials over the needs of local residents (Gillette, 2014b). Other states focus on forces external to local management – i.e., socioeconomic conditions that are at once causes and symptoms of diminishing local service capacity and resources (see Kimhi, 2008), such as high and concentrated poverty, older building stocks, residential vacancies, high crime, deep-rooted regional changes, population loss and job loss. The column labeled "policy approach" captures the gist of the state's approach to financially distressed communities and reinforces the causal theory behind the policy's design. We also include information on the administration of the states' policies. Here the focus is on the powers of key administrative actors and their bureaucratic location. In line with a great deal of research on policy analysis and the policymaking process, we structure Table 3 in a way that suggests that key state decisions on goals, administration and implementation flow from how responsibility for the problem is assigned – i.e., the causal story (see Stone, 2011, p. 206). This information is provided for the six states that were represented at the Detroit workshop – Michigan, Rhode Island, New Jersey, Pennsylvania, New York and Ohio – as well as for North Carolina, a state that frequently gains attention for the effectiveness of its intervention policy.

(1) Michigan's Local Financial Stability and Choice Act: A Brave New World for State Intervention

The tenets of Michigan's intervention policy have been well-documented in research reports and news media. After the governor declares a fiscal emergency,[22] four possible courses of action are available to a municipality,[23] though local takeover by an emergency manager (EM) is the most common course of action. This allows a state-appointed manager to "act for and in the place and stead of the governing body and the office of chief administrative officer of the local government" and effectively grants this individual powers beyond those available to local officials.[24] Not only does he or she become responsible for all local fiscal decisions, including development and implementation of a recovery plan (which must be approved by the state treasurer), but the EM can also modify existing collective bargaining agreements, negotiate new union contracts and make personnel changes. The EM can also explore the option of consolidating services with another government entity, sell municipal assets and ask voters to increase the tax rate. The EM remains in this role until the city reaches certain benchmarks within its recovery plan, and a

22 A series of triggers are in place and one must occur – e g., failure by the local unit of government to pay creditors or make timely pension contributions – prior to a state review of a local unit's finances

23 Consent agreement, emergency management, neutral evaluation or municipal bankruptcy.

Table 3. Intervention Policy in the Context of State-Local Fiscal Relations

State	State Context		Local Financial Emergency Policy			
			Design		Administration	
	Revenue Pressures	Expenditure Pressures	"Causal" Story	Policy Approach	Agency/Govt. Branch	Responsibilities
Michigan	**Revenue stick (top 5%)**	**High (top 20%)**	**Management (internal)**	**State-appointed manager furnished with broad tools to restore solvency (mostly on spending side) once distress occurs. Michigan typically does not intervene in local fiscal affairs until a fiscal emergency is recognized. There is no program of prevention.**	**Governor** **Department of Treasury (Office of Fiscal Responsibility)**	**Declaration of financial emergency and appointment of powerful emergency manager.** **Monitor emergency management process and approve certain decisions.**
New Jersey	Revenue carrot (bottom 10%)	High (top 5%)	Socioeconomic factors (external) Management (internal)	**Support distressed communities.** When/if cities enter distress, the state makes available monetary and technical assistance.	Department of Community Affairs (Division of Local Govt Services)	Monitor and approve local budgets, certain debt and capital investments; approve of additional aid, advocate for local government interests
New York	Revenue carrot (bottom 5%)	High (top 1%)	City specific	**Generate city-specific solutions.** The legislature designs and enacts a specific policy for each city in distress **Prevent distress from occurring.** The comptroller's office has designed an extensive monitoring system, staffed by many state auditors, to help local officials stave off financial emergency	Legislature Office of the State Comptroller Governor	Legislate and adopt city-specific legislation, including establishing local control board Preventive monitoring of all local budgets and administration of fiscal monitoring system Appoint local control board
North Carolina	Balance/lean carrot (bottom half)	Low (bottom 5%)	Management (internal)	**Central control prevents distress.** North Carolina has a highly centralized system designed to prevent risky decision making and borrowing by municipalities.	Department of Treasury (Local Government Commission)	Review audits, monitor local fiscal health, approve and settle local debt issues, require remediation plan.
Ohio	Balance/lean stick (top 40%)	High (top 25%)	Management (internal)	**Support local control.** Ohio intervenes at the request of local officials; recovery plans are submitted by local officials	State Auditor (Local Government Services Division)	Train local officials, audit local budgets, classify distressed communities
Pennsylvania	Balance (bottom half)	High (top 20%)	Socioeconomic factors (external) Management (internal)	**Helps troubled communities "help themselves."** Even in receivership aims to address causes and prevent relapse, though communities may be unable to exit the state process because of systemic barriers.	Dept. of Community/Econ Development (Center for Local Government Services)	Place cities under receivership, distribute financial aid to distressed cities, monitor fiscal status of cities
Rhode Island	Revenue carrot (bottom 15%)	High (top 5%)	Management (internal)	**Restore solvency and prevent further decline once distress is imminent.** Rhode Island has a strong receivership policy. It also offers additional assistance to cities approaching distress to help prevent full-fledged crisis	Department of Revenue (Division of Municipal Finance)	Monitor all local governments, aid governments in or at risk of distress, appoint receiver

receivership transition board is appointed by the governor to assist in transition until the official termination of receivership.

The structure of Michigan's successive intervention laws and the powers granted to the emergency manager point to a particular type of causal story – local government mismanagement as the chief barrier to fiscal solvency. The state's solutions and assistance all center on correcting local decisions that led to chronic budget shortfalls, and the main focus of Michigan's law, which is administered by the Department of Treasury, is to ensure a balanced budget. Efforts to achieve short-term fiscal solvency typically center on reductions in cities' financial obligations – e.g., cutting pension obligations, making personnel cuts and contracting out services traditionally provided by local governments. EMs and other state officials have little leeway to affect the revenue side of local governments' ledgers. As Anderson (2011, p. 620) argues, the viewpoint being expressed by the design and implementation of Michigan's policy is "that the current revenue picture of the city is adequate to provide for public safety, debt service, and other core expenses—if only .. the city had competent management." Indeed, little or no financial support accompanies state takeover. This is a telling feature of the state law that sheds considerable light on both the degree to which the policy oversimplifies the causes of local fiscal distress and the mismatch between the administrator's toolkit and the nature of the problem.

To respond to the question at the outset of this section: if takeover is the solution, the problem is mismanagement. Michigan codifies this causal story in a way that is less adulterated than in any other state we have surveyed. In other words, the state has adopted and codified a vastly oversimplified story. Even Rhode Island, which granted similarly sweeping powers to its state-appointed emergency managers, offers additional assistance to cities approaching distress to help prevent full-fledged crises. The state has also seen EMs (called "receivers") raise local taxes to generate more local revenue. This less than favorable assessment of Michigan's policy is buttressed by the absence of emergency bailout funding, a traditional feature of the more aggressively implemented state intervention policies (Berman, 1995; Anderson, 2011), as well as meager revenue-raising powers. EMs are empowered to tackle city expenditures as a means of bringing local budgets into equilibrium, but revenue-raising powers are effectively more limited than the powers normally afforded a city's mayor or council member. As has been pointed out elsewhere, for cities such as Flint, Ecorse, Benton Harbor and Pontiac, this is a gross oversimplification of the structural barriers to fiscal sustainability (Doidge et al., 2015). Our aim in this report is not to disprove the notion that mismanagement is the cause. We merely point out that the policy's design and implementation features devalue the considerable constraints that the state places on the revenue capacity of local officials.

(2) The Limited Applicability of "Best Practices": Why Adoption of North Carolina's Policies Won't Work for Michigan

The reentry of Michigan's cities into emergency management and the number of local governments and school districts in trouble have led to suggestions that Michigan should look elsewhere for answers.[25] A Pew Center on the States report suggests that North Carolina's monitoring system has prevented fiscal distress despite a history of crises during the Great Depression and some of highest unemployment rates in the country (Pew Charitable Trusts, 2013).

The Local Government Commission, a division of the North Carolina Treasury Department, reviews cities' independent audits on key fiscal health indicators, particularly the level of fund balance. If a locality fails to meet a specific threshold, it is placed on the commission's watch report and required to submit a plan of improvement. If local officials are unable to return the municipality to an acceptable level on their own, the commission assumes control of all local financial decisions, including taxing issues, until the problem is corrected. Additionally, the commission approves and sells all local bonds for public structure investments, which both increases the level of state oversight and reduces the potential for local mismanagement of debt. Bond agencies assign a premium to this monitoring system, considering it a model system (Coe, 2007).

Features of North Carolina's approach provide intriguing options for Michigan lawmakers, such as a codified, professional state office and extensive front-end monitoring to identify potential crises. However, evaluating these policies in isolation – i.e., in the absence of key contextual factors – is likely to overstate the potential success of North Carolina's policies if they were to be enacted in Michigan.

For instance, according to the U.S. Census Bureau, in 2007, North Carolina had 548 municipalities, no other local general-purpose governments and 100 counties; Michigan had 533 cities and villages (municipalities), 1,242 townships and 83 counties. A consequence of Michigan having three times as many local governments as North Carolina is that the volume of reports that would need to be reviewed for monitoring purposes would be three times as great.[26] Certainly this would require more resources devoted to oversight at the state level, thus putting additional stress on the state budget.

The states differ greatly on other dimensions of the elements of state context identified in Section I. North

25 http://www.crcmich.org/PUBLICAT/2000s/2000/memo1053.pdf.

26 This does not include the additional resources that would be required to monitor school districts, special districts or other governmental units.

Carolina has an obligatory state pension system; Michigan does not. In 1947, North Carolina declared it illegal for local governments to bargain with unions.[27] Conversely, Michigan's local governments have a strong history of collective bargaining and excluded police and fire unions from 2012's right-to-work legislation. Tax and expenditure limits, when averaged from 1970 through 2005, rank Michigan as the third most restrictive state in limits placed on local governments. North Carolina is 38th – a property tax rate limit on counties and municipalities, set in 1973, has remained its only TEL.

The differences in the state policy context between the two states suggest that Michigan should be cautious when drawing lessons from North Carolina as its model for intervention policies. We attribute North Carolina's success in preventing municipalities from entering distress not to the design of its specific intervention policy but rather to a much tighter link between its policy approach and the state-imposed context for fiscal distress.

(3) Rebuilding State-Local Partnerships: Key Insights from Rhode Island, New Jersey, Pennsylvania, New York and Ohio

One of the more striking findings to emerge from our workshop and subsequent research is the difference between Michigan's approach to local fiscal distress and the approaches of comparably situated state governments. These differences are laid bare in Table 3. Plainly put, state policies and institutions effectively incubate budgetary imbalances; yet lawmakers and administrators have ignored potential front-end damage when designing the policy aimed at helping communities in distress. Rhode Island, the state most comparable to Michigan in the priorities of its intervention policy and the powers granted to state receivers, also provides financial assistance to municipalities most in need, targeting aid to communities with a high property tax burden relative to taxpayer wealth through the state's Distressed Communities Relief Fund thus buttressing the revenue capacity of its local governments.[28] With respect to this specific aspect of state context, Rhode Island generally provides higher levels of state aid.

New Jersey and Pennsylvania: A More Comprehensive View of Local Financial Failure

Beyond Rhode Island, Michigan lawmakers have a variety of states from which to learn about the viability of policy alternatives. New Jersey and Pennsylvania have enacted receivership laws that are quite different than Michigan and Rhode Island. Internal mismanagement is not eschewed entirely; rather it is considered alongside the external, structural dynamics with which local lawmakers must contend. This more holistic causal story both reinforces and is reinforced by choices that these states have made regarding implementation and administration.

New Jersey's policy of assisting cities during times of financial crisis originated in the Great Depression. Since that time, the state has built support within its bureaucracy to review and approve city budgets and offer financial and technical assistance as needed to prevent cities from entering bankruptcy. Rather than appointing a state-level official to take charge of a city`s finances (such as an emergency manager in Michigan),[29] New Jersey seeks to assist local officials in alleviating distress. This partnership is reflected in the mission statement of the New Jersey Division of Local Government Services (DLGS), a division of the Department of Community Affairs. It states that the DLGS "serves as an advocate for local Government interests," provides assistance and is responsible for "financial integrity." The DLGS provides advisory services to local governments, both once the community is identified as distressed and on request of the municipality, and also licenses and educates local officials.

Not surprisingly, these two services help establish a partnership between state and local officials independent of the financial position of the municipality. The state requires that all local government budgets and certain financing and purchases be approved by state agencies.[30] The budget review is conducted by department staff members (many hired short-term annually) and is made easier for local units of government by state-provided training and consistent reporting requirements. When these preventive actions fail to ward off systemic financial issues, the state begins a more involved intervention. The community is first placed on a watch list, at which point the state generally channels additional monetary aid to the struggling government. The state also uses its Qualified Bond Act Program, which requires state approval to bond or make capital expenditures, to ensure stability and prevent default. This program can capture and stall state aid for payment of debt services. At the same time, DLGS offers technical assistance to cities to help them solve underlying problems that contribute to fiscal distress.

The most notable example is the consolidation of the Camden police force in 2010. The mayor terminated the entire city police force and contracted with the county to provide those services, with the guidance and support

27 N.C. Gen. Stat. 95-78 to 84 (http://www.nrtw org/right-work-states-north-carolina).

28 Established in 1990. Municipalities that fall in the bottom 20 percent of three of the law's four indices qualify to receive state aid under the law. In the 2014 fiscal year, seven municipalities received funding through this legislation, a total of $10.4 million

29 Until recently, when Atlantic City was declared to be in fiscal distress and an emergency manager was appointed.

30 Procurements over $5 million must be reviewed by the comptroller, and those over $10 million must be directly approved.

of state officials.[31] Camden illustrates the cooperative efforts of various levels and sectors of the state and local governments. It highlights that preventive efforts to maintain or restore fiscal sustainability are not always sufficient, but that a collaborative approach can assist cities and the state through difficult political decisions. New Jersey's approach indicates that the state views itself in partnership with local governments, with a responsibility to provide a check on risky financial decisions but also to provide ongoing financial assistance to struggling communities.

In contrast to New Jersey's hesitance to use direct state control, Pennsylvania's Act 47 allows the state to place fiscally distressed communities in receivership under the direction of the Center for Local Government Services in the Department of Community and Economic Development. Once a municipality has been placed under receivership, local government officials must have the majority of their decisions confirmed by the receiver, and the receivership board may implement cost-saving or revenue-raising strategies unavailable to local officials. The board has the ability to raise taxes above the legal maximum but has no additional powers in collective bargaining. Principally, the receiver acts as a liaison between the local government and others to improve the financial integrity of the city and is typically able to broker additional state funding for the distressed community. In Harrisburg's recent financial descent, for instance, the receiver was able to facilitate $25 million of revenue to fund a non-profit that would provide infrastructure and economic development.

Receivers in Pennsylvania tend to take a comprehensive view of local financial difficulties as they work with the state to look for alternative partnerships and unique revenue-enhancing and cost-sharing schemes. Proposed financial recovery plans often include recommendations that will improve local governments' economic positions in the future. This approach extends through the process of recovery. It requires more research, more interactions and coordination between parties, and more time to allow for business adjustments and industrial reorganization. Furthermore, it includes a period of weaning cities off the additional funding to which they had access during their most trying times. To officially exit Act 47, cities must follow an extensive process that includes hearings and the department director's signature. As a result, Pennsylvania has had only seven of 28 distressed communities officially conclude the process. Allowing cities to remain in a system with additional structure and support illustrates Pennsylvania's acknowledgement that factors outside of local control contribute to fiscal issues, and that the state has some role in providing additional support.

In all, intervention policies in New Jersey and Pennsylvania are administered by state agencies dedicated to working with local governments. State personnel are involved with municipalities well before distress, and they have resources and authority to assist municipalities. Though administrators are afforded the statutory authority to assume greater control over city finances, this is not the only facet of their relationship with local governments.

New York and Ohio: The Benefits of Monitoring

Similar to New Jersey and Pennsylvania, New York has established a system that supports state and local cooperation and information sharing. As local fiscal crisis deepens, the state becomes more involved in local political and operational affairs. The state's policy approach to local fiscal emergencies is ad hoc\ (rather than multijurisdictional), allowing lawmakers to survey the specific causes of distress for a given community and legislate solutions in line with these problems.

As is well-documented, New York's history of fiscal intervention begins with New York City's near bankruptcy in 1975. Naturally, a crisis of that magnitude spurred state action, but since that time, New York has not been plagued by chronic distress. This is due in part to cities' ability to increase revenues without legal restriction (until 2014, when the state imposed a cap on property tax increases). Additionally, many New York communities have avoided the economic peril that results from a loss of major industries and subsequent economic restructuring.[32] This history is evident in the state's view of municipal distress as an unusual and unique instance that requires customized solutions. New York provides gradual intervention and individualized approaches to distress, with the decisions and the process supervised by state elected officials – the governor, the legislature and the comptroller.

In addition to customized intervention approaches to distressed cities – which could violate the constitutions of states that disallow special legislation – New York is also heavily involved in monitoring the fiscal position of its local governments. The state's Local Government and School Accountability (LGSA) unit of the Office of the State Comptroller operates the Fiscal Stress Monitoring System, which reviews annual financial data of local governments to determine whether each government is facing significant, moderate or probable fiscal stress. Municipalities must submit audit reports, which are reviewed and in some cases conducted by approximately 200 auditors.[33] From annual reports, budgets and audits, the LGSA creates local fiscal measures for benchmarking, trend analysis and

31 Returning to the role of other state policies in distress solutions, this action would not have been possible without particular provisions within union and employee contracts that allowed for such termination of individual employees.

32 Buffalo was an exception and did necessitate intervention proceedings. It should be noted that Buffalo is one of only four New York local governments responsible for operating its own school district.

33 These 200 employees review audit reports of school districts and other local governments as well as municipalities.

general monitoring over time and across local government types. State auditors are also deployed to work with local governments. As a result, state officials may use knowledge of community nuances in evaluating local deviations from sound fiscal indicators and state trends. Such specialization is particularly useful as state intervention becomes necessary.[34]

If a local government is identified as financially unsound, the state must pass special legislation to institute a local control board for the municipality to engage in the formal intervention process. After a local control board is created, primary authority over the struggling municipality is transferred from the comptroller's office to the governor-appointed board.

Each board, by the nature of the process, has different powers. Previous boards have overseen proposed local budgets and set personnel policy, and were granted the final authority to initiate bankruptcy proceedings.[35] That the boards have had no additional taxing authority, ability to renegotiate previous collective bargaining agreements nor authority to make unilateral budget decisions reflects the state's emphasis on local autonomy.

The boards have been particularly useful in coordinating intergovernmental solutions. For instance, the Buffalo Fiscal Stability Authority (BFSA) was established in 2003. It helped Buffalo manage its additional school district responsibility and restructured the city's pension and health insurance plans by joining the respective state-level systems. Finally, the BFSA brokered an arrangement for city parks to be managed at the county level and for 16 libraries to close. Despite the local knowledge and intergovernmental efforts, it took nearly nine years for Buffalo to exit receivership and for the BFSA to transition into an advisory role. Policy specifies that the BFSA will serve in this role until 2037, and the city may revert to full receivership if financial indicators show distress.

At the state level, New York vests its relationship with local governments and the power to intervene in elected officials – the governor, the comptroller and the legislature. This separates the state's ongoing monitoring from its intervention, and though it raises the legislative barrier to intervention by requiring the crafting and passage of legislation, it also provides public accountability and a system of checks and balances. The ability to draft city-specific solutions allows New York to address management issues, economic conditions and the impacts of the state context in different ways in each city, ideally assisting the community to long-term stability.

Ohio, like New York, faced a fiscal crisis in its largest city in the 1970s. Cleveland's default on short-term notes in 1978, which made it the first municipality to default since the Great Depression, led Ohio to develop a comprehensive policy designed to prevent and, if necessary, intervene in distressed cities (Pew Charitable Trusts, 2013; Levine, Scorsone and Justice, 2013). No municipality has defaulted since Cleveland, but Toledo, East Cleveland and other municipalities have entered fiscal emergency status, particularly once the Great Recession exacerbated declining revenue bases and expenditure pressures.

Ohio's Local Government Services Division, located in the state auditor's office, is responsible for training local officials and auditing local budgets. Chapter 118 of the state code,[36] which deals with local fiscal emergencies, grants the Local Government Services Division (the auditor) responsibility for categorizing distressed communities for fiscal caution, fiscal watch or fiscal emergency. The categorization system signals to local officials, bondholders and other stakeholders the extent of the local government's fiscal stress and the ease of financial recovery anticipated. It serves as a useful continuum of distress, recognizing that failing to pass one indicator of financial soundness may not require the same actions as a community failing multiple triggers. Each category has an increasing level of oversight (i.e., requirements for audit depth and financial plan proposals). Once fiscal emergency is declared, an advisory board is created.

Under all three distress categories, local governments are required to submit recovery plans to the Local Government Services Division. If a local government is not compliant with its recovery plan, the only penalty is movement to a higher designation of fiscal distress. It is not until a municipality reaches the fiscal emergency status that penalties are imposed.

As part of the fiscal emergency proceedings, municipal officials must submit a recovery plan to the recovery board for approval. If a plan is not submitted or the local government fails to adhere to a plan, the Office of Budget and Management is supposed to suspend all state funding to that municipality,[37] though this penalty has never been fully enforced.

34 Ultimately, any distressed community implements solutions that are specific to its condition. A universal policy prescription is to reduce expenditures. However, no universal prescription can be made on what account specifically should be limited and in what way. Knowledge of exact inefficiencies, redundancies, slack and so forth is necessary to act. If outside agents are to advise on such actions, their already having some knowledge of the particulars of the city will allow for more expedient and implementable recommendations.

35 Control boards are not granted this authority for New York City.

36 The other elements comprising the law became effective, were revised or added in 1996, 1999, 2001 and 2002 – http://codes.ohio.gov/orc/118 (pdf). The state's approach is consistent with the autonomy allowed Ohio's local governments. Section 118.02 (B) of the state code states that, "[t]he intention ..is to enact procedures, provide powers, and impose restrictions ..while leaving principal responsibility for the conduct of the affairs...in the charge of its duly elected officials." The effort to maintain local autonomy is demonstrated by the fact that the review process of the Local Government Services Division is initiated by request of local officials as well as at the suggestion of auditors.

37 Although individuals receiving direct state welfare within the community's borders continue to do so.

Ohio, like other states, struggles with assisting communities to achieve permanent fiscal stability. The city of East Cleveland was under fiscal emergency for 18 years. Exiting the process failed to mark long-term sustainable success – East Cleveland was once again placed under fiscal emergency. In late 2014, it was considering entering into bankruptcy proceedings,[38] and the city's mayor filed a petition seeking a merger with the city of Cleveland in the summer of 2015.[39]

38 http://www.morningjournal com/general-news/20141226/east-cleveland-considers-bankruptcy

39 http://www.cleveland.com/cityhall/index ssf/2015/07/east_clevelandmayor_gary_nort html.

Ohio, like Michigan, illustrates the issues that arise when a state's solution (intervention policy) does not match the causes of distress (context). Local officials retain control of decision making and the plan to resolve distress, but they and the state agency responsible for intervention lack the authority or resources to address the root causes of distress or to circumvent the pressures that the mix of state policies adds to local fiscal policymaking processes.

Section 3: Conclusions and Recommendations

In the previous sections we identified the ways that broad state policies limit or enhance the local governing options and the ways that states with intervention policies match their approach to local financial distress with the reality of city operating environments. Here we conclude our analysis with conclusions and practical recommendations to assist the C.S. Mott Foundation, state and local officials, and Michigan residents in identifying a more effective approach to local fiscal crises.

(1) Conclusions

There is no single model policy for state intervention in distressed cities or for prevention of fiscal distress. Changing Michigan's fiscal intervention law to replicate that of another state would likely provide little improvement for Flint or other cities facing fiscal crises. There is no "best practice" for state intervention in cities. What Michigan can learn from other states and our research is that removing and repairing mismanagement addresses only one cause of fiscal distress. Bringing a structurally imbalanced budget back into balance is an important step to assist cities like Flint, but a policy that does not address a state's unique system of revenue, tax and expenditures, and labor policies may not help cities truly escape financial trouble over the long term. States must decide which legal and political tradeoffs they are willing to make to support city fiscal health. Michigan must also recognize that, in comparison with similar states, it provides a particularly difficult environment for its cities.

Municipal fiscal distress is not just a local problem. State policy choices set the boundaries for local action and the conditions under which cities receive assistance. It is not surprising that these conclusions do not point to simple solutions, executable at the local level. Changing any one part of the state context is politically challenging, and it would be impractical to recommend major policy overhauls of Proposal A, the Headlee Amendment, collective bargaining rules and state revenue sharing. Ideally, Michigan would adopt a more balanced approach to its local governments' fiscal needs, but we are aware that this is unlikely in the short term because of both political will and the high barriers to changing constitutionally enshrined rules. Instead, we offer recommendations that balance improvements that would better support cities in fiscal distress with political feasibility.

(2) Recommendations

Create a state agency that coordinates services to local governments and offers technical support and fiscal monitoring. Establishing a formal place within state government that is responsible for ongoing, cooperative work with local governments on fiscal stability and other issues would help create a partnership and culture of trust between the state and its municipalities. The Department of Treasury does provide some of these services on an individual basis via the Office of Fiscal Responsibility (OFR), but the OFR does not have the resources necessary to provide a comprehensive system of support to all of the state's local governments.

It is important that whatever agency is created be empowered with human resources to sufficiently provide service; financial resources, separate from the state's revenue sharing to local governments, to offer special assistance where needed to communities facing challenges or distress; and a position within the state departmental structure that allows it to be taken seriously when recommending policy and working with other departments to assist local governments. The examples of offices in the other states in our study may provide elements of the agency's design, but the office should be built with Michigan's particular context and culture in mind. It may be appropriate to expand the OFR in its current position, but moving the office to another department, establishing it as a stand-alone agency and other potential structures should be evaluated as well.

Raise awareness among citizens and state decision makers that the causes of fiscal distress are not solely at the local level. Flint is an example that can illustrate this point as the C.S. Mott Foundation and city leaders communicate with the public and state officials. As the city emerges from state control, the budget is balanced for the short term, and the transition advisory board is in place to monitor management and compliance with the plan. Yet revenue projections show the city likely facing a structural deficit in the next five years with little available to cut from the budget. State control has reasonably removed management problems as the cause of deficits, yet the city's fiscal health remains precarious. A focused communications effort highlighting the combined effects of Michigan's expenditure, revenue and labor policies could help broaden the discussion of fiscal distress in the state and create awareness that this is more than a local problem. Rather than being the exception, Flint may be the harbinger of what is to come for Michigan's local governments without changes at the state level.

Appendix

Section 1

The following table lists the key concepts that make up core elements of the state context for local fiscal distress, our empirical measure of the concepts, and the data we brought to bear to generate these measures.

Concept	Measure(s) – by Figure/Table	Data
Revenue Pressures		
State Aid Environment	**Figure 1**: Annual average of per capita state aid in real 2005 dollars to three (population) classes of U.S. cities: (1) population > 100,000; (2) population between 25,000 and 100,000; and population between 5,000 and 25,000. Years: 1970 to 2005. **Figure 2**: Annual average of per capita state aid in real 2005 dollars allocated by each of the 48 contiguous states for the years 1970 and 2005.	U.S. Census Bureau. Annual Survey of State and Local Government Finances and Census of Governments (1970-2005). See: http://www.census.gov/govs/classification/
Tax and Expenditure Limits	**Figure 3**: Annual count of state adoptions of five types of TELs, 1970 to 2005. **Figure 4**: State TEL severity score for 1970 and 2005. Severity score indexes six key characteristics of state-imposed TELs: (1) the type of TEL; (2) if the TEL is statutory or constitutional; (3) growth restrictions; (4) method of TEL approval; (5) TEL overrides and exemptions; and (6) method of override.	Amiel, Deller, and Stallmann (2009). http://www.aae.wisc.edu/pubs/sps/pdf/stpap536.pdf
Revenue "Carrot" and Revenue "Stick"	**Figures 5 and 6 and Table 2**: Displays policy distance between state aid environment and state-imposed TEL restrictions. State aid and TEL z scores were calculated for each state year. (These standardize the relationship to the average of all states and all years and represent how many standard deviations a score is from the average.) The aid measure is per capita state aid in real 2005 dollars for cities with populations over 5,000. The TEL measure is the TEL severity score described above. These scores were then differenced (Aid_z minus TEL_z in Figure 5; TEL_z minus Aid_z for Figure 6 and Table 2) to create the distance measure. The values displayed are the average distances from 2000 through 2005. Carrot states are 1.5 standard deviations above the mean difference; stick states are 1.5 standard deviations below the mean difference.	**Aid**: U.S. Census Bureau. Annual Survey of State and Local Government Finances and Census of Governments (1970-2005). **TEL**: Amiel, Deller, and Stallmann (2009).

Expenditure Pressures		
Collective Bargaining Environment and Labor Costs	**Table 1:** Five-category classification scheme, ranging from Very Weak to Very Strong. The collective bargaining strength of local police, local fire fighters, teachers, and "other" local employees – the four main functional areas of local public employment – are measured along three dimensions: (1) collective bargaining rights for local public employees, ranging from "Duty to Bargain" to "Collective Bargaining Is Prohibited"; (2) Union Security Provisions via the existence of a Right-to-Work Law for local public employees; and (3) Strike Policy Provisions. **Figure 6 and Table 2:** Public sector employee union membership as a percent of all public sector employees in state, 2000-2014. Z scores were calculated to standardize the relationship to the average of all states over this 15-year period. The score represents how many standard deviations a state's percentage is from the average state.	**Collective Bargaining Environment:** NBER Public Sector Collective Bargaining Law Data Set. Valletta and Freeman - original (1988); Rueben - update (2000). See: http://www.nber.org/publaw/ **Labor Costs:** Hirsch and Macpherson. (2003).Union Membership and Coverage Database from the Current Population Survey: Note. See: http://unionstats.gsu.edu/CPS%20Documentation.htm

Section 2

We invited three types of individuals to participate in the Workshop on State Intervention in Distressed Communities held at Detroit's Greektown Hotel and Casino October 16-17, 2014: individuals who were formally involved in various elements of state intervention policy design and implementation, those involved in local fiscal distress and bankruptcy from a legal standpoint, and policy experts and researchers. The following table classifies the participants.

State/Affiliate	No. of Participants
Michigan	4
New Jersey	1
New York	1
Ohio	1
Pennsylvania	1
Rhode Island	1
Attorney's, private practice	2
Unaffiliated policy experts	3
C. S. Mott Program officers	2
Local finance professionals	2
MSU researchers	2
MSU research team	5

The following table provides a detailed agenda of the workshop proceedings:

Session Title	Outline
Setting the Context	Surveying the causes and consequences of local fiscal distress, with particular attention to the relatively weak position of local governments in the U.S. federal system: • Review of structural, economic, fiscal, intergovernmental, institutional, and political causes • Local governments' response to fiscal distress • State policies/institutions' role in local fiscal capacity • State policies designed to help local governments meet their financial problems
State Intervention in Distressed Communities: The View From Michigan	An in-depth view of Michigan's approach to local fiscal distress through the eyes of those closely involved in the policy's design, implementation, and evolution
A Deep Dive Into State Intervention: Policies on Paper v. Policies in Practice	A structured dialogue about the participants' experiences with key elements of state intervention. • *Stage 1: Getting in* Where and when is pre-intervention support offered? How are distressed localities identified? When and how do local governments enter the program? How are decision criteria applied? • *Stage 2: Developing a plan* Who carries out the intervention? What actions may these actors take? What are the specific goals of intervention? What are the chief barriers to effective implementation? • *Stage 3: Exit strategy* How does a local government exit the program? Are triggers well specified? When, if ever, are medium- and long-term fiscal, economic, or service-based objectives discussed?
Detroit, Michigan – Ground Zero for the Changing Fiscal Relations Between State and Local Governments	A detailed view of the City of Detroit's ongoing intervention and bankruptcy processes

MICHIGAN STATE UNIVERSITY | Extension

MSU is an affirmative-action, equal-opportunity employer, committed to achieving excellence through a diverse workforce and inclusive culture that encourages all people to reach their full potential Michigan State University Extension programs and materials are open to all without regard to race, color, national origin, gender, gender identity, religion, age, height, weight, disability, political beliefs, sexual orientation, marital status, family status or veteran status Issued in furtherance of MSU Extension work, acts of May 8 and June 30, 1914, in cooperation with the U S Department of Agriculture Ray Hammerschmidt, Interim Director, MSU Extension, East Lansing, MI 48824 This information is for educational purposes only Reference to commercial products or trade names does not imply endorsement by MSU Extension or bias against those not mentioned Produced by ANR Communications WCAG 2 0

I. Introduction

The city of Flint, Michigan, has experienced a variety of fiscal difficulties since the early 2000s. In 2002, an emergency financial manager was appointed for the city under Public Act 72 of 1990 and was in place until 2004. Unfortunately, the reforms and changes made at that time only lasted for a few years before fiscal problems re-emerged in Flint (see MSU Extension white paper *Long-Term Crisis and Systemic Failure: Taking the Fiscal Stress of America's Older Cities Seriously*). By 2011, a second wave of emergency managers would be named to run the city under two newer laws (including PA 4 of 2011 and PA 436 of 2012). These emergency managers were removed from the city, restoring home rule in April 2015. The key question: Can Flint avoid the problems that have plagued it for the last 15 years without being placed under state control for the third time? Before answering that question, we must understand the reforms and changes that have occurred in the city since a fiscal emergency was declared in 2011.

The objectives of this case study of Flint, Michigan, are to understand the economic and fiscal trends that led to the state takeover via an emergency financial manager in November 2011 and to analyze the impact of the emergency manager policy on the city's fiscal health. It updates trends presented in a previous case study on fiscal stress in Flint,[3] provides additional detail regarding the policy changes that emergency managers have made, and examines the impacts of those changes.

[3] Eric Scorsone and Nicolette Bateson, *Long-Term Crisis and Systemic Failure: Taking the Fiscal Stress of America's Older Cities Seriously* (Michigan State University Extension, September 2011), http://expeng.anr.msu.edu/uploads/files/42/MSUE_FlintCaseStudy-2011%202.pdf

II. Historical Overview of Flint, Michigan

Examining the history of Flint can provide an understanding of the evolution of the chronic fiscal stress that has plagued the city, as well as its significance in the geographic region. The city of Flint is located in Genesee County, about 60 miles northwest of Detroit. The Flint River provided the natural resources to create successful commerce in the 1800s for fur trading, the lumber industry, the manufacture of carriages, and eventually the production of horseless carriages that led to the birth of the automotive industry. The entrepreneurial spirit and wealth in the area contributed to the founding of the Buick Motor Company in 1903, followed by the incorporation of General Motors (GM) in 1908. With the rapid growth of the automotive industry came concerns for employee working conditions. This led to the first automotive sit-down strike in 1936-1937 in Flint. After 44 days, the strike ended with the first union agreement with GM, which gave rise to the United Auto Workers (UAW). The continued improvements in working conditions and wages enabled Flint to become an ideal place to live and work, and the increase in wealth fostered a well-respected educational system. Early automotive industry leaders such as Charles Stewart Mott and William C. Durant provided the vision to create a strong cultural environment. Flint prospered for most of the years from the 1930s into the early 1970s. Like many industrial cities, however, the economic vibrancy ebbed and flowed with the U.S. automotive industry. In 1978, GM employed over 80,000 Flint-area residents. By 1990, the number of employees decreased to 23,000, dipping to as low as 8,000 in 2006.

City Government

The City of Flint was incorporated in 1855. The present charter, adopted in 1974, provides for a strong mayor-council form of government. The city council consists of nine members, each representing a ward and serving four-year terms. The mayor, also elected to a four-year term, is the chief executive officer. The mayor appoints a city administrator, as well as principal officials and department heads.

The City of Flint provides a full range of services across 32.8 square miles, including: police and fire protection, construction and maintenance of streets and infrastructure, recreational and cultural activities, water and sewer services, and sanitation and garbage pickup services. In addition, the City of Flint is financially accountable for four other entities:

- City of Flint Board of Hospital Managers (manages and operates the Hurley Medical Center providing inpatient, outpatient, and emergency care)
- Flint Downtown Development Authority (promotes rehabilitation of the downtown area)

- City of Flint Economic Development Corporation (provides financing and development opportunities for businesses located in the City)
- Flint Area Enterprise Community[4] (coordinates the federal enterprise and helps to leverage the resources for the zone)

Flint is the county seat for Genesee County. Like most counties in Michigan, the county government provides court services, human services, record keeping, and community enrichment for its residents. The county and its elected officials also serve as regional problem solvers.

Demographics

The city of Flint's population has changed drastically over the past 50 years. This section explores the historical changes that have occurred throughout the city and region. These trends are essential for explaining the path that has led to Flint's fiscal distress and may point to the path that the city may need to follow in order to build a sustainable future.

Population

According to data collected by the U.S. Census Bureau, the population of the city of Flint has declined over five consecutive decades. There were 48% fewer residents in the city in 2010 compared to 1960 (**Exhibit II-1**). In 2012, there were 100,515[5] residents in the city; in 2013 the city's estimated population further declined to 99,758[6].

In contrast, the population trends in the Flint metropolitan statistical area (MSA), defined by Genesee County boundaries, indicate enormous growth through the 1970s with slight declines over the following three decades. This indicates that the Flint metropolitan statistical area has experienced significant decentralization.

4 The Flint Area Enterprise Community (FAEC) was consolidated with the Economic Development Corporation (EDC) (with the EDC Board of Directors exercising authority and control of the FAEC) by an executive order of the city's emergency manager effective August 8, 2012.

5 With a margin of error of +/- 27 people.

6 2013 American Community Survey 1-year estimate, http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ACS_13_1YR_S0101&prodType=table

Exhibit II-1 Flint Metropolitan Statistical Area (MSA) and Flint City Population
Data source: U. S. Census Bureau (Decennial Census, American Community Survey*)

	1940	1950	1960	1970	1980	1990	2000	2010	2013*
MSA	227,944	270,963	374,313	444,341	450,449	430,459	430,459	425,790	415376
City	151,453	163,143	196,940	193,317	159,611	140,761	124,943	102,434	99758

Exhibit II-2 more clearly illustrates this decentralization. In 1940, the city of Flint comprised 66% of the population of the Flint MSA population compared to only 24% in 2013. The estimates from the 2013 American Community Survey indicate that the net migration into the suburbs may be starting to stabilize, though Flint's population has continued to decline in recent years.

Population Characteristics

Flint's population has been aging over the past several decades. **Exhibit II-3** shows a breakdown of the number of people by age group in Flint from 1940 through 2013.

	1940	1950	1960	1970	1980	1990	2000	2010	2013*
—	66%	60%	53%	44%	35%	33%	29%	24%	24%

Exhibit II-2 Flint City Population as a Percent of MSA
Data source: U. S. Census Bureau (Decennial Census, American Community Survey*)

	1940	1950	1960	1970	1980	1990	2000	2010	2013*
■ Age 65 and over	6,613	10,346	14,313	16,765	16,019	15,015	13,084	10,999	12,270
□ Age 35 to 64	51,779	57,285	63,925	55,694	42,791	42,193	41,878	38,507	38,906
■ Age 20 to 34	39,778	41,771	41,122	41,946	43,784	35,956	27,858	21,178	20,051
■ Age 19 and under	53,373	53,741	77,580	78,912	57,017	47,597	42,123	31,750	28,431

Exhibit II-3 Age of Flint Population
Data source: U. S. Census Bureau (Decennial Census, 2013 American Community Survey*)

To see this more clearly, **Exhibit II-4** shows the relative share of each age category in the total population for each year. The share of population aged 19 years old and under generally increased from 1940 to 1970 with the Baby Boom and has since continually declined from its peak of 41% in 1970, to only 29% of the population in 2013. The share of individuals aged 20 to 34 has fluctuated over the last seven decades, but has been on a general decline since 1980. The share of population aged 35 to 64 years old experienced a period of contraction from 1950 to 1980 followed by a continuous period of growth since then, likely due to the aging of the Baby Boomer population. Finally, during the past seven decades, there has been a fairly steady expansion of residents aged 65 and over, probably due to increased life expectancy. This demographic is expected to continue to expand with the aging of the Baby Boomer population.

The racial distribution of the city has also changed since the 1940s, as shown in **Exhibit II-5**. The city has become more diverse with a population that is 39% white and 56% black/African-American in 2012 compared to 95.6% white and 4% black/African-American in 1940. The share of the population in the "Other" category, which includes both individuals of other races and multi-racial individuals, has also grown from 0.1% in 1940 to 6% in 2010.

Exhibit II-4 Flint Age by Percentage of Population

Housing Trends

Housing trends also help tell the story of a city that is facing fiscal stress. The rate of housing vacancy increased from 5.1% in 1970 to 25.4% in 2013 (**Exhibit II-6**). The rate of change in vacancy was highest between 2000 and 2013 with a 13 percentage-point increase. This coincides with Michigan's decade of economic decline. The potential impact of increased housing vacancies on fiscal health include not only decline in property values and associated property tax revenues, but also increased municipal maintenance, police patrol, fire protection, and other costs to address health and human safety concerns.[1]

Home ownership is also associated with the strength of a community's property values. In 2013, owner-occupied housing only comprised 57% of occupied housing units compared to 73% of units at its peak over the last seven decades in 1960. However, the rate of owner-occupied housing in 2013 is a slight increase from its value in 2010, perhaps a small sign of recovery for the city of Flint (**Exhibit II-7**).

	1940	1950	1960	1970	1980	1990	2000	2010	2013*
Vacant	1,161	1,101	3,683	3,261	3,328	4,830	6,720	10,849	13,812

Given these trends, it is no surprise that property values in the Flint area have declined drastically since the Great Recession as shown in **Exhibit II-8**. The state equalized value (SEV) and the taxable value (TV) have almost converged as of 2015. This could be attributed to a combination of falling property values and the "pop-up" effect of the transfer of ownership of property due to Proposal A (which will be discussed in more detail in section IV). Since local governments tend to rely heavily on property taxes for revenue, this is another indicator of the declining tax base of the city.

Economy

The trends in the jobless rate in the city of Flint and Flint MSA tend to follow the same pattern as that of Michigan as a whole (**Exhibit II-9**). The jobless rate rose during the 2001 recession and did not see sustained recovery until after the Great Recession ended in 2009; however, absolute unemployment rates tend to be higher in the city compared to the MSA and the state as a whole. While there has been a drop in unemployment in the city of Flint since the end of the Great Recession, it is still higher (14% in 2014) than pre-2001 recession levels (8% in 2000).

Exhibit II-8 State Equalized Value (SEV) and Taxable Value (TV) – Flint
Data source: Genesee County Equalization Department

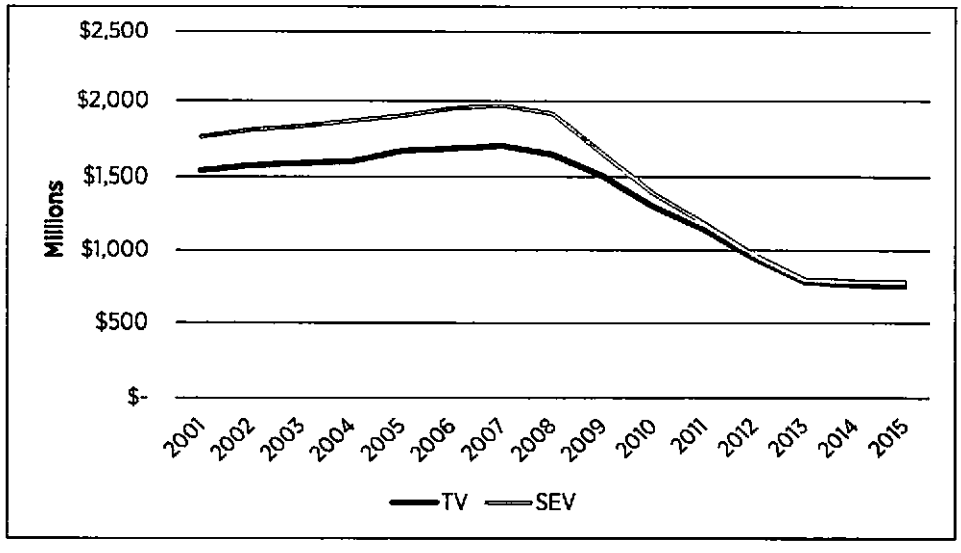

Exhibit II-9 Flint Jobless Rate
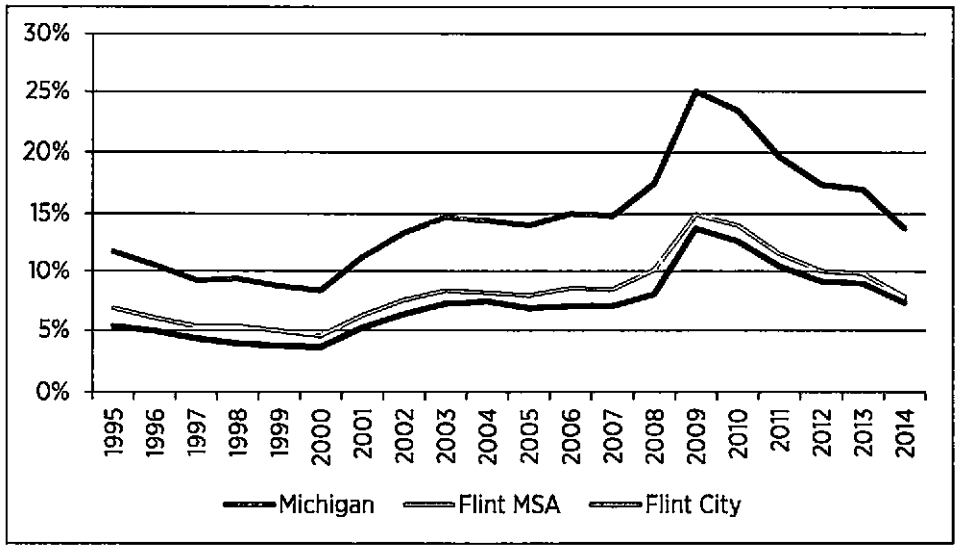
Data source: Michigan Department of Technology, Management & Budget



The city of Flint's audit reports disclosed the city's personal income statistics as shown in **Exhibit II-10**. While a slight recovery occurred after the 2001 recession, in general, personal income has been on a long-term decline since 1996, indicating a diminishing tax base. A decline in personal income not only indicates a lower capacity for property tax and income tax revenues, but also suggests a relation to a lower demand for business-type services. If this demand is fairly elastic with respect to personal income, this would lead to a reduction in city income from public recreation programs, parking fees, and similar sources. The decline in personal income began leveling off in 2009, suggesting signs of stabilization following Michigan's decade in recession.

While the economic climate in the 1990s and 2000s worsened the city of Flint's employment and income trends, many decades of above average poverty rates signal long-term fiscal stress. **Exhibit II-11** shows the general growth in the share of total population living below the poverty level, which peaked at 41.2% in 2010. The share of families below the poverty level follows the population trend. Poverty rates reported by the 2012 American Community Survey indicate

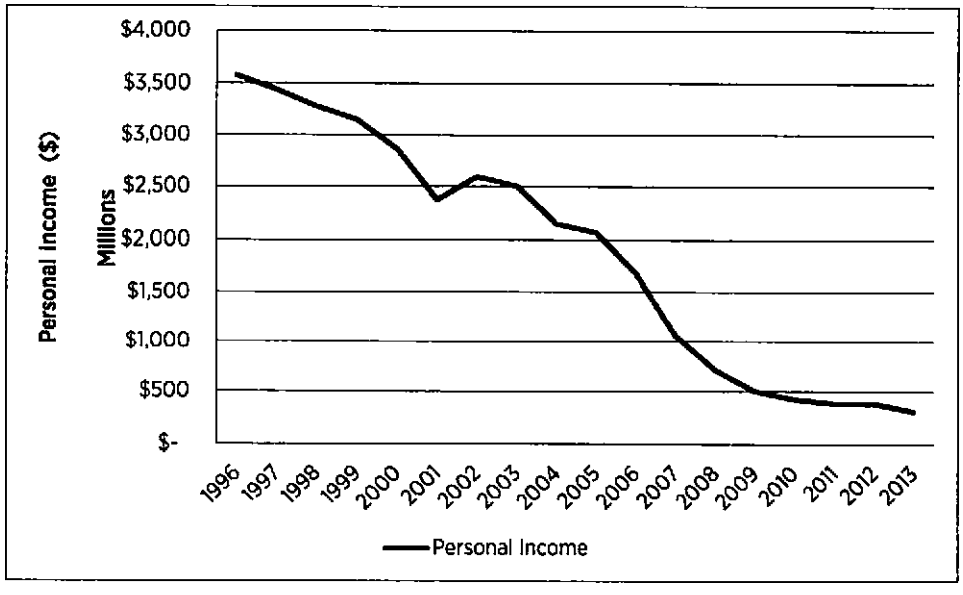


Exhibit II-10 Flint Personal Income

	1970	1980	1990	2000	2010	2013*
Percent of all persons below poverty level	12.4%	16.9%	30.6%	26.4%	41.2%	41 8%
Percent of families below poverty level			27 6%	22.9%	35.2%	35.9%

Exhibit II-11 Population of Flint Below Poverty Level
Data source: U.S. Census Bureau (Decennial Census, 2012 American Community Survey*)

a possible improvement since 2010, which also coincides with the improvements in unemployment and income, discussed above. If the unemployment and income trends are indeed indicative of economic recovery, then these improvements in poverty statistics are possibly explained by a countercyclical relationship between poverty and the business cycle.

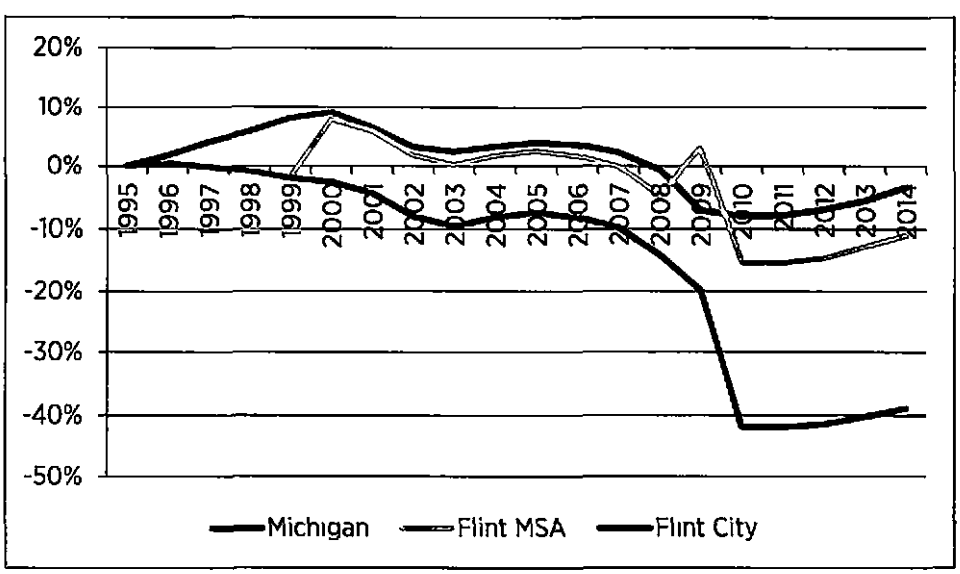
Exhibit II-12 depicts the cumulative change in the number of nonfarm jobs in the city of Flint, the Flint MSA, and Michigan as a whole. While the state overall saw a period of growth in employment in the mid-1990s, employment in the city of Flint and the Flint MSA began to decline in 1996. According to annual estimates from the Bureau of Labor Statistics (BLS) for the Flint MSA, the decline in manufacturing was the driving force of unemployment. Employment in this sector consistently fell between 1995 and 2008, from 48,200 jobs to 9,500.[7] Over this same period, the share of manufacturing jobs (of total nonfarm employment) dropped from 27% to 9%. This trend is likely due to the region's reliance on the domestic auto industry and the declines in the Big Three's market share that began in the 1980s and led to plant closures in the 1990s and early 2000s. According to Genesee County's audit reports, the county's largest employer in FY1997 was GM with 40,944 employees. In FY2009, GM still held its rank as the county's largest employer, but with only 3,417 employees in the county.

While the Flint MSA saw a boost in jobs in 2000, the city experienced a long-term decline in employment over the period shown, with 39% fewer jobs in 2014 than existed in 1995. The share of employment in the city compared to the MSA as a whole also fell in the same time period; as of 2014, employees in Flint represent about 18% of those in the Flint MSA compared to 26% in 1995.

The trends in **Exhibit II-12** indicate that employment started to recover slightly in 2010. This has been primarily driven by the private sector, namely the manufacturing, professional and business services, and trade, transportation and utilities sub-sectors. Public sector employment in the region has followed national trends as it continues to decline. The overall rise in employment in Flint along with the unemployment, income, and poverty trends support the story that the city is experiencing signs of economic recovery.

[7] Not seasonally adjusted

Exhibit II-12 Cumulative Change in Employment in Flint and in Michigan
Data source. Michigan Department of Technology, Management & Budget



The industries representing the city's 10 largest employers have diversified over the past decade. Most notable is the increased prevalence of higher education and employment services (**Exhibit II-13**). During periods of economic decline, enrollment in higher education often increases as individuals seek to expand their skill sets or pursue career changes. Demand for job placement services also increases. Another trend is the increasing concentration of employees in the top 10 employers. The 10 largest employers represented about 65% of the total number of employees in 2014 compared to only 59% of the total number of employees in 2003. This indicates that the impact of smaller firms in the city has diminished over this period. Larger firms tend to have more organizational slack,[ii] which can act as a buffer during economic downturns. Smaller firms that do not have such slack are likely more vulnerable to poor economic environments. Depending on the nature of recovery, employment in small firms could diminish even further during future recessions.

Exhibit II-14 illustrates the diversification of employment in the city of Flint by comparing the share of employees in each industry in 2003 and 2014. The relative share of both automotive employment and public sector employment dropped more significantly than that of healthcare employment.

Principal Employer Industry	FY2003	FY2014
Automotive	23,616	13,975
Federal, state and local government	13,037	6,103
Healthcare	9,569	5,963
Higher education	-	5,656
Employment services	-	1,214
Employees working for ten largest employers	46,222	32,911
Total employees working in City	78,553	51,128

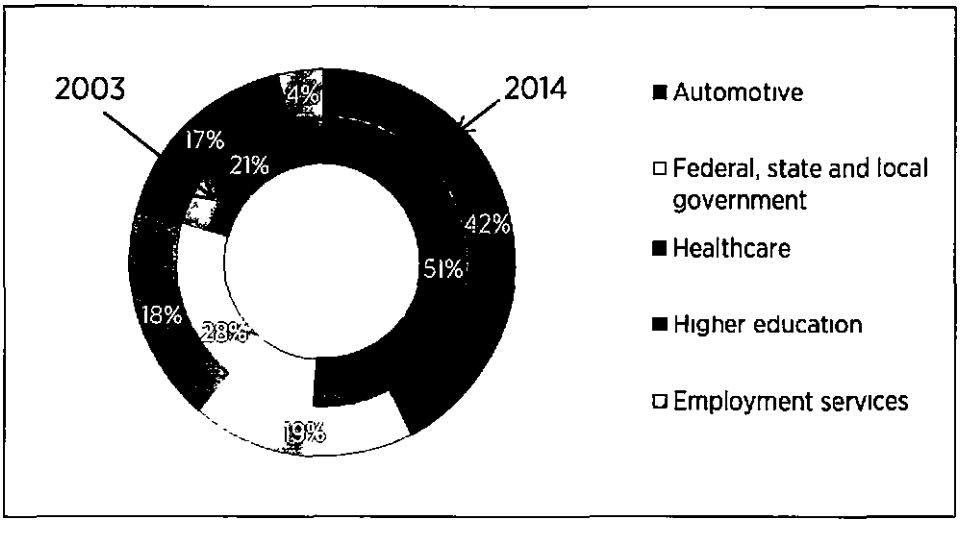

Exhibit II-14 Flint's 10 Largest Employers by Industry
Data source: City of Flint Comprehensive Annual Financial Reports

The city has concentrated efforts to encourage new development. Although most new projects include property that is either tax exempt or requires a property tax incentive, they have brought employees to the city, which increases the nonresident income tax revenue. Recent redevelopment efforts have focused on marketing the 452-acre vacant "Buick City" property. The Environmental Protection Agency has committed up to $7 million for Phase I clean-up of that property.[iii] The total commitment to Buick City is approximately $30 million. Funding for the remediation is from the Revitalizing Auto Communities Environmental Response (RACER) Trust that was created through the GM bankruptcy. The soil remediation project began in early 2011. According to the March 2014 update, corrective measures are being implemented in the Southend site. A corrective measures proposal for the Northend cleanup is being reviewed and will be presented to the public in summer 2014.[iv]

In November 2013, the American Cast Iron Pipe Company announced plans to construct a plant on the Buick City property, creating 50 to 60 manufacturing jobs for Flint. The plant opened in December 2014.

Flint's air transportation needs are serviced by nearby Bishop International Airport. In January 2011, the Bishop Airport Board approved the bid process for a $16.8 million expansion.[v] This project added 47,000 square feet of terminal space, four gates and doubled the width of the corridor linking two sections of the airport. The expansion was completed in November 2012, adding 350 jobs and increasing the number of passengers at Flint's Bishop International Airport[vi]. Several highways meet road transportation needs.

III. Flint Under Emergency Financial Management

Path to Receivership

Due to its decreasing population, employment, and tax revenues, the Flint city government has been under considerable fiscal stress in recent years. In the early 2000s, an emergency financial manager (EFM) was appointed for the city, and was in place until 2004; however, the city soon returned to fiscal insolvency.

The cycle of returning to a deficit position after an EFM appointment ends is not unique to Flint. Drawing on the experience of Flint and other cities that have been assigned an EFM, state policy makers drafted revisions to PA 72, which was replaced by PA 4 in 2011. After a referendum, PA 4 was repealed in 2012, then replaced by PA 436 of 2012[8].

The new law provides greater incentive and mechanisms for local governments to address budget challenges before an emergency manager (EM) is assigned. PA 436 also provides four options to struggling municipalities[9], offering alternatives to the appointment of an EM. Ultimately, however, if cities with chronic fiscal stress are suffering from structural challenges beyond their control, improved management will only be able to cure a limited number of problems.

If a city is placed in receivership under PA 436 of 2012 and an EM is appointed by the state, he or she is granted broad powers to address the struggling city's finances. This includes the authority to amend collective bargaining agreements, make personnel changes, and review and approve the city's budget.

Responding to the most recent fiscal crisis, Michigan's Treasury Department conducted a preliminary review of Flint's financial situation in August and September 2011.[vii] The review found that general fund expenditures had exceeded revenues for the preceding four years. Two years after its deficit reduction plan had been submitted to the state, the general fund deficit had more than doubled. The review also reported that departments within the municipal government had been compensating for cash shortages by borrowing from other funds. The review team determined it was uncertain whether the City of Flint would be able to fulfill its short-term financial obligations.

Due to the City of Flint's structural deficit, increasing legacy costs, and accumulating debt, the review team recommended to the governor that the city be placed under emergency financial management under Public Act 4. In November 2011, the governor of Michigan placed the City of Flint in receivership.

Michael Brown was appointed as the city's emergency financial manager effective December 1, 2011. In August 2012, Michael Brown was replaced by Edward Kurtz as emergency manager (who had served as the city's EM from 2002 to 2004). Ed Kurtz served as the city's emergency manager until July 2013, at which time Michael Brown was again appointed by the governor. Michael Brown resigned in September 2013; Darnell Earley was appointed as his replacement. In January 2015, it was announced that Jerry Ambrose, who had previously served as the city's finance and administration director, would replace Darnell Earley as emergency manager. Jerry Ambrose served as the city's EM until April 2015, when control of the city's finances was returned to the mayor and city council under the supervision of a Receivership Transition Advisory Board.

Reforms to Personnel Costs

Wages and Salaries

Significant actions were taken shortly after Michael Brown's appointment as emergency manager. Almost immediately after his appointment, the salaries, benefits, and other compensation were eliminated for the city's mayor and nine council members. The mayor's salary was later restored to 60% of his base salary with full restoration of his benefits, and the salaries of city council members were restored to $7,000 per year with no benefits. Additionally, council members were required to complete level one of the Michigan Municipal League's core courses for municipal government. Several positions were eliminated, which included the Office of the Ombudsman, the Civil Service Commission, and the respective staff assigned to these offices.

[8] Emergency financial managers were in place under Act 72, the term "emergency manager" is used in PA 4 and PA 436. There are somewhat different powers under the various acts but otherwise the concept is the same.

[9] These options include entering into a consent agreement with the state, filing for bankruptcy, agreeing to mediation, or accepting the appointment of an EM

In an effort to reduce the city government's wage expenses by 20%[viii], significant changes were made to the collective bargaining agreements of the City of Flints's police and fire unions. Wages were reduced across the board for members of all police unions: by 1.5% for sergeants, by 2.5% for captains and lieutenants, and by 5% for officers). Salaries and wages of members of the firefighters' union were also reduced[10].

Substantial changes were also made to the city government contracts with the American Federation of State, County and Municipal Employees (AFSCME) locals 1600 and 1799, the unions representing the majority of general city government employees. Wages for Local 1600 members were reduced by 2.5%, and several changes to overtime, holiday, and leave pay were made for both unions.

With the exception of emergency overtime, the EM required that all employee overtime be approved in advance. Executive orders were also issued to put limitations on departments' spending authority, with EM approval required for purchases over $10,000. Stringent budgetary guidelines were put on all departments, emphasizing that budgetary authority is not a mandate to spend and that actions to keep expenses low should be taken whenever possible.

Pensions

Changes were made to police and fire unions' pension eligibility. Employees' annual pension contributions were increased to 9.5% of all earnings for those in the fire and police unions. For members of the unions hired prior to the introduction of the new pension guidelines, the portion of pensions earned up to the 20th year of service are calculated according to the expired bargaining agreement. However, the multiplier was reduced to 2.25 and capped at 240 hours of leave time included as part of the final average compensation (FAC) for all service time earned after the effective dates of the new collective bargaining agreements.

Similar adjustments were made to the pension benefits for locals 1600 and 1799. The defined benefit multiplier was reduced to 1.5% prospectively, and the employee contribution rate was increased from 8% to 12% for Local 1600 and to 9.5% for Local 1799. Hybrid retirement plans (with both defined contribution and defined benefit components) were established for new hires and former defined benefit plan participants. Employees' contributions to the defined contribution components are matched by the City of Flint; employer contributions to the defined benefit component were capped at 10%.

To save administration-related costs, pensions for all unions with collective bargaining agreements with the City of Flint were transferred from the Flint Employees' Retirement System (FERS) to the Michigan Municipal Employees Retirement System (MERS).[ix] This move was approved by all but the police officers' union; section 19(k) of PA 4 was invoked to approve the transfer of Flint police officers' pensions.

Other Post-Employment Benefits

Changes were made to the healthcare benefits received by retirees of the police and fire unions. Cuts included discontinuing healthcare for a former employees' spouse if he or she is eligible to receive paid health coverage through an employer or former employer. The City of Flint reduced the number of plans offered to employees hired after July 1, 2012, offering a high deductible plan in conjunction with a health savings account. Through executive orders, the EM reserved the right of the city to change or discontinue the health insurance programs in response to the Patient Protection and Affordable Care Act (PPACA) as amended.

The City of Flint scaled back its contribution requirements for an active employee's health coverage, requiring employees to pay any premium contributions that exceed the amount contributed by the employer through pension deductions.

Retirees and their spouses aged 65 and over who are covered by Medicare supplemental plan at the employer's expense are subject to contribution limits of the Publicly Funded Health Insurance Contribution Act (PA 152 of 2012) if and only if the retiree enrolls in and pays for Medicare Supplemental Part B. Changes made to the healthcare coverage of retired members of the local 1600 and 1799 unions were similar to those of the other major unions representing City of Flint employees.

Changes were made to the retiree health benefits offered to personnel hired after the effective dates of the new agreements. Instead of employer-paid retiree healthcare coverage, members of the police officers' and firefighters' unions, as well as locals 1600 and 1799 hired after April 2012 were eligible for Retiree Medical Savings Accounts (RMSAs) to which the City of Flint and employees contribute through payroll deductions.

Under the executive orders, the City of Flint committed to contribute $1,500 annually to the RMSAs, with employees contributing $600 per year. Employees will be 100% vested at all times on their own contributions and investment earnings, while employer contributions and investment earnings will be 100% vested after five years of completed service. The same changes were made to retiree health benefits of newly hired nonunion city government

[10] From $63,080.16 to $50,791 52 for CAD supervisors, from $60,515.52 to $56,998.24 for quartermaster, and from $33,467.20 to $27,270.88 for comm. specialist trainees

employees. Contributions to a new employee's RMSA continue until the employee is no longer employed by the City of Flint (including retirement) or when the employee becomes eligible for Medicare. These benefits were not made available to nonunion retirees or spouses who are eligible for health coverage through another employer or former employer.

Other Reforms

In addition to actions taken to reduce the City of Flint's financial obligations in relation to staff, other measures were taken to address the growing deficit. User fees were implemented for waste collection and a special assessment was levied to provide funds for the operation of street lighting (to eliminate $2.85 million in costs to the city government's general fund[x]). Both fees were added to homeowners' property tax bills. Water and sewer rates were increased by 25% to adequately cover the costs of operating both systems.

The City of Flint's Fiscal Year 2013 budget, passed by an executive order on April 24, 2012, was the first balanced budget it had passed in seven years. A total of 155 positions (16% of the workforce) were eliminated.[xi]

Property taxes were increased in order to support police and fire budgets. This increase was achieved by a vote of the city's residents, who approved a 6 mill property tax increase on November 6, 2012.[xii] This tax increase allowed the city government to maintain staffing levels in the police and fire departments that had, up until that point, been supported through a federal grant.

IV. City Finances

Repeated periods of governmental fund deficits can be used to identify cities with chronic fiscal stress. If a city is consistently unable to sustain a positive fund balance, it is likely facing structural budgetary constraints. The City of Flint's fund balance/accumulated deficit history highlights its recurring deficits (**Exhibit IV-1**). Temporary solutions provided some periods of short-term relief in 2005 to 2007 due to the measures taken by an emergency financial manager under Public Act 72 of 1990. The governor appointed the EFM in May 2002, who remained in place until 2004. The progress made during the EFM's tenure was undone three years later due to subsequent labor settlements, costly litigation, and declining revenues. The City of Flint closed FY2008 with a deficit in the General Fund of $6.8 million. Since 2010, the Flint city government has been able to build up the fund balances in its other governmental funds, but has mixed performance in controlling the deficit in its General Fund, which is the main fund for general operating expenses.

General Fund

As of June 30, 2014, the City of Flint's General Fund ended the year with an accumulated deficit of $8.9 million. This is the seventh consecutive year that the fund balance has been in a deficit position, but significantly reduced from the $19.1 million deficit in FY2012. FY2014 is also the third year since FY2006 that the city operated with a surplus in its General Fund; the only other year in which the General Fund ended with a surplus is FY2011 (**Exhibit IV-2**).

Exhibit IV-1 Governmental Funds – Flint History of Fund Balances
Data source: City of Flint Comprehensive Annual Financial Reports

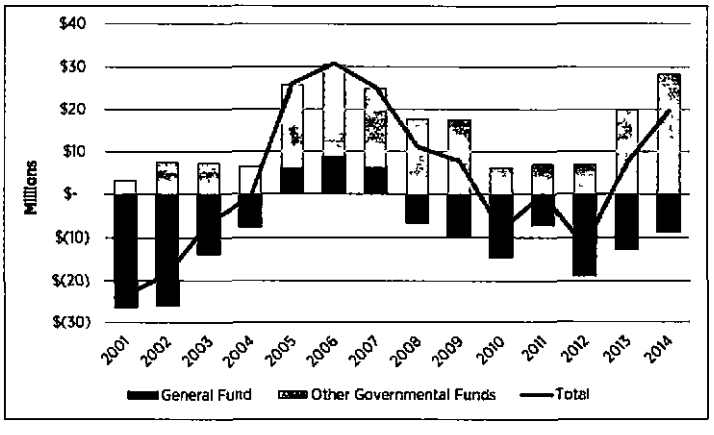

Exhibit IV-2 Flint General Fund Revenues and Expenditures
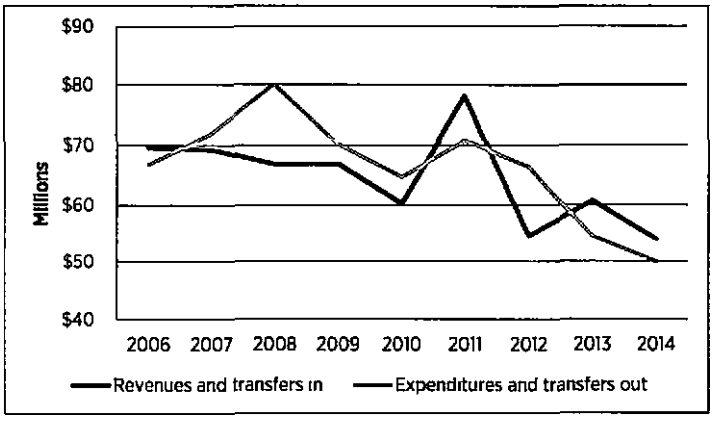
Data source: City of Flint Comprehensive Annual Financial Reports



Revenues

As of 2014, the four primary sources of revenue, and their proportionate share of the General Fund, are property tax (10%), income tax (24%), state shared revenue (32%), and charges for services (18%). **Exhibit IV-3** shows the changes in the share of General Fund revenues over time. Typically, the property tax is the primary source of revenue for local governments. However, the City of Flint's reliance on the property tax has severely diminished over the last several years, which is a testament to the impact of falling property values in the city. Conversely, the share of revenues from charges for services has seen an overall growth. In FY2010, the share of revenues from charges for services actually exceeded that from property taxes. Both the share of revenues of income taxes and of state shared revenue have also declined, but to a lesser extent. The spike in the share of "Other" revenue funds in FY2011 was due to an $8 million debt issuance in the form of 25-year fiscal stabilization bonds from the Local Government Loan Program through the Michigan Department of Treasury. This was less than half of the $20 million in bonds that the City of Flint had initially requested in order maintain operations when it had anticipated that it would run out of cash by March 1, 2011.

Property Tax

Property tax in Michigan is assessed on both real and personal property, though municipalities are limited in levying property taxes in a number of ways. First, the Home Rule City Act of 1909 limits cities in Michigan to levying property taxes of no more than 20 mills for direct municipal services.[xiii] Next, the Headlee Amendment, ratified in 1978, limits the authorized millage rate when property values rise at a faster rate than the rate of inflation.[xiv] Increases in property values due to improvements or new construction are not subject to this limit. Finally, in 1994, Michigan voters approved Proposal A, which limited annual increases to the taxable value to 5% or the rate of inflation, whichever is lower, until there is a transfer of ownership.[xv]

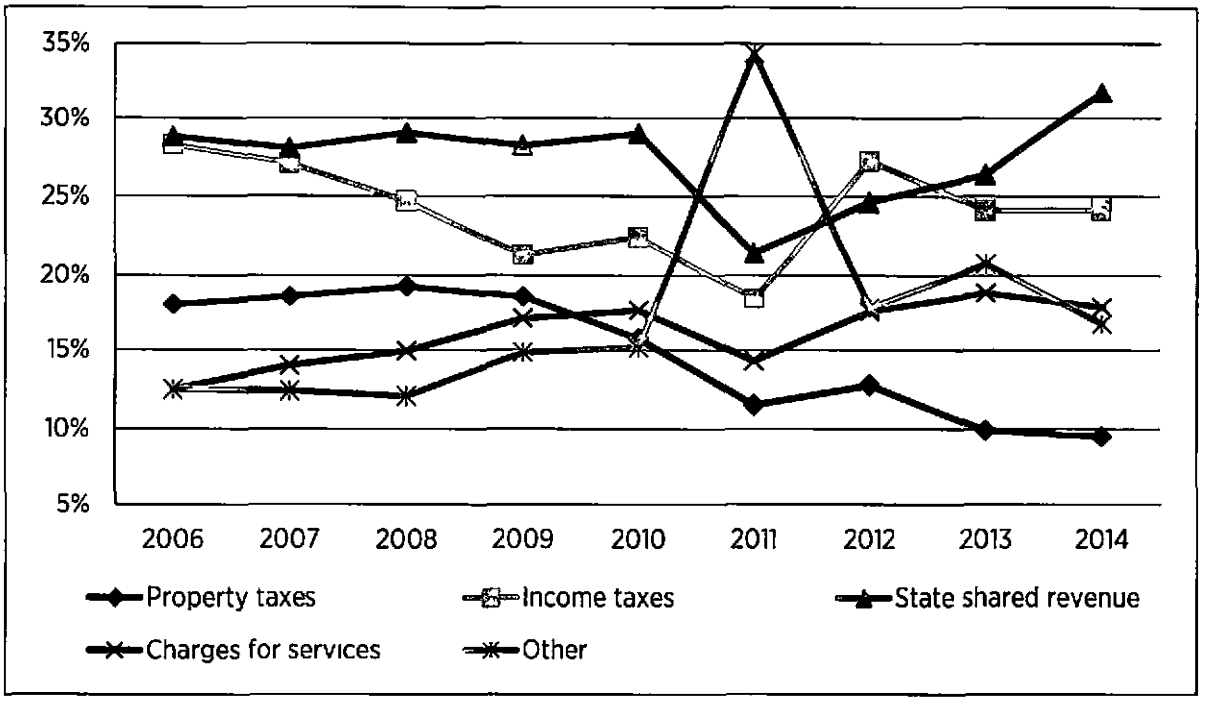


Exhibit IV-3
Share of Flint General Fund Revenues
Data source: City of Flint Comprehensive Annual Financial Reports

Compared to the 10 most populated local units in Genesee County, which represent 72% of the population, the city of Flint levies the highest homestead tax rate (**Exhibit IV-4**). This may cause the city to be less competitive in attracting residents, which hinders its ability to increase its tax base. High tax rates also create incentives for residents to relocate to the suburban areas, which may be one factor that contributes to the population decentralization trends shown in **Exhibit II-2**. For example, a homeowner in the city of Flint will pay, on average, 37.7% more in property taxes than residents of the nine other largest communities that own properties with the same taxable value. This is a substantial increase compared to the same analysis that was performed in the 2011 case study; in FY2011, a homeowner in Flint would pay on average 28.2% more than a homeowner in the other nine communities with a property that had the same taxable value. If a residential property has a taxable value of $75,000, the homeowner in Flint will pay $4,413. A homeowner in the next most-populated community, Grand Blanc Charter Township, will pay $3,119.

Exhibit IV-4 Millage Rates in Genesee County for Fiscal Year 2013 (2014 Tax Rates)
Data source: 2013 American Communities Survey and Michigan Department of Treasury

Taxing Unit	Type of Unit	2013 Population*	Average Property Tax Rates					Annual Bill Based on Taxable Value of $75,000

As a % of County Total		**72%**						

* ACS 5-year estimate

Although the nonhomestead property tax rate had been fairly stable from 2000 to 2010, a more noticeable increase has occurred over the last few years (**Exhibit IV-5**). In 2013, the direct city millage increased from 16.1 to 19.1 mills with the addition of the 6 mill public safety millage and an elimination of a 3 mill waste collection millage.

As discussed in section II, property values in Flint have dramatically declined over the past four years. **Exhibit IV-6** shows a corresponding reduction in property tax revenues; receipts from property taxes in FY2014 were less than half those in FY2006, and less than 40% of their peak in FY2008. The deterioration of the property tax as a stable revenue source is especially clear given that less than 10% of General Fund revenues are dependent on property taxes in FY2014 compared to more than 18% five years prior.

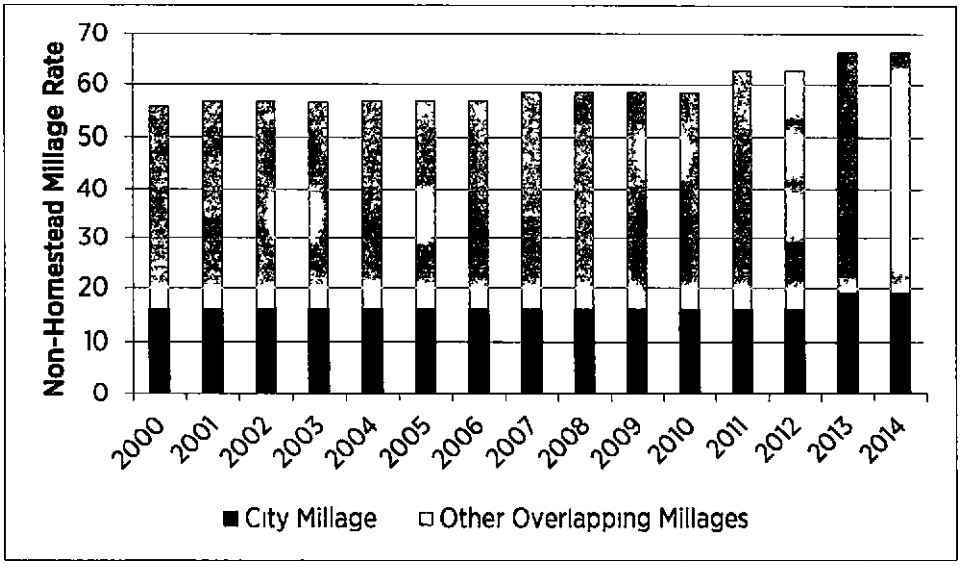

Exhibit IV-5 City of Flint Millage Rates

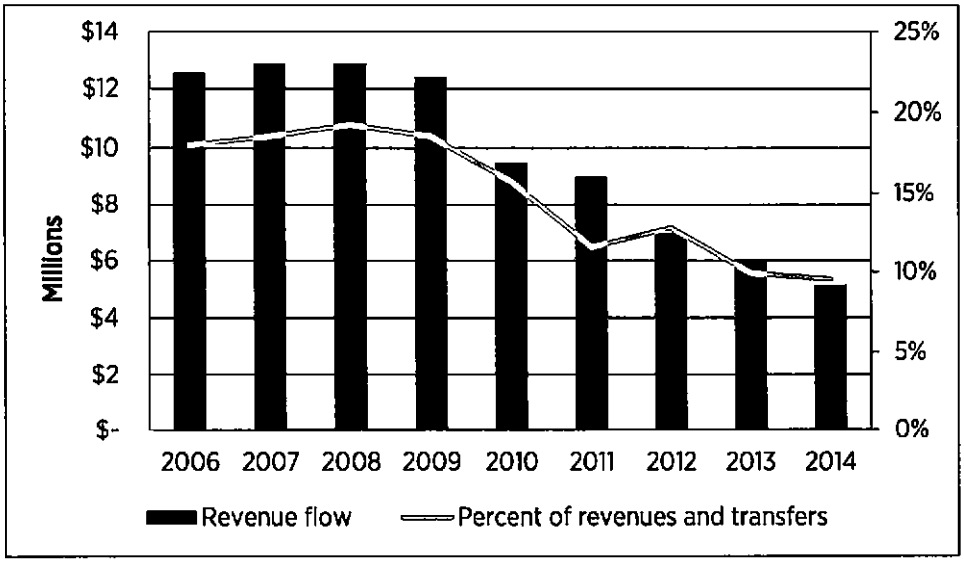

Exhibit IV-6 Flint Property Tax Revenue
Data source: City of Flint Comprehensive Annual Financial Reports

Income Tax

Of the 10 largest cities in Michigan, three are authorized to levy an income tax, including Flint. The income tax rate is 1% for city residents and 0.5% for non-residents. Income tax receipts steadily declined from FY2006 to FY2010 (**Exhibit IV-7**). Since FY2010, this revenue stream has stabilized and seen some slight growth, though it fell again in FY2014.

State Shared Revenue

State shared revenue is generated from a statewide sales tax. Revenue sharing to local governments consists of both constitutional and statutory payments. The constitutional portion is distributed on a population basis. The statutory portion of revenue sharing is defined by a formula based on a combination of population, taxable value per capita, and millage yield (a ratio of the taxable value per mill levied). Starting in FY2012, the statutory revenue sharing was replaced with the Economic Vitality Incentive Program (EVIP).[16] The EVIP allocates funding to cities, villages, and townships based on their ability to satisfy certain criteria, but relies on the old statutory program to determine participation and individual payment amounts. **Exhibit IV-8** shows the breakdown between the

Exhibit IV-7 Flint Income Tax Revenue
Data source: City of Flint Comprehensive Annual Financial Reports

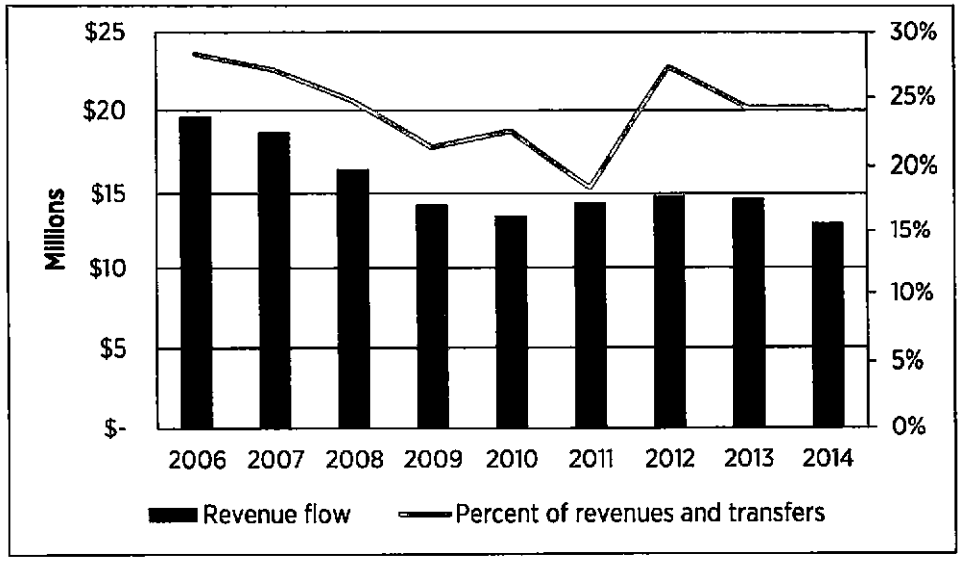

Exhibit IV-8 Breakdown of Flint State Shared Revenue
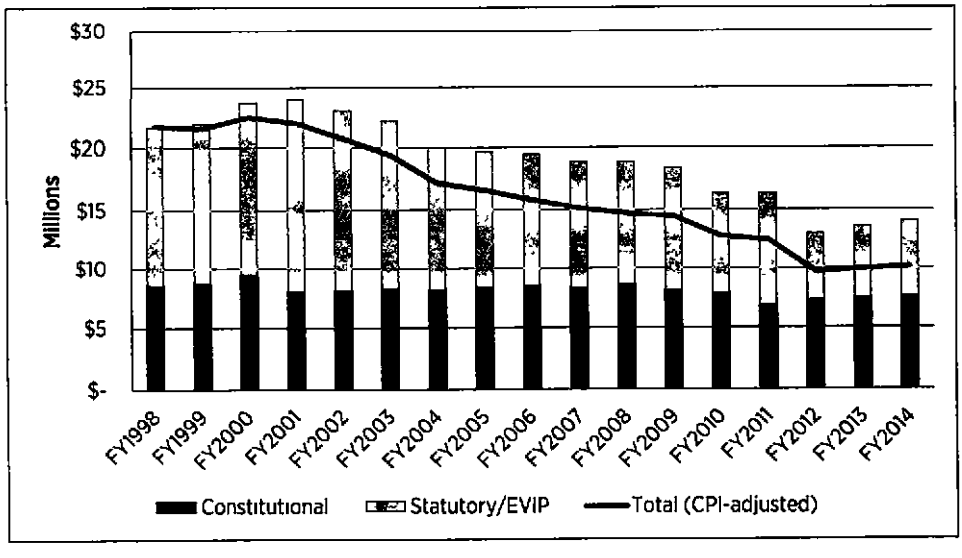
Data source: Michigan Department of Treasury



constitutional payments and statutory/EVIP payments to the City of Flint since FY1998. While constitutional payments have been fairly constant, there has been a substantial decline in statutory/EVIP payments.

Exhibit IV-9 displays the change in state shared revenue over time as reported in the city's financial audit reports.

Charges for Services

While all other revenue sources have been declining since FY2006, income from user fees and charges for services have actually increased on a nominal basis over the same period (**Exhibit IV-10**). Though it has fluctuated in recent years, the percentage of revenues and transfers from charges for services is still relatively high compared to FY2006. This is indicative of cities undergoing fiscal stress since they seek to replace the typical tax and intergovernmental sources with other revenue streams.

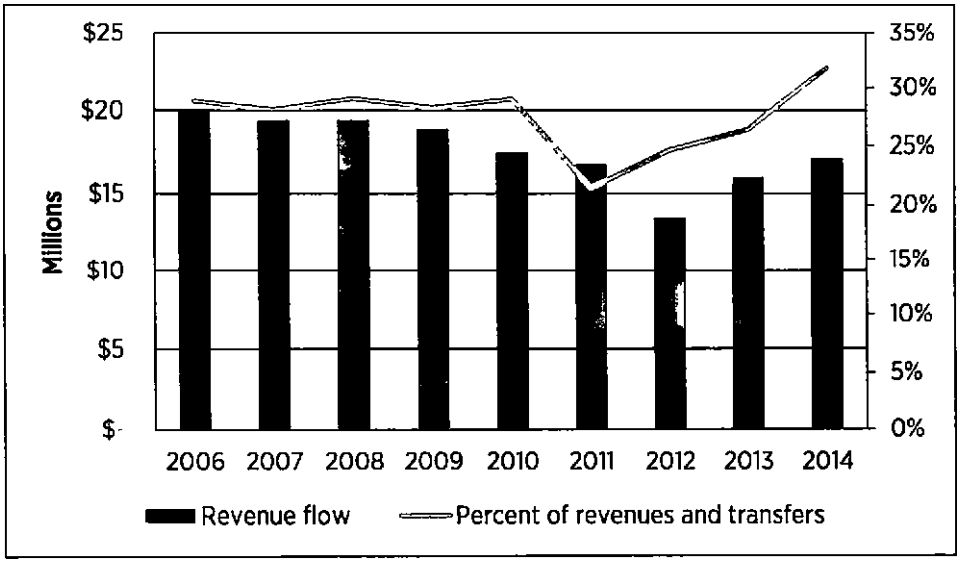


Exhibit IV-9 Flint State Shared Revenue Over Time
Data source: City of Flint Comprehensive Annual Financial Reports

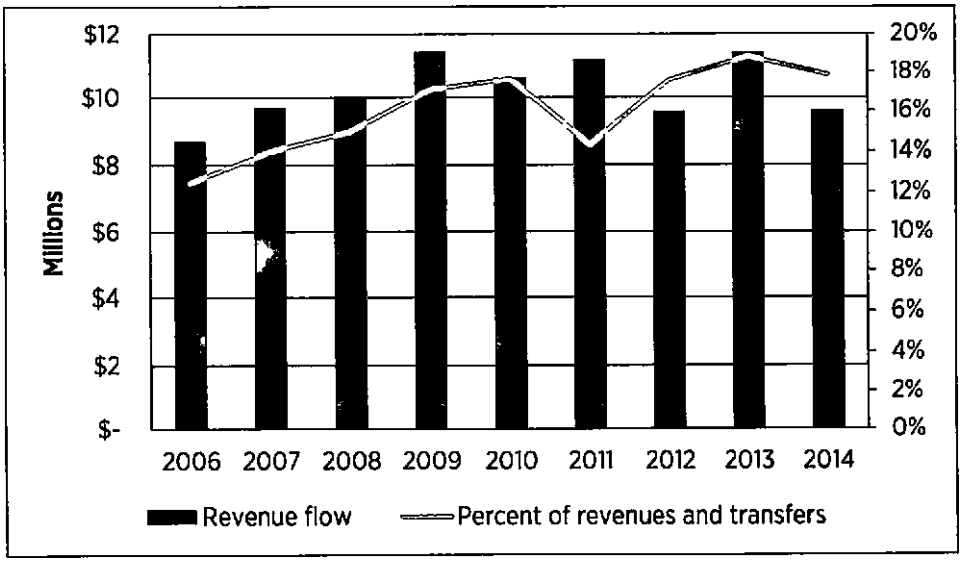

Exhibit IV-10 Charges for Services in Flint
Data source: City of Flint Comprehensive Annual Financial Reports

Expenditures

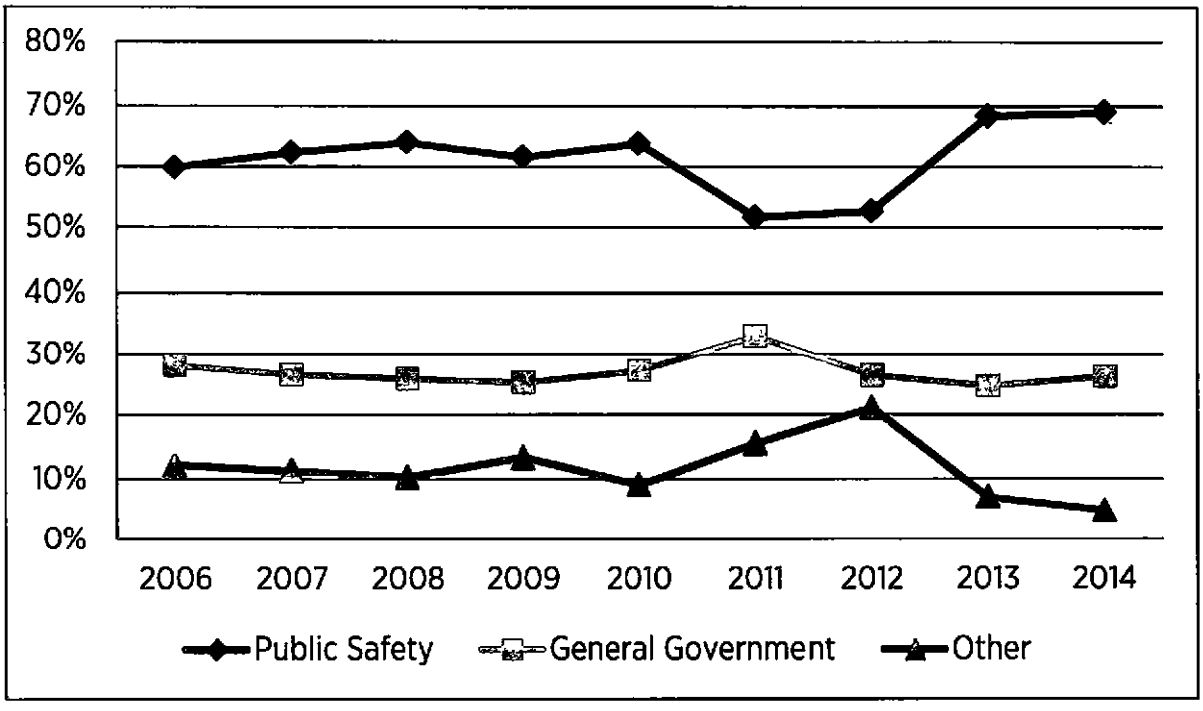
The primary General Fund expenditures are public safety and general government services. In FY2014, 69.1% of spending was allocated to public safety and 26.2% to general government (**Exhibit IV-11**). The following section will detail the spending in various categories for the city of Flint.

Public Safety

Public safety consists of the majority of the General Fund expenditures, and includes the following categories:

- Building inspection
- Combined public safety department
- Emergency dispatch
- Fire department
- Police department

Exhibit IV-11
Share of General Fund Expenditures in Flint
Data source. City of Flint Comprehensive Annual Financial Reports



As discussed in section III, during the November 2012 elections, the voters of Flint approved a 6-mill property tax increase for public safety with 57% approval.[xvii] The proposal also required that 55.5% of General Fund revenues be allocated to public safety budgets (**Exhibit IV-12**). Additional, temporary funding support includes:

- $6.9 million Staffing for Adequate Fire and Emergency Response (SAFER) grant from the Federal Emergency Management Agency (FEMA) awarded in 2012 to avoid laying off 32 fire fighters[11]
- $2.1 million in state funds granted in 2012 to re-open the city's lockup
- $1.8 million grant from the Michigan Department of Treasury Competitive Grant Assistance Program (CGAP) to install a communications tower in the city to expand radio coverage for police and firefighters awarded in April 2013

[11] This grant was awarded twice, but not renewed in 2014.

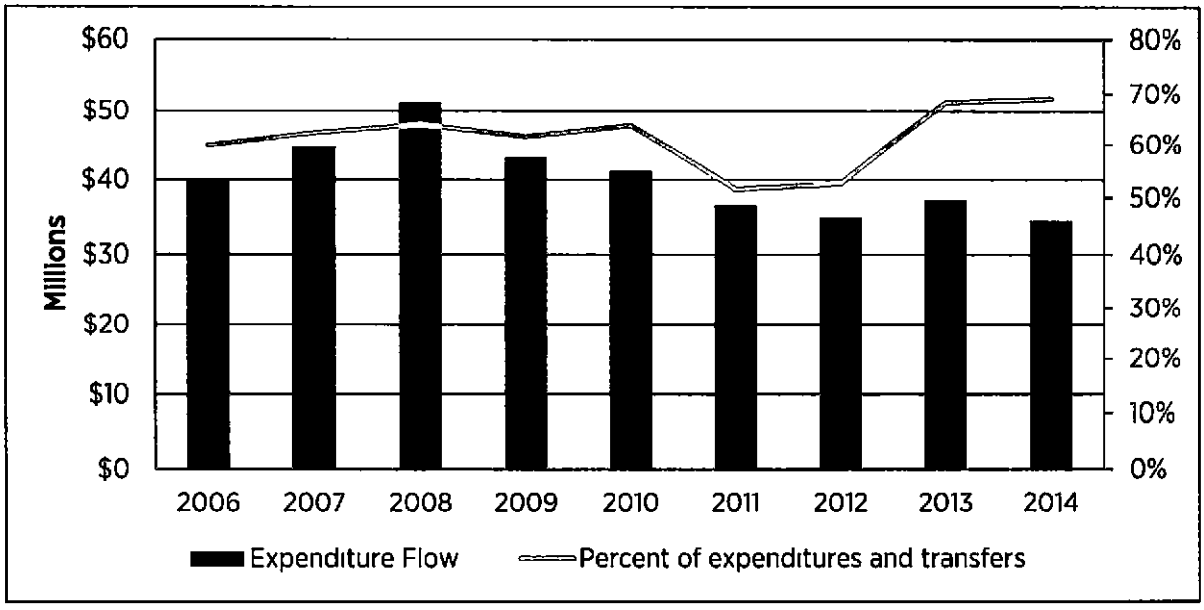


Exhibit IV-12
Flint Public Safety
Data source: City of Flint Comprehensive Annual Financial Reports

General Government

As of FY2014, general government expenditures include the following categories of local government operations:

- Mayor's office
- Finance
- Human relations
- City clerk
- Law office
- Human resources
- City administrator

Expenditures on general government have followed an overall decline since FY2008 (**Exhibit IV-13**). The exception in FY2011 was due to a settlement payment related to a lawsuit against the city regarding the sale of the Genesee Towers building.

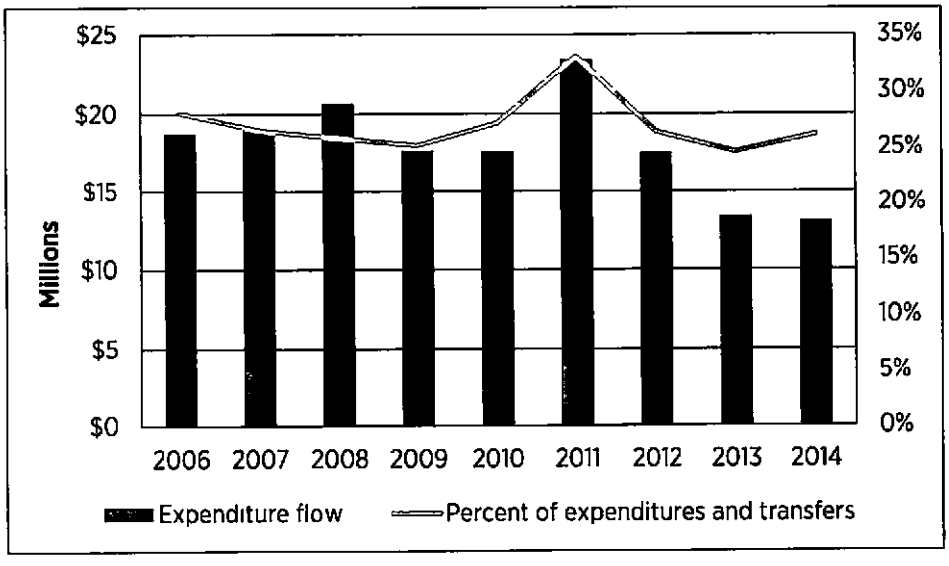
Special Revenue Funds

Revenues and expenditure trends for other governmental funds are shown in **Exhibit IV-14**. These include special revenue funds and debt service funds. As of FY2014, special revenue funds consist of the following types of funds:

- Major streets
- Local streets
- Neighborhood policing
- State Act 251 – forfeitures
- EDA Revolving Loan
- Public Improvement Fund
- Parks and recreation
- Senior citizen centers
- City park
- Building department
- Garbage collection
- Street light (special assessment)
- Public safety (special millage)

The city established a special assessment for streetlights in FY2013 to avoid making cuts to public safety. The public safety special millage was discussed in earlier sections of this report. As of FY2014, debt service includes funds from a

Exhibit IV-13 Flint General Government
Data source: City of Flint Comprehensive Annual Financial Reports



parking deck, Windmill Place, and Buick City. Relative to the General Fund, the city government has managed to keep expenditures in pace with revenues. About $6.5 million of the $10 million deficit in FY2011 was due to the Federal Grants Fund. The majority of the remaining deficit consisted of a $2.3 million deficit in the Major Streets Fund.

Proprietary (Enterprise) Funds

The City of Flint's two proprietary funds include water supply and sewer disposal operations. Prior to FY2012, Hurley Medical Center and the Golf Division were considered business-type activities as part of the city government under proprietary funds. However, starting in FY2012, the city began presenting Hurley as a separate component unit in the audit report, and in March 2012, the city entered into agreements with Flint City Golf, LLC, and the Mott Park Public Golf Course Association to operate the city's golf courses.

Historically, the City of Flint purchased Lake Huron water from the Detroit Water and Sewerage Department (DWSD). Per a resolution that authorized the sale of Drinking Water Revolving Fund bonds, the city government sets its water rates to cover expenses of the administration and operation of the water system. These expenses include the rates charged by the DWSD, which had increased on average by 10% per year. The rates must be sufficient to pay an amount equal to 125% of principal and interest on bonds and any other obligations. In January 2011, the city increased water and sewer rates by 25% and 22% respectively. Another increase of 35% on both water and sewer rates followed in September 2011 in order to meet these revenue requirements.

In April 2013, the city ended its contract with DWSD, and opted instead to contract with the Karegnondi Water Authority (KWA) to build a pipeline from Lake Huron to Genesee County. Effective October 1, 2013, the City of Flint entered into a contract to purchase water from the KWA, with the pipeline expected to be completed in July 2016. The city officially switched its water source to the Flint River in April 2014, to be used until the agreement with the KWA came into effect. However, the city and its residents have experienced several issues with water quality since then.[xviii]. Flint was awarded $2 million from the state through Michigan's Financially Distressed Cities, Villages, and Townships Grant Program to improve its water infrastructure and quality[xix].

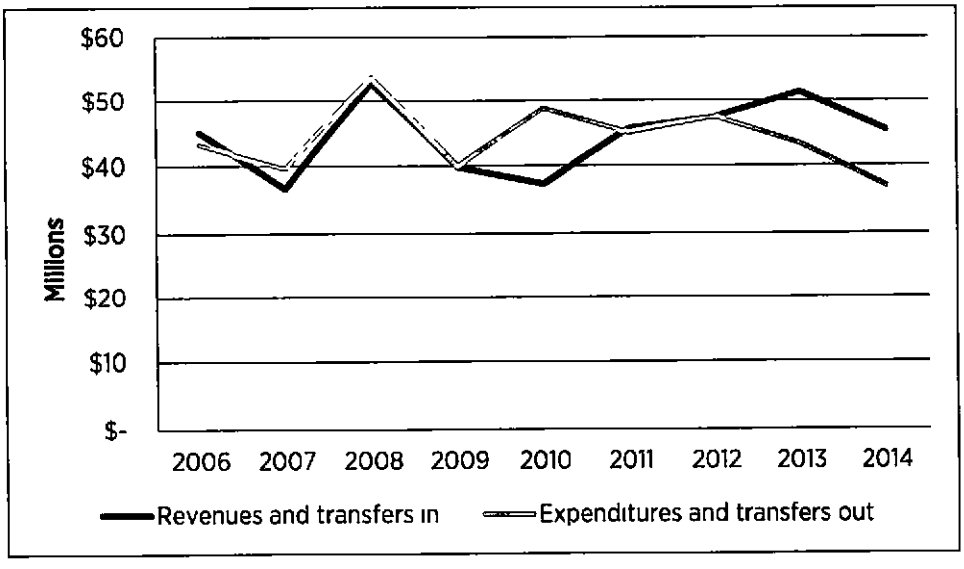


Exhibit IV-14 Other Flint Governmental Funds Revenues and Expenditures
Data source: City of Flint Comprehensive Annual Financial Reports

In general, the revenues and transfers into the water supply fund have exceeded expenditures and transfers out (**Exhibit IV-15**).

In contrast, the sewer disposal fund had seen major deficits annually up until FY2013 (**Exhibit IV-16**). One major contributor to the operating losses associated with this fund is internal borrowing by other funds. This will be discussed in more detail in section V.

Exhibit IV-15 Flint Water Supply Fund Revenues and Expenditures
Data source: City of Flint Comprehensive Annual Financial Reports

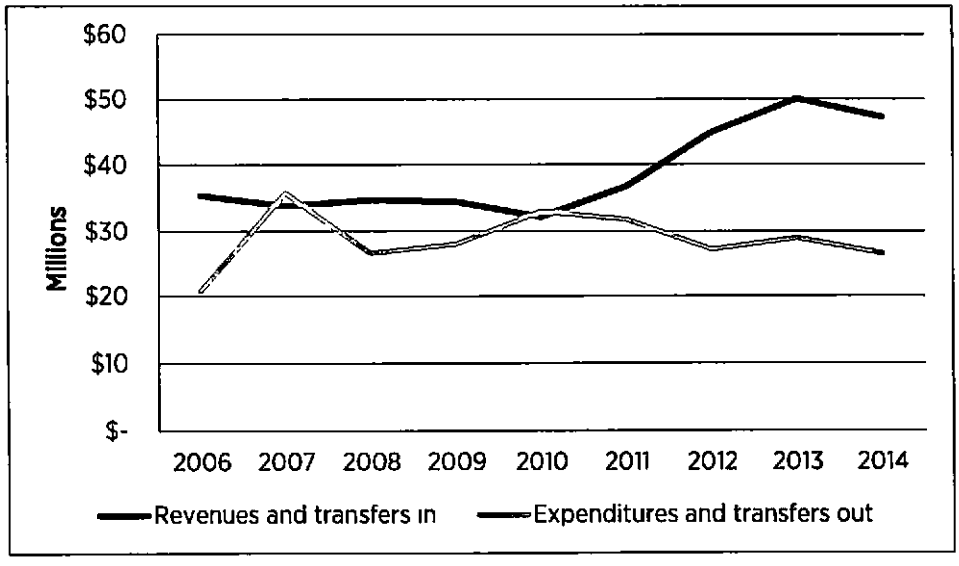

Exhibit IV-16 Flint Sewer Disposal Fund Revenues and Expenditures
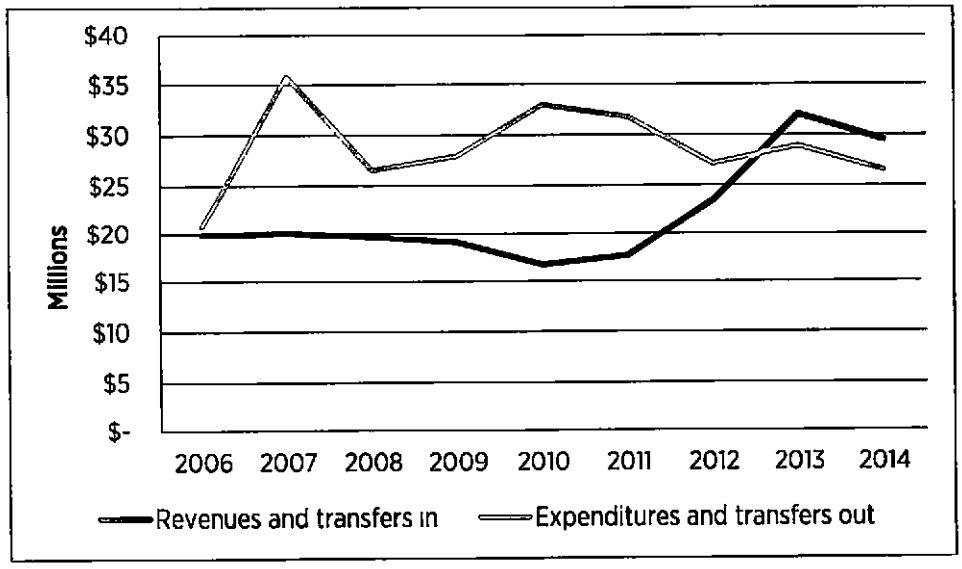
Data source: City of Flint Comprehensive Annual Financial Reports



Internal Service Funds

The City of Flint allocates the internal service funds for data processing, fringe benefits, central maintenance garage, and self-insurance. Internal service funds should be self-sustaining through charges for services to other departments and funds. However, this is not always the case, as shown by the positive figures for "Transfers In" in **Exhibit IV-17**. The Central Maintenance Garage Fund received incoming transfers for six consecutive years. On average, these transfers amount to about 28% of operating costs annually. There was an exception in FY2013, in which the Central Maintenance Garage Fund issued an outgoing transfer to the Garbage Collection Fund in order to transfer proceeds related to the sale of city garbage trucks.

V. Debt

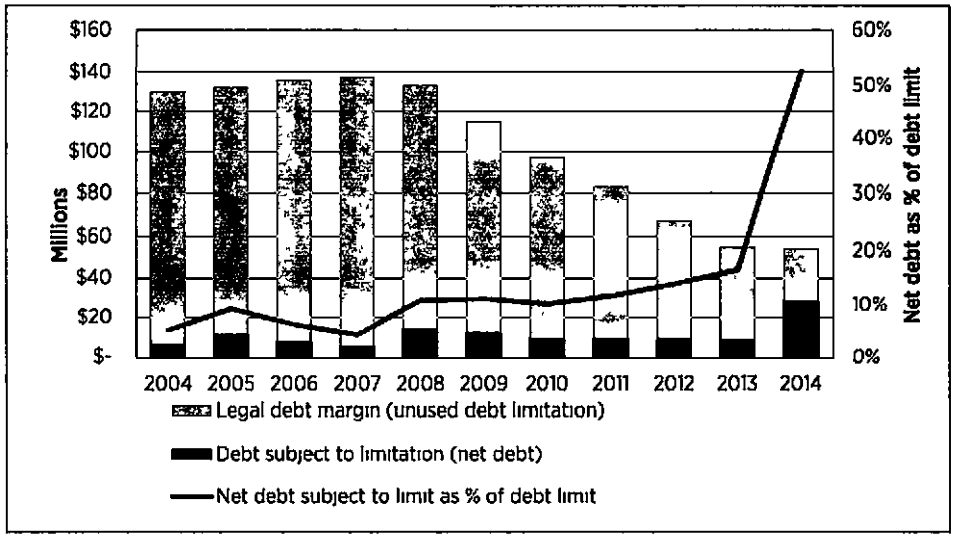
The City of Flint's bond rating has not been updated since the 2011 case study was written. The last bond rating was performed by Moody's Investor Service in February 2006. At that time, the City of Flint was assigned a rating of Bal with a stable outlook.

According to the city's financial audit reports, the City Charter limits net debt to 7% of the assessed value of the real and personal property in the city. **Exhibit V-1** discloses breakdown of the city's net debt limit since 2004. While the absolute amount of the city's debt has been fairly stable over time, the decline in property values in the city has closed the legal debt margin considerably (**Exhibit V-1**). As a result, the net debt as a percentage of the debt limit has jumped from about 4.3% in FY2007 to 16.6% in FY2013.

Many cities with chronic fiscal stress have a significantly large debt burden, which has not necessarily been the case for the City of Flint. The 2011 case study noted that this issue of fiscal distress was mainly due to the lack of capacity to issue debt or manage a long-term capital improvement program. In FY2011, the City made its final payment on an $8 million financial recovery bond issued in 2004 when it was operating under the authority of a state-appointed EFM. As noted earlier, the current level of fiscal stress has caused the City of Flint to seek $20 million fiscal stabilization bonds, of which it received $8 million. These funds are intended to address the chronic cash shortage and unfunded prior operating expenditures. Recurring cash shortages and the need to finance prior years' operations are often considered additional red flags indicating chronic fiscal stress.

Another symptom of chronic fiscal stress is an increased reliance on internal borrowing, another trend that has continued since the 2011 case study. When the City of Flint has difficulty obtaining external financing at a reasonable rate, cash from internal funds becomes a default source of borrowing. **Exhibit V-2** summarizes interfund borrowing activity since FY2006. The nature of this type of activity is generally related to operating transactions among funds. The City of Flint has used this to address cash shortages at the close of the fiscal year. The "Due to/from Other Funds" section is related to short-term loans, while the

Exhibit V-1 Flint Long-Term Debt Limit
Data source: City of Flint Comprehensive Annual Financial Reports



"Advances to/from Other Funds" is related to long-term loans. A concern arises when these balances are significant in dollar amounts and present for more than one year. The City of Flint's General Fund has relied on short-term interfund resources for seven out of the last nine fiscal years and long-term interfund resources since FY2012. As shown in **Exhibit V-2**, the primary lending fund for these transfers has been the Sewer Disposal Division Fund, which contributes to the fund's long-term structural deficit, as reported in **Exhibit IV-16** on page 26. The short-term balance of approximately $13.2 million at June 30, 2013, equates to almost 25% of General Fund revenues for FY2014.

In July 2012, the Flint City Council President, along with three other residents, filed a lawsuit against the city, claiming that the water and sewer rate increases in 2011 violated city ordinances.[xx] The claim was that because water and sewer funds have been transferred to the General Fund, additional funds raised had not been allocated toward their intended purposes. A Genesee County Circuit Court judge dismissed the case in June 2013, claiming that the rate increases were in compliance with Public Act 4, which granted legal power to emergency managers to make rate increases to reflect true operating costs.

As noted in the 2011 case study, advances among funds are often formalized in a written note with specific payment terms including an interest rate. The City of Flint has used advances to fund capital equipment purchases in its internal services funds. Such reliance on interfund borrowings may restrict the lending fund's financial flexibility and use of resources for the designated purpose. Recent advances from the Sewer Disposal Division Fund to the General Fund represent return on equity.

VI. Personnel Costs

Annual Earnings and Benefits

The City of Flint's payroll has declined by almost 1,000 full-time equivalent employees, about 63%, since 2001 due to attrition and downsizing (**Exhibit VI-1**). This breaks down to a 59% reduction in public safety employees and a 65% reduction in other city employees. The majority of this reduction has taken place since 2008.

Pension Benefits

The City of Flint has a defined benefit pension plan with a benefit that ranges from 1.7% to 2.6% of the participant's Final Average Compensation (FAC) based on the last three years of credited service, multiplied by the years of credit service based on the date of hire. Employees who retire at or after age 55 with 10 years of credited service (eight years for appointed officials) or those members with 25 years of credited service (23 years for police and fire employees), regardless of their age, are entitled to a retirement benefit. Certain police members can voluntarily retire at age 50 with 25 years of service. Benefits fully vest on reaching 10 years of service with the benefit payable at age 55. The plan requires employee contributions ranging from 0% to 9%.

Beginning in October 2012, the City of Flint closed out its single-employer plan and transferred approximately $270 million of assets to the Michigan Municipal Employees' Retirement System, an agent multi-employer plan that covers substantially all employees of city government. The City of Flint's unfunded pension liability is $241 million, as of its most recent actuarial valuation.

Defined benefit plan pension benefits are determined by following a three-part formula:

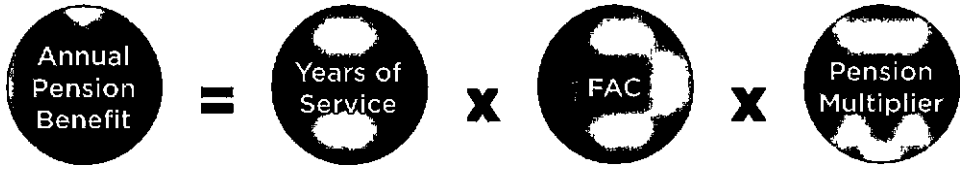

Exhibit VI-1 Flint Full-Time Equivalent Employees
Data source: City of Flint Comprehensive Annual Financial Report

	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
Total	1526	1227	1114	1081	1066	1105	1135	1190	1003	767	835	717	570	655
Public Safety	693	523	468	478	462	478	482	516	421	288	284	265	281	268
Other	833	704	646	603	604	627	653	674	582	479	551	452	289	387

Years of Service – Years of service is based on actual employee service, although sometimes the employee or employer may "buy" years of service at an actuarially determined cost. Unless this is fully funded in advance, it increases the long-term liability.

Final Average Compensation (FAC) – The final average compensation is the average of wages or salary paid to the employee based on a predetermined number of years. Identifying what type of compensation is included in the FAC is important. If it includes overtime, vacation leave payout, longevity, and other pay items, the cost to the employer increases. When the FAC is determined using fewer years, typically the benefit is higher since it is based on highest years. When the FAC period is very short, even small increases in overtime, compensatory time payout, or accrued leave time payout will increase the pension. This is the reason some retirees' actual pension benefits are higher than their regular full-time pay as active employees.

Pension Multiplier – The pension multiplier represents a percent of pay for each year of service.

A cost of living adjustment (COLA) provides an annual increase in benefit retirement. A COLA benefit of E2 provides a 2% annual increase in pension for retirees. Granting automatic pension increases can further constrain future administrations. Employers typically have a pension plan design where they may instead grant a one-time COLA adjustment to retirees.

The proportion of the Annual Required Contribution (ARC) that the city government has contributed to cover pension expenses has improved over the past several years (**Exhibit VI-2**). For every year since FY2009, the City of Flint has contributed at least the ARC amount.

Flint's pension Unfunded Accrued Actuarial Liability (UAAL) has increased from $194 million in 2006 to $323 million in 2011, which was the time of the last actuarial valuation (**Exhibit VI-3**). The funded ratio fell during this time from 81% to 61%.

Exhibit VI-2 Flint Pension – Actual vs. Annual Required Contribution

Data source: City of Flint Comprehensive Annual Financial Reports

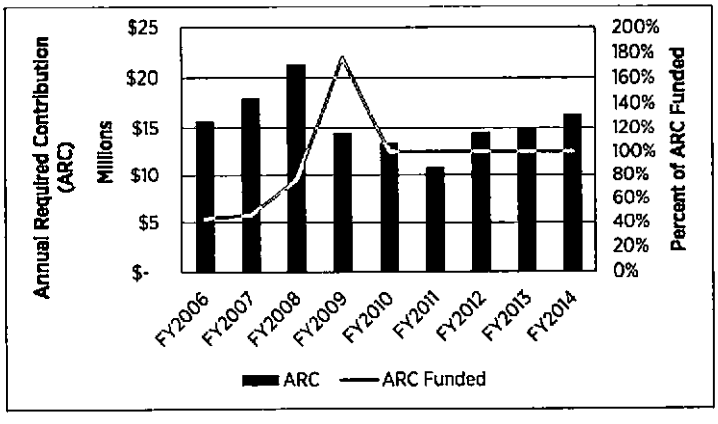

Exhibit VI-3 Flint Pension Funding Status

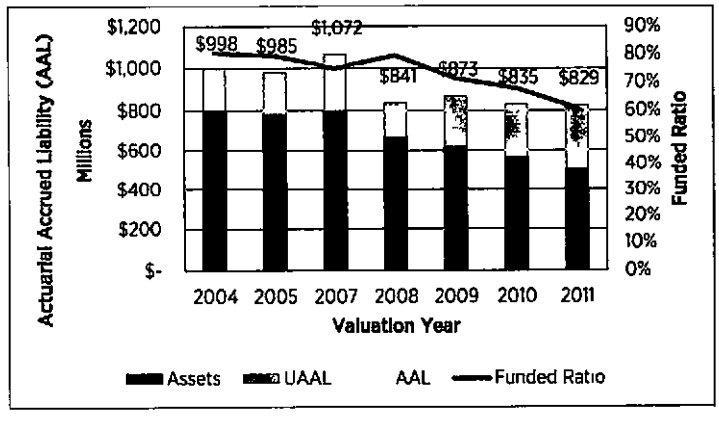
Data source: City of Flint Comprehensive Annual Financial Reports



Other Post-Employment Benefits

The City of Flint contributes to other post-employment benefits (OPEB) for public safety and general employees under collective bargaining agreements of Local 1799, Local 1600, and Fire Local 352. The proportion of the ARC that the city has paid to cover OPEB expenses has improved over the past couple years, from 31% in FY2011 to only 114% in FY2014 (**Exhibit VI-4**).

Since its actuarial valuation in 2006, the City of Flint's unfunded OPEB liability has been cut by $468 million. The city government began advance funding its OPEB plan in FY2012, which has been reflected in its 2012 actuarial valuation. As of this valuation, the plan is 0.1% funded, though that dropped to 0% in the 2013 valuation (**Exhibit VI-5**).

VII. Conclusion

On April 30, 2015, Gov. Rick Snyder rescinded the financial emergency in Flint and restored home rule and the power of the city's elected officials. It had been more than 10 years since the last time such an event occurred in Flint in the summer of 2004. Many questions still continue to swirl around the city's fiscal and economic future. A review of the reforms and changes that occurred since the appointment of an emergency manager in 2011 is a useful starting point for the city to understand the future fiscal trajectory it faces. This review will allow local and state officials to assess the reforms and changes in place and shape the future fiscal policy of the city of Flint, Michigan.

Changes implemented by the four emergency managers appointed to oversee Flint's finances were aimed at reducing the city's considerable budgetary deficit through reducing its financial obligations, especially pensions and other retiree benefits, while increasing city revenue. Some of the most significant changes have impacted the employees and retirees of the City of Flint. These two groups were the most important creditors of the city government. They remain so. Like many city governments in Michigan, Flint does not carry a large debt burden outside of water and sewer borrowing. This means that city retirees and employees are the groups owed the most by the city government and therefore, will be the most directly impacted during a financial reorganization following a fiscal crisis.

The structure of the city government was changed, with staffing reduced by 20%. A city administrator, who will serve as the city's chief administrative officer, was hired on a five-year contract. Among other responsibilities, the city administrator has the authority to negotiate collective bargaining agreements with the city's employee unions.

Reforms were also made to the way the city's budgeting practices, requiring two-year budgeting and three-year financial forecasts to be performed annually. This will allow city officials to identify and potentially deal with budgetary issues before they occur. The city government also adopted a master plan for the first time since the 1960s. The master plan identifies a vision for the city. It was developed with considerable input from the residents of Flint.

The electorate of Flint passed a referendum to have a Charter Review Commission put in place in the summer of 2015. The nine-member commission was elected in May of 2015. It will review the entire charter and assess options for reform. This is an excellent opportunity for the commission and the citizens of Flint to evaluate the current charter and determine a path forward for the city government that includes short-and long-term solvency.

The emergency manager signed a number of final orders before leaving office in April 2015. These orders involved the city council including agenda and meeting dates. They also included setting the special assessment for street lighting, restoring mayor and city council compensation, and adopting a set budget for FY 2016 and 2017. In addition, they included an order ensuring compliance with the so-called hard cap section of PA 152 of 2011 stating that the city shall not pay more than 80% of employee healthcare plans.

The final and perhaps most important order of the Flint emergency manager was issued on April 30, 2015. The overall purpose of the order is to ensure that the mayor and city council shall implement reforms and changes to maintain the fiscal stability of the city government. These provisions included following the recommendations of the Receivership Transition Advisory Board (RTAB) and city administrator. Specific other actions include 1) fully funding the annual pension requirement, 2) not interfering with city employees, 3) observing the budget ordinance, 4) ensuring all local laws are consistent with state laws, 5) not issuing debt without approval of the RTAB, 6) documenting all city liabilities, 7) verifying the appropriate eligibility requirements of all official city positions, 8) acting expeditiously on all economic development projects, and 9) reviewing and acting expeditiously on all intergovernmental cooperation initiatives by the city administrator. All of these provisions are intended to ensure that the city government, as dictated by the mayor and city council, follow certain practices and recommendations that are intended to maintain fiscal stability and solvency. These types of provisions were not in place after the 2002-04 crisis.

The city administrator is also subject to a number of provisions in the final EM order. These provisions include 1) overseeing day-to-day operation of city government, 2) negotiating and recommending changes to bargaining unit contracts to the RTAB, 3) submitting regular reports on city progress, 4) ensuring full compliance with PA 436 of 2012, 5) not removing city administrator without approval of RTAB, 6) observing all purchasing order ordinances, and 7) serving as primary interface between city council and city employees. Again, all of these provisions are meant to ensure the fiscal stability of the city government.

The changes made by the emergency managers have improved Flint's financial position. The general fund deficit was reduced from its peak of over $19 million in FY2012 to just over $8 million in the most recent fiscal year. The city has applied for a $7 million loan from Michigan's Emergency Loan Board, which would effectively eliminate

this deficit. Pension and OPEB liabilities have been significantly reduced, and reforms to employee collective bargaining agreements have reduced future legacy costs. Other cost-saving measures include transferring emergency dispatch to Genesee County and contracting out waste collection.

Despite the progress made since a fiscal emergency was declared in 2011, the City of Flint still faces considerable challenges to its fiscal solvency. Outgoing emergency manager Jerry Ambrose mentioned some of these in his final letter, including the lawsuit filed on behalf of Flint's retirees over changes made to their healthcare benefits, the structural deficit that still exists in the city's financial projections, challenges to fund the city's public safety needs, and the city's ageing infrastructure.

The overall Flint fiscal playbook that has been enacted by the state government and its emergency managers serves as an important template for these types of interventions.[12]

The first part of the playbook is that any reforms or changes must be in reference to the largest component of the fiscal problem, which in this case related to liabilities owed to employees and retirees. Many important changes were made to wages and compensation, pension system benefits, medical benefits and other such liabilities. Of equal or perhaps greater importance, there are a number of safeguards now in place to ensure that these changes remain in place for a long period. Any adjustments to these reforms must go through the city administrator and the RTAB. These safeguards are obviously meant to prevent any backsliding to previous wage or benefit levels. It is this type of activity that led to the most recent crisis, as changes made by the emergency financial manager in 2004 were not kept in place and most of those changes were rescinded by the elected officials between 2004 and 2011. Those changes, combined with the worst recession since the Great Depression, meant that the city faced short- and long-term fiscal insolvency in 2011.

[12] This statement is not meant as recommendation or approval for the state emergency manager law. There are many dimensions upon which the state emergency manager should be assessed. This statement is simply meant to reflect that, in following this path, the Flint experience, with one of the state's largest cities, may be an important reference point.

Eric,

This is a draft summary of these two documents, if Drew is able (and assuming it still needs to get done) I would very much welcome the input from someone with his level of knowledge and expertise on these things. However, these are my comments on these two articles.

The Flint Fiscal Playbook appears to just be a Case Study that documents the events that led up to, and happened during, the State's takeover of Flint. It does not appear to make an overall point, certainly not one that Ed would be too interested in. It's a good read, but I am sure that he is aware of all of these events already.

Beyond State Takeovers, is very critical of EMs nationally, and Michigan is specifically highlighted. I documented all elements from that article that I believe Ed would need to be made aware of.

Please let me know if you need anything else.

Drew,

Eric wants you and I to look into this ASAP, the higher ups are looking for a summary and I was hoping that we could coordinate our efforts to reduce the amount of time this would take.

Please call me when you get into the office.

With regard,

Subject: New reports on Flint and local government issued by MSU

Good Morning,

Please find attached some new reports from MSU regarding the Flint EM years (2011-2014) which is a follow-up to our 2011 report on Flint.

Find here the original Flint report:
https://www.cityofflint.com/wp-content/uploads/Reports/MSUE_FlintStudy2011.pdf

The second report documents the role of state government in the fiscal affairs of Local Government. In particular, you will note:

- Page 9, figure 4 that Michigan escalated its local tax limitations more than almost any state except Colorado
- Page 11, figure 5, Michigan is a stick state in regards to local aid
- Page 14, figure 6, MI is ranked as being high cost and high revenue pressure (meaning revenue restrictions) which is the worst of both worlds

Our research points to the fact that Michigan policies are a major part of the cause of local fiscal distress, not the only cause but a major contributing factor. This is the first time we are aware of being able to quantify this conventional wisdom and place it in the fifty state context.

Thank you

Eric

Beyond State Takeovers: Reconsidering the Role of State Government in Local Financial Distress, with Important Lesions for Michigan and its Embattled Cities

MSU Extension White Paper

SUMMARY - 10/28/15

Overall Summary: The authors compare and contrast various methods for dealing with acute local financial distress, mostly focusing on the State of Michigan. They argue that States are largely to blame for creating these distresses, and that no model for addressing these problems would be universally affective. The audience of this White Paper is intended to be the Mott Foundation, recommendations (at the bottom) are intended specifically to help them craft their strategy for helping deal with this issue.

Michigan context: The authors have two main criticisms of the State of Michigan and the Emergency Manager Law:

1. The State of Michigan incubates municipal financial distress, and is largely to blame for them by:
    - Limiting local revenue collection, author argues that Michigan is more aggressive in its local tax limitations than most states (specifically citing the Headlee Amendment of 1978 and Proposal A of 1994)
    - Michigan provides a low level of financial assistance in state aid to its cities and towns, the author also argues that this is dangerous because it further entwines the municipalities' financial fates to the state (and the politics of the state legislature)
    - The State often imposes additional costs through local service burdens
    - The State increases the cost of labor (healthcare spending, level of retirement contributions etc.). Author argues that critical elements of employee benefits are structured by state laws, that in turn municipalities are forced to abide by, and pay for.

2. The state of Michigan's aggressive intervention policy does little to address the consequences of state imposed financial problems. Author claims that:
    - State assumes that mismanagement is the root cause of fiscal distress
    - State's emergency managers tend to only focus on cutting costs, because there is little they can do on the revenue side. Argues that EMs aren't as effective as their national peers because they lack bailout funding, or substantial tools to raise revenues.
    - State early financial intervention is likely to be less effective (than specifically North Carolina) because Michigan has 3X as many Cities to monitor

Author's recommendations:

- Create a state agency that coordinates services, offers technical support, and financial monitoring. Stresses that this should be more of a cooperative work environment.
- There is no single model for state intervention that Michigan can adopt from other states that would be more effective than the one currently in place
- Raise awareness among citizens that the state is also partially to blame for these financial issues

The Flint Fiscal Playbook: An Assessment of the Emergency Manager Years (2011-2015)

MSU Extension White Paper

SUMMARY - 10/28/15

Overall Summary: This is a case study of Flint, looking at the fiscal and economic trends that led to state takeover, a general history of the State's intervention in Flint, and a very limited analysis of that takeover. This article does paint the EMs role in Flint in a somewhat favorable way, but doesn't really make an overall point but merely to document the events that led up to, and included the State's takeover the Flint, and the EM orders that were established as a result.

Hudson, Deanna (TREASURY)

ADDITIONAL COMMUNICATION

APPOINTMENTS

LICENSES

RESOLUTIONS

NOTE: Resolution No. 150828.1 was referred to today's City Council agenda from the Wednesday, September 30th Planning & Development Committee meeting, while Nos. 150863 and 150864 were referred from the Wednesday, October 7th Finance & Administration Committee meeting.

150828.1 Approval/Obsolete Property Rehabilitation District/Lapeer Road and Averill Avenue

Resolution resolving that the legally described parcels of land situated within the City of Flint, Genesee County, and State of Michigan, be and are hereby established as an Obsolete Property Rehabilitation District (3501 Lapeer Road Area District) pursuant to the provision of the Public Act 146 of 2000, as amended. [NOTE: The district encompasses properties located at 3501 Lapeer Road, 3711 Lapeer Road and 1620 Averill Avenue.]

150863 SAW Grant Agreement/City of Flint/Michigan Finance Authority (MFA)/Michigan Department of Environmental Quality (DEQ)/Strategic Water Quality Initiatives Grant Program

Resolution resolving that the City Administrator, a position currently held by Natasha L. Henderson, is designated as the Authorized Representative for purposes of the SAW Grant Agreement, AND, the proposed form of the SAW Grant Agreement between the City of Flint, the MFA and the DEQ is hereby approved and the Authorized Representative is authorized and directed to execute the SAW Grant Agreement with such revisions as are permitted by law and agreed to by the Authorized Representative, AND, the City of Flint shall repay the Grant, within ninety (90) days of being informed to do so, with interest at a rate NOT-TO-EXCEED eight (8) percent per year, to the Authority, if the City of Flint is unable to, or decides not to, proceed with contructing the project or implementing the asset management program for which the funding is provided within three (3) years of the Grant award, AND, the Grant, if repayable, shall be a first budget obligation for the City of Flint and the City of Flint is required, if necessary, to levy ad valorem taxes on all taxable property in the City for the payment thereof, subject to applicable constitutional, statutory and local tax rate limitations, AND, the City of Flint shall not invest, reinvest or accumulate any moneys deemed to be Grant funds, nor shall it use Grant funds for the general local government administration activities or activities performed by municipal employees that are unrelated to the project, AND, the Authorized Representative is hereby jointly or severally authorized to take any actions necessary to comply with the requirements of the MFA and the DEQ in connection with the issuance of the Grant. The Authorized Representative is hereby jointly or severally authorized to execute and deliver such other contracts, certificates, documents, instruments, applications and other papers as may be required by the MFA or the DEQ or as may be otherwise necessary to effect the approval and delivery of the Grant, AND, the City of Flint acknowledges that the SAW Grant Agreement is a contract between the City, the MFA and the DEQ, AND, all resolutions and parts of resolutions insofar as they conflict with the provisions of this resolution are rescinded. [NOTE: Part 52 of the Natural Resources and Environmental Protection Act, as amended, provides that the MFA, in consultation with the DEQ, shall establish a strategic water quality initiatives grant program to provide grants to municipalities for sewage collection and treatment systems or storm water or non-point source pollution control. The City of Flint is requesting $2,000,000.00 to establish an asset management plan.] [NOTE: Agreement is not attached.]

150864 Contract/City of Flint/County of Genesee/Flint Holding Facility Operation

Resolution resolving that the City Administrator authorizes the appropriate city officials to do all things necessary to enter into the attached agreement with Genesee County for operation of the Flint Holding Facility. [NOTE: The City of Flint Police Department includes a 110-person holding facility with the ability to hold detainees for up to 72 hours. The Genesee County Sheriff currently operates the holding facility. The city and the sheriff have agreed to the terms of a contract for the sheriff to continue operating the facility for a contract price NOT-TO-EXCEED $2,764,275.00. The agreement is contingent on the city receiving funding from the State of Michigan to pay the full costs of the contract and the Sheriff receiving a continued waiver from the Michigan Department of Corrections.] [NOTE: Agreement is attached.]

RESOLUTIONS - MAY BE REFERRED FROM COTW

150865 Budget Amendments/FY2016 Budget of the City of Flint/General Fund/Drug Law Enforcement Fund/Public Improvement Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's General, Drug Law Enforcement and Public Improvement Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0982015.]

150866 Budget Amendments/FY2016 Budget of the City of Flint/Water Fund/Sewer Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's Water and Sewer Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0992015.]

150872 Budget Amendment/Water and Sewer Budget/Switch Back to Detroit Water and Sewerage Department (DWSD) Water Supply

Resolution resolving that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable, with specific revenue and expenditure line items to be provided by the Chief Financial Officer. [NOTE: The State of Michigan and C.S. Mott Foundation have committed $6 million and $4 million dollars respectively to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department (DWSD) and its successor, the Great Lakes Water Authority (GLWA), until the City is able to received water from the Karegnondi Water Authority (KWA). At

this time the KWA reports that construction is on schedule to be completed by June 30, 2015 [2016]. The City estimates the total cost to purchase water through DWSD will be $12 million for nine months. The balance of $2 million not covered by the pledges of State and Local resources is the responsibility of the City. A budget amendment is necessary to reflect both an increase in revenues for the receipt of $10 million in assistance and $2 million of budgeted Use of Fund Balance, and an increase in expenditures of $12 million for the purchase of DWSD water supply.]

Submission No.: CA0892015

Presented: 9/24/15

Adopted: _____

Resolution Approving the Establishment of an Obsolete Property Rehabilitation District
(P.A. 146 of 2000, as amended - IMS Ice Arena Corp.)

BY THE CITY ADMINISTRATOR:

Pursuant to Act No. 146 of the Public Acts of 2000, the City of Flint has the authority to establish Obsolete Property Rehabilitation Act Districts within the physical boundaries of the City of Flint.

The owner of such property has filed a written request with the Clerk of the City of Flint requesting the establishment of an Obsolete Property Rehabilitation Act District on property located at 3501 Lapeer Road and legally described in Exhibit 1. The City of Flint has proposed to extend the requested district to include adjacent properties commonly known as 3711 Lapeer Road and 1620 Averill, and legally described in Exhibit 2.

The Flint City Council of the City of Flint sets forth a finding and determination that the district meets the requirements set forth in section 3(1) of Public Act 146 of 2000, as amended.

Written notice has been given by mail to all owners of real property located within the proposed district, and to the public by newspaper advertisement in the Flint Journal and/or public posting of the hearing on the establishment of the proposed district.

On October 12, 2015, a public hearing was held and all residents and taxpayers of the City of Flint were afforded an opportunity to be heard thereon.

The Flint City Council deems it to be in the public interest of the City of Flint to establish the Obsolete Property Rehabilitation Act District as proposed.

It Is Resolved, by the Flint City Council that the legally described parcels of land situated within the City of Flint, Genesee County, and State of Michigan to wit:

See attached Exhibits 1 and 2

be and are hereby established as an Obsolete Property Rehabilitation Act district (3501 Lapeer Road Area District) pursuant to the provision of the Public Acts of P.A. 146 of 2000, as amended.

APPROVED AS TO FORM:

Peter M. Bade, Chief Legal Officer

Natasha L. Henderson, City Administrator

CITY COUNCIL:

RECEIVERSHIP TRANSITION ADVISORY BOARD:

PROJECT STAFF REVIEW FORM

To:	Natasha Henderson, City Administrator
From:	Janice Karcher, Flint & Genesee Chamber of Commerce
Date:	August 25, 2015
Subject:	Request for the creation of an Obsolete Property Rehabilitation District (OPRD), Dort Federal Event Center

Request to Create an Obsolete Property Rehabilitation District
Owners of the Dort Federal Event Center (formerly Perani Arena) plan to refurbish the arena in order to accommodate a new hockey team and additional community events. An estimated 28 jobs will result from the project. The increased commercial activity in the facility is expected to benefit neighboring businesses in the City.

Authorized by the State of Michigan Obsolete Property Rehabilitation Act (OPRA), a district has been requested by the owner to allow them to make future application for an OPRA certificate that supports reconstruction of portions of the building interior, freeway signage, and other amenities.

NOTE: The creation of an OPRD is the first step in the establishment of OPRA certificate for a specific property. Owners of property within the district must make application for an OPRA certificate and receive approval from the local jurisdiction in order to receive any benefit.

It is recommended that the City of Flint consider creating an OPRD with a larger footprint to include Scott Elementary to the west of the arena and the retail complex east of the arena. Both properties are underutilized and could benefit from tools that encourage redevelopment.

In anticipation of a request for OPRA certificate for Dort Federal Event Center, some estimates have been created to determine potential impact of the project on City of Flint revenues. See page 2 of this memo.

Estimate of impact on tax revenue (estimate only, for planning purposes)
In anticipation of a future application for OPRA status, the following details should be contemplated:

The property is currently listed on Flint tax rolls with a true cash value of $2.2 million, despite the facility's age and decayed condition. The new owners purchased the building for $500,000 in December, 2014, and filed a tax appeal to the State of Michigan in May, 2015 to request an adjustment in the assessed value of the property. It is expected that the true cash value of land and building will be adjusted to an amount closer to the $500,000 paid.

Note: The building has been inspected and deemed obsolete, according to City Assessor Bill Fowler. Should an OPRA certificate be granted in the future, the taxable value of the building would be frozen for up to 12 years, obligating the owners to pay the property taxes at the current level and giving them relief on only the annual increase in assessed value over that period of time.

Below is an estimate of City of Flint tax revenue impact based on taxable values provided by City of Flint Assessor's Office.

Estimated Property Tax Revenue – estimated high and low

- True cash value (purchase price) $500,000*
  - Land $150,000; Building $350,000
  - Estimated annual tax $$16,740
  - Estimated City of Flint portion $5,331

*If the owner's state tax appeal results in a true cash value higher than the $500,000 purchase price, the property tax obligation will increase accordingly.

Income tax revenue

- Estimated City of Flint income tax revenue 2016 -- $3,640 per year

1 City of Flint, Flint Schools Current Non-Homestead Millage Rate is 66.9603 (per 1,000 of taxable value). This includes City property tax as follows: General Operating 7.5 mils, Capital Improvements 2.5 mils, and Voted Operating 9.1 mils.

RESOLUTION AUTHORIZING THE SAW GRANT AGREEMENT

BY THE CITY ADMINISTRATOR:

Part 52 (strategic water quality initiatives) of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended ("Part 52"), provides at MCL 324.5204e that the Michigan Finance Authority (the "MFA") in consultation with the Michigan Department of Environmental Quality (the "DEQ") shall establish a strategic water quality initiatives grant program; and

In accordance with the provisions of 2012 PA 511, that provides grants to municipalities for sewage collection and treatment systems or storm water or nonpoint source pollution control; and

In accordance with the provisions of 1985 PA 227, as amended, Part 52, and other applicable provisions of law, the MFA, the DEQ, and the City of Flint, as a grant recipient, shall enter into a grant agreement (the "SAW Grant Agreement") that requires the City of Flint to repay the grant under certain conditions as set forth in MCL 324.5204e, as amended; and

The City of Flint does hereby determine it necessary to ***(select one or more)***
☑ establish an asset management plan, ☐ establish a stormwater management plan, ☐ establish a plan for wastewater/stormwater, ☐ establish a design of wastewater/stormwater, ☐ pursue innovative technology, or ☐ initiate construction activities (up to $500,000 for disadvantaged community); and

It is the determination of the City of Flint that at this time, a grant in the aggregate principal amount not to exceed $2,000,000 ("Grant") be requested from the MFA and the DEQ to pay for the above-mentioned undertaking(s); and

The City of Flint shall obtain this Grant by entering into the SAW Grant Agreement with the MFA and the DEQ.

BE IT RESOLVED THAT:

1. The City Administrator, a position currently held by Natasha L. Henderson, is designated as the Authorized Representative for purposes of the SAW Grant Agreement.

2. The proposed form of the SAW Grant Agreement between the City of Flint, the MFA and DEQ (attached Sample Grant Agreement) is hereby approved and the Authorized Representative is authorized and directed to execute the SAW Grant Agreement with such revisions as are permitted by law and agreed to by the Authorized Representative.

3. The City of Flint shall repay the Grant, within ninety (90) days of being informed to do so, with interest at a rate not to exceed eight (8) percent per year, to the Authority, if the City of Flint is unable to, or decides not to, proceed with constructing the project or implementing the asset management program for which the funding is provided within three (3) years of the Grant award

4. The Grant, if repayable, shall be a first budget obligation of the City of Flint, and the City of Flint is required, if necessary, to levy ad valorem taxes on all taxable property in the City for the payment thereof, subject to applicable constitutional, statutory and local tax rate limitations.

5. The City of Flint shall not invest, reinvest or accumulate any moneys deemed to be Grant funds, nor shall it use Grant funds for the general local government administration activities or activities performed by municipal employees that are unrelated to the project.

6. The Authorized Representative is hereby jointly or severally authorized to take any actions necessary to comply with the requirements of the MFA and the DEQ in connection with the issuance of the Grant. The Authorized Representative is hereby jointly or severally authorized to execute and deliver such other contracts, certificates, documents, instruments, applications and other papers as may be required by the MFA or the DEQ or as may be otherwise necessary to effect the approval and delivery of the Grant.

7. The City of Flint acknowledges that the SAW Grant Agreement is a contract between the City, the MFA and the DEQ.

8. All resolutions and parts of resolutions insofar as they conflict with the provisions of this Resolution are rescinded.

ADOPTED: _____

RESOLUTION AUTHORIZING AN AGREEMENT WITH GENESEE COUNTY FOR OPERATION OF THE FLINT HOLDING FACILITY

BY THE CITY ADMINISTRATOR:

The City of Flint Police Department includes a 110-person holding facility with the ability to hold detainees for up to 72 hours: and

The City desires to continue utilizing the holding facility and has sought funding from the State of Michigan to operate the facility; and

The Genesee County Sheriff currently operates the holding facility. The City and the Sheriff have agreed to the terms of a contract for the Sheriff to continue operating the facility. Pursuant to that agreement, the Sheriff will operate the Flint Holding Facility for a contract price not-to-exceed $2,764,275.00; and

The agreement between the City and County is contingent on the City receiving funding from the State of Michigan to pay the full costs of the contract, and the Sheriff receiving a continued waiver from the Michigan Department of Corrections; and

It is the determination of the City that it is in its best interests to enter into a contract with the Sheriff to continue operating the holding facility.

IT IS RESOLVED that the City Administrator authorizes the appropriate City Officials to do all things necessary to enter into the attached agreement with Genesee County for operation of the Flint Holding Facility.

FOR THE CITY:

Natasha L. Henderson, City Administrator

Dayne Walling, Mayor

APPROVED BY THE CITY COUNCIL:

S \P Bade\Resolutions\Flint Holding Facility Reso 10 01 15 doc

CITY OF FLINT AND GENESEE COUNTY
AGREEMENT FOR OPERATION OF FLINT HOLDING FACILITY
BY GENESEE COUNTY SHERIFF
FY2015-16

This is an agreement between the City of Flint (hereinafter "City") and Genesee County (hereinafter "County") for operation of the Flint Police Department pre-arraignment holding facility (hereinafter "Holding Facility") by the Genesee County Sheriff (hereinafter "Sheriff") (together, the "Parties").

The Holding Facility is a 110 person pre-arraignment lodging facility located on the second floor of the City of Flint Police Department. The Sheriff shall operate the Holding Facility in accordance with the following terms and conditions:

1. **Applicable Law:** This contract shall be governed by and interpreted according to the laws of the State of Michigan pertaining to contracts made and to be performed in this state.

2. **Arbitration:** County agrees that for all claims, counterclaims, disputes, and other matters arising out of or relating to this agreement, County must request the City's consent to arbitrate within 30 days from the date the County knows or should have known the facts giving rise to the claim, dispute or question.

   (a) Notice of a request for arbitration must be submitted to the City in writing by certified mail or personal service upon the City Attorney.

   (b) Within 60 days from the date a request for arbitration is received by the City, the City shall inform County whether it agrees to arbitrate. If the City does not consent, County may proceed with an action in the appropriate court. If the City does consent, then within 30 days of the consent each party shall submit to the other the name of one person to serve as an arbitrator. The two arbitrators together shall then select a third person, the three together shall then serve as a panel in all proceedings. Any decision concurred in by a majority of the three shall be a final binding decision. The City's failure to respond to a timely, conforming request for arbitration is deemed consent to arbitration.

   (c) The costs of the arbitration shall be split and borne equally between the parties and such costs are not subject to shifting by the arbitrator.

   (d) The remedy for County's failure to comply with this provision is dismissal of the action.

3. **City Income Tax Withholding:** County and any subcontractor engaged in this contract shall withhold from each payment to its employees the City income tax on all of their compensation subject to tax, after giving effect to exemptions, as follows:

   (a) Residents of the City: At a rate equal to 1% of all compensation paid to the employee who is a resident of the City of Flint.

   (b) Non-residents: At a rate equal to 1/2% of the compensation paid to the employee for work done or services performed in the City of Flint.

These taxes shall be held in trust and paid over to the City of Flint in accordance with City ordinances and State law. Any failure to do so shall constitute a substantial and material breach of this contract.

4. **Compensation:** This agreement is contingent on certain conditions described below. In the event the City receives funding, the City shall pay for such services, as set forth herein, a contract price not to exceed $2,764,275.00 for services as described in the original 3 and 6 page **"Genesee County Sheriff's Office Flint City Lockup Proposals"** and the attachment to this contract titled, **"Genesee County Fund #899- City of Flint Lockup-Fiscal Year 2015/16,"** which governs pricing for this contract term, with the amounts stated in this document superseding any inconsistent amounts stated in the proposals. The contract price includes all anticipated costs of operating the facility including transport, meals, insurance, service fees, and personnel costs. In no event will County be entitled to a greater amount of payment than is set forth in this contract, nor will the County perform services or acquire equipment for which it will not be reimbursed. Other costs may include vacation payouts upon retirement for time accrued while assigned to the Holding Facility. County expressly recognizes that oral agreements by City officials to pay a greater amount are not binding.

   The Parties agree that if the above contract price is not approved by the State, County will provide, and the City of Flint will accept, a revised budget and services based on the available funding.

   (1) County shall submit itemized invoices for all services provided under this Agreement identifying:

      (a) The date of service
      (b) The name of person providing the service and a general description of the service provided.
      (c) The unit rate and the total amount due.

      Invoices shall be submitted to:

      City of Flint
      Accounts Payable
      P.O. Box 246
      Flint, MI 48501-0246

   (2) Invoices shall be paid by the City within forty-five (45) days of submission of a proper invoice.

   (3) It is solely within the discretion of the City as to whether County has provided a proper invoice. The City may require additional information or waive requirements as it sees fit.

   (4) If, during the period covered by this Agreement, an increase in salary, fringe benefits or other costs is implemented as a result of negotiation between the County and the collective bargaining organization (labor union) of the employees or as a result of rate increases, this Agreement shall be amended to include the increased cost of providing the services covered by this Agreement, and the City agrees to reimburse the County to the extent of the increased costs and available funding.

5. **Contingencies:** This agreement is contingent on the City receiving funding to pay the full costs of this contract from the State of Michigan for the Holding Facility, and the Sheriff receiving a continued waiver from the Michigan Department of Corrections regarding the standards applicable to the Holding Facility. Failure to obtain either contingency shall render this contract void.

6. **Contract Documents:** The invitation for bids, instructions to bidders, proposal, affidavit, addenda (if any), statement of bidder's qualifications (when required), general conditions, special conditions, performance bond, labor and material payment bond, insurance certificates, technical specifications, and drawings, together with this agreement, form the contract, and they are as fully a part of the contract as if attached hereto or repeated herein.

7. **Disclaimer of Contractual Relationship with Subcontractors:** Nothing contained in the Contract Documents shall create any contractual relationship between the City and any Subcontractor or Sub-subcontractor.

8. **Term:** The term of this contract is October 1, 2015 through September 30, 2016.

9. **Certification, Licensing, Debarment, Suspension and Other Responsibilities:** County warrants and certifies that County and/or any of its principals are properly certified and licensed to perform the duties required by this contract in accord with laws, rules, and regulations, and is not presently debarred, suspended, proposed for debarment or declared ineligible for the award of any Federal contracts by any Federal agency. County may not continue to or be compensated for any work performed during any time period where the debarment, suspension or ineligibility described above exists or may arise in the course of County contractual relationship with the City. Failure to comply with this section constitutes a material breach of this Contract. Should it be determined that County performed work under this contract while in non-compliance with this provision, County agrees to reimburse the City for any costs that the City must repay to any and all entities.

10. **Force Majeure:** Neither party shall be responsible for damages or delays caused by Force Majeure or other events beyond the control of the other party and which could not reasonably have been anticipated or prevented. For purposes of this Agreement, Force Majeure includes, but is not limited to, adverse weather conditions, floods, epidemics, war, riot, strikes, lockouts, and other industrial disturbances; unknown site conditions, accidents, sabotage, fire, and acts of God. Should Force Majeure occur, the parties shall mutually agree on the terms and conditions upon which the services may continue.

11. **Good Standing:** County must remain current and not be in default of any obligations due the City of Flint, including the payment of taxes, fines, penalties, licenses, or other monies due the City of Flint. Violations of this clause shall constitute a substantial and material breach of this contract. Such breach shall constitute good cause for the termination of this contract should the City of Flint decide to terminate on such basis.

12. **Liability:** Each party to this Agreement will remain responsible for any claims arising out of that party's performance of this Agreement, as provided for in this Agreement or by law. This Agreement is not intended to either increase or decrease either party's liability to, or immunity from, tort claims.

This Agreement is not intended to, nor will it be interpreted as giving, either party a right of indemnification either by contract or at law for claims arising out of the performance of this Agreement.

13. **Independent County:** No provision of this contract shall be construed as creating an employer-employee relationship. It is hereby expressly understood and agreed that County is an "independent contractor" as that phrase has been defined and interpreted by the courts of the State of Michigan and, as such, County is not entitled to any benefits not otherwise specified herein.

14. **Insurance/Worker's Compensation:** County shall provide evidence of having acquired the insurance within 10 days of the State appropriation of funding for this Contract. All coverage shall be obtained from insurance companies licensed and authorized to do business in the State of Michigan unless otherwise approved by the City's Risk Manager. Policies shall be reviewed by the City's Risk Manager for completeness and limits of coverage. All coverage shall be with insurance carriers acceptable to the City of Flint. County shall maintain the following insurance coverage for the duration of the contract.

    (a) Commercial General Liability coverage of not less than $11,000,000 combined single limit with the City of Flint, and including all elected and appointed officials, all employees and volunteers, all boards, commissions and/or authorities and their board members, employees and volunteers, named as "Additional Insureds." This coverage shall include: Bodily Injury, Personal Injury, Property Damage, Contractual Liability, Products and Completed Operations, Independent Contractors; Broad Form Commercial General Liability Endorsement, (XCU) Exclusions deleted and a per contract aggregate coverage. This coverage shall be primary to the Additional Insureds, and not contributing with any other insurance or similar protection available to the Additional Insureds, whether said other available coverage be primary, contributing, or excess.

    (b) Workers Compensation Insurance in accordance with Michigan statutory requirements. The Parties agree that this coverage is included in the personnel costs in the Proposal.

    (c) SIR Charges. It is understood that no County resources will be expended which are not reimbursed. County shall establish and maintain, and City shall pay into, an account to be utilized solely as the Self Insured Retention source of funding for settlements or payments on claims, including legal fees, arising from the Holding Facility. The contribution into this account agreed upon by the Parties for this term is $50,000 to be invoiced and paid in the first billing cycle. County agrees to provide a quarterly accounting of this fund.

    County shall furnish to City two certificates of insurance for all coverage requested with original endorsements for those policies requiring the Additional Insureds. All certificates of insurance must provide the City of Flint with not less than 30 days advance written notice in the event of cancellation, non-payment of premium, non-renewal, or any material change in policy coverage. County must provide, upon request, certified copies of all insurance policies. If any of the above polices are due to expire during the term of this contract, County shall deliver renewal certificates and copies of the new policies to the City of Flint at least ten days prior to the expiration date. County shall ensure that all subcontractors utilized obtain and maintain all insurance coverage required by this provision.

15. **Laws and Ordinances:** County shall obey and abide by all of the laws, rules and regulations of the Federal Government, the Constitution of the United States, State of Michigan, Genesee County and the City of Flint, applicable to the performance of this agreement, including, but not limited to, labor laws, and laws regulating or applying to public improvements.

16. **Modifications:** Any modifications to this contract must be in writing and signed by the parties or the authorized employee, officer, board or council representative of the parties authorized to make such contractual modifications under State law and local ordinances.

17. **Non-Assignability:** County shall not assign or transfer any interest in this contract without the prior written consent of the City provided, however, that claims for money due or to become due to County from the City under this contract may be assigned to a bank, trust company, or other financial institution without such approval. Notice of any such assignment or transfer shall be furnished promptly to the City.

18. **Non-Disclosure/Confidentiality:** County agrees that the documents identified herein as the contract documents are confidential information intended for the sole use of the City and that County will not disclose any such information, or in any other way make such documents public, without the express written approval of the City or the order of the court of appropriate jurisdiction or as required by the laws of the State of Michigan.

19. **Non-Discrimination:** County shall not discriminate against any employee or applicant for employment with respect to hiring or tenure; terms, conditions, or privileges of employment; or any matter directly or indirectly related to employment, because of race, color, creed, religion, ancestry, national origin, age, sex, height, weight, disability or other physical impairment, marital status, or status with respect to public assistance.

20. **No Third Party Beneficiaries:** There are no third party beneficiaries of this contract.

21. **Notices:** Notices to the City of Flint shall be deemed sufficient if in writing and mailed, postage prepaid, addressed to **Flint City Attorney, City of Flint, 1101 S. Saginaw St, Flint, Michigan 48502** and **Flint City Clerk, City of Flint, 1101 S. Saginaw Street, Flint, Michigan 48502**, or to such other address as may be designated in writing by the City from time to time. Notices to County shall be deemed sufficient if in writing and mailed, postage prepaid, addressed to **Genesee County Corporation Counsel, 1101 Beach St., Flint, MI 48502**, or to such other address as may be designated in writing by County from time to time.

22. **Records Property of City:** All documents, information, reports and the like prepared or generated by County as a result of this contract shall be shared with the City of Flint at the City's request.

23. **Scope of Services:** County shall provide all of the personnel, materials, labor, equipment, supplies, machinery, tools, cleaning, superintendence, insurance and other accessories and services necessary to provide the service in accordance with the original **3 and 6 page** proposals titled **"Genesee County Sheriff's Office Flint City Lockup Proposal,"** the attachment to this agreement titled, **"Genesee County Fund #899- City of Flint Lockup-Fiscal Year 2015/16,"** which governs pricing for this contract term, and the special conditions stated within this agreement. City will provide the physical space as well as all utilities and general maintenance of the space. If there is any inconsistency between the

proposal and the conditions stated in this document or in the other attachments to this document, the terms of the proposal are superseded to the extent of such inconsistency.

County shall perform the work in accordance with the General Conditions and any Special Conditions provided for in this contract and warrants to the City that all materials and equipment furnished under this contract will be new unless otherwise specified, and that all work will be of good quality, free from faults and defects and in conformance with the contract documents.

24. **Special Conditions:** The following special conditions shall supersede any and all inconsistent provisions:

(a) **Detainee Booking** – Detainees will be booked at the Holding Facility. Sheriff agrees that he formally takes custody and control over the detainee when the detainee is presented for booking and detainee remains in his custody and control until release. Detainees will be booked using the City's Live Scan equipment. Sheriff shall be solely responsible for supervision and care of detainees while they are under his custody and control. The County's Jail Admission Policy shall govern when the Holding Facility reaches 100 detainees.

(b) **Jail Policy and Procedures** –The County and the Sheriff agree that all detainees will be accepted for holding in the Holding Facility as provided for in this Agreement. Failure to accept detainees as provided by this agreement, except when the population is over 100 as provided in section 24 (a) above, is a material breach of this Agreement and is cause for termination of this Agreement with 30 days written notice. County agrees that, for the duration of the Sheriff's administration of the Holding Facility, the County is legally responsible for costs and damages that may result from incidents related to the provision of these services occurring within the Facility.

(c) **Healthcare** – The Sheriff is responsible for determining whether a detainee needs healthcare, including mental or physical care. If a detainee who does not meet the County's Jail Admission Policy needs healthcare, the Sheriff or his designee will immediately seek consent from an authorized City representative, as designated by the Flint Police Department, to release the detainee from custody. If the City consents, the Sheriff will transport detainee to a health care provider. Upon delivery of the detainee to the provider, the detainee will be discharged from custody. The City is not liable for health care costs for detainees if it has consented to their release from custody.

If a detainee who meets the County's Jail Admission Policy needs healthcare, the Sheriff or his designee will immediately seek consent from an authorized City representative, as designated by the Flint Police Department, to transport the detainee to a health care provider. If the City consents, the Sheriff will transport detainee to a health care provider and ensure proper personnel from the county jail are there to receive custody of the detainee. Upon delivery of the detainee to the provider, the detainee will be discharged from custody of the Holding Facility and transferred to the custody of the Sheriff. The City is not liable for health care costs for detainees if it has consented to their release from custody.

(d) **Use of Holding Facility** – Any person arrested on an original charge within the City may be lodged at the Holding Facility regardless of agency making the arrest.

Any person arrested within the City on an outstanding warrant from the 67th District Court district or the Seventh Circuit Court may be lodged in the Holding Facility regardless of agency making the arrest.

Any person arrested on a warrant from the 68th District Court district or, upon consolidation, the 5th Division of the 67th District Court may be lodged in the holding facility regardless of the location of arrest or agency making the arrest.

Any person arrested within the County, not within the City limits, on an outstanding warrant from the 67th District Court district or the Seventh Circuit Court may be lodged in the Holding Facility, unless the person is arrested on a charge that otherwise meets the County's Jail Admission Policy, in which cast the arrested person shall be lodged in the County Jail. This paragraph applies unless the County Jail is under a County Jail Overcrowding State of Emergency described in Public Act 352 of 1982, as amended, that is beyond 14 days as described in MCL 801.56.

Any person arrested in the City on a warrant(s) issued from a jurisdiction other than those listed above may be lodged at the Holding Facility, provided that the warrant holding agency confirms the validity of the warrant and commits to picking up the detainee within 24 hours.

(e) **Performance Objectives** – City and County will develop financial and performance objectives. The objectives shall include, but will not be limited to, determining how many detainees were lodged in the jail who did not meet the County Jail Admission Policy; how many detainees were arraigned; and the reported crime as compared to the period preceding the operation of the Holding Facility. The metrics will be reviewed every 6 months. After review, if necessary, the terms of this contract will be revised so as to facilitate satisfaction of the agreed upon benchmarks.

(f) **Organization Chart** – City and County will develop and continuously update an organization chart which will set forth all corrections staff employees and their positions. In no event will the total number of employees assigned to the Holding Facility fall below the number provided in the Proposals.

(g) **Detainee Reimbursement** – County may seek reimbursement from detainees as allowed by law. The total price of the contract will be reduced by the amount recovered.

(h) **Meeting/Reporting** - The City and County will designate representatives of the Sheriff and Flint Police Departments to confer as needed, but no less than a weekly basis, to ensure the safe and efficient operation of the Holding Facility, as well as compliance with the terms of this Agreement. The Sheriff will provide the Flint Police Department with access to operational data and regularly report on the operation of the Holding Facility.

(i) **Collect Calling Service** - The City may offer detainees collect calling service, including but not limited to installation of phones in the Holding Facility, and the City will recover all revenue generated. The County assumes no responsibility for this service or its maintenance.

(j) **Monitoring System** - The County will continue to maintain the previously installed video monitoring system in the facility.

25. **Severability**: In the event that any provision contained herein shall be determined by a court or administrative tribunal to be contrary to a provision of state or federal law or to be unenforceable for any reason, then, to the extent necessary and possible to render the remainder of this Agreement enforceable, such provision may be modified or severed by such court or administrative tribunal so as to, as nearly as possible, carry out the intention of the parties hereto, considering the purpose of the entire Agreement in relation to such provision. The invalidation of one or more terms of this contract shall not affect the validity of the remaining terms.

26. **Standards of Performance**: County agrees to exercise independent judgment and to perform its duties under this contract in accordance with sound professional practices. The City is relying upon the professional reputation, experience, certification, and ability of County. County agrees that all of the obligations required by it under this Contract shall be performed by the County and its employees and working under County direction and control.

27. **Subcontracting**: No subcontract work, if permitted by the City, shall be started prior to the written approval of the subcontractor by the City. The City reserves the right to accept or reject any subcontractor.

28. **Termination**: Either party may terminate this contract upon giving written notice 2 months in advance. The contract will be automatically terminated should the State of Michigan not provide funds to operate the Holding Facility. The City will immediately notify the County if it learns that the State will not renew funding for the Holding Facility for the purpose of implementing an organized transition or shut down of the Facility.

29. **Time of Performance**: County's services shall commence immediately upon receipt of the notice to proceed and shall be carried out forthwith and without reasonable delay.

30. **Waiver**: Failure of the any of the Parties to insist upon strict compliance with any of the terms, covenants, or conditions of this Agreement shall not be deemed a waiver of any term, covenant, or condition. Any waiver or relinquishment of any right or power hereunder at any one or more times shall not be deemed a waiver or relinquishment of that right or power at any other time.

31. **Whole Agreement**: This written agreement and the documents cited herein embody the entire agreement between the parties. Any additions, deletions or modifications hereto must be in writing and signed by both parties.

Absent: Councilperson: Davis and Councilperson Winfrey

RESOLUTIONS

150828.1 Approval/Obsolete Property Rehabilitation District/Lapeer Road and Averill Avenue

Resolution resolving that the legally described parcels of land situated within the City of Flint, Genesee County, and State of Michigan, be and are hereby established as an Obsolete Property Rehabilitation District (3501 Lapeer Road Area District) pursuant to the provision of the Public Act 146 of 2000, as amended. [NOTE: The district encompasses properties located at 3501 Lapeer Road, 3711 Lapeer Road and 1620 Averill Avenue.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150863 SAW Grant Agreement/City of Flint/Michigan Finance Authority (MFA)/Michigan Department of Environmental Quality (DEQ)/Strategic Water Quality Initiatives Grant Program

Resolution resolving that the City Administrator, a position currently held by Natasha L. Henderson, is designated as the Authorized Representative for purposes of the SAW Grant Agreement, AND, the proposed form of the SAW Grant Agreement between the City of Flint, the MFA and the DEQ is hereby approved and the Authorized Representative is authorized and directed to execute the SAW Grant Agreement with such revisions as are permitted by law and agreed to by the Authorized Representative, AND, the City of Flint shall repay the Grant, within ninety (90) days of being informed to do so, with interest at a rate NOT-TO-EXCEED eight (8) percent per year, to the Authority, if the City of Flint is unable to, or decides not to, proceed with contructing the project or implementing the asset management program for which the funding is provided within three (3) years of the Grant award, AND, the Grant, if repayable, shall be a first budget obligation for the City of Flint and the City of Flint is required, if necessary, to levy ad valorem taxes on all taxable property in the City for the payment thereof, subject to applicable constitutional, statutory and local tax rate limitations, AND, the City of Flint shall not invest, reinvest or

accumulate any moneys deemed to be Grant funds, nor shall it use Grant funds for the general local government administration activities or activities performed by municipal employees that are unrelated to the project, AND, the Authorized Representative is hereby jointly or severally authorized to take any actions necessary to comply with the requirements of the MFA and the DEQ in connection with the issuance of the Grant. The Authorized Representative is hereby jointly or severally authorized to execute and deliver such other contracts, certificates, documents, instruments, applications and other papers as may be required by the MFA or the DEQ or as may be otherwise necessary to effect the approval and delivery of the Grant, AND, the City of Flint acknowledges that the SAW Grant Agreement is a contract between the City, the MFA and the DEQ, AND, all resolutions and parts of resolutions insofar as they conflict with the provisions of this resolution are rescinded. [NOTE: Part 52 of the Natural Resources and Environmental Protection Act, as amended, provides that the MFA, in consultation with the DEQ, shall establish a strategic water quality initiatives grant program to provide grants to municipalities for sewage collection and treatment systems or storm water or non-point source pollution control. The City of Flint is requesting $2,000,000.00 to establish an asset management plan.] [NOTE: Agreement is not attached.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150864 Contract/City of Flint/County of Genesee/Flint Holding Facility Operation

Resolution resolving that the City Administrator authorizes the appropriate city officials to do all things necessary to enter into the attached agreement with Genesee County for operation of the Flint Holding Facility. [NOTE: The City of Flint Police Department includes a 110-person holding facility with the ability to hold detainees for up to 72 hours. The Genesee County Sheriff currently operates the holding facility. The city and the sheriff have agreed to the terms of a contract for the sheriff to continue operating the facility for a contract price NOT-TO-EXCEED $2,764,275.00. The agreement is contingent on the city receiving funding from the State of Michigan to pay the full costs of the contract and the Sheriff receiving a continued waiver from the Michigan Department of Corrections.] [NOTE: Agreement is attached.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

Passed The Consent Agenda

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, including all the preceding items marked as having been adopted on a Consent Agenda. The motion carried by the following vote:

Aye: 7 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 2 - Vice President Davis and Councilperson Winfrey

RESOLUTIONS - MAY BE REFERRED FROM COTW

150865 Budget Amendments/FY2016 Budget of the City of Flint/General Fund/Drug Law Enforcement Fund/Public Improvement Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's General, Drug Law Enforcement and Public Improvement Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0982015.]

SEPARATED FROM MASTER RESOLUTION

150866 Budget Amendments/FY2016 Budget of the City of Flint/Water Fund/Sewer Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's Water and Sewer Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0992015.]

SEPARATED FROM MASTER RESOLUTION

150872 Budget Amendment/Water and Sewer Budget/Switch Back to Detroit Water and Sewerage Department (DWSD) Water Supply

Resolution resolving that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable, with specific revenue and expenditure line items to be provided by the Chief Financial Officer. [NOTE: The State of Michigan and C.S. Mott Foundation have committed $6 million and $4 million dollars respectively to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department (DWSD) and its successor, the Great Lakes Water Authority (GLWA), until the City is able to received water from the Karegnondi Water Authority (KWA). At this time the KWA reports that construction is on schedule to be completed by June 30, 2015 [2016]. The City estimates the total cost to purchase water through DWSD will be $12 million for nine months. The balance of $2 million not covered by the pledges of State and Local resources is the responsibility of the City. A budget amendment is necessary to reflect both an increase in revenues for the receipt of $10 million in assistance and $2 million of budgeted Use of Fund Balance, and an increase in expenditures of $12 million for the purchase of DWSD water supply.]

SEPARATED FROM MASTER RESOLUTION

150875 Authorization/Agreements/City Administrator/Conversion to Detroit Water

System

Resolution resolving that the City Administrator is authorized to enter into agreements with the Detroit Water and Sewerage Department (DWSD) and Genesee County Drain Commission (GCDC) for conversion to the Detroit Water System.

SEPARATED FROM MASTER RESOLUTION

150876 Establishment/Indigenous Peoples Day

Resolution resolving that the City of Flint shall recognize Indigenous Peoples Day on the second Monday in October and use it to reflect upon the invaluable contributions made by Indigenous Peoples to our community.

SEPARATED FROM MASTER RESOLUTION

SEPARATED FROM MASTER RESOLUTION

150865 Budget Amendments/FY2016 Budget of the City of Flint/General Fund/Drug Law Enforcement Fund/Public Improvement Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's General, Drug Law Enforcement and Public Improvement Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0982015.]

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 7 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

RESOLUTIONS

RESOLUTIONS - MAY BE REFERRED FROM COTW

150886 Brown & Sons Co./Annual Supply/Brake Parts, Bulbs, Breakers, Sprays and Filters

Resolution resolving that the Finance Department is hereby authorized to issue purchase orders for FY2016, FY2017, and FY2018 to Brown & Sons Co. for the annual supply of brake parts, bulbs, breakers, sprays, and filters, as requested by Fleet, in an annual amount NOT-TO-EXCEED $140,000.00, for an aggregate amount of $420,000.00 (pending adopting of the FY18 Budget), AND, resolving that the Finance Department has the discretion to spend an additional amount of NO-MORE-THAN 5% of the annual requested spend amount to Brown & Sons Co. for unanticipated requests that may be submitted during the next three years [Fleet/Central Garage Fund Acct. No. 661-000.000-110.400]. [City Administrator Submission No. CA1022015]

150887 CO#1/Contract/Zito Construction/Water Main Cut-In Project

Resolution resolving that the Mayor and City Administrator do all things necessary to enter into change order #1 to the contract with Zito Construction to extend the contract into the current fiscal year and pay additional work that was needed to complete the project, as requested by the Water Plant, in an amount NOT-TO-EXCEED $19,570.00, for a revised contractual amount of $695,870.00 [Water Fund Acct. No. 591-536.100-801.000]. [City Administrator Submission No. CA1032015]

150888 Contract/Stansley Industries/Biosolids Sludge Transportation-Hauling Services

Resolution resolving that the Mayor and City Administrator are authorized to enter into a three-year contract with Stansley Industries for [a] biosolids sludge cake transportation/hauling agreement, as requested by the Water Pollution Control, for a FY2016 amount of $60,000.00, and pending adoption of FY2017 [Budget] of $80,000.00, and FY2018 Budget amount of $85,000.00, for a total award of $225,000.00 [Sewer Fund Acct. No. 590-550.100-801.500]. [City Administrator Submission No. CA1042015]

150889 Contract/Waste Management-Venice Park Landfill/Biosolids Sludge Disposal Services

Resolution resolving that the Mayor and City Administrator are authorized to enter into a three-year contract with Waste Management/Venice Park for the disposal of the biosolids sludge cake, as requested by the Water Pollution Control, for a FY2016 amount of $150,000.00, and pending adoption of FY2017 and FY2018 Budget amounts of $200,000.00 each year, for a total award of $550,000.00 [Sewer Fund Acct. No. 590-550.100-801.500]. [City Administrator Submission No. CA1052015]

150890 Budget Amendment/Department of Public Works (DPW)/Michigan Department of Transportation (MDOT) Contracts

Resolution resolving that the Department of Public Works' FY2016 Budget shall be amended with the transfer of $189,301.57 from fund balance to Professional Services Line Item No. 202-441.702-801.000. [NOTE: In order to comply with the contractual agreement between MDOT and DPW for bridge work on I-69, and the contractual agreement between MDOT, the City of Flint, and Rowe Professional Services for the Leith Street-Stewart Avenue Bridge Project, it is necessary to replace funds liquidated during the year-end closing process and increase the FY2016 Budget with those remaining funds, for remaining project funding in the amounts of $101,432.82 and $87,868.75, respectively.] [City Administrator Submission No. CA1062015]

150891 Contract/Fleis & Vandenbrink/Preliminary Design and Engineering Services/Fenton Road Project

Resolution resolving that the Mayor and City Administrator are authorized to enter into a contract with Fleis & Vandenbrink using TIP funds for the preliminary design and engineering services for the Fenton Road Project, as requested by Transportation, in an amount NOT-TO-EXCEED $156,748.60 [Major Street Fund Acct. No. 202-441.702-801.000]. [City Administrator Submission No. CA1072015]

150892 Contract/Wade Trim, Inc./Preliminary Design and Engineering Services/Kearsley Street Rehabilitation Project

Resolution resolving that the Mayor and City Administrator are authorized to enter into a contract with Wade Trim, Inc. using TIP funds for the preliminary design and engineering services for the Kearsley Street Rehabilitation Project, as requested by Transportation, in an amount NOT-TO-EXCEED $94,000.00 [Major Street Fund Acct. No. 202-441.702-801.000]. [City Administrator Submission No. CA1082015]

150893 Charitable Gaming License/State of Michigan Lottery Charitable Gaming Division/Flint Cultural Center Corporation, Inc./Raffle

Resolution recognizing the Flint Cultural Center Corporation, Inc. as a non-profit organization operating in the City of Flint for the purpose of obtaining a charitable gaming license, issued by the Michigan Lottery Charitable Gaming Division, relative to conducting a raffle during their "Night at the Museum" event on November 14, 2015, as allowed by Act 382 of the Public Acts of 1972, as amended. SUMMARY FOR 10/26/2015 CITY COUNCIL AGENDA

150873 Summary Minutes/Flint City Council/Regular Meeting/September 28, 2015

Summary Minutes of the Flint City Council regular meeting held Monday, September 28, 2015, at 6:01 p.m., in the City Council Chambers, 3rd Floor, City Hall.

A motion was made by Councilperson Mays, seconded by Councilperson Kincaid, that this matter be Placed on File. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 1 - Councilperson Winfrey

150874 Traffic Engineering/Closure Permit

Short-Term Street/Lane Closure Permit dated October 7, 2015, re: Kearsley, Robert T. Longway, Horrigan, Court, and Crapo Streets on Saturday, October 10th (Making Strides Against Breast Cancer Walk).

A motion was made by Councilperson Mays, seconded by Councilperson Nelson, that this matter be Placed on File. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 1 - Councilperson Winfrey

150828.1 Approval/Obsolete Property Rehabilitation District/Lapeer Road and Averill Avenue

Resolution resolving that the legally described parcels of land situated within the City of Flint, Genesee County, and State of Michigan, be and are hereby established as an Obsolete Property Rehabilitation District (3501 Lapeer Road Area District) pursuant to the provision of the Public Act 146 of 2000, as amended. [NOTE: The district encompasses properties located at 3501 Lapeer Road, 3711 Lapeer Road and 1620 Averill Avenue.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150863 SAW Grant Agreement/City of Flint/Michigan Finance Authority (MFA)/Michigan Department of Environmental Quality (DEQ)/Strategic Water Quality Initiatives Grant Program

Resolution resolving that the City Administrator, a position currently held by Natasha L. Henderson, is designated as the Authorized Representative for purposes of the SAW Grant Agreement, AND, the proposed form of the SAW Grant Agreement between the City of Flint, the MFA and the DEQ is hereby approved and the Authorized Representative is authorized and directed to execute the SAW Grant Agreement with such revisions as are permitted by law and agreed to by the Authorized Representative, AND, the City of Flint shall repay the Grant, within ninety (90) days of being informed to do so, with interest at a rate NOT-TO-EXCEED eight (8) percent per year, to the Authority, if the City of Flint is unable to, or decides not to, proceed with contructing the project or implementing the asset management program for which the funding is provided within three (3) years of the Grant award, AND, the Grant, if repayable, shall be a first budget obligation for the City of Flint and the City of Flint is required, if necessary, to levy ad valorem taxes on all taxable property in the City for the payment thereof, subject to applicable constitutional, statutory and local tax rate limitations, AND, the City of Flint shall not invest, reinvest or accumulate any moneys deemed to be Grant funds, nor shall it use Grant funds for the general local government administration activities or activities performed by municipal employees that are unrelated to the project, AND, the Authorized Representative is hereby jointly or severally authorized to take any actions necessary to comply with the requirements of the MFA and the DEQ in connection with the issuance of the Grant. The Authorized Representative is hereby jointly or severally authorized to execute and deliver such other contracts, certificates, documents, instruments, applications and other papers as may be required by the MFA or the DEQ or as may be otherwise necessary to effect the approval and delivery of the Grant, AND, the City of Flint acknowledges that the SAW Grant Agreement is a contract between the City, the MFA and the DEQ, AND, all resolutions and parts of resolutions insofar as they conflict with the provisions of this resolution are rescinded. [NOTE: Part 52 of the Natural Resources and Environmental Protection Act, as amended, provides that the MFA, in consultation with the DEQ, shall establish a strategic water quality initiatives grant program to provide grants to municipalities for sewage collection and treatment systems or storm water or non-point source pollution control. The City of Flint is requesting $2,000,000.00 to establish an asset management plan.] [NOTE: Agreement is not attached.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150864 Contract/City of Flint/County of Genesee/Flint Holding Facility Operation

Resolution resolving that the City Administrator authorizes the appropriate city officials to do all things necessary to enter into the attached agreement with Genesee County for operation of the Flint Holding Facility. [NOTE: The City of Flint Police Department includes a 110-person holding facility with the ability to hold detainees for up to 72 hours. The Genesee County Sheriff currently operates the holding facility. The city and the sheriff have agreed to the terms of a contract for the sheriff to continue operating the facility for a contract price NOT-TO-EXCEED $2,764,275.00. The agreement is contingent on the city receiving funding from the State of Michigan to pay the full costs of the contract and the Sheriff receiving a continued waiver from the Michigan Department of Corrections.] [NOTE: Agreement is attached.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150865 Budget Amendments/FY2016 Budget of the City of Flint/General Fund/Drug Law Enforcement Fund/Public Improvement Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's General, Drug Law Enforcement and Public Improvement Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0982015.]

SEPARATED FROM MASTER RESOLUTION

150866 Budget Amendments/FY2016 Budget of the City of Flint/Water Fund/Sewer Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's Water and Sewer Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0992015.]

SEPARATED FROM MASTER RESOLUTION

150872 Budget Amendment/Water and Sewer Budget/Switch Back to Detroit Water and Sewerage Department (DWSD) Water Supply

Resolution resolving that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable, with specific revenue and expenditure line items to be provided by the Chief Financial Officer. [NOTE: The State of Michigan and C.S. Mott Foundation have committed $6 million and $4 million dollars respectively to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department (DWSD) and its successor, the Great Lakes Water Authority (GLWA), until the City is able to received water from the Karegnondi Water Authority (KWA). At this time the KWA reports that construction is on schedule to be completed by June 30, 2015 [2016]. The City estimates the total cost to purchase water through DWSD will be $12 million for nine months. The balance of $2 million not covered by the pledges of State and Local resources is the responsibility of the City. A budget amendment is necessary to reflect both an increase in revenues for the receipt of $10 million in assistance and $2 million of budgeted Use of Fund Balance, and an increase in expenditures of $12 million for the purchase of DWSD water supply.]

SEPARATED FROM MASTER RESOLUTION

150875 Authorization/Agreements/City Administrator/Conversion to Detroit Water System

Resolution resolving that the City Administrator is authorized to enter into agreements with the Detroit Water and Sewerage Department (DWSD) and Genesee County Drain Commission (GCDC) for conversion to the Detroit Water System.

SEPARATED FROM MASTER RESOLUTION

150876 Establishment/Indigenous Peoples Day

Resolution resolving that the City of Flint shall recognize Indigenous Peoples Day on the second Monday in October and use it to reflect upon the invaluable contributions made by Indigenous Peoples to our community.

SEPARATED FROM MASTER RESOLUTION

150865 Budget Amendments/FY2016 Budget of the City of Flint/General Fund/Drug Law Enforcement Fund/Public Improvement Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's General, Drug Law Enforcement and Public Improvement Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0982015.]

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 7 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 2 - Vice President Davis and Councilperson Winfrey

150866 Budget Amendments/FY2016 Budget of the City of Flint/Water Fund/Sewer Fund

Resolution resolving that the FY2016 Budget of the City of Flint is hereby amended to reflect the changes in the attached list of budget adjustments to the city's Water and Sewer Funds, dated October 7, 2015, AND, the Chief Financial Officer is authorized to do all things necessary to incorporate the attached changes into the (FY2016) Budget and to assign the appropriate account numbers. [NOTE: Budget adjustments are attached.] [City Administrator Submission No. CA0992015.]

A motion was made by Councilperson Kincaid, seconded by Councilperson Nelson, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Councilperson Nelson, Chairperson Freeman, Vice President Davis, Councilperson Galloway, Councilperson VanBuren, Councilperson Kincaid and Councilperson Mays

Absent: 1 - Councilperson Winfrey

150872 Budget Amendment/Water and Sewer Budget/Switch Back to Detroit Water and Sewerage Department (DWSD) Water Supply

Resolution resolving that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable, with specific revenue and expenditure line items to be provided by the Chief Financial Officer. [NOTE: The State of Michigan and C.S. Mott Foundation have committed $6 million and $4 million dollars respectively to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department (DWSD) and its successor, the Great Lakes Water Authority (GLWA), until the City is able to received water from the Karegnondi Water Authority (KWA). RESOLUTION TO BROWN & SONS CO. FOR THE ANNUAL SUPPLY OF BRAKE PARTS, BULBS, BREAKERS, SPRAYS AND FILTERS

BY THE CITY ADMINISTRATOR

RESOLUTION

The Finance Department, Purchases and Supplies Division, has solicited a bid for brake parts, bulbs, breakers, sprays and filters for a three year period as requested by the Fleet Division; and

Brown & Sons Co., 1720 Davison Rd., Flint, Michigan was the lowest responsive bidder from nine solicitations for said supplies. The funding for this purchase will come from the following account: 661-000.000-110.400; and

IT IS RESOLVED, that the Finance Department is authorized to issue purchase orders for FY16, FY17, and FY18 to Brown & Sons Co. for the annual supplies of brake parts, bulbs, breakers, sprays and filters in an annual amount not to exceed $140,000.00 which results in an aggregate amount of $420,000.00 over the three year period. (Fleet/Central Garage Fund) $140,000 for FY16, $140,000 for FY17, and $140,000 pending adoption of the FY18 budget.

BE IT FURTHER RESOLVED, that the Finance Department has the discretion to spend an additional amount of no more than 5% of the annual requested spend amount to Brown & Sons Co for unanticipated requests that may be submitted during the next three years.

Agenda Item Title:
Annual Supply of Brake Parts, Bulbs, Breakers, Sprays and Filters

Prepared By:
Mike Rule

Background/Summary of Proposed Action:
The Fleet Garage is requesting a purchase order for our annual supply of aftermarket vehicle replacement parts. Parts to be purchased include brakes, bulbs, filters, sprays, steering, and suspension related items. These aftermarket parts allow the garage to repair our fleet of vehicles at a lower cost than purchasing OEM components.

RESOLUTION TO ZITO CONSTRUCTION FOR WATERMAIN CUT-IN PROJECT

BY THE CITY ADMINISTRATOR

RESOLUTION

The Finance Department, Purchasing and Supplies Division, solicited a bid in March 2014 for an initial watermain cut-in at the Water Plant and Zito Construction, 8033 Fenton Rd., Grand Blanc, Mi was the sole bidder to submit a bid; and

On March 26, 2014, the Emergency Manager authorized the Proper City Officials to enter into a contract with Zito Construction for said watermain project in an amount not to exceed $676,300.00; and

The Water Plant is requesting the issuance of change order #1 to said contract in order to extend the contract into the current fiscal year (July 1, 2015 – June 30, 2016) and to pay for additional work that was needed to complete the project in an amount not to exceed $19,570.00. Funding will come from the following account: 591-536.100-801.000; and

IT IS RESOLVED, that the Mayor and City Administrator do all things necessary to enter into change order #1 to the contract with Zito Construction to extend the contract into the current fiscal year and pay additional work that was needed to complete the project in an amount not to exceed $19,570.00 for a revised contractual amount of $695,870.00. RESOLUTION TO STANSLEY INDUSTRIES FOR THREE (3) YR. BIOSOLIDS SLUDGE TRANSPORTATION/HAULING SERVICES

BY THE CITY ADMINISTRATOR

RESOLUTION

The Finance Department, Purchases & Supplies Division, has solicited proposals for a three (3) yr. biosolids sludge disposal and waste hauling services agreement for removal of the sludge cake from the Utilities Water Pollution Control Facility's new biosolids loading facility; and

Stansley Indutries, 3793 Silica Road, Sylvania, OH was the lowest responsive proposal for transportation/hauling fees for a three (3) year period from five proposals received. The funding for this request will come from the following account number: 590-550.100-801.500; and

IT IS RESOLVED, that the Mayor and City Administrator are authorized to enter into a three (3) yr. contract with Stansley Industries for biosolids sludge cake transportation/hauling agreement for an FY16 amount of $60,000.00 and pending the adoption of FY17 of $80,000.00 and FY18 budget amount of $85,000.00 for a total award of $225,000.00 (Sewer Fund)

RESOLUTION STAFF REVIEW

September 2, 2015

Agenda Item Title: Biosolids Cake Hauling and Disposal Services

Prepared By: Robert J. Case, WPC Supervisor

Background/Summary of Proposed Action:

WPC is abandoning its multiple hearth incinerators to dispose of sewage sludge, and henceforth will send it to a landfill, as a cost-saving measure. A new Biosolids Loadout Facility under construction will soon enable offsite disposal. Contracts are now needed with a suitable licensed landfill and a trucker to transport and dispose of the cake offsite.

Financial Implications:

A significant reduction in utility and manpower costs will result, and also avoid the need to spend millions to bring the incinerators into compliance with new regulations. Please approve a three year agreement for Sludge Hauling and Disposal for fiscal years 2016, 2017, and 2018. The approved FY2016 budgeted amount is $210,000.00 ($150,000 Landfill, $60,000 Sludge Hauling), future allocations to be determined upon budget adoption. Use account number 590-550.100-801.500.

RESOLUTION TO WASTE MANAGEMENT/VENICE PARK LANDFILL FOR THREE (3) YR. BIOSOLIDS SLUDGE DISPOSAL SERVICES

BY THE CITY ADMINISTRATOR

RESOLUTION

The Finance Department, Purchases & Supplies Division, has solicited proposals for a three (3) yr. biosolids sludge disposal and waste hauling services agreement for removal of the sludge cake from the Utilities Water Pollution Control Facility's new biosolids loading facility; and

Waste Management/Venice Park, 9536 Lennon Road, Lennon, Michigan was the best total cost solution for landfill disposal fees in conjunction with transportation/hauling fees with the city's recommended sludge hauling contractor for a three (3) year period from five proposals received. The funding for this request will come from the following account number: 590-550.100-801.500; and

IT IS RESOLVED, that the Mayor and City Administrator are authorized to enter into a three (3) yr. contract with Waste Management/Venice Park for the disposal of the biosolids sludge cake for an FY16 amount of $150,000.00 and pending the adoption of FY17 and FY18 budget amounts of $200,000.00 each year for a total award of $550,000.00 (Sewer Fund)

SEALED PROPOSAL RECEIVED PURCHASING DEPARTMENT ON AUGUST 3, 2015
FOR THREE (3) YEAR BIOSOLIDS WASTE HAULING & DISPOSAL SERVICES
PROPOSAL #16-525

DISPOSAL SERVICES

VENDOR	Republic - Citizens 2361 W. Grand Blanc Rd. Grand Blanc, MI	*Waste Management 9536 E. Lennon Rd. Lennon, MI	Brent Run 8385 Vienna Rd. Montrose, MI
Yr. 1	$18.00/ton	**$19.00/ton**	$26.93/ton
Yr. 2	$18.00/ton	**$19.79/ton**	$27.86/ton
Yr. 3	$18.00/ton	**$20.61/ton**	$28.83/ton

*An Alternate Proposal from Waste Management was included in its sealed proposal and reviewed. This proposal appears to offer the lowest cost and best value solution for the City. Waste Management offers to accept 11,000 tons per year of biosolids cake at the Venice Park landfill with no tip fee. In exchange, the City WPC Facilities would accept 11,000,000 gallons per year of leachate trucked in from two other landfills owned by Waste Management. As a result of this trade in services, the City will incur no cost landfill biosolid cakes.

Resolution Authorizing Appropriate City of Flint Officials to Do All Things Necessary to Process a Budget Amendment to Transfer $189,301.57 From Fund Balance Into the 202-441.702-801.000 Ledger Account

BY THE CITY ADMINISTRATOR:

EM2332014 authorized the City of Flint to enter into contract with MDOT to perform reconstruction, bridge widening, and bridge replacement work on I-69. In order to comply with the contractual agreement between MDOT and Department of Public Works, it is necessary replace funds liquidated during the year-end closing process and increase the FY16 budget by those remaining funds. Funding remaining on this project is $101,432.82.

EMO742013 authorized the City of Flint to enter into contract with Rowe Professional Services for preliminary and construction engineering services on the MDOT Leith St.-Stewart Ave Bridge project. In order to comply with the contractual agreement between City of Flint, MDOT, and Rowe Professional Services, it is necessary replace funds liquidated during the year-end closing process and increase the FY16 budget by those remaining funds. Funding remaining on this project is $87,868.75.

IT IS RESOLVED, that Department of Public Works' FY16 budget shall be amended with the transfer of $189,301.57 from fund balance to line item 202-441.702-801-000 Professional Services.

RESOLUTION STAFF REVIEW

DATE: October 21, 2015

Agenda Item Title: Budget Amendment

Prepared By: Shawanda Roebuck for Howard Croft, Director of Department of Public Works

Background/Summary of Proposed Action: On April 11, 2014, resolution number EME2332014 was adopted giving the City of Flint authorization to enter into contract # 14-020 with MDOT to perform reconstruction, bridge widening, and bridge replacement work on I-69. The local share of the construction project estimated at $343,000.00, however, the project was not completed in FY15, and the remaining authorized funds were rolled into fund balance. Approval for use of fund balance is needed to comply with contractual terms of the contract.

In addition, on July 13, 2013 resolution number EMO742013 authorized the City of Flint to enter into contract # 15-083 with Rowe Professional Services to provide preliminary and construction engineering services for the MDOT Leith St. -Stewart Ave Bridge project for $137,940.00. The project was not completed in FY14, and the authorized funds were rolled into fund balance. Approval for use of fund balance is needed to comply with contractual terms of the contract.

Financial Implications: MDOT has the authority under Public Act 51 of 1951 to request the Treasurer to withhold the City's MTF payment to secure the City's participation in the I-69 project, as well as being in breach of contract for failure to comply with payment terms of the Leith St.-Stewart Ave Bridge project.

RESOLUTION TO FLEIS & VANDENBRINK FOR PRELIMINARY DESIGN AND ENGINEERING SERVICES FOR FENTON ROAD PRELIMINARY ENGINEERING

BY THE CITY ADMINISTRATOR:

RESOLUTION

The Department of Public Works & Utilities, Transportation Department has solicited a proposal from one of the pre-qualified engineering vendors for the preliminary design and engineering services for the Fenton Road project, and

Fleis & Vandenbrink, 9475 Holly Rd., Suite 201, Grand Blanc, MI submitted a proposal to provide said services to the Fenton Rd. project. The funding for this request will come from the following account number: 202-441.702-801.000; and

IT IS RESOLVED, that the Mayor and City Administrator are authorized to enter into a contract with Fleis & Vandenbrink using TIP funds for the preliminary design and engineering services for the Fenton Road project in the amount not to exceed $156,748.60 (Major Street Fund)

RESOLUTION STAFF REVIEW

Date: October 21, 2015

Agenda Item Title: Resolution to Fleis & Vandenbrink for PE services for Fenton Rd. rehabilitation project

Prepared By: Kathryn Neumann on behalf of Howard Croft

Background/Summary of Proposed Action:

The City of Flint has four pre-qualified engineering firms. Fleis & Vandenbrink was selected to submit a proposal for the Fenton Rd. rehabilitation project.

The Fenton Rd. rehabilitation project will include design in accordance with MDOT standards and specifications and will be completed in accordance with MDOT's Local Agency Program Plan Preparation and 3R Design Guidelines. Proposed work will include reducing Fenton Rd. from four lanes to three lanes, resurfacing the roadway, storm sewer improvements, curb repairs/replacements as needed, joint repairs, structure adjustments, driveway approaches, sidewalk repairs/replacements as needed as well as ADA sidewalk ramps at all controlled intersections.

Financial Implications: The City must expedite the design of the project in order for the project to be submitted to MDOT for review and approval prior to the funding obligation deadline. If the plans are not completed and approved, MDOT cannot obligate federal funds to the project.

Budgeted Expenditure? **Yes** **X** **No** **Please explain if no:**

To: Cline, Richard (Treasury); Hudson, Deanna (TREASURY)
Subject: RE: Materials for November 12th RTAB Meeting

Eric/Deanna,

I started looking at revenue v expenditure document that you'd sent us, and here is my feedback:

FLINT Financial Review – 9/30/15 Budget to Actual

10/29/15

Overall:

- **No cash flow document** - We have not been furnished with a cash flow and projections, so we might be missing some critical information. So far (9/30/15), the cash flow can be inferred to be in OK shape, they have collected $41M for the year, and only have spent $30M in total.
- **Other Grants Fund deficit in amended budget** - There is one item in the budget that is budgeted to be about a $1.9M deficit, in the "Other Grants Fund" fund, I am not sure why this is, my guess is that there are funds from other year's that are being carried over into this one, but I would like to be sure:

2015-16 Amended Budget

Fund Items	Revenues	Expenditure	Net
Fund 101 - General Fund	$51,399,548.00	$51,399,546.00	$2.00
Fund 202 - Major Street Fund	$8,622,714.00	$8,622,713.00	$1.00
Fund 203 - Local Street Fund	$3,637,757.00	$3,637,757.00	$0.00
Fund 205 - Public Safety	$6,181,948.00	$6,181,948.00	$0.00
Fund 207 - Police Fund	$1,323,944.00	$1,323,944.00	$0.00
Fund 208 - Park/Recreation Fund	$406,971.00	$406,971.00	$0.00
Fund 219 - Street Light	$2,824,204.00	$2,824,203.00	$1.00
Fund 226 - Rubbish Collection Fund	$4,829,503.00	$4,829,502.00	$1.00
Fund 265 - Drug Law Enforcement Fund	$172,174.00	$172,174.00	$0.00
Fund 274 - HUD CDBG, ESG, & HOME GRANTS	$8,532,130.00	$8,091,647.00	$440,483.00
Fund 296 - Other Grants Fund	**$5,249,245.00**	**$7,127,170.00**	**-$1,877,925.00**
Fund 402 - Public Improvement Fund	$2,828,967.00	$2,828,967.00	$0.00
Fund 542 - Building Inspection Fund	$1,966,717.00	$1,966,716.00	$1.00
Fund 590 - Sewer Fund	$32,337,768.00	$32,347,768.00	-$10,000.00
Fund 591 - Water Fund	$37,055,802.00	$35,980,087.00	$1,075,715.00
(blank)			
Grand Total	$167,369,392.00	$167,741,113.00	-$371,721.00

Water and Sewer

- **Does not include $ for new deal with DWSD** - This budget and the expenses does not appear to include the $12M revenues or expenditures associated with transferring back to the Detroit Water and Sewerage System
- **Water fund and Sewer fund projecting major deficits, possibly higher than estimated** - In trying to replicate N. Henderson's estimate of an $11M revenue shortfall for the Water fund and the Sewer fund I am not as optimistic. A lot can happen in a month, so this being a month behind might be the cause of the difference of opinion, but as of 9/30/15, they were only collecting about 65% of their "Charges for services rendered". If we project that out for the year, we are looking at a much larger deficit than $11M (p. 13-14):

Revenues	Sum of 2015-16 Adopted Budget	Collected	Projected collection
Fund 590 - Sewer Fund (TOTAL)	**$ 32,337,768.00**	**$ 5,186,513.00**	**$**
Charges for service rendered	**$ 30,434,895.00**	**$ 5,184,142.00**	**$**
Drawings from fund balance	$ 1,091,873.00	$ -	$
Interest and dividend income	$ -	$ -	$
Other revenues	$ 11,000.00	$ 2,371.00	$
Transfers in	$ 800,000.00	$ -	$
Fund 591 - Water Fund (TOTAL)	**$ 37,055,802.00**	**$ 5,547,970.00**	**$**
Charges for service rendered	**$ 36,943,802.00**	**$ 5,475,780.00**	**$**
Drawings from fund balance	$ -	$ -	$
Fines and forfeitures	$ -	$ 416.00	$
Gain on sale of fixed assets	$ 100,000.00	$ 58,400.00	$
Interest and dividend income	$ -	$ -	$
Other revenues	$ 12,000.00	$ 13,374.00	$

officials...they mayor, city council, and others.

Please see the information below and attached for additional background on timing, decision-making, etc.

Discussions about the possible development of a Flint-area/Genesee County water system had been on-going since the early 2000's and the City of Flint had been in discussions about the possibility of joining KWA for much of that time, certainly prior to the appointment of an emergency manager (Mike Brown) in December 2011. The following M-Live articles show the city was looking at a possible move to KWA, which Genesee County strongly supported, well before a manager was appointed.

http://www.mlive.com/news/flint/index.ssf/2010/02/detroit_tells_genesee_county_w.html

http://www.mlive.com/news/flint/index.ssf/2011/01/water_pipeline_vs_flint_river.html

http://www.mlive.com/news/flint/index.ssf/2011/04/city_of_flint_still_mulling_wa.html

http://www.mlive.com/news/flint/index.ssf/2011/09/flint_officials_to_be_presente.html

http://www.mlive.com/news/flint/index.ssf/2011/12/so_far_so_good_genesee_county_1.html

Additionally, The Flint Journal supported the move to KWA in an editorial in Sept. 2011, again, prior to the appointment of a manager.

http://www.mlive.com/opinion/flint/index.ssf/2011/09/our_voice_its_decision_time_fo.html

Prior to the decision to move to KWA, which the Mayor and City Council fully supported (March 2013 Flint Journal story cites 7-1 City Council vote to join KWA); http://blog.mlive.com/newsnow_impact/print.html?entry=/2013/03/flint_city_council_approves_re.html the city's emergency manager (Mike Brown in June 2012; Ed Kurtz in Sept. 2012) twice requested permission from DWSD to blend river water with DWSD water to ensure high quality, safe drinking water for residents, while saving the city an estimated $2-3 million annually (DWSD was proposing a 5x rate increase for the City of Flint).

It is also important to note that the Genesee County Drain Commissioner, who had been heading up the KWA project, ***required*** *that Flint's elected leaders approve of and sign-off on the transition to KWA as he believed it was important to have the city's elected officials make the decision and not an emergency manager (see attached).*

Under PA 436, an emergency manager's approval is required for transactions of $50,000 or more, and thus Ed Kurtz did approve the

eventual move to KWA, again with full support and urging from the Mayor and City Council. Kurtz's letter, detailing that decision after consideration of DWSD's "last, best offer" is attached.

This ***is not*** *a situation where the Mayor and Council wanted to utilize one system with the EM reversing course.* ***All involved*** *in the decision-making process agreed* ***KWA was the best long-term option for the City of Flint.*** *With Flint's decision to go with KWA, DWSD terminated Flint's contract, effective April 17, 2014 (letter attached). Given that termination, Flint had two "options:"*

-sign a long-term (30 year) agreement with DWSD, which was not economically feasible given the city's decision to go with KWA

-Use Flint River as an interim source (it had long been the city's backup) until KWA was on-line

http://www.mlive.com/news/flint/index.ssf/2014/03/flint_drinking_water_to_come_f.html

It is also important to note that the current situation in Flint has been exacerbated by years of neglect and a lack of maintenance to the decades-old system. All this said, the most important issue now is moving things forward, through the collaborative State, City, and Foundation effort to ensure safe drinking water for the residents of Flint.

Subject: Former Flint EMs

Hi Terry, Hope you're well.

We're producing a one hour documentary/podcast on Flint's water issues. Would really love to hear from the former EMs on this. Correct me if I'm wrong, but it seems there wasn't just one guy who decided to switch water sources, but maybe a few different people. Is there any way you can help me get interviews with the former EMs of Flint to talk about the decision and the issues that lead to it? Big ask, I know. But I need help if I'm going to do this right. I'm traveling now, so if you want to chat a bit, call my cell 810.923.5839.

All the best,

This email is to request your consideration for the following person when looking at your options for the Receivership Transition Advisory Board (RTAB):

Brenda Williams
2520 Orchard Lane
Flint, MI 48505
(810) 577-0536

Ms. Williams is highly recommended for the position. She is a local area attorney who will provide a different/legal perspective to the RTAB. She is a former assistant prosecutor with a vast knowledge of the assets and offerings in the Flint Community. Ms. Williams has a fantastic relationship with both profit and non-profit organizations, the faith-based community, and community leaders throughout the area. For your convenience, Ms. Williams resume is attached.

As such, I strongly recommend her for the RTAB vacancy.

Respectfully,

Sheldon A. Neeley

Jerry: good news. The lawsuit *Gerics v Ambrose* was dismissed by the federal court this morning.

Attorney Bill Kim of my office handled this and did a good job.

Have a great weekend.

Pete

UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF MICHIGAN
SOUTHERN DIVISION

ADAM GERICS,

Plaintiff,

v.

JERRY AMBROSE,

Defendant.
_____/

Case No. 15-cv-12992

HONORABLE STEPHEN J. MURPHY, III

ORDER DISMISSING CASE

Plaintiff Adam Gerics filed the present case and claimed that the City of Flint violated the Constitution when it redrew the boundaries of the Carriage Town Historic District. On September 8, the parties stipulated that Gerics would have 14 days to submit a new complaint that conformed to the pleading standards contained in the Federal Rules. ECF No. 6. On September 18, Gerics filed a motion that requested additional time to respond. ECF No. 8. The Court granted the motion and gave Gerics until October 28 to file a new complaint that conformed to the Federal Rules. The order also stated that "[i]f the Court has not received a properly formatted complaint by that date, the Court will dismiss his case with prejudice under Civil Rule 41." ECF No. 10. October 28 has passed and Gerics has yet to file a corrected complaint. Accordingly, Gerics' case is **DISMISSED WITH PREJUDICE**.

SO ORDERED.

s/Stephen J. Murphy, III
STEPHEN J. MURPHY, III
United States District Judge

Dated: October 30, 2015

I hereby certify that a copy of the foregoing document was served upon the parties and/or counsel of record on October 30, 2015, by electronic and/or ordinary mail.

Subject: RE: Materials for November 12th RTAB Meeting

Hello Eric,

Deanna and I just conferenced on this assignment, and we have noticed that we appear to be missing some documents that we assumed would have been included in the materials that you sent over.

1. There doesn't seem to be a cash flow with projections document anywhere
2. City Council Mtg 10/12 – They didn't seem to include documentation for 5 of the City Council's resolutions: Res 150872, 150875, 150876, 150865, 150866

Deanna/Alex:

Attached is a packet from the City of Flint for the upcoming RTAB meeting.

I am not sure if this will be their only submission, however, it is a start.

For this packet, please begin to review the materials and note any thoughts, concerns, or items that need follow-up.

Be prepared to discuss your observations.

If you wish to discuss the "packet analysis" process, let me know.

Paul:

That would not be my interpretation. You did not indicate how Meadowbrook staff reached the conclusion that governmental immunity no longer would apply to Darnell for acts taken by him while at the City of Flint. I will presume that they read § 20(1) of the Act to apply only to an Emergency Manager currently serving in the local government regarding which litigation arises and concluded it would not apply to Darnell since he no longer is Emergency Manager for the City of Flint. That conclusion may appear reasonable if § 20(1) is read in isolation. However, when read as a whole, § 20 is replete with instances where the term "Emergency Manager" refers to past as well as current occupants of that office.

Section 20 was intended to remedy two shortcomings in Act 72: providing legal representation for Emergency Financial Managers while in office and after *leaving* office. Section 20(2) was intended to address the former and § 20(5) to address the latter, which was of particular concern since two former Act 72 Emergency Financial Managers had been subjected to litigation after leaving office.

With one exception, the Attorney General's Office consistently took the position under Act 72 that it would not provide legal representation for Emergency Financial Managers because they were not State officials. Section 20(2) requires such representation, but only if litigation challenges: (a) the validity of the Act, (b) the authority of a State official or officer acting under the Act, or (c) the authority of an Emergency Manager and even then only if he or she was acting within the scope of his or her authority under the Act. If, hypothetically speaking, litigation were to be filed against Darnell for acts taken by him while at the City of Flint, the Attorney General's Office would be obligated to provide legal representation only if such litigation involved (a) or (c); (b) would not apply because Emergency Managers are neither State officials or officers.

As noted above, § 20(5) would address, again hypothetically speaking, litigation filed against Darnell for acts taken by him while at the City of Flint. If not covered by insurance, his litigation-related expenses, actual and *anticipated*, would be assessed against the City of Flint, if approved by the State Treasurer after determining that Darnell's conduct had been within the scope of his authority and occurred on behalf of a local government while it was in receivership. See § 20(5)(a) and (b).

Let me know should you have further questions.

Tom

I spoke to Meadowbrook and they are confident that they can find another carrier for Darnell. There chief concern is that if Darnell is sued for an action taken as Flint EM, PA 436 governmental immunity no longer covers him--Section 20 (4) (5).

Fred is that your interpretation?

Also, insurance will cost approx. $5,000 which, in their opinion, is probably less that it would cost the AG to defend him.

I talked to Darnell who really wants the additional protection and is discussing the matter further with Meadowbrook.

Subject: RE: Professional Liability Insurance

He probably isn't trusting the state to back him up and wants added assurance of liability coverage, which is outlined in Sec. 20(4) of the statute. He also may not feel comfortable having the AG represent him and would again prefer to have the extra insurance coverage [which provide for legal defense if needed]. After reading Sec. 20(5) in the statute, there is reliance that the state treasurer will approve the legal expenses and determine that his actions fell within (5)(a)(b). I can see some possible holes in the statute that would make me feel uncomfortable, especially in light of all the legal threats being thrown his way.

Interesting, but not surprising to hear that the prof liab insurance carrier doesn't want to renew coverage based on all of the negative media coverage. Since I worked at a med mal insurance co. for 10 years, I understand why an underwriter might have a difficult time assessing the risk for this coverage and would prefer to not be exposed to any "potential" risk going forward. Did the state provide coverage for Darnell? I was wondering why they would contact the state versus Darnell. I can also understand why Darnell would want to continue receiving this coverage. I would if I were in his shoes for a number of reasons.

The premiums on this coverage are sure to go up based on the potential risk, and that is if any carrier is willing to take on the risk.

Paul,

For any number of reasons, I want that coverage. I would ask that Meadowbrook identify a carrier. I am also curious as to why they didn't contact me. In any event, they should be asked to pursue this matter despite their concerns about media coverage of an event that clearly I was not liable for.

Hi Darnell

I received an email today from Meadowbrook Insurance that ACE/Westchester gave notice that it will not renew your professional liability coverage. Meadowbrook is concerned that if will be difficult to find a new carrier because of a recent Freep article on Flint Water.

Do you need professional liability coverage? Section 20 of PA 436 provides that EM is immune from liability and that the AG shall defend any civil claim, demand, or lawsuit. As a result, I think you may not need additional coverage. However, before I respond to Meadowbrook, I want to get your thoughts on the matter. My cell is 517 899 1291 thanks

Dayne Walling
Mayor

Natasha L. Henderson
City Administrator

September

- Leak Detection on all 600 miles of the distribution system has started and is over halfway complete. Several dozen leaks have been identified and repairs continue as more leaks are found. This has decreased the amount of water loss existing in the system.
- Construction of a load out facility at our wastewater plant is on target for completion by November and will allow the City to eliminate the use of the incinerator resulting in significant annual savings.
- Over 3500 new water meters have been installed this year creating better accuracy, accountability, and decreasing the number of estimated reads on utility bills.

The report is the last to be issued showing the Flint River as a primary drinking water source and contains information on what temporary issues residents can expect during the change in water source, including hydrant flushing and possible discoloration as the water goes through the system. The report also references the submittal of a plan to the MDEQ for the addition of corrosion control agents to treated water delivered from Detroit.

Recent issues with lead leaching into drinking water as the reason for the switch in water source are mentioned in the report along with information regarding lead safety, free in-home water testing and free filters available to residents. A table containing all of the third quarter "Regulated Detected Contaminants", a feature of every water quality report, appears at the end of the publication.

Residents with questions or concerns about water quality can call the Water Treatment Plant at 810-787-6537 or email flintwater@cityofflint.com. Continuing information on water will be provided via the City of Flint's website, cityofflint.com.

Independent water tests show lead problems far worse than Flint claims

Posted By Curt Guyette on Tue, Sep 1, 2015 at 5 13 pm

Photo courtesy Min Tang and Kelsey Pieper/Virginia Tech

Photo of Flint drinking water pipes showing different kinds of iron corrosion and rust

Claims by state and local officials that Flint's municipal water is safe to drink are being put to the test in a precedent-setting independent study.

So far, those claims are emphatically failing to pass muster.

Researchers from Virginia Tech — working with a group of Flint residents and the ACLU of Michigan — are conducting an extensive analysis of lead and copper levels in water flowing into the homes of Flint's residents.

Initial findings show the problem is roughly twice as bad as the city's tests indicate.

What's been dubbed the Flint Citizen Science Study is still under way, but the early findings have been so disturbing that the Virginia Tech team is posting results on the web in order to alert residents about how extensive the problem may be.

"I think it would have been unethical to not release this information right away," said VT professor Marc Edwards, who is leading the project.

According to U.S. Environmental Protection Agency regulations, the city would be out of compliance if 10 percent of homes tested were above the action level of 15 parts per billion lead. The city says its latest sampling, conducted during the first six months of this year, shows that Flint's water is in compliance with federal regulations, according to documents obtained by the ACLU of Michigan.

That claim is based on tests conducted at 69 homes.

The VT study is looking at nearly four times as many homes. Of the 120 samples analyzed so far, 20 percent have been over the federal action level — twice what it would take for the city to be out of compliance.

"Needless to say, these data are very worrisome," said Edwards. "There are a disturbingly high number of homes with lead levels in a range where water consumption has caused lead poisoning in children and adverse pregnancy outcomes."

Flint Mayor Dayne Walling and the Michigan Department of Environmental Quality both failed to respond to requests to comment on this story.

Edwards said that a study of this type — with residents leading the effort — is unprecedented.

Impetus for the project grew after the ACLU of Michigan in early July disclosed **an internal U.S. Environmental Protection Agency memo** that raised concerns about the water-sampling methodology used by the City of Flint.

One major concern is that the city, operating in accordance with Michigan Department of Environmental Quality protocol, instructs residents to "pre-flush" their water lines prior to testing. Residents are told to run their water for about four minutes in advance of taking a sample, which limits the amount of time water can absorb lead and copper from pipes and fixtures prior to testing. As a result, the amounts of metals that will be found are minimized, and the possibility that worst-case scenarios will be missed is increased.

Miguel Del Toral, a water specialist for the U.S. EPA's Region V, characterized the city's method as the equivalent of finding a "loophole" in the law and exploiting it.

Edwards agreed, contending that "no legitimate scientist" would say that the pre-flushing approach is an acceptable way to test for lead.

He also said that, based on recent tests the VT team conducted, high lead levels were to be expected, in part, because water from the Flint River is so **caustic.**

"At present, as a rough estimate ... it looks like Detroit water is about five times less corrosive to iron pipe than Flint River water. This also probably means that the iron pipes in the city of Flint system will fail five times faster using the Flint River water rather than the Detroit water," according to the VT web site.

While under the control of **a state-appointed emergency manager**, Flint switched from using Detroit water as its source to the Flint River in April 2014, ostensibly as a cost-saving measure. Since then there has been a constant stream of water quality problems, with residents complaining of a variety of health issues and water that's often brown or yellow and frequently foul-smelling.

According to Edwards, Flint's water is at least four times more corrosive than Detroit's, causing infrastructure to break down and lead to be released into the city's drinking water. As a result, his study's disturbing findings are not surprising.

Edwards, a former recipient of a MacArthur Foundation "genius grant" who

discovered widespread problems regarding lead in Washington, D.C.'s water in the early 2000s, applied for an emergency National Science Foundation grant to fund the study currently taking place.

Three hundred sample kits arrived in Flint on Aug. 19. Since then, a team of residents representing such local groups as Concerned Pastors for Social Change, Water You Fighting For?, and the Democracy Defense League — all of which are part of a lawsuit seeking to force the city to return to the Detroit system — has been recruiting volunteers to have their water tested.

As of Tuesday, more than 265 sample kits have been collected and returned to Virginia Tech. The community-driven effort has exceeded all expectations regarding resident participation, said Edwards, who noted that the project would have been considered successful if at least 75 of the kits had been returned for analysis.

"The response shows how concerned the people of Flint are about the quality of their water," Edwards said.

Curt Guyette is an investigative reporter for the ACLU of Michigan. His work, which is funded by a grant from the Ford Foundation, focuses on issues involving emergency management and open government.

dostinep@michigan.gov

Flint – Sept 2 – Mayor Walling, N Henderson, J Freeman, Wendy, R Byrne, E Cline, P Dostine

- Flint sent adjusted water bills out to customers; bill reflects 35% reduction per court order. (So, even if stay is granted, customers will receive at least one newly adjusted bill.) Henderson said financial impact of adjusted rate is approx. $600K per billing period. For the year, projected to be $7M.
- Average water bill reduction for a 5/8" line is $18.00. Flint is still able to bill and collect for water and sewer service charges.
- Class Action Suit. How many homes are affected? Flint officials have assumed the impact is city-wide, some 30,000 customers. The city doesn't know how many past, foreclosed homes are a result of delinquent water bills. Mayor Walling and Henderson said they are trying to determine this number.
- Flint can resume water shut-offs with the new, adjusted bills that just went out.
- Henderson has asked engineers to study the KWA project, to see what is essential, what must remain. The engineers said there are two different scenarios: (1) June Plan, (2) December Plan.
- First KWA bond payment ($6M) is due in Nov-15.
- Results from Quarterly Water Test. TTHM levels tested higher than the average in one part of the city. Levels still within acceptable limit. Flint not required to send out notifications.
- Flint still continuing its meter installation program.
- Flint will be applying for this year's FDCVT grant, $2M, for a property assessment project.
- Watermain Break. The break is under the Flint River. City officials said they cannot fix this in-house, will have to contract it out. Will need RTAB approval. A special meeting may have to be called to address this issue.
- Public safety. Fires are down, but this means the city loses some eligibility for grants. Homicides are still high, approx. 42 so far this year.
- The administrative assistant was hired, brought on, prior to the recent hiring freeze edict.
- Flint officials asked Treasury during the call if there was any assistance available to the city for its suspended CIP.

Fact Sheets

Gentlemen,

Find enclosed 3 items as promised at our meeting of August 26, 2015.

1. Original Fact Sheet
   DWSD vs. KWA: 5/1/12

2. KWA Fact Sheet: 9/1/15

3. DWSD Cost of Water

Should you have any questions, do not hesitate to contact me directly at 810-287-1925.

VIA EMAIL

Revised 5/1/12

Fact Sheet
City of Flint
DWSD versus KWA

Issue: City of Flint joining Karegnondi Water Authority and leaving City of Detroit water system

Fact: Both the City of Flint and City of Detroit operate their water system via enterprise funds. The water fund does not impact either community's general fund. Leaving the water system will not impact the general fund.

Fact: The City of Flint is a suburban customer of Detroit. If Flint leaves, it only impacts the suburban customer rate, not Detroit's.

Fact: Detroit's own plan calls for (latest available estimate) $1.2 billion dollar improvements to supply redundancy to Flint. If Flint leaves, Detroit avoids this construction cost.

Fact: Detroit and DWSD have experienced bond rating decreases in recent months. If Flint leaves, DWSD avoids a new bond issue and eliminates a capital project from its master plan improving its financial outlook.

Fact: Delivering water to Flint from DWSD is expensive. If Flint leaves, DWSD can reduce its operating and maintenance costs to its contracted customers.

Fact: DWSD has a limited capacity for water treatment and delivery. If Flint leaves, the City can resell that volume to other customers.

Fact: DWSD has multiple drinking water treatment plants. Some are more expensive to operate and maintain than others. Without a commitment to Flint, its largest customer other than the City of Detroit, DWSD may choose to discontinue operation of one or more of its current facilities and realize significant cost reductions to the overall system.

Fact: Flint is not part of the DWSD sewer system. The City of Flint leaving has no impact on the sewer system.

Fact: The creation of the KWA system will create over 1,000 construction jobs in Michigan. Design and construction of the system will take 42 months from July 2012 through December 2015.

Fact: KWA is offering a fixed rate for capital to its customers. Flint joining KWA will give the City a stable rate for upwards of 20 years.

Fact: KWA will offer raw water to the region. Raw water is not enhanced with chemicals, which is undesirable to agribusiness.

Fact: The I-69 corridor/I-75 corridor crosses in Flint. Along with CN and CSX and the pipeline aerotropolis, Flint can be a major transportation center for agribusiness. KWA can provide two products for agribusiness: potable and process (raw) water, and wastewater treatment facilities.

Fact: DWSD does not serve the Thumb region. KWA with its partners will be able to serve both the population with its basic needs: drinking water and the businesses with large quantities of process (raw) water.

Fact: DWSD is the only water supplier for over 4 million residents of the state. The creation of the KWA will create a second water supply system thereby reducing the impact of terrorist attacks on water supplies. With a mutual aid agreement between DWSD and KWA, the system could complement each other.

Fact: DWSD does not provide water supply to major portions of the KWA service area. KWA will provide local municipalities in the thumb region with an alternative water supply to the Arsenic impacted well systems.

In addition, local communities can replace groundwater systems with KWA surface water system and thereby improve local groundwater levels.

The KWA system will provide fire protection service to regions currently not served.

Fact: The current DWSD water system has over 20% water loss in its system. KWA's water supply is expected to have less than a 5% water loss. KWA will provide a more effective use of the waters of the state.

Fact: KWA provides redundant water supply to Flint. Currently, DWSD only provides a single source to Flint. KWA provides multiple supply sources to Flint at a fraction of the cost.

Fact: KWA has offered to purchase excess infrastructure from DWSD. If Flint leaves, Detroit has 25 miles of watermain it no longer needs. KWA has offered to purchase the pipeline and enter into a long-term arrangement for purchase of water from DWSD.

Fact: Each incorporating municipality in KWA will pay the same rate for raw water; therefore, each community will set its own treatment standards and exert local control of the cost of water it provides to its citizens.

Fact: Lapeer and Sanilac Counties are facing depletion of their groundwater supplies.

Karegnondi Water Authority (KWA) Fact Sheet

- KWA is incorporated by the State of Michigan, comprised of the City of Flint, City of Lapeer, Genesee County, Lapeer County, and Sanilac County.

- As specified in its Articles of Incorporation, each of these constituent municipalities has one representative to the board – specifically the Mayors or their designees of the 2 cities (Flint and Lapeer), the Drain Commissioners or their designees from each of the counties (Sanilac, Lapeer. and Genesee).

- KWA will deliver raw water to customer utilities.

- Each governmental unit will still own and operate their respective treatment and distribution systems. GCDC will have no jurisdiction over the City of Flint water. Flint will have all franchise rights for sale and treatment of water from KWA within the City of Flint.

- Each community that obligates itself to the debt for construction of the KWA infrastructure pipeline, intake and pump stations, receives commensurate voting membership to the board.

- Flint's debt obligation is based on the volume as selected by the city.

- Additional members are appointed by their respective communities.

- All board members serve without compensation.

- KWA will operate with 5 to 7 full-time equivalent employees. KWA will contract its labor force.

- To date, only the City of Flint and Genesee County have bought capacity in the project.

- Once KWA water is available, each community receiving untreated Lake Huron water from KWA will pay a share of the operating costs, i.e.: electricity, labor, maintenance, and chemicals in proportion to the volume of water they receive.

KAREGNONDI WATER AUTHORITY FINANCING CONTRACT

THIS CONTRACT, dated as of August 1, 2013, by and among the Karegnondi Water Authority, a municipal authority and public body corporate of the State of Michigan (hereinafter referred to as the "Authority"), the City of Flint in the County of Genesee and the County of Genesee (collectively, the "Local Units" and each a "Local Unit").

WITNESSETH:

WHEREAS, the Authority has been incorporated under the provisions of Act No. 233, Public Acts of Michigan, 1955, as amended (hereinafter referred to as "Act 233"), for the purposes set forth in Act 233; and

WHEREAS, the Authority will acquire, construct and operate a water supply system to be known as the Karegnondi Water Supply System that provides untreated water to the Local Units, each of which is a constituent municipality of the Authority; and

WHEREAS, it is immediately necessary and imperative for the public health and welfare of the present and future residents of each of the Local Units that a certain water supply system, as more fully described on Exhibit A hereto, together with all necessary interests in land, appurtenances and attachments thereto (the "System") be acquired, installed and constructed; and

WHEREAS, plans and an estimate of cost of the System have been prepared by the Authority's consulting engineers, Wade Trim (the "Consulting Engineers"), which said estimate of aggregate cost totals an amount not to exceed $300,000,000; and

WHEREAS, each of the Local Units is desirous of having the Authority acquire and own the System in order to continue to operate the System in order to furnish the Local Units with untreated raw water; and

WHEREAS, the parties hereto have determined that the System is essential to the general health, safety and welfare of each of the Local Units; and

WHEREAS, the Authority and each of the Local Units are each agreeable to the execution of this Contract by and among themselves which provides, among other things, for the financing of all or a portion of the cost of the System; and

WHEREAS, this Contract contemplates the issuance of bonds in one or more series by the Authority to pay all or part of the costs of the System; and

WHEREAS, each of the Local Units has or will approve and authorize the execution of this Contract by resolution of its governing body; and

MILLER, CANFIELD, PADDOCK AND STONE, P.L.C.

WHEREAS, each of the Local Units has published or will publish, individually or jointly, a notice of intention to enter into this Contract in a newspaper of general circulation in the territory encompassed by each Local Unit; and

WHEREAS, this Contract will become effective for each Local Unit upon expiration of a period of forty-five (45) days following publication by each Local Unit of its notice of intention without filing of a petition for referendum on the question of its entering into this Contract, or if such referendum election be required, then upon approval by the qualified electors of the Local Unit.

NOW, THEREFORE, IN CONSIDERATION OF THE PREMISES AND THE COVENANTS MADE HEREIN, THE PARTIES HERETO AGREE AS FOLLOWS:

SECTION 1. The Authority and the Local Units hereby approve the acquisition, construction and operation of System, together with all necessary interests in land, appurtenances and attachments thereto.

SECTION 2. Each of the Local Units hereby consents to the use by the Authority and any parties contracting with the Authority of the public streets, alleys, lands and rights-of-way in each Local Unit for the purpose of constructing, operating and maintaining the System including any improvements, enlargements and extensions thereto.

SECTION 3. The System is designed to provide and transport untreated raw water to each of the Local Units and the System is immediately necessary to protect and preserve the public health.

SECTION 4. The Authority and each of the Local Units hereby approve and confirm the plans for the System prepared by the Consulting Engineers and the total estimated cost thereof in the sum of not to exceed $300,000,000. Said cost estimate includes all surveys, plans, specifications, acquisition of property for rights-of-way, physical construction necessary to acquire and construct the System, the acquisition of all materials, machinery and necessary equipment, and all engineering, engineering supervision, administrative, legal and financing expenses necessary in connection with the acquisition and construction of the System and the financing thereof.

SECTION 5. The Authority shall not enter into any final contract or contracts for the acquisition and construction of the System if such contract price or prices will be such as to cause the actual cost thereof to exceed the estimated cost as approved in Section 4 of this Contract unless the Authority has sufficient funds to cover such excess, or, each of the Local Units, by resolution of its respective legislative body, (a) approves said increased total cost, and (b) agrees to pay such excess over the estimated cost, either in cash or by specifically authorizing the maximum principal amount of bonds to be issued, as provided in Sections 9 and 14 of this Contract, to be increased to an amount which will provide sufficient funds to meet said increased cost, and approves a similar increase in the installment obligations of each Local Unit, if any, pledged under the terms of this Contract to the payment of such bonds.

SECTION 6. The System shall be acquired and constructed by the Authority substantially in accordance with the plans and specifications therefor approved by this Contract. All matters relating to engineering plans and specifications, together with the making and letting of final construction contracts, the approval of work and materials thereunder, and construction supervision, shall be in the

MILLER, CANFIELD PADDOCK AND STONE, P.L.C.

control of the Authority. All acquisition of sites and rights-of-way, if any, shall be done by the Authority. Each Local Unit's share of the costs of such acquisition in each Local Unit, if any, shall be paid from the Local Unit's share of bond proceeds and, in addition, any costs incurred by any Local Unit in connection with the acquisition or construction of the System, including, but not limited to, engineering expenses, shall be promptly reimbursed to the Local Unit by the Authority from the proceeds of the Authority's Bonds with the approval of the Authority board.

SECTION 7. The Authority shall operate, maintain and administer the System for and on behalf of the Local Units. The System shall be maintained in good condition and repair. The Authority shall provide insurance as part of its obligation to operate the System. The Authority will furnish reports to the Local Units at periodic intervals corresponding with the reporting periods of the Local Units in detail sufficient to inform the Local Units of the operations of the System and to permit the Local Units to meet their financing requirements hereunder.

SECTION 8. To provide for the construction and financing of the System in accordance with the provisions of Act 233, the Authority shall take the following steps:

(a) The Authority will take steps to adopt a resolution or resolutions providing for the issuance of its bonds in one or more series in the principal amount of not to exceed $300,000,000 (except as otherwise authorized pursuant to Section 5 of this Contract) to finance all or part of the costs of the System. Said bonds shall mature serially or be subject to mandatory sinking fund redemption as authorized by law, and shall be secured by the contractual obligations of each Local Unit in this Contract. After due adoption of the resolution or resolutions , the Authority will take all necessary legal procedures and steps necessary to effectuate the sale or sales and delivery or deliveries of said bonds.

(b) The Authority shall take all steps necessary to take bids for and enter into and execute final acquisition and construction contracts for the acquisition and construction of the System as specified and approved hereinbefore in this Contract, in accordance with the plans and specifications therefor based on the plans as approved by this Contract.

(c) The Authority will require and procure from the contractor or contractors undertaking the actual construction and acquisition of the System necessary and proper bonds to guarantee the performance of the contract or contracts and such labor and material bonds as may be required by law.

(d) The Authority, upon receipt of the proceeds of sale of each series of bonds, will comply with all provisions and requirements provided for in the resolution authorizing the issuance of such series of bonds and this Contract relative to the disposition and use of the proceeds of sale of such series of bonds.

(e) The Authority may temporarily invest any bond proceeds or other funds held by it for the benefit of each Local Unit as permitted by law and investment income shall accrue to and follow the fund producing such income. The Authority shall not, however, invest, reinvest or accumulate any moneys deemed to be proceeds of the bonds pursuant to §148 of the Internal Revenue Code of 1986, as amended, and the applicable regulations thereunder (the "Code"), in such a manner as to cause the bonds to be "arbitrage bonds" within the meaning of Code §

MILLER, CANFIELD PADDOCK AND STONE, P.L.C.

103(b)(2) and §148, or otherwise as may jeopardize the tax status of the bonds.

SECTION 9. Each Local Unit irrevocably covenants and agrees to pay to the Authority its Local Unit share of each series of bonds to be issued by the Authority pursuant to this Contract. The share of each Local Unit shall be determined as set forth on Exhibit B hereto.

The cost of the System to be financed with the issuance of bonds of the Authority in the aggregate principal amount of not to exceed $300,000,000 shall be paid in annual installments on the dates and in the amounts as established in the Authority's bond authorizing resolution.

Each Local Unit covenants that it will make or cause to be made its payments as required by this Contract not less than 3 days prior to the dates on which the Authority is required to make payments on the bonds described herein to the transfer agent for the bonds.

It is understood and agreed that the bonds of the Authority hereinbefore referred to will be issued in anticipation of the above contractual obligation, with principal maturities on the dates established by the Authority corresponding to the principal amount of the installments then coming due, and there shall also be paid in addition to said principal installments, on such dates as shall be determined by the Authority, commencing on such date as determined by the Authority, as accrued interest on the principal amount remaining unpaid, an amount sufficient to pay all interest at an interest rate not to exceed ten percent (10%) per annum, due on the next succeeding interest payment date on the bonds from time to time outstanding.

It is further understood and agreed that the bonds of the Authority may be secured by a debt service reserve fund or funds to provide additional security for the timely payment thereof if the Authority determines, in consultation with its financial advisor, that the provision of such debt service reserve fund or funds is advisable. If the bonds of the Authority are secured by a debt service reserve fund or funds, each Local Unit covenants and agrees to provide for the replenishment of such debt service reserve funds as described in Exhibit B.

From time to time as the Authority is billed by the transfer agent for its services for the bonds, and as other costs and expenses accrue to the Authority from handling of the payments made by the Local Units, or from other actions taken in connection with the System, the Authority shall promptly notify the Local Units of the amount of such paying agent fees and other costs and expenses, and the Local Units shall promptly remit to the Authority sufficient funds to meet such fees and other costs and expenses in the proportions hereinabove provided to the extent sufficient funds are not available to the Authority. Each Local Unit warrants and represents that the amount of its obligations under this Contract, when taken together with other indebtedness of such Local Unit, will not cause its obligations under this Contract to exceed any constitutional, statutory or charter debt limitation applicable to such Local Unit.

The Authority shall, within thirty (30) days after the delivery of each series of the bonds of the Authority hereinbefore referred to, furnish each Local Unit with a complete schedule of installments of principal and interest thereon, and the Authority shall also at least sixty (60) days prior to each principal and/or interest installment due date, advise the Local Units, in writing, of the exact amount of principal and interest installments due on each series of bonds on the next succeeding bond principal and/or interest due date, and payable on the first day of the month immediately preceding, as hereinbefore

MILLER, CANFIELD, PADDOCK AND STONE, P.L.C.

provided. Failure of the Authority to notify the Local Units of any such payment shall not relieve the Local Units of the obligation to make such payment.

If any principal installment or interest installment is not paid when due, the amount not so paid shall be subject to a penalty, in addition to interest, of one percent (1%) thereof for each month or fraction thereof that the same remains unpaid after the due date.

SECTION 10. Each Local Unit states its intention to pay its obligations under this Contract from sources of moneys as are provided by Act 233 and applicable law, including the levy and collection of rates and charges to users of its respective water supply system for operating and maintaining its system provided by each Local Unit to customers in the Local Unit. Nevertheless, pursuant to the authorization contained in Act 233, each Local Unit hereby irrevocably pledges its full faith and credit for the prompt and timely payment of its obligations pledged for bond payments as expressed in this Contract, and, subject to the provisions of the last sentence of this paragraph, shall each year, commencing with the first tax levy after issuance of the bonds by the Authority, levy an ad valorem tax on all the taxable property in the Local Unit in an amount which, taking into consideration estimated delinquencies in tax collections, will be sufficient to pay such obligations under this Contract becoming due before the time of the following year's tax collections. Such annual tax levies shall be subject to applicable constitutional, statutory, and charter tax limitations. Nothing herein contained shall be construed to prevent a Local Unit from using any, or any combination of, the means and methods provided in Section 7 of Act 233, as now or hereafter amended, for the purpose of providing funds to meet its obligations under this Contract, and, if at the time of making the annual tax levy there shall be either other funds on hand earmarked and set aside, or funds provided in the annual budget of the water supply system of the Local Unit, for the payment of the contractual obligations due prior to the next tax collection period, then such annual tax levy may be reduced by such amount.

In the event a Local Unit shall fail for any reason to pay to the Authority at the times specified the amounts required to be paid by the provisions of this Contract, the Authority shall immediately give notice of such default and the amount thereof, to the Treasurer of each Local Unit, the Treasurer of the State of Michigan, and such other officials charged with the disbursement to such Local Unit of funds returned by the State and now or hereafter under Act 233 available for pledge as provided in this Section and in Section 12a of Act 233, and if such default is not corrected within ten (10) days after such notification, the State Treasurer, or other appropriate official charged with disbursement to such Local Unit of the aforesaid funds, is, by these presents, specifically authorized by the Local Unit, to the extent permitted by law, to withhold from the aforesaid funds the maximum amount necessary to cure said deficit and to pay said sums so withheld to the Authority, to apply on the obligations of the Local Unit as herein set forth. Any such moneys so withheld and paid shall be considered to have been paid to the Local Unit within the meaning of the Michigan Constitution and statutes, the purpose of this provision being voluntarily to pledge and authorize the use of said funds owing to the Local Unit to meet any past-due obligations of such Local Unit due under the provisions of this Contract. In addition to the foregoing, the Authority shall have all other rights and remedies provided by law to enforce the obligations of the Local Unit to make its payments in the manner and at the times required by this Contract, including the right of the Authority to direct the Local Unit to make a tax levy to reimburse the Authority for any funds advanced.

SECTION 11. Each Local Unit may pay in advance any of the payments required to be made by this Contract, in which event the Authority shall credit the respective Local Unit with such advance

MILLER, CANFIELD PADDOCK AND STONE, P.L.C.

payment on future due payments to the extent of such advance payment, or use such advances to call bonds without credit to the extent provided in relevant series of bonds.

SECTION 12. Each Local Unit may pay additional moneys over and above any of the payments specified in this Contract, with the written request that such additional funds be used to prepay installments, in which event the Authority shall be obligated to apply and use said moneys for such purpose to the fullest extent possible. Such moneys shall not then be credited as advance payments under the provisions of Section 11 of this Contract.

SECTION 13. It is specifically recognized by each Local Unit that the debt service payments required to be made by each pursuant to the terms of Section 9 of this Contract are to be pledged for and used to pay the principal installments of and interest on with respect to the bonds to be issued by the Authority as provided by this Contract and authorized by law, and each Local Unit covenants and agrees that it will make all required payments to the Authority promptly and at the times herein specified without regard to whether the System is actually completed or placed in operation.

SECTION 14. If the proceeds of the sale of the bonds in one or more series in aggregate amount not to exceed $300,000,000 to be issued by the Authority are for any reason insufficient to complete each Local Unit's share of the cost of the System, subject to each Local Unit's approval required by Section 5 hereof, the Authority shall automatically be authorized to issue additional bonds in an aggregate principal amount sufficient to pay the cost of completing the System and to increase the annual payments required to be made by each Local Unit in an amount so that the total payments required to be made as increased will be sufficient to meet the annual principal and interest requirements on the bonds herein authorized plus the additional bonds to be issued. It is expressly agreed between the parties hereto that the Authority shall issue bonds pursuant to this Contract and each Local Unit shall be committed to retire such amount of bonds as may be necessary to pay each Local Unit's share of the costs of the System whether or not in excess of those presently estimated herein. Any such additional bonds shall comply with the requirements of Act 233 and any increase in the annual payments shall be made in the manner and at the times specified in this Contract. In lieu of such additional bonds, each Local Unit may pay over to the Authority, in cash, sufficient moneys to complete each Local Unit's share of the cost of the System.

SECTION 15. After completion of the System and payment of all costs thereof, any surplus remaining from the proceeds of sale of bonds shall be used by the Authority for either of the following purposes: (a) for improvements or enhancements to the System or for other projects of the Authority undertaken on behalf of the Local Units, subject to approval of the Authority; or (b) credited by the Authority toward the next payments due the Authority by said Local Units hereunder.

SECTION 16. The obligations and undertakings of each of the parties to this Contract shall be conditioned on the successful issuance and sale of the first series of bonds pursuant to Act 233, and if for any reason whatsoever the first series of bonds are not issued and sold within three (3) years from the date of this Contract, this Contract, except for payment of preliminary expenses and ownership of engineering data, shall be considered void and of no force and effect.

SECTION 17. The Authority and each Local Unit each recognize that the owners from time to time of each series of bonds issued by the Authority under the provisions of Act 233 to finance the cost of the System will have contractual rights in this Contract, and it is, therefore, covenanted and agreed by

MILLER, CANFIELD, PADDOCK AND STONE, P.L.C.

the Authority and each Local Unit that so long as any of series of bonds shall remain outstanding and unpaid, the provisions of this Contract shall not be subject to any alteration or revision which would in any manner materially affect either the security of such series of bonds or the prompt payment of principal or interest thereon. Each Local Unit and the Authority each further covenant and agree that each will comply with its respective duties and obligations under the terms of this Contract promptly at the times and in the manner herein set forth, and will not suffer to be done any act which would in any way impair the said bonds, the security therefor, or the prompt payment of principal and interest thereon. It is hereby declared that the terms of this Contract insofar as they pertain to the security of any such bonds shall be deemed to be for the benefit of the owners of said bonds.

SECTION 18. This Contract shall remain in full force and effect from the effective date hereof (as provided in Section 21) until each series bonds issued by the Authority are paid in full, but in any event not to exceed a period of thirty (30) years for each series of bonds. At such time within said 30-year term as any of the series of said bonds are paid, this Contract shall be terminated. In any event, the obligation of each Local Unit to make payments required by this Contract shall be terminated at such time as all of said bonds are paid in full, together with any deficiency or penalty thereon.

SECTION 19. This Contract shall inure to the benefit of and be binding upon the respective parties hereto, their successors and assigns.

SECTION 20. This Contract shall become effective upon (i) approval by the legislative body of each Local Unit, (ii) approval by the Board of the Authority and (iii) due execution by authorized officers of each Local Unit and by the Chairman and Secretary of the Authority.

SECTION 21. This Contract may be executed in several counterparts.

MILLER, CANFIELD PADDOCK AND STONE, P.L.C.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed as of the day and year first above written.

EXHIBIT A

SYSTEM

The Karegnondi Water System is a raw water supply system. It will deliver untreated Lake Huron water 65 miles inland to the population centers of Lapeer and Genesee Counties, including the Cities of Lapeer and Flint, and the County Agency of Genesee County with 17 local municipal systems. The system will also be capable of delivering water along the route to customers in Sanilac and Lapeer County, as well as future customers in Saint Clair County.

The system will consist of a lake intake, two pumping stations, and over 65 miles of large diameter transmission watermain. The system will include fire hydrants, metering stations, reservoirs, and the appurtenances necessary to operate the system efficiently. The lake intake portion of the project and the land where the two pumping stations are located will be acquired, constructed, designed and financed by the County of Genesee and made available for use by the Karegnondi Water System.

All land and required right-of-ways and easements have been acquired.

MILLER, CANFIELD, PADDOCK AND STONE, P.L.C.

EXHIBIT B

LOCAL UNIT ESTIMATED SHARE OF IMPROVEMENT COST

The following is a breakdown of the percent each Local Unit is required to pay of the aggregate debt service, including the obligation to replenish a debt service reserve fund(s), if any, on the Authority's bonds authorized by this Contract:

Local Unit	Bond Issue
County of Genesee	65.8%
City of Flint	34.2%

In the event the City of Flint fails to fulfill its payment obligations under this Contract, the County of Genesee irrevocably covenants and agrees to make such missed payment within 1 day of being notified of the missed payment. Further, the Authority covenants and agrees to undertake all legal action and make use of all remedies available under this Contract to enforce the payment obligations of the City of Flint under this Contract. The Authority also covenants and agrees to undertake all legal action and make use of all remedies available to it under the Raw Water Supply Contract between the Authority and the City of Flint dated as of June 28, 2013 ("Raw Water Supply Contract"), as amended, specifically sections 7.08 and 7.09 of such contract. If the County of Genesee is required to make a payment for the City of Flint under this Contract and the Authority recovers any funds from the pursuit of such remedies described above, the Authority shall reimburse the County of Genesee from such funds for any payments made. To the extent permitted by law, the capacity that the City of Flint acquired in the System pursuant to the Raw Water Supply Contract shall be transferred to the County of Genesee until the City of Flint has repaid the County of Genesee for any additional payments made hereunder. The City of Flint shall also pay a penalty of one percent (1%) thereof for each month or fraction thereof that the same remains unpaid after the due date of the amount paid by the County of Genesee as a result of the failure of the City of Flint to fulfill its payment obligations hereunder. Further, if a Local Unit fails to pay its contractual obligation causing a shortfall and the debt service reserve fund(s) is drawn upon to pay the Authority's bonds, the replenishment of such debt service reserve fund shall be an obligation of the Local Unit that failed to pay, as provided in the resolution authorizing the bonds. Provided, however, if the City of Flint fails to fulfill its debt service reserve fund replenishment obligation, as with other payment obligations under the Contract, the County of Genesee agrees to make such payments.

Additionally, if the Authority sells raw untreated water capacity to other parties, to the extent funds are available from payments received from those parties, each Local Unit shall be credited on each day payment is due hereunder as agreed to by the Authority and the Local Units towards each Local Unit's payment obligations hereunder.

MILLER, CANFIELD, PADDOCK AND STONE, P.L.C.

Executive Summary

1 Introduction

The City of Flint (Flint), the Genesee County Drain Commissioner – Division of Water and Waste Services (GCDC-WWS), and the Greater Lapeer County Utilities Authority (GLCUA) are supplied water from the City of Detroit's Water and Sewerage Department (DWSD). Because of growing concerns regarding the reliability and cost of the DWSD supply, Flint, GCDC-WWS, and GLCUA have considered alternatives for water supply. The first formal study was completed in 1992; the most recent was completed in 2006.

This study considers two alternatives from the 2006 study. One alternative is the continued purchase of water from DWSD; the other alternative is the development of a new water supply from Lake Huron.

Both alternatives include the construction of a new pipeline. DWSD is planning the construction of a new pipeline to Flint to address concerns regarding reliability and capacity. Water rates for either alternative will be increased similarly to recover the capital investment in new facilities.

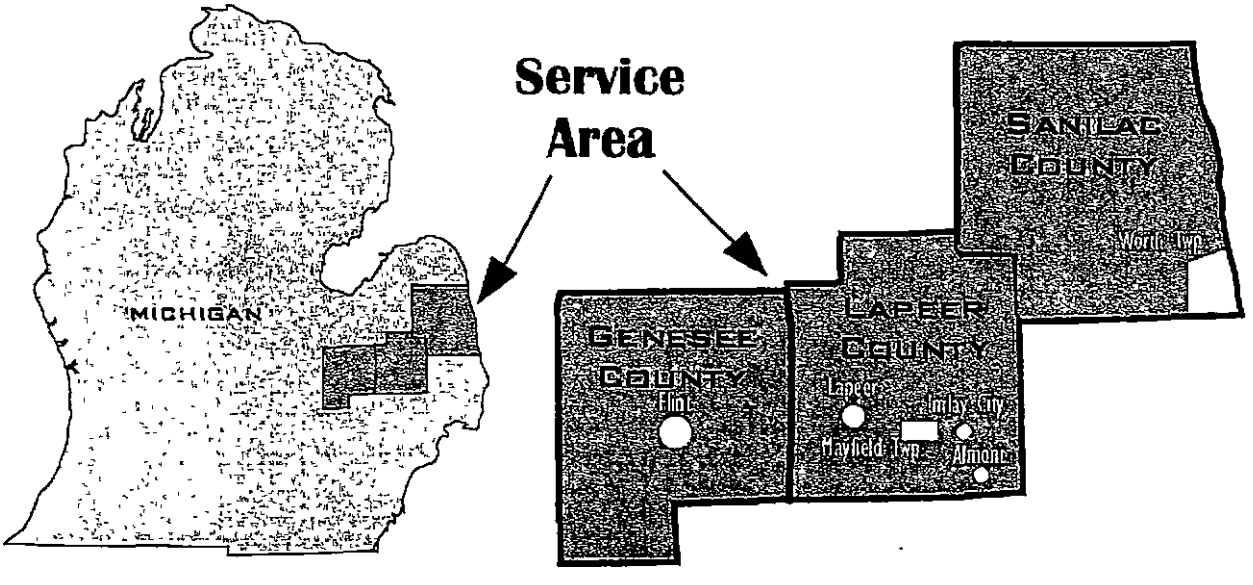
The second alternative, development of a new water supply from Lake Huron, provides the opportunity to supply water to additional communities. Sanilac County has joined Flint, GCDC-WWS, and GLCUA as participants in this study of water supply alternatives.

A new governmental authority, the Karegnondi Water Authority (KWA), is planned to develop and operate the new water supply. The KWA will be comprised of the communities supplied water.

2 Study Area

Figure 1 shows the study area.

Figure 1: Study Area



3 Demands

Table 1 shows the current and future (25 year) demands used for this study. Existing demands are based on records of recent water use; future demands have been developed from information provided by each community.

Table 1: Demands for Planning

	Initial (2014)		25 Year (2039)	
	Avg Day (mgd)	Max Day (mgd)	Avg Day (mgd)	Max Day (mgd)
Genesee County	14 2	25.0	16.2	32.5
City of Flint	16 5	25.0	19 2	28.8
Lapeer County	2.5	3.8	9.0	14.8
Sanilac County	0.1	0 1	0.1	0.1
Total	33.3	53 9	44.5	76.2

4 Alternative 1- Continued Supply by DWSD

Several options for continued DWSD supply to Flint, GCDC-WWS, and GLCUA have been discussed with DWSD representatives; however, there have been no formal negotiations or agreement regarding any particular option. Four options have been evaluated based on these discussions. Analysis indicates that the lowest cost option for continued supply from DWSD is a partnering arrangement with DWSD. This alternative is not available to Sanilac County.

With this option, a 30 year contract with DWSD for water service is required. Flint, GCDC-WWS, and GLCUA will be responsible to construct and operate a portion of the Flint Transmission System (FTS) which DWSD is planning to construct in 2010. By constructing and operating a portion of the FTS; water can be purchased by Flint, GCDC-WWS, and GLCUA at a lower rate.

DWSD estimates the portion of the FTS to be constructed by Flint, GCDC-WWS, and GLCUA at $346,000,000. Operating costs are projected to be $724,000 per year initially. In exchange for responsibility for the construction and operating costs; Flint, GCDC-WWS, and GLCUA will benefit by a 45% reduction in the purchase price of water from DWSD. Table 2 shows the cost of water for this option in 2011-2012, the year in which construction of the FTS is planned to be completed. The current water rate (2009-2010) is shown for comparison.

Table 2: Comparison of DWSD Cost of Water, Now and After Construction of FTS

	Flint & GCDC-WWS ($/MCF)	GLCUA ($/MCF)
DWSD Commodity	$8.70	$9.30
FTS Capital	$15.19	$14.53
Macomb Capital *	$0.00	$0.00
FTS O&M	$0.46	$0.46
Projected 2011-2012 Rate	$24.35	$24.29
2009-2010 Rate	$14.32	$16.11

*Planned for 2024; no cost impact until then

5 Alternative 2 – New Lake Huron Water Supply

The 2006 study evaluated several options for a new water supply. The 2009 update focuses on one of the options, the alternative of delivering raw water from Lake Huron to participating communities for local treatment and distribution.

GCDC-WWS purchased 230 acres of property adjacent to Lake Huron in southern Sanilac County in 2002. An intake to draw water from Lake Huron and a pumping station are planned for this site. Raw water will be pumped through a pipeline to an inland reservoir.

Inland from the reservoir, pipelines supply treatment facilities for Flint, GCDC-WWS, and GLCUA. Treatment facilities for Sanilac County can be located along the pipeline route.

Treatment by microfiltration has been planned for Sanilac County and GLCUA. A new conventional treatment plant is planned for GCDC-WWS. It is planned that raw Lake Huron water is delivered for treatment to Flint's existing treatment plant.

The planned water system provides for twin pipelines, storage, backup equipment and processes to provide a reliable supply. Facilities have been planned with capacity for the 25 year demands shown in Table 1, and provisions for further expansion.

Figure 2 is a schematic showing the new water supply.

Figure 2: Schematic Lake Huron Water Supply

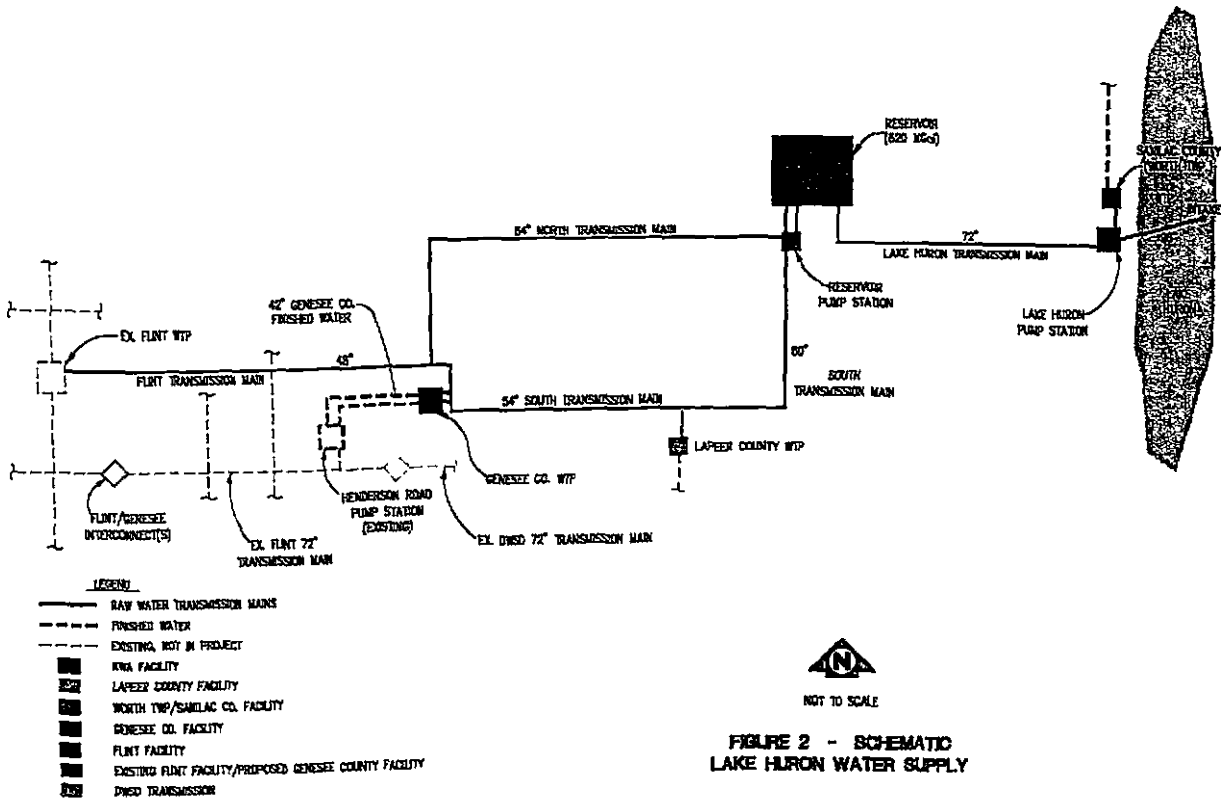


FIGURE 2 - SCHEMATIC
LAKE HURON WATER SUPPLY

Table 3 summarizes the project cost of the new Lake Huron water supply which was studied.

Table 3: Summary of Cost of New Lake Huron Water Supply

Project Component	Total Project Cost	Sanilac Co. Share	Lapeer Co. Share	GCDC-WWS Share	Flint Share
KWA Lake Huron Water Supply	$443,885,767	$813,723	$86,312,736	$188,899,927	$167,859,381
New Sanilac Co. Facilities	$1,849,360	$1,849,360			
New Lapeer Co. Facilities	$40,009,060		$40,009,060		
New Genesee Co. Facilities / Upgrades	$110,038,554			$110,038,554	
New Flint Upgrades	$5,987,030				$5,987,030
Totals	$601,769,771	$2,663,083	$126,321,796	$298,938,481	$173,846,411

Table 4 shows the projected operating costs for the new Lake Huron water supply during the initial year of operation

Table 4: Project Operating Expenses during Initial Year of New Lake Huron Water Supply

Community	KWA ($/MCF)	Local ($/MCF)	New Water Supply Treatment Cost (2014)	2009-2010 DWSD Rate
Sanilac County	$1.30	$41.56	$42.86	N.A.
Lapeer County (GLCUA)	$1.30	$3.11	$4.41	$16.10
GCDC-WWS	$1.30	$2.86	$4.16	$14.32
City of Flint	$1.30	$4.13	$5.43	$14.32

Notes
1. New water supply costs based on projected annual consumption of each community in year 2014.
2. Costs do not include debt retirement or depreciation expense.

6 Comparison of Alternatives

With the investments in facilities planned by DWSD, either of the alternatives considered are believed to provide a reliable, long-term water supply with sufficient capacity for the needs of the study area. Regardless of the alternative selected, a new pipeline and other facilities are planned for construction. As a result, the cost of water will increase with either alternative.

Figure 3 shows the projected cost of water for each alternative. For demonstration purposes, the cost of water for the new Lake Huron water supply alternative does not include the cost of repayment of debt incurred for its construction. The graph shows that without the debt of constructing the new system (or once the debt for its construction is repaid), the cost of water from the new supply will be substantially less than continuing to purchase water from DWSD.

October 2012 Preliminary Engineering Report Update
Final Report

October 4, 2012

DRAFT

42

ROWE PROFESSIONAL SERVICES COMPANY
540 S. Saginaw Street Suite 200 P.O. Box 3748 Flint, MI 48502

20.1 Introduction

The September 2009 Preliminary Engineering Report – Lake Huron Water Supply (2009 Study) compared alternatives for a new regional water supply. Since the 2009 Study, Genesee County and the City of Flint have continued planning and confirmed the capacities to be provided for each. This memorandum updates the capital costs for the proposed new water supply based on the confirmed capacities.

20.2 KWA Water Supply

Ongoing planning has resulted in modifications to the preliminary design developed in the 2009 Study. This cost update is based on the modified preliminary design. For this update, the KWA water supply is assumed to include the following primary components:

- Water Supply Intake
- Lake Huron Pumping Station (LHPS)
- Transmission Mains (Segment 1, Segment 2, and Flint Segment)
- Intermediate Pumping Station (IPS)

It is assumed that the new KWA supply will deliver raw water to a new WTP constructed and operated by Genesee County in western Lapeer County and to the City of Flint's existing WTP. Construction of the new GCDC-WWS WTP and needed upgrades to the Flint WTP will be the responsibility of each agency and these costs are not included in KWA costs.

20.3 Economics

Costs are based on the following criteria:

- Assume construction occurs in 2013 through 2015
- Assume construction is financed by 25 year bonds at a rate of 5%
- Assume engineering, legal, administration, and contingencies are 25% of construction cost
- Adjust construction costs to the current Engineering News-Record Construction Cost Index (ENR CCI) which in August 2012 had a value of 9351

Costs for pump stations and the intake have been updated based on the current design concepts. New material costs for pipe have been obtained from pipe suppliers. Pipe sizes and lengths are revised from the 2009 Study based on providing service only to GCDC-WWS and the City of Flint.

20.4 Capacities

This update is based on providing the following Maximum Day Demands:

GCDC-WWS:	42 mgd
City of Flint:	18 mgd
Total:	60 mgd

Maximum day demands include WTP process water.

20.5 Design Criteria

Based on current market conditions, it is assumed that ductile iron pipe will be used for pipe sizes smaller than 48" diameter and that pipe having a diameter of 48" or more is steel pipe. Pipe is designed assuming a Hazen Williams coefficient of 120 and a maximum operating pressure of 200 psi.

20.6 Reliability

It is assumed that the KWA will provide only the primary raw water supply to each agency's WTP. GCDC-WWS and the City of Flint will each be responsible for their backup water supply for reliability.

20.7 Water Supply Details

Following is a summary of the primary components of the planned KWA water supply. Revised construction costs are based on the following assumptions regarding the planned water supply.

- *78" diameter intake pipeline, extending about one mile into Lake Huron* – Two timber crib intakes are provided each having a capacity of 60 mgd and located in 25 deep water. The intake pipeline has provisions for extension and designed for a capacity of 85 mgd. Both intakes are provided with chemical feed provisions to control zebra mussels.
- *Lake Huron Pump Station (LHPS)* – Four 14,000 gpm vertical turbine pumps with constant speed motors are planned. Pumps will draw from one of two clear wells, each provided with separate screens. No backup power is planned for the pumps; a redundant power supply from the utility is planned to maintain lights and controls in the event of loss of the primary power supply.
- *Transmission Main Segment 1* – 121,000 lf 60' pipeline will convey water from the LHPS to the Intermediate Pumping Station (IPS) reservoir, located midway between Lake Huron and a new water treatment plant (WTP).
- *Intermediate Pumping Station (IPS)* – The IPS is assumed to provide four 14,000 gpm constant speed horizontal split case pumps to pump water from the IPS reservoir to the GCDC-WWS WTP. The IPS reservoir is planned to be an open top, 5 million gallon ground storage tank. The reservoir will allow for balancing of variations in the pumping rates between the two pump stations. No backup power is planned for pumping. A generator is planned to provide lights and maintain controls in the event of loss of power from the utility company.
- *Transmission Main Segment 2* – The IPS will pump water to the GCDC-WWS WTP through 148,000 lf of 60" pipeline.
- *Transmission Main Flint Segment* – 96,000 Lf of 36" transmission main will be provided to convey water past the GCDC-WWS WTP to the City of Flint's existing WTP.

20.8 Project Cost

The updated project cost for the proposed water supply is $272,000,000. Figure 1 provides a summary of the costs. Annual principal and interest payments for the project are estimated to be $19,300,000 for a total of $483,000,000 over the life of the 25 year bond period. The annual unit cost is estimated to be $322,000 per each 1 mgd of total capacity.

Figure 1 - KWA Water Supply Project Cost

	Unit Cost	Quantity	Total
Intake			
Timber Crib	$1,050,000 Each	2 Each	$2,100,000
Intake Pipe - Marine Construction	$2,120 / LF	5,655 LF	$11,988,600

Gentlemen... in the attached (which you have likely seen before) is a description of the cost to reconnect to DWSD. I assume/hope no one is still seriously considering that option but if you need anything more give us a call.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Gerald Ambrose
Emergency Manager

TO: Wayne Workman, Deputy Treasurer
Treasury Department
State of Michigan

FROM: Jerry Ambrose, Emergency Manager
City of Flint

DATE: March 3, 2015

As the Emergency Manager for the City of Flint, I am charged with restoring the City government to financial solvency, and working to assure that the City moves forward on a financially sustainable basis. The steps taken over the past three years have been difficult. Taxes and fees have been raised, services and workforce reduced, and ongoing costs, including legacy costs, have been constrained.

The current controversy surrounding the provision of water, and the path for resolution, has a potentially significant impact on the progress that is being made. I am satisfied that the water provided to Flint users today is within all MDEQ and EPA guidelines, as evidenced by the most recent water quality results conducted for MDEQ. We have a continuing commitment to maintain water safety and to improve water quality, and have dedicated resources to assure this commitment will be made.

The oft-repeated suggestion that the City should return to DWSD, even for a short period of time, would, in my judgment, have extremely negative financial consequences to the water system, and consequently to the rate payers. By the most conservative estimates, such a move would increase costs by at least $12 million annually, with that amount achieved only by eliminating virtually all budgeted improvements in the system. For a system with Unrestricted Assets of only $740,745, according to the June 30, 2014 audited financial statements, the only recourse within the City's control would be to increase revenues significantly. And in my judgment, that would come from raising rates for water by 30% or more . Further, changing the *source* of the city's water would not necessarily change any of the *aesthetics* of the water, including odor and discoloration, since those appear to be directly related to the aging pipes and other infrastructure that carry water from the treatment facility to our customers.

This direction of discussion also deviates from what, in my judgment, should be the focus: How can we not only operate and maintain a system to assure the delivery of safe and quality water dependably, but significantly reduce the cost of water and sewer to the users? At an average of $149 per month for water and sewer service for a residential user, the cost is extremely high in comparison to surrounding areas, as well as most areas across the state, and creates a significant financial burden for many users. In my judgment, we should all be concentrating on how to reduce rates by 50% or more. Unfortunately, there are no easy or evident answers, and continuation of the status will be an impediment to the sustainable recovery of the City of Flint. It is a conversation that I expect we will have with the recently created Water Quality Advisory Committee.

My reasoning for this conclusion is as follows:

One of the decisions made in the context of beginning to eliminate deficits and to restore financial stability to the City of Flint was to increase water and sewer rates significantly – the only choice available to financially stabilize a system that as of June 30, 2012, had a deficit of $8,758,091. Another was to leave DWDS for the KWA because it offered the opportunity to lower future rate increases. A third decision was to utilize the Flint River on an interim basis when DWSD unilaterally terminated the City's contract for water purchase. That decision was made because it also offered an immediate cost savings opportunity which translated into the ability to upgrade the Water Treatment Plant without having to seek financing. It was a reasonable decision because of our experience in using the river in a back-up capacity, including test runs on a quarterly basis for several decades.

Unfortunately, the switch to the river as a primary source was more challenging than anticipated, and the harsh winter of 2013-2014 resulted in much more damage to the aging water infrastructure than in previous years. The result was the issuance of required notices that water exceeded established guidelines for safety as it could affect certain vulnerable populations, and some users of the system experienced unpleasant odors and discoloration. Some users also appeared to have had some negative reactions to the new source of water. However, as soon as the test results were known, City staff took immediate actions to address the concerns. These actions are evidenced today by the fact that MDEQ has certified that our most recent testing shows water from all testing sites to be well within acceptable guidelines. Additionally, the City is continuing to taking the necessary actions to assure that the water supply remains safe and that water quality continues to improve.

As the City has moved to address the situation, the suggestion continues to be made that the City should re-engage with DWSD and purchase water at least until the KWA pipeline is supplying water. As evidenced by the most recent letter from DWSD, such a decision would immediately increase the City's cost by $846,700 per month, or $10,160,400 per year, just for the fixed cost portion of the price. The actual *purchase* of water would be an additional fee, and dependent upon

the quantity purchased. We estimate the actual water purchase cost to average more than $1 million per month, for a grand total of approximately $22 million per year. Finally, the DWSD offer is conditioned upon the City (or presumably the KWA) agreeing to negotiate a long term contract (30 years) for back-up.

The $22 million annual estimate of increased costs to purchase water from DWSD would be minimally offset by an approximate $3 million in reduced operating costs, and could be further offset by an additional $9 million, but only if all funding for capital improvements to the system are eliminated. To eliminate all funding dedicated to repairing, stabilizing, and improving the system would be totally irresponsible and would have long term negative consequences to the City and to future rate payers.

As you are aware we have recently brought in outside expert assistance to evaluate the steps we have taken to assure that the water is safe and to continue to improve water quality. We are expecting specific recommendations within the next few weeks, and are committed to implementing those recommendations in a timely manner. Many steps have already been taken. I am confident that implementing their recommendations will assure a continuing supply of safe water as well as improved quality, and at far less cost than re-engaging DWSD.

We have also created a 40-member Water Advisory Committee and a 13-member Technical Advisory Committee to assure two-way communication with the public and users of the system. Those committees will begin to meet this week, and we look forward to answering their questions and receiving their input.

It is unfortunate that problems and concerns with quality have arisen, and we are working every day to address the issues that caused them. Maintaining safe water and improving quality is a top priority as we work to make the City of Flint an attractive place to live, work, study, and play.

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: City of Flint Water Rates

Attached and below is information regarding the increase in water and sewer rates for the City of Flint since 2010.

- The data shows the significant deficit position of the water fund which was not rectified until 2013 when water rates were increased by 26%. The data also shows the lack of capital investment for a system as old as Flint.

- This condition is acknowledged in the City's recently adopted Capital Improvements Plan which identified approximately $50M in needed capital improvements over the next several years. This deficiency was also noted in the rate study commissioned by the City of Flint in 2014.

- According to the City, if Flint reconnected to DWSD for the next 18 months, the estimated monthly cost would be more than $1M per month totaling approximately $18M. This includes a fixed monthly charge of $846,700 plus the cost of actual water usage, minus the cost of operational expenditures at the Water Treatment Plant. Even with the elimination of future capital improvements, most of the additional cost would need to be funded with an additional increase to existing rates. Such an increase could approach 30%.

- The option of purchasing DWSD water from the County would be on parity with purchasing water directly from DWSD.

- The KWA previously advised the City that the connection to KWA may take place in mid-2016, but has now stated that weather conditions permitting, the connection could be made as early as December 2015.

- The $8M capital costs to upgrade the Water Treatment Plant was made to be able to treat both river water and KWA water. This upgrade has been funded with the cost reduction in operating costs achieved by not buying water from DWSD during the interim period.

- As you are aware, the City has retained Veolia as an outside water consultant to assist in maintaining the safety and improving the quality of water produced by its water system, and their initial analysis is due to be completed within the next two weeks. In addition, the City's current budget includes $2M for replacement of a 2-mile pipeline segment that is anticipated to significantly address some of the current water issues.

Average monthly bill in 2015 - note that water and sewer are not billed separately; the charges are included within the same bill regardless of water usage.

Water service charge	$22.90
Sewer service charge	$34.48
Total service charge	$57.38
Per unit rate:	
Water	$ 7.92
Sewer	$ 5.17
Total per unit	$13.09

Average family of four uses 7 units per month.
Their bill for usage would be: 7 x 13.09 = 91.63 + 57.38 service charge = $149.

If additional information is desired, please let me know.

City of Flint Water Rate History

Year (Date Effective)	Average Monthly Water/Sewer Bill*	Percentage Change in Water/Sewer Rates	Water Fund** Total Operating Revenue	Water Fund** Unrestricted Net Position	Water Fund** Capital Improvements
2010	$64	12%	$31,956,754	-$5,795,973	$2,091,160
1/15/2011	$82	29%	$36,762,663	-$12,443,265	$1,403,916
9/16/2011	$111	35%			
7/1/2012	$111	26%	$44,834,439	-$8,758,091	$755,681
2013	$140	0%	$49,903,868	$834,447	$147,462
07/01/13 to 06/30/14	$140	0%	$43,552,152	$760,745	$3,301,700
07/01/14 to 06/30/15	$149***	6%	N/A	N/A	N/A

Note* Water rate information is based on average usage of 7 units per month with a 5/8" residential remote meter.

Note** Water fund information was compiled from the City of Flint's CAFR filed with the Michigan Department of Treasury.

Note*** Billing breakdown contained in attached memo.

Subject: PRESS RELEASE: MDEQ Testing of City of Flint Water Shows TTHM Levels are Well Below the Required Action Level, City No Longer in Violation

For Immediate Release

MDEQ Testing of City of Flint Water Shows TTHM Levels are Well Below the Required Action Level, City No Longer in Violation

Flint, Michigan – September 3, 2015 – The City of Flint has made significant improvements to its water treatment process and distribution system. Annual average results show all locations are within acceptable limits for total trihalomethanes (TTHM) and work continues to ensure that the average stays below the acceptable level. Flint's TTHM levels have now been below the actionable level for four consecutive quarters, long enough to bring the City out of violation with the Safe Water Drinking Act.

Installation of the Granulated Activated Carbon filter mediums in July has had a significant impact on the reduction of total organic carbon (TOC) and is expected to continue to do so. TOC contact with chlorine can lead to the creation of the chemical byproduct trihalomethanes. By reducing the amount of TOC in the treated water, the amount of TTHM in the water fell as a direct result.

"The City of Flint is continuing to improve its water system including both the areas of treatment and distribution," said Mayor Dayne Walling. "As the issue of trihalomethanes comes under control and the City is no longer in violation of safety standards, it will work with the MDEQ on implementing water optimization

measures to reduce the corrosive effects of water on older pipes and home service lines." Older pipes and service lines can contain lead solder which can leach into the water over time.

Flint has been looking at the water optimization option for some time and is now looking at taking accelerated steps toward implementation. According to the MDEQ, a typical water optimization plan can take up to five years to complete, as in the case of the Detroit Water and Sewerage Department. The City of Flint plans to have its water optimization measures in place by the beginning of 2016. This measure, combined with the ongoing improvements to the distribution system wherever possible, will improve water quality and extend the performance of the City's aging infrastructure.

"The City of Flint has been in constant communication with the MDEQ in our continuing efforts to upgrade and improve our water system," said Director of Public Works Howard Croft. "We have received assurances from them that every step we have taken has been in line with their recommended actions. The City will continue to work to ensure safe, quality water to its residents, businesses and visitors."

The City of Flint will continue to provide updates on its water progress through its website, cityofflint.com. Anyone with water issues is encouraged to call 810-766-7202 so that they can be addressed. Residents wishing to receive a free and independent in-home water test can call 810-787-6537 or email flintwater@cityofflint.com.

Weekly Conference Call Notes – Sept. 7, 2015

Allen Park –August 28 – Mayor Matakas, B. Cady, M. Kibby, R. Byrne, E. Cline, P. Dostine

- **Priorities**
  - Construction on Park Street is moving along.
  - The City's new app, Click It & Fix, is popular with the residents.
  - City to recommend vendor who will update Master Plan to Council.
  - City to recommend vendor who will produce overview/audit of City to ouncil.
  - The MML is progressing on its review of AP's personnel, job reclassifications, and salary survey.
- **Order 54**
  - Brownfield issue. Treasury's Brownfield expert reviewing paperwork. When completed, a conference call will be scheduled with AP to discuss.
- **Order 55**
  - Searching for vendor to do appraisal and survey of the property.
- **Fire Contract**
  - No change. Still two outstanding issues: duty-disability; voting member on pension from fire. Talks to resume Sept. 14.
- **SAFER Grant**
  - Update. This grant is retaining 6 firefighters, not hiring new.
- **Bond Tender**
  - $195K issued as insured. BOA is assuming this piece of the tender.
  - The tender is out until Sept. 16.
- **Prescription Drug Coverage/Healthcare for Under 65, Actives & Over 65**
  - Over 65 switched to Humana, savings of $176K
  - The change to Catamaran drug coverage saved $143K.
  - Under 65 & actives are staying with BCBS. Cady said the overall net increase for the healthcare and prescription drug for the under 65 and actives is $211K.
  - AP must now pay the arrearage fee ($505K, was reduced from $850K) to BCBS over 4 years.
  - Treasury has requested a comprehensive breakdown of this healthcare and drug coverage provider change for the over 65, under 65 and actives.
- **CM Search**
  - All candidates have been interviewed.
  - Treasury asked to be included if candidates appear before council for interviews.
- **F.O. Directive: Quarterly Litigation Report**
  - AP checking on status of reports. Should have been part of the packets. Treasury has not received.
  - A litigation report was emailed after the telephone call today.
- **Elevator**
  - Should be completed today.

Benton Harbor –August 27 – D. Watson, R. Byrne, P. Dostine, R. Widigan

- **Weekly Priorities:**
  - **FLSA Claim:** Checks have been cut for the settlement.
  - There is a new FLSA claim for $25K against the City and Darwin. The individual does not have a solid case at the moment.
  - Audit prep is going well, looking at $140K surplus.
- **Lange, O'Brien/Unruh Lawsuit:** No new information regarding O'Brien/Unruh. Offer to settle all three is $1.8M.
  - Bob Callahan said that Lange wants $595K to settle.
  - Darwin will have a conference call with the attorneys to develop a response to that settlement request.
  - The insurance company has not stated how much they would contribute to just the Lange case.
- **Update on Vacant Positions:**
  - MML proposal is complete and will be sent to Treasury for review (for the head hunting firm).
  - Marja Winters will be working with the City three days a week and will help the City find a new community and economic director/assistant city manager.
    - Posting/job description will be sent out Monday or Tuesday next week.
  - **Assessor position**: Individual is interested, however, they would like to have an assessing assistant.
    - The contract gives 6 months of severance pay when the contract is terminated. The City attorney is reviewing the contract to see if the City still needs to pay it if the assessor is the one leaving.
  - Darwin has a phone call with Al Mooney tomorrow – Al is looking to do more part time.
  - **DPW**: City is filling one position, gearing up for the winter.
- **Status of FDCVT Grant Applications:**
  - Darwin is resubmitting some of the projects from LY as well as additional projects that they are getting cost estimates to submit in new projects.
  - Should be submitted mid-September.

Ecorse – August 25 – W. O'Neal, T. Sadowski, J. Pepperman, R. Byrne, P. Dostine, C. Porubsky

Priorities:

Waiting to hear from Treasury on five-year budget, would like feedback. Randy: does the budget reflect the consolidation with River Rouge? Current fiscal year doesn't show anything, didn't budget for savings. Transferred salaries to professional services. Has some time to show savings. Has leeway in PA 33.

Spoke with RR yesterday, have to put contract on hold. Things are heating up. If the deal does not go thru, all Ecorse FF will be reduced to part-time. Would help with savings needed to balance five-year. Current salaries are around $850-900K, thinks this would cut roughly in half.

Would pay RR around $400K. Would like to have shared command with the agency to cut down on overtime costs. Their Public Safety gets a bonus, Ecorse has not had a raise in twelve years.

Tim's first day was yesterday. John and Tim will work together this week. John has volunteered to be on call.

DPW Superintendent resigned last week. Will be brought to the RTAB next month. **This position was being paid salary plus overtime.** Has been here around two years, Wayne thinks he is overwhelmed administratively. Wayne is thinking of moving current employee into vacant treasury position and give an applicant that has water/sewer billing experience the position of DPW Administration Assistant. Wayne stated the bills are going out on time; has some problems to address regarding fraud, etc.

OPEB Benefit Audit is also on the radar, Wayne is going to look at. Has to look at what a couple people are paying for healthcare and ensure it is the correct amount. Pre-65 do not have healthcare anymore, only ones grandfathered in (approximately ½ dozen or more). Wayne has met with MERS multiple occasion. 7.75 rate of return, Wayne was using 8. Need to recalculate.

Prax Air: Got a call from Livese at Prax Air and stated there are things that need to be changed in the resolutions to comply with law. Getting prep work ready, conducting pre-construction meetings, etc.

Council voted to receive and file letter from Wayne Workman.

Flint – Sept 2 – Mayor Walling, N Henderson, J Freeman, Wendy, R Byrne, E Cline, P Dostine

- Flint sent adjusted water bills out to customers; bill reflects 35% reduction per court order. (So, even if stay is granted, customers will receive at least one newly adjusted bill.) Henderson said financial impact of adjusted rate is approx. $600K per billing period. For the year, projected to be $7M.
- Average water bill reduction for a 5/8" line is $18.00. Flint is still able to bill and collect for water and sewer service charges.
- Class Action Suit. How many homes are affected? Flint officials have assumed the impact is city-wide, some 30,000 customers. The city doesn't know how many past, foreclosed homes are a result of delinquent water bills. Mayor Walling and Henderson said they are trying to determine this number.
- Flint can resume water shut-offs with the new, adjusted bills that just went out.
- Henderson has asked engineers to study the KWA project, to see what is essential, what must remain. The engineers said there are two different scenarios: (1) June Plan, (2) December Plan.
- First KWA bond payment ($6M) is due in Nov-15.

- Results from Quarterly Water Test. TTHM levels tested higher than the average in one part of the city. Levels still within acceptable limit. Flint not required to send out notifications.
- Flint still continuing its meter installation program.
- Flint will be applying for this year's FDCVT grant, $2M, for a property assessment project.
- Watermain Break. The break is under the Flint River. City officials said they cannot fix this in-house, will have to contract it out. Will need RTAB approval. A special meeting may have to be called to address this issue.
- Public safety. Fires are down, but this means the city loses some eligibility for grants. Homicides are still high, approx. 42 so far this year.
- The administrative assistant was hired, brought on, prior to the recent hiring freeze edict.
- Flint officials asked Treasury during the call if there was any assistance available to the city for its suspended CIP.

Hamtramck – August 27 – K. Powell, R. Byrne, P. Dostine, D. Van de Grift

- **Priorities**
  - Processing paperwork for the bond sale (closing in Sept.), and infrastructure project. Anticipated cost is $6.5M.
  - Put out to bid for vendor to perform City audit.
  - Hired an auditor for the housing discrimination fund.
  - Taking the snow removal responsibilities in-house this season, expected to save the City money. DPW began prepping for the winter season.
  - Bidding out the landscaping contract, Katrina said the current cost is too high.
  - Also bidding out contract to do sewer work and repair.
  - Meeting scheduled with Wayne County Executive and Sheriff regarding jail services.
- **Police Overtime**
  - Last month's bill was $60K. Katrina noted that revenues of $96K were generated as a result. Fireworks and a movie night at the school contributed to the $60K overtime figure.
  - Overtime language is in police contract in eight hour shifts. This will need to change in the next contract.
  - Katrina will ask court to break out traffic revenues from forfeiture revenues.
  - The Police Chief is in the process of hiring part-time officers and a dispatcher so higher paid staff will not have to dispatch.
  - Police Study: No progress. Treasury recommends looking at ICMA .
- **Library**
  - A library study is needed. Last fiscal year, the library finished with an $80K deficit. The City bailed them out. According to Katrina, the library has important role in the community and acts as community center in many ways.

- **HR Update**
    - Recently, the City Treasurer's actions resulted in an overdrawn account. The Finance Director sent a memo documenting the error.

Inkster – August 13 – M. Stuhldreher, R. Byrne, P. Dostine, C. Porubsky

- **Priorities/Misc.:**
    - DOJ employee came in to facilitate community group (resulted from Dent situation).
    - Richard Marsh is transitioning; Mark is getting used to new position/role.
    - Meeting with MSHDA on Monday; Mark will be in attendance.
    - Discussion will take place Monday at the Council meeting regarding Mark's role as Interim City Manager.
    - Final billing for search has been processed.
    - Police training is needed, but it is hard to send as they are short-staffed. Randy suggested contacting Capt. Yes.
    - TIFA is declining; Mark will have to get money from GF. Debt was issued in 2010 and has about 20 years left. This was in the long-term forecast and is not a surprise. Initial projections were at 4-5%, actual rate of decline was 8-9%.
- **Police Chief:**
    - Started Monday. Interim Chief Thomas is completely separated from the agency now, but the two were able to spend some time together.
    - To Mark's knowledge, the Chief has not met Captain Yesh yet, but has met some MSP members, include Lt. Shaw.
    - Mark stated that the new Chief is straightforward, about business, articulate, and has good people skills. Expects that the community will embrace him.
    - Randy would like to meet the new Chief and see the building.
- **Chargebacks:**
    - Came back lower than budgeted.
    - $300K positive variance on GF, $100K negative on Sewer; everything together is $213K positive variance.

Lincoln Park – July 29 – B. Coulter, P. Dostine, D. Van de Grift

- **FAC & Wayne County Future Road Projects:**
    - Brad and the DPW Director will begin attending these meetings.
- **New City Manager:**
    - Mr. Coppler will start October 1. Brad has started forwarding informational emails to begin the acclimation process.
- **Five-Year Plan/90-Day Plan:**
    - Both will be submitted soon; the five-year is nearly complete.
    - Projected fund balance this year is $100K, $500K-$700K for next year, and $400K-$500K the year after.
    - If the projected fund balances don't materialize, there are areas that can be modified to reduce expenses. The fire contract allows for modification, first responders could be

eliminated, FTEs could be reduced from 18, police shifts could be shortened, and could begin charging for HazMat cleanups.
  - Healthcare costs were decreased by $600K this year.
  - If pension payments cannot be made, a judgement levy should be considered.
- **Order Concerning the New City Manager:**
  - Brad will add language to the Final Order detailing the City Manager's authority.
- **Rental & Vacant Property Ordinances:**
  - Two ordinances, will help to control/monitor the number of rental/vacant properties in the City; this will hopefully help stabilize and perhaps increase property values.
  - It is estimated that between 6-15% of properties in the City are currently vacant.
- **TJ Adams Final Invoice:**
  - The final invoice for the City Manager search will be forwarded to Treasury.
- **Gabriel, Roeder, Smith & Co:**
  - The City is considering filing for the full amount of pension underfunding, $90M.
  - Legal fees would range from $75K-$100K.
  - May or may not be a good risk to take.

Pontiac – August 28 – Mayor Waterman, J. Sobota, , N. Nazarko, R. Byrne, P. Dostine, R. Widigan

Weekly Priorities:

- GERS Board passed a policy addressing future overpayments of COLA.
- J. Sobota is working on his report to the RTAB.

Deputy Mayor Position: TJ Adams firm sent out letters to council-members to attend a forum to meet the two Dept. Mayor finalist.

- The names will be kept confidential.
- Informal meeting with council on Thursday at 10AM, there will be no vote or evaluation to fill out. Council meeting to follow at 12.
- Randy will attend the sessions on Thursday.

Community Development Positions: Salary approved, positions were posted on August 20. 30 days ends on September 25.

- Met with Oakland Co. to discuss working together on community development once the positions are filled.

Phoenix Center: The City's attorneys have talked with one of the other condemnation attorney's. They are working on setting up a meeting between the owner of the Ottawa Towers owners and the City.

- The Mayor/City is working on a strategic plan for the property/area.

Two-year Rolling Budget: Budget amendment for the 15/16 budget is pending before the finance committee. Once that is complete then the City will prepare and finalize the two-year.

Retiree Lawsuit: The City had a pre-meeting with opposing council. A new list of possible eligible individuals. Once all the information is gathered it will be finalized and sent to the mediator. Next pre-meeting is set for September 21.

- A letter of understanding is being developed and shared with the mediator.

FDCVT Grant Applications: Randy reminded the City.

Royal Oak Township – July 27 – R. Burgess, D. Squalls, R. Byrne, P. Dostine, C. Porubsky

- **Priorities for the Week/Miscellaneous Items:**
  - Set up meetings for this week or next with potential developers.
  - Code enforcement officers currently have dealership in court over taxes – Donna thinks the best scenario would be for someone to buy both the dealership and motel next to it and demolish the motel.
  - Donna: Finish F&O Plan.
  - Robert: Spoke with Finance on Thursday, need a cash flow analysis for the remainder of the year and to create an amended budget.
  - Current on all bills with the exception of one.
  - Revenue sharing is anticipated to be the only income, but Robert thinks there is enough money to make it thru the year.
  - Randy reminded the Twp. that a monthly financial report is required.
  - General fund renewal is on the ballot August 4; Donna and Robert would like to send a flyer out. Randy cautioned them on the wording
- **Audit:**
  - Completed; Donna said that it was better than last years' and didn't highlight many problems.
  - Robert stated that one of the things the audit noted was that an inventory needed to be completed.
  - Donna wanted to know if the Board had to approve the audit – Randy said to ask Mr. Wilkerson.
- **Police Update**
  - Donna will know soon after August 4 (election) more regarding Hazel Park.
  - Oak Park is not interested; very short meeting where annexation was suggested.
  - Ferndale: Over $1M, have not talked to.
  - Deadline is August 31; if not completed money will need to be returned.
- **Street Lighting:**
  - Completed last Friday, grant should close this week.
  - A rebate of $9700 is anticipated.
  - Bills should start being lower in September; the entire $10K budgeted for these may not be needed.

Michigan

Feds sending in experts to help Flint keep lead out of water

By Ron Fonger | rfonger1@mlive.com
on September 10, 2015 at 6 00 PM, updated September 10, 2015 at 6 04 PM

FLINT, MI – The U.S. Environmental Protection Agency says it will send help to the city as it develops plans for controlling **corrosion in treated Flint River water**, a key to keeping lead from leaching into homes and businesses.

The EPA said that while city water is within allowable levels for lead, it has "recommended that Flint implement **corrosion control treatment** as soon as possible since the city's lead service lines can leach lead into the drinking water if left untreated."

The statement was issued to The Flint Journal-MLive Wednesday, Sept. 9, one day after researchers from Virginia Tech University advised Flint residents not to drink or cook with tap water here without flushing lines before each use or using a filter to remove lead.

Virginia Tech students and faculty have posted the results of 252 water tests from Flint online, concluding the city has "a very serious lead in water problem."

The Virginia Tech testing so far has shown 10 percent of the water samples from across the city tested at 25 parts per billion of lead or more – far more than the allowable level – 15 ppb – set in federal guidelines

Overall, the Virginia Tech testing showed 16 7 percent of Flint samples showed more than 15 ppb of lead.

All Stories

Meanwhile, the city's official test results show 90 percent or more of the samples are 15 ppb or less, according to the state, and the water is meeting all standards for safety.

Flint Mayor Dayne Walling said in an email that he trusts "efforts being made by the EPA to work closely with the Michigan Department of Environmental Quality and the city of Flint to ensure that Flint residents are provided with safe drinking water and all questions are answered "

Walling announced last week that the city will put measures in place that are designed to reduce lead in drinking water by 2016, and said he had been in regular communication with the U.S. EPA, which has agreed to have experts from its Office of Research and Development join Flint's Technical Advisory Committee.

The Technical Advisory Committee was **formed in March** by Walling and former emergency manager Jerry Ambrose but has met only twice, Flint Department of Public Works Director Howard Croft said.

Virginia Tech Professor Marc Edwards, who plans to visit Flint next week to discuss the results of water testing here, said city residents need "scientifically sound advice about the safety of their water when it comes to lead," a toxic metal that was used for many years in household plumbing and water service lines.

Even at low levels, lead may cause a range of health effects, including behavioral problems and learning disabilities, according to the EPA, which warns that children 6 years old and under are most at risk from lead exposure

The Michigan Department of Environmental Quality has estimated at least 15,000 homes in Flint have lead plumbing, and Communications Director Brad Wurfel said the only way to eliminate lead in those homes would be to replace hundreds of miles of lead pipes and connections

Flint residents "who have lead pipes or a lead service connection had lead in their water at some level before this issue was in the newspaper ... before the switch to the Flint River," Wurfel said in an email THursday, Sept. 10. "Optimizing (corrosion control) can minimize impacts, but it won't alleviate the issue."

Edwards' group says in a posting online that Flint water is safe for bathing, showering, toilet flushing and watering lawns and gardens, but advised that the water should be used for cooking or drinking only if it flows through a faucet filter certified to remove lead or if lines have been continuously flushed for 5 minutes at a high flow rate to clean most lead from pipes before use

Brad Wurfel, communications director for the DEQ, said in an email to The Journal that Flint's water system has problems -- but is meeting safe water standards based on its water sampling.

"The city of Flint has challenges, no question," Wurfel said "Decades of forestalled maintenance ... coupled with changes in city population size that put new demands on an old system .. compounded by a rate structure which makes Flint's water very expensive, are all serious issues the city must confront."

The "solution won't be cheap and relief for some parts of the city won't come quickly because this problem didn't start last month, last year, or even last governor; it started in the last century," the statement says

Wurfel and the Virginia Tech researchers each questioned how testing by the city and the university have come up with different results.

Wurfel said that while the state "appreciates academic participation in this discussion, offering broad, dire public health advice based on some quick testing could be seen as fanning political flames irresponsibly."

Edwards said the university's work in Flint, including warnings about the corrosiveness of the city's tap water and sampling that has shown high levels of lead, is available to review online

Wurfel said the state's program for ensuring water quality is built on federal law and "has been effectively protecting drinking water supplies for decades . a consistent, solid program."

Virginia Tech conducted experiments on Flint water, concluding it leaches more lead from plumbing than does Detroit water, "creating a public health threat in some Flint homes that have lead pipe or lead solder."

More corrosive water creates more potential for that lead to leach into tap water, city, state and federal officials have said

Edwards has said experiments at Virginia Tech show Flint's tap water is much more corrosive than treated water from Lake Huron -- sold by the city of Detroit, which had been used here for more than 50 years

The city plans to connect to Lake Huron again in 2016 by tapping into the Karegnondi Water Authority pipeline, which Flint and Genesee County are partners in constructing

The Virginia Tech professor said elevated lead levels in Flint tap water are tied to a corrosive water source that contains about eight times more chloride than Detroit water does.

"Chloride is generally considered to be very corrosive to iron. For instance, chloride present in road salts applied in the winter causes iron in cars and bridges to rust," the Virginia Tech team's website says.

In April 2014, after the city of Detroit terminated its contract to sell water to Flint, the city began using the Flint River as its water source.

Croft said, based on consultation with the DEQ, the city did not take steps at that time to attempt to make the water less corrosive

Wurfel said large water system operators like Flint must carry out two consecutive rounds of water tests in a 12-month period after changing water sources.

The tests allow the city is to see what changes need to be made to minimize corrosion.

"Those (test) results show the system complies with the federal rule -- 90 percent of the samples are 15 ppb or less," Wurfel said in an

email "If the system is large -- 50,000 or more customers -- they still have to proceed with optimizing the system

"They get a year to make a plan, based on the results of the tests. We get a year to review the plan They get two years to implement the plan," the statement says "We've encouraged Flint to skip the time periods and move immediately to optimizing."

The results of the Virginia Tech water testing in Flint are expected to be shared during a **town hall meeting** from 6-8 p m. Tuesday, Sept. 15, in Saints of God Church, 2200 Forest Hill Ave

CITY OF FLINT

Dayne Walling
Mayor

September 14, 2015

The Honorable Rick Snyder
Governor, State of Michigan
P.O. Box 30013
Lansing, MI 48909

RE: Call for Additional Support for Flint Water Improvement Plan

Dear Governor Snyder:

On behalf of the Flint community, I am writing with a renewed request for additional support to address Flint's water challenges to ensure that water is affordable and secure for everyone in Flint especially our vulnerable populations. I am asking for an additional $30 million in funds for Flint's infrastructure and a new healthy homes initiative.

Significant progress has been made throughout this year to increase water safety and quality and I thank you for the involvement of your office, the Michigan Department of Environmental Quality, and the Michigan Department of Treasury. A majority of items in the Water Improvement Plan are completed or underway. Most importantly, Flint is now in compliance with the Safe Drinking Water Act due in large part to the installation of the new carbon filter. The infrastructure systems are being made more secure and efficient through the State grants. Now the City is committed to following the recommendation of the Michigan Department of Environmental Quality to optimize the treatment process, reduce corrosion and further minimize risks from lead.

The need to accelerate the City's capital improvement investments remains and has been further increased by the continued financial stress and legal issues. Previously I requested support for replacement or forgiveness of payment to the Drinking Water Revolving Loan Fund due to Flint's status as a distressed community and the gap in funding in the adopted capital improvement plan. I understand that the existing federal law does not allow the existing Drinking Water Revolving Loans that Flint is carrying to be forgiven in retrospect but the need still exists. Flint owes approximately $20 Million. One solution is for the State to grant a new $20 Million that is designed as forgivable from the start. Another solution is to provide

equivalent funding through an expansion of the grant program to Michigan's Financially Distressed Cities, Villages and Townships with a supplemental budget amendment in cooperation with the State Legislature.

The community's heightened concern about lead leeching into the water from old service lines and home plumbing also needs to be addressed. We know that lead is an environmental contaminant and there have been many programs in place over the years to address sources in paint and pipes. Flint needs a new healthy homes initiative specifically focused on lead in water with $10 Million to start the process of replacing service lines for the most vulnerable households. Regardless of the source and treatment of Flint's water, this long term threat of lead in pipes needs to be removed in the interest of public health.

My approach continues to be to work with you and your appointed officials, State Senator Ananich, State Representatives Phelps and Neeley, Congressman Kildee, community groups, businesses, churches, foundations, the Flint City Council, and all of the City of Flint and State and Federal government personnel. We need every available expert and resource to address Flint's water problems.

Flint's safety is my top priority. Just as the City and State have worked together on public safety, we need additional support for fixing the water problems. We need $30 Million in new funds to repair and update the city-wide infrastructure and to assist households in becoming lead-free. The entire Flint community deserves sustainable, safe, secure and affordable water now and into the future. Thank you for the consideration Governor and I look forward to future discussions.

Sincerely,

Dayne Walling
Mayor, City of Flint

CC: Flint City Council President Joshua Freeman; Congressman Dan Kildee; State Senator Jim Ananich; State Representative Sheldon Neeley; State Representative Phil Phelps; EPA Regional Administrator Dr. Susan Hedman; Chief of Staff Dennis Muchmore

Weekly Conference Call Notes – Sept. 14, 2015

Allen Park –Sep. 11 – Mayor Matakas, B. Cady, M. Kibby, R. Byrne, E. Cline, P. Dostine

Priorities

- Payroll clerk is leaving Allen Park, going to Garden City. Allen Park will start interviews for new payroll clerk Monday.
- Town Hall meeting scheduled for next week. Topic is 2 mill on ballot for street repair.
- City closing books. Audit to start next week.

Update on Bond Tender

- $1.3M so far. Cady said they are disappointed. Hoping that people waiting to last minute (Sept 16) for every penny.

Fire contract Update

- Fireman are taking Allen Park to arbitration. They and the city cannot reach an agreement. Cady said one of the problems is that all the city's internal knowledge is gone.
-

FDCVT Grant Application

- Allen Park is working on the grant. Looking to fund a LED replacement program and purchase a portable generator.
-

Retiree Health Care Update

- The retiree have been switched to Humana. The under 65 and actives are with BCBS. Go live for both is Oct. 1
-

Position/Classification Study Update

- Allen Park selected White Hall Group ($47K) to conduct third and final piece of the study: city personnel/service efficiency study. Other two, Job Description and Salary Surveys, MML did.
-

Beatom Lawsuit

- Settled for $22.5K. MML is paying the cost.

Benton Harbor –Sept. 10 – D. Watson, R. Byrne, P. Dostine, E. Cline

Priorities

- Fri, Sept 11, Benton Harbor is unveiling its Sept 11 Monument. Expecting 1,000 people.
- BH still in negotiations with FOP and AFSCME. Darwin said it's easy because the city has no money.
-

Lange, O'Brien / Unruh Lawsuit

- No update, at a standstill.

Update on Vacant position

- Assessor position. RFP went out. A company responded that Darwin likes, a mother and son team. One works as an assessor for a small twp. One works in equalization for Berrien County. The cost for their services is $10K less than former assessor. They are committing to 2 years.
- Finance Director. Darwin forwarded Treasury the MML-headhunter specs for the position. The headhunter is Kathy Eisinger (sp)
- Plante Moran is conducting the annual audit. Preliminary numbers show a $774K fund balance. A Ronda Hildebrandt, interim finance director as described by Darwin, will be helping out BH from now through the close of the audit. She will be at the offices 5 days a week. Watson plans on asking her is she has any interest in applying for the finance job.
- Water Supervisor. BH posted the position. BH has an agreement with St Joseph to assist them. The current supervisor is staying till Oct. 20. BH also advertised for a Distribution Foreman.
- Community Development & Economic Director. The current director is staying till Nov, she will help with transitioning the new hire when he/she gets on board. BH posted the position already.
- BH's political season is in full swing. Darwin noted that commission meetings are ratcheting up.

FDCVT Grant

- Darwin plans to make an application in about 2 weeks. The focus will be using the grant monies on the sanitary survey results mentioned below.

Sanitary Survey results

- Two areas were found to be deficient: the hydraulic and reliability systems.

New commissioner

- Darwin reported that the new commissioner is doing well. He's been given the Charter Code of Ethics and a copy of the ordinances.

Ecorse – August 25 – W. O'Neal, T. Sadowski, J. Pepperman, R. Byrne, P. Dostine, C. Porubsky

Priorities:

Waiting to hear from Treasury on five-year budget, would like feedback. Randy: does the budget reflect the consolidation with River Rouge? Current fiscal year doesn't show anything, didn't budget for savings. Transferred salaries to professional services. Has some time to show savings. Has leeway in PA 33.

Spoke with RR yesterday, have to put contract on hold. Things are heating up. If the deal does not go thru, all Ecorse FF will be reduced to part-time. Would help with savings needed to balance five-year. Current salaries are around $850-900K, thinks this would cut roughly in half. Would pay RR around $400K. Would like to have shared command with the agency to cut down on overtime costs. Their Public Safety gets a bonus, Ecorse has not had a raise in twelve years.

Tim's first day was yesterday. John and Tim will work together this week. John has volunteered to be on call.

DPW Superintendent resigned last week. Will be brought to the RTAB next month. **This position was being paid salary plus overtime.** Has been here around two years, Wayne thinks he is overwhelmed administratively. Wayne is thinking of moving current employee into vacant treasury position and give an applicant that has water/sewer billing experience the position of DPW Administration Assistant. Wayne stated the bills are going out on time; has some problems to address regarding fraud, etc.

OPEB Benefit Audit is also on the radar, Wayne is going to look at. Has to look at what a couple people are paying for healthcare and ensure it is the correct amount. Pre-65 do not have healthcare anymore, only ones grandfathered in (approximately ½ dozen or more). Wayne has met with MERS multiple occasion. 7.75 rate of return, Wayne was using 8. Need to recalculate.

Prax Air: Got a call from Livese at Prax Air and stated there are things that need to be changed in the resolutions to comply with law. Getting prep work ready, conducting pre-construction meetings, etc.

Council voted to receive and file letter from Wayne Workman.

Flint – Sept 2 – Mayor Walling, N Henderson, J Freeman, Wendy, R Byrne, E Cline, P Dostine

- Flint sent adjusted water bills out to customers; bill reflects 35% reduction per court order. (So, even if stay is granted, customers will receive at least one newly adjusted bill.) Henderson said financial impact of adjusted rate is approx. $600K per billing period. For the year, projected to be $7M.
- Average water bill reduction for a 5/8" line is $18.00. Flint is still able to bill and collect for water and sewer service charges.
- Class Action Suit. How many homes are affected? Flint officials have assumed the impact is city-wide, some 30,000 customers. The city doesn't know how many past, foreclosed homes are a result of delinquent water bills. Mayor Walling and Henderson said they are trying to determine this number.
- Flint can resume water shut-offs with the new, adjusted bills that just went out.
- Henderson has asked engineers to study the KWA project, to see what is essential, what must remain. The engineers said there are two different scenarios: (1) June Plan, (2) December Plan.
- First KWA bond payment ($6M) is due in Nov-15.
- Results from Quarterly Water Test. TTHM levels tested higher than the average in one part of the city. Levels still within acceptable limit. Flint not required to send out notifications.
- Flint still continuing its meter installation program.

- Flint will be applying for this year's FDCVT grant, $2M, for a property assessment project.
- Watermain Break. The break is under the Flint River. City officials said they cannot fix this in-house, will have to contract it out. Will need RTAB approval. A special meeting may have to be called to address this issue.
- Public safety. Fires are down, but this means the city loses some eligibility for grants. Homicides are still high, approx. 42 so far this year.
- The administrative assistant was hired, brought on, prior to the recent hiring freeze edict.
- Flint officials asked Treasury during the call if there was any assistance available to the city for its suspended CIP.

Hamtramck – Sept. 10 – K. Powell, R. Byrne, P. Dostine, D. Van de Grift

Priorities

- Hamtramck is busy working on the park in front of City Hall, Pope Park, and Veteran's Park.
- Katrina attended a focus group meeting in A2 hosted by the MML. MML is exploring the development of a program that would provide consultants to communities in financial distress. Other participants included: Joyce Parker, Flint's finance director, a Monroe representative and someone from the GFOA.
- Hamtramck's city council as well as Katrina will attend next week's MML conference in Traverse City.
- Hamtramck is signing contracts with an auditor to audit the city, a company to perform sewer repairs, and someone to audit the housing fund. The city has yet to bid-out the landscaping contract.
- No meeting date has been set yet between Katrina and the Wayne County Executive and the Sheriff to discuss jail services.

Police Study

- Katrina reached out the ICMA who gave her a list of consultants to conduct a police study. They included Tri Data, Wes Anderson & Assoc, McGrath Consulting, and Fitch.
- Treasury provided Katrina with a contact at the ICMA who may be able to assist with the study.

Housing discrimination lawsuit

- There are 5 homes left to be built: Hamtramck is responsible for two, Habitat for Humanity two, and MSHDA one. The cost to Hamtramck will be approximately $500K of which the city will put on its winter tax rolls.

City Treasurer

- Has been busy on some projects.

Inkster – August 13 – M. Stuhldreher, R. Byrne, P. Dostine, C. Porubsky

- **Priorities/Misc.:**
  - DOJ employee came in to facilitate community group (resulted from Dent situation).
  - Richard Marsh is transitioning; Mark is getting used to new position/role.
  - Meeting with MSHDA on Monday; Mark will be in attendance.
  - Discussion will take place Monday at the Council meeting regarding Mark's role as Interim City Manager.
  - Final billing for search has been processed.
  - Police training is needed, but it is hard to send as they are short-staffed. Randy suggested contacting Capt. Yes.
  - TIFA is declining; Mark will have to get money from GF. Debt was issued in 2010 and has about 20 years left. This was in the long-term forecast and is not a surprise. Initial projections were at 4-5%, actual rate of decline was 8-9%.
- **Police Chief:**
  - Started Monday. Interim Chief Thomas is completely separated from the agency now, but the two were able to spend some time together.
  - To Mark's knowledge, the Chief has not met Captain Yesh yet, but has met some MSP members, include Lt. Shaw.
  - Mark stated that the new Chief is straightforward, about business, articulate, and has good people skills. Expects that the community will embrace him.
  - Randy would like to meet the new Chief and see the building.
- **Chargebacks:**
  - Came back lower than budgeted.
  - $300K positive variance on GF, $100K negative on Sewer; everything together is $213K positive variance.

Lincoln Park – Sept. 9 – B. Coulter, R. Byrne, E. Cline, D. Van de Grift, P. Dostine

Priorities:

- **Cell Tower**
  - Should be completed next week. The City expects to gross about $350K.
- **PA 345 Issue**
  - The EM will be holding 3 town hall meetings with the Police and Fire chiefs. The Mayor may also be invited.
  - Information will also be placed on Cable TV and on the City's social media sites.
  - The EM noted that he is being careful not to violate state law regarding ballot proposals.
- **FDCVT Grants**
  - Applications being developed.
- **Retiree Lawsuit**

- No activity on this issue. Noted that MML will not provide insurance coverage. The EM is deciding how to address this.

- **Cost Recovery**
  - All information is being assembled for cost recovery regarding the tanker fire on I-75.

- **Jury Duty**
  - The EM is still scheduled for jury duty the week of September 21.

- **Panhandling and Donation Bins** – The EM is still considering the adoption of ordinances regarding these issues.
  - First Amendment issues must be taken into concern.
  - May look at enforcing this through the Motor Vehicle Code.

FY 15-16 Budget
- Adopted.

City Manager
- Start date is anticipated at October 1.

4-Month Plan
- The EM indicated that this is moving forward.

MSHDA/MEDC
- No new information.

Exit Timeline
- Eric is to develop a draft Exit Timeline to share with the EM.
- Drew stated that the EM's last day, based on the 18-month limit, is Thursday, January 7, 2016.

Wayne County Sewer Issue
- This continues to be researched.

Pontiac – Sept. 11 – Councilman K. Williams, J. Sobota, , N. Nazarko, R. Byrne, P. Dostine, R. Widigan

- **Weekly Priorities:**
  - Council will have a special meeting on Monday to take up the contact for the Deputy Mayor and the Transition Advisor Position.

- **Questions from Councilman Williams:**

1. Is this a true transition?: Yes, it is.

2. Why is there no timeline in the contact for the transition advisor?: The timeline is unknown, it may take 5 months or 10 months. Jerry is simply an advisor, period. The idea is to limit the number of hours, hoping there is no need to re-new the contact.
3. It would be prefer that there are limits on the advisor, council has no appetite to add more "advisors". Why not set the contract at 4 months and renew if it's needed: We will take to W. Workman.
4. Retiree healthcare and Phoenix Center litigation are two big issues. Healthcare lawsuit must be resolved before RTABs exit?
5. Financial best practices have already been implemented,
6. limits to spending, fund balance policy, etc…RTAB/State has requested a 5-year financial plan, that is out of council's control: Mayor stated the requirement is to have a two year budget and a five year projection, right now they are waiting on the council to address and act on the two year budget. Sobota stated once the first two years is finalized the five year protection will not be difficult.
    a. **Councilman Williams**: how much of these bullet points must be finalized/addressed before the RTAB can begin the transition and what are the sticking points to transition out. Council needs a list of what THEY need to take care of to help with transition. Most of the bullet points are in the hands of the Mayor, Dept. Mayor, and CA.
    b. How does the Council show the state that they are making progress/addressing the checkpoints.
    c. The benchmarks are left to interpretation as to how to complete them, need a clear set of bullet points showing how the council moves towards local government (referencing the contract).
    d. The Council's key goal is to have a legitimate plan as to how to transition.
    e. Issue with the contract is it does not come back to the Council, there is no renewal date. No problem with the council renewing it, the problem is that it's not an option.

- **Deputy Mayor Position Update**: No vote was taken last night, the council agrees with the Mayor's choice. Debate on the salary. Council will meet on Monday at 5PM to address.
    - Raise in the salary was NOT mentioned to the council until last night. Last they were informed the salary was $95K. With the salary at $107K it will be hard to get four votes from the council.
    - Residents do NOT want the Dept. Mayor making more money than the Mayor.

- **Transition Advisor Position Update:** Comments from Mayor – Councilman Williams is part of the old guard, looking for some sound bites and is a very 'savvy' councilman. Any changes Treasury makes to the contract he will take to council and will say that they took on Treasury and 'won'.
    - Mayor says that if changes are made to the contract it puts her in a precarious situation.

- **Community Development Positions**: City is still accepting applications. HR director will review and present to the council. Process closes soon.

- **Street Sweeper:** Council is requesting to bring street sweeping 'in-house'. No research has been done as to the liability and cost of this undertaking.

- **Two-year Rolling Budget:** This is being addressed by council and committees.

- **RTAB Agenda add-on requests:** Mr. Sobota is requesting the RTAB address street sweeping and DPW road stripping. He was informed the request must be submitted in a memo by noon today.

Royal Oak Township – July 27 – R. Burgess, D. Squalls, R. Byrne, P. Dostine, C. Porubsky

- **Priorities for the Week/Miscellaneous Items:**
  - Set up meetings for this week or next with potential developers.
  - Code enforcement officers currently have dealership in court over taxes – Donna thinks the best scenario would be for someone to buy both the dealership and motel next to it and demolish the motel.
  - Donna: Finish F&O Plan.
  - Robert: Spoke with Finance on Thursday, need a cash flow analysis for the remainder of the year and to create an amended budget.
  - Current on all bills with the exception of one.
  - Revenue sharing is anticipated to be the only income, but Robert thinks there is enough money to make it thru the year.
  - Randy reminded the Twp. that a monthly financial report is required.
  - General fund renewal is on the ballot August 4; Donna and Robert would like to send a flyer out. Randy cautioned them on the wording
- **Audit:**
  - Completed; Donna said that it was better than last years' and didn't highlight many problems.
  - Robert stated that one of the things the audit noted was that an inventory needed to be completed.
  - Donna wanted to know if the Board had to approve the audit – Randy said to ask Mr. Wilkerson.
- **Police Update**
  - Donna will know soon after August 4 (election) more regarding Hazel Park.
  - Oak Park is not interested; very short meeting where annexation was suggested.
  - Ferndale: Over $1M, have not talked to.
  - Deadline is August 31; if not completed money will need to be returned.
- **Street Lighting:**
  - Completed last Friday, grant should close this week.
  - A rebate of $9700 is anticipated.
  - Bills should start being lower in September; the entire $10K budgeted for these may not be needed.

CITY OF FLINT

Dayne Walling
Mayor

September 14, 2015

The Honorable Rick Snyder
Governor, State of Michigan
P.O. Box 30013
Lansing, MI 48909

RE: Call for Additional Support for Flint Water Improvement Plan

Dear Governor Snyder:

On behalf of the Flint community, I am writing with a renewed request for additional support to address Flint's water challenges to ensure that water is affordable and secure for everyone in Flint especially our vulnerable populations. I am asking for an additional $30 million in funds for Flint's infrastructure and a new healthy homes initiative.

Significant progress has been made throughout this year to increase water safety and quality and I thank you for the involvement of your office, the Michigan Department of Environmental Quality, and the Michigan Department of Treasury. A majority of items in the Water Improvement Plan are completed or underway. Most importantly, Flint is now in compliance with the Safe Drinking Water Act due in large part to the installation of the new carbon filter. The infrastructure systems are being made more secure and efficient through the State grants. Now the City is committed to following the recommendation of the Michigan Department of Environmental Quality to optimize the treatment process, reduce corrosion and further minimize risks from lead.

The need to accelerate the City's capital improvement investments remains and has been further increased by the continued financial stress and legal issues. Previously I requested support for replacement or forgiveness of payment to the Drinking Water Revolving Loan Fund due to Flint's status as a distressed community and the gap in funding in the adopted capital improvement plan. I understand that the existing federal law does not allow the existing Drinking Water Revolving Loans that Flint is carrying to be forgiven in retrospect but the need still exists. Flint owes approximately $20 Million. One solution is for the State to grant a new $20 Million that is designed as forgivable from the start. Another solution is to provide

equivalent funding through an expansion of the grant program to Michigan's Financially Distressed Cities, Villages and Townships with a supplemental budget amendment in cooperation with the State Legislature.

The community's heightened concern about lead leeching into the water from old service lines and home plumbing also needs to be addressed. We know that lead is an environmental contaminant and there have been many programs in place over the years to address sources in paint and pipes. Flint needs a new healthy homes initiative specifically focused on lead in water with $10 Million to start the process of replacing service lines for the most vulnerable households. Regardless of the source and treatment of Flint's water, this long term threat of lead in pipes needs to be removed in the interest of public health.

My approach continues to be to work with you and your appointed officials, State Senator Ananich, State Representatives Phelps and Neeley, Congressman Kildee, community groups, businesses, churches, foundations, the Flint City Council, and all of the City of Flint and State and Federal government personnel. We need every available expert and resource to address Flint's water problems.

Flint's safety is my top priority. Just as the City and State have worked together on public safety, we need additional support for fixing the water problems. We need $30 Million in new funds to repair and update the city-wide infrastructure and to assist households in becoming lead-free. The entire Flint community deserves sustainable, safe, secure and affordable water now and into the future. Thank you for the consideration Governor and I look forward to future discussions.

CITY OF FLINT

Dayne Walling
Mayor

January 18, 2015

The Honorable Rick Snyder
Governor, State of Michigan
P.O. Box 30013
Lansing, MI 48909

RE: Flint Water Improvement Plan

Dear Governor Snyder·

On behalf of the Flint community, I am writing to convey serious concerns about water quality and to request your support for my proposed Flint Water Improvement Plan. Access to safe and clean water is a basic human right, and, therefore, policy and budget decisions need to ensure that water is affordable and secure for everyone in Flint and all across Michigan It is essential there is City, State and Federal cooperation to address the challenges here and to meet the needs of vulnerable populations.

The Flint Water Improvement Plan is focused in five areas: safety, quality, access, investment and education. The plan puts safety and quality first because this is fundamental. It is designed to be a sustainable solution for the City of Flint and the community as we move towards a new permanent water supply from Lake Huron through the Karegnondi Water Authority. My plan offers new ideas and also builds on successful models of utility, energy and assistance programs at the State and Federal levels.

<u>Safety & Quality</u>

- 100% Safety is the standard
- City of Flint reports testing data to the public to assure safety and expands testing sites and frequency
- Bring on experienced river water treatment operational management in the City of Flint

<u>Access</u>

- Announce an amnesty program for Flint water service turn-ons and reduce the turn-on fee
- Develop a revised affordable payment plan policy to encourage customers to return
- Design Federal and State partnership to establish new Drinking Water Emergency Assistance Fund for the elderly and vulnerable families

<u>Investment</u>

- Accelerate water system improvements outlined in the City of Flint Capital Improvement Plan through Federal and State Investments
    - State approves City of Flint's Distressed Cities Fund applications

- Federal and State support for replacement or forgiveness of payment to the Drinking Water Revolving Loan Fund due to Flint's status as a distressed community
- Federal and State grants for infrastructure improvements in alignment with the Flint Master Plan

- City Water Department implements budgeted FY15 projects including leak detection, valve repairs, new pipes and meter replacements

Education

- Develop a community partnership with universities to provide household and business customers with information on testing and conservation
- Ongoing partnership with Michigan Department of Human Services, United Way, Salvation Army and community organizations to provide information and water assistance with the Keep the Water Flowing Fund and support services
- Expand youth energy initiative to assist households with conservation and efficiency (piloted in summer 2014 with Northwestern High School students, EcoWorks and Consumers Energy)

It is also critical to restore the public confidence in Flint Water. The implementation of this plan must be accompanied by extensive community engagement including local elected officials. My objective is to work with you and your appointed officials, State Senator Ananich, State Representatives Phelps and Neeley, Congressman Kildee, community groups, businesses, churches, foundations, the Flint City Council, and all of the City of Flint and government personnel.

It is imperative that we communicate better and provide residents more information. I understand representatives from the Michigan Department of Environmental Quality will be joining a public forum this week at City Hall. This engagement going forward is vital so thank you for supporting their efforts. I think this issue of transparency is important for communities all across the State. I recommend a review of the applicable laws and policies and, at a minimum, a new requirement that water testing data be reported publicly no less than quarterly by law in all Michigan communities in Flint's population category.

Thank you for the consideration Governor. There is nothing more important in Flint right now than fixing the water problems. We must work together to identify funds to repair and update the water treatment facilities and city-wide infrastructure and to help those persons without access to clean water so that the entire Flint community has sustainable, safe, secure and affordable water now and into the future. This is an important issue for the state of our State of Michigan and I urge you to work with us to implement solutions.

Sincerely,

Dayne Walling, Mayor
City of Flint

CC: Flint City Council President Joshua Freeman; Congressman Dan Kildee; State Senator Jim Ananich; State Representative Sheldon Neeley; State Representative Phil Phelps; Flint Emergency Manager Jerry Ambrose

Summary: Conference Call with City of Flint

September 15, 2015

Participating: Tom Saxton, Wayne Workman, Fred Headen, Eric Cline, Mayor Walling, City Administrator Natasha Henderson, Finance Director Jody Lundquist, City Attorney Pete Bade, Assistant City Attorney Tony Chubb

- The City of Flint is involved in two lawsuits regarding water and sewer rates: *Kincaid* and *Shears*.
    - It was stressed that the *Shears* and *Kincaid* lawsuits are both separate but are being litigated concurrently and that any developments mutually impact both suits.
- It was noted that in the opinion of the City, both cases will continue to be litigated for some time due to the complexity of the issues involved.
- In a related matter, the City Attorney noted that the Water Coalition lawsuit to force the City to purchase water from the City of Detroit was dismissed in Genesee County Circuit Court.

***Shears* Lawsuit**

- *Shears* was decided by the Genesee County Circuit Court by a non-final order on August 17, 2015.
    - Among other things, the Court enjoined City officials from any longer imposing a 35 percent increase in water and sewer rates; from disconnecting water or sewer service due to delinquent bills, dating back to September 16, 2011; and from placing liens on property due to delinquent bills, dating back to September 16, 2011.
    - City officials have filed an appeal with the Michigan Court of Appeals seeking, among other things, a stay of the Genesee County Circuit Court injunction.
    - In the interim, City officials are complying with the Court's order in *Shears*.
- The City's appeal is still being considered by the Court. No timeline for a decision is known.

***Kincaid* Lawsuit**

- *Kincaid* was decided by the Michigan Court of Appeals on June 11, 2015.
    - The Court held that a 35 percent increase in water and sewer rates imposed by City officials on September 16, 2011, violated the City charter and that Emergency Manager Mike Brown had no statutory authority to later ratify those rate increases in May of 2012.
    - The Court of Appeals remanded the case to Genesee County Circuit Court.
    - City officials intended to appeal this decision to the Michigan Supreme Court, but missed the filing deadline by one day.
- The City Attorney stated that litigation of this case must continue because some key issues have yet to be resolved, including:
    - The exact damages have not been clarified.
    - The issue of who has standing in this case remains unresolved.

Summary: Conference Call with City of Flint

September 15, 2015

Financial Impacts

- City officials estimate that nullification of the 35 percent increase in water and sewer rates is costing approximately $600K/month. Therefore, if the Court orders either refunds or credits against future water and sewer bills retroactive to September 16, 2011, the cost is estimated to be approximately $30M.
    - The Finance Director noted that since September 2011, the system has had a declining number of users, so the total potential refund is higher than basing calculations from the current number of users.
    - The City Administrator stated that the City has not developed a plan to issue a refund of this size because the City lacks sufficient funds to do so and they would be unable to operate at this point.
- The City Administrator noted that citizens are paying the latest monthly billing but that the City must contend with lower revenues for the foreseeable future.
- In addition, it was noted that if the City has to refund the Ready-to-Serve charge from September 2011 through July 1, 2015, that this amount is approximately $10M.
- It was noted that the amount of delinquent funds owed to the City that are over 30 days old has grown from $7.8M to $8.4M since the ruling in the Shears Lawsuit.
    - Further, the City Administrator stated that because the City is prohibited from shutting off service for non-payment, the amount of delinquent funds is expected to continue to grow.
- In addition, the City Administrator noted that the measures taken to reserve funds within the system to address the financial issues has delayed needed capital improvements, which further exacerbates the problems within the system, but the City cannot address these capital needs without additional revenue.
- The City Administrator further stressed the importance of the State assistance sought by the Mayor in his September 14, 2015, letter to the Governor.
    - The Mayor requested $30M for infrastructure and capital improvements related to the City's water and sewer system.
    - It was stressed by Treasury that existing funding options were very limited and we were not aware of anything short of a legislative appropriation.
        - State funding of the City's $30M request will likely invite requests from many other communities with similar needs.
        - The State recently awarded the City $2M in Distressed Cities grant funds to implement improvements to their system.
        - The State further provided the City with an additional $2M in relief for outstanding SRF/DWRF loans.
        - Treasury is not aware of any current Flint projects related to their water quality issues that could be funded through the DWRF program and DEQ is responsible for managing DWRF eligible projects.

For Immediate Release

Lawsuit against City of Flint brought by Coalition for Clean Water Dismissed by Circuit Court

Flint, Michigan – September 15, 2015 – The lawsuit brought against the City of Flint by the Coalition for Clean Water has been dismissed by Circuit Court Judge Archie Hayman. In his September 14 ruling, Judge Hayman determined that the plaintiff did not state a valid cause of action against the City of Flint, the Mayor and the City Administrator. Judge Hayman also determined that he did not have jurisdiction to provide the relief sought by the plaintiff. All counts of the Coalition's amended complaint were therefore dismissed.

The City of Flint has maintained communication with both the Michigan Department of Environmental Quality and the United States Environmental Protection Agency to ensure all proper safety and quality standards have been followed. The MDEQ recently notified Flint that it is no longer in violation of the Safe Water Drinking Act due to total trihalomethanes (TTHM) following four consecutive quarters of testing showing levels below the federal action level. The City of Flint will continue to work to ensure safe, quality and affordable drinking water to its residents, businesses and visitors.

The City of Flint will continue to provide updates on its water progress through its website, cityofflint.com. Anyone with water issues is encouraged to call 810-766-7202 so that they can be addressed. Residents wishing to receive a free and independent in-home water test can call 810-787-6537 or email flintwater@cityofflint.com.

Flint asks Snyder for $30M to upgrade water system

Associated Press 7:52 a.m. EDT September 15, 2015

Water from the Flint River rushes into the Flint water treatment plant in Flint.(Photo: File photo)

1 CONNECTTWEETLINKEDIN 2 COMMENTEMAILMORE

Flint — The mayor of Flint is asking Michigan Gov. Rick Snyder for $30 million to help upgrade the city's water system and replace lead service pipes.

The Flint Journal reports Mayor Dayne Walling announced his request while speaking Monday to the City Council. The request was made that day in a letter to Snyder.

The funds sought by Walling include $10 million to replace lead service lines and plumbing that can leach lead into drinking water. Virginia Tech researchers testing Flint's water have said residents shouldn't drink or cook with city water without flushing lines or using a filter.

The U.S. Environmental Protection Agency says Flint's water is within levels allowed for lead. The agency has said it would help the city in its efforts to reduce lead.

Wayne & I have a call scheduled with the Mayor, City Atty, & the City Mgr @ 4:00 today. We are following up to see if in fact they inadvertently missed filing the appeal on the rate case. If so, in my mind that would be a huge, costly blunder (but that is why we are talking to them) which will greatly exacerbate the financial condition/solvency of the system.
And recall (not that long ago) I believe we gave them approx. $2mm in SRF loan relief and approx. $2mm in grant *money[cgap?] to improve the system.*
We are having staff look at possible other assistance from a financing or loan perspective. My sense is there will not be much there if any.

p.s. – the Flint coalition lawsuit was dismissed (see attached)

I don't know how you respond. Attached is an email I just sent to Dennis et al. We/Treasury don't do the distressed cities $s. Shouldn't that come from TED ?
If the state gives Flint money; all of the urban communities will be standing in line.
They all have problematic water systems.

Importance: High

Guys...

The Flint Journal is asking for a reaction from the Gov's Office...on Walling's "request." The letter is attached and does indicate that Walling understands "forgiveness" is not an option on the existing loans...but that he seems to be requesting a "new" loan that could be forgiven...which I doubt is feasible or legal, etc.

Please advise on what you feel is a most appropriate response...

Should we say we "encourage" the city to apply for a distressed cities grant (total grant is only $5m) and suggest they work with their respective legislators to increase the grant limit, if they feel that is an appropriate avenue? If we do that, Dave will be asked if the G supports an increase...not sure we want to go there???

Hi Terry,

The Journal is asking for a response to Mayor Walling's letter.

I just want to double check: I see he's again asking for loans to be forgiven, but didn't we say earlier that there's no legal path to do that?

His letter is attached.

Thanks!

Dave

Hey Dave:
Mayor Walling has penned another letter to the governor, requesting $30 million for Flint's infrastructure.
I've attached the letter and a link to a story I posted last night.
I'd like to follow up with any comment your office can provide.

Flint – Sept. 16 – N. Henderson, Mayor Walling, J .Freeman, W. Lamphier, R. Byrne, E. Cline, P. Dostine

Priorities

- Working with Charter Commission. Natasha has contacted Mott Foundation. Foundation may have some money for the Commission so it can complete its mission and get an updated Charter on the ballot.
- Police. Crime prevention. Flint looking into a prevention grant that targets students who have been expelled from school for lengthy periods. This grant would keep the students occupied and engaged, keep them out of trouble.
- Flint has contracted out space in its fire stations for ambulance services. The contract is for $90K. Much needed revenue for the city.
- GM is moving forward on the planned Body Shop, to be completed in Dec. 2017. The project will engage Flint's transportation, public works and building departments, bringing in much needed revenue.
- Flint has completed its FDCVT grant. Submission is next.

Watermain break

- Watermain break under the Flint River. This is not a priority right now for Flint. The repair will be expensive and will have to be bid out.

Lead in the water

- Flint is working with MDEQ to address the issue. Phosphorus can be added to the system which will reduce the presence of lead.
- Flint is planning a press conference once the problem is addressed.
- Natasha mentioned that the city is still in compliance with Safe Water Drinking Act regarding the recent lead issue.

Water lawsuit

- No new developments.

****

Summary from September 15, 2015, conference call between Treasury and City of Flint officials.

The participants were: Tom Saxton, Wayne Workman, Fred Headen, and Eric Cline, from Treasury, and Dayne Walling, Natasha Henderson (City Administrator), Pete Bade (City Attorney), Tony Chubb (Assistant City Attorney), and Jody Lundquist (Finance Director) from the City.

Issues discussed:

- The City of Flint is involved in two lawsuits regarding water and sewer rates: *Kincaid* and *Shears*. *Kincaid* was decided by the Michigan Court of Appeals on June 11, 2015. The Court held that a 35 percent increase in water and sewer rates imposed by City officials on September 16, 2011, violated the City charter and that EM Mike Brown had no statutory authority to later ratify those rate increases in May of 2012. The Court of Appeals remanded the case to Genesee County Circuit Court. City officials intended to appeal the Court of Appeals *Kincaid* decision to the Michigan Supreme Court, but missed the filing deadline by one day.

- *Shears* was decided by the Genesee County Circuit Court by a non-final order on August 17, 2015. Among other things, the Court enjoined City officials from any longer imposing the 35 increase in water and sewer rates; from disconnecting water or sewer service due to delinquent bills dating back to September 16, 2011; and from placing liens on property due to delinquent bills dating back to September 16, 2011. City officials have filed an appeal with the Michigan Court of Appeals seeking, among other things, a stay of the Genesee County Circuit Court injunction.

- In the interim, City officials are complying with the Court's order in *Shears*. City officials estimated that removal of the 35 percent increase in water and sewer rates from future bills will cost roughly $600,000 per month, or $7.2 million annually. Therefore, if the Court orders either refunds or credits against future water and sewer bills, retroactive to September 16, 2011, the cost would be roughly $28.8 million to date (i.e., $600,000 per month times 48 months to date). The City Administrator indicated that City officials have not developed a plan to issue a refund of this magnitude because the City lacks sufficient funds to do so and they believe the City would be unable to operate at that point.

- The City Administrator noted that the accounts receivable for water and sewer operations that are over 30 days old has increased from $7.8 million to $8.4 million since the *Shears* order. She also noted that, because

City officials are prohibited from disconnecting water or sewer service for non-payment, they expect this number to continue to increase.

- The City Administrator noted that the measures taken to preserve funds within the water and sewer system to address these issues have delayed needed capital improvements, which has further exacerbated problems within the system. However, City officials cannot address capital needs without additional revenue.

- The City Administrator brought up and stressed the importance of the State assistance sought by the Mayor in his September 14, 2015, letter to the Governor. The Mayor requested $30.0 million for infrastructure and capital improvements related to the City's water and sewer system. Wayne indicated that the Mayor's request had been received and promptly disseminated within Treasury and was being reviewed. However, he also indicated that, in his opinion, existing funding options were limited without additional legislative action.

DRAFT

DRINKING WATER - LEAD - DISTRIBUTION OF RESPONSIBILITIES

Environmental Protection Agency	**Michigan Department of Environmental Quality**
Promulgation of Federal Safe Drinking Water Act Rules	Primacy - Michigan Safe Drinking Water Act and Administrative Rules
1974 Safe Drinking Water Act	Oversight of public water systems
1991 Lead and Copper Rule	Inspections
2000 Lead and Copper Rule Minor Revisions	Construction Permitting
2007 Lead and Copper Rule Short Term Revisions	Provide loans to water systems for public infrastructure improvements
???? Lead and Copper Rule Long Term Revisions	State Laboratory Services
Granting Primacy of Federal Regulations to States	Laboratory Certification
Auditing of State Public Water Supply Programs	Establish monitoring requirements, quantity and frequency
Provide Funding to States	Verification of monitoring results and compliance determination
	Notify water systems of Action Level Exceedance
	Establish Water Quality Parameter Ranges, as necessary
	State Reporting to EPA
	Operator Training and Certification

City of Flint Water System	**Water Customers**
Certified Operation of public water system	Participate in lead sampling as requested
Establish Water Rates	Request lead testing if concerned
Obtain construction permits	Follow lead sampling Instructions
Reporting to MDEQ	Provide signed information on how sample was collected
Coordination of lead and copper sampling	Review individual result material
Establishing a Tiered Sampling Pool	Follow instructions for reducing lead exposure
Providing Sampling Kits and Instructions to customers	Replace private leaded service line and plumbing materials with lead-free products
Obtain signed statements from participating customers	Obtain plumbing permits and comply with code requirements
Obtain sample analysis	Pay Water Bills
Provide individual lead sample result to participants	Read Annual Report (CCR)
Comply with Action Levels for lead and copper	Read and follow Public Notification materials
Provide lead monitoring and notice Certification to MDEQ	
Provide Annual Report (CCR) to all customers	
Conduct Water Quality Parameter Monitoring	
Recommend and Install Optimized Corrosion Control Treatment	
Provide Public Notification, as necessary	
Replace public portion of lead service, as necessary	

DRAFT

City of Flint Water System Background

Water Service Land Area 34 square miles
550+ miles of public water mains
250+ miles of water mains 75+ years old
70% of public water mains are unlined cast iron pipe
Service population 99,763
Service connections 32,900
Flint Water System established in 1883
Flint Water Treatment Plant #2 completed in 1954
Connection to Detroit Water and Sewerage Department 1967
Flint Water Treatment Plant #2 rehabilitated 1999 – 2005

City of Flint Timeline

December 2011 – Flint Emergency Financial Manager Appointed by Governor Snyder
April 2013 – Flint rejects DWSD contract and instead joins the Karegnondi Water Authority

City of Flint
Water Quality Update
Wednesday September 16TH, 2015

GAC Installation

What: ***$1,601,740 contract with LAN*** to design and install new filter media at the Water Plant

Status: Complete

Leak Detection

What: ***$900,000 Treasury Distressed City Grant*** for Leak Detection / Pipe Wall Assessment

Status: In Progress

The vendor "echologics" is nearly 1/3 complete with the leak detection

WPC Incinerator Shutdown

What: ***$1,100,000 Treasury Distressed City Grant*** for WPC Incinerator Shutdown

Status: In construction phase

The walls are nearly done being erected.

Next steps: Construction of the walls.

Water Meter Installation

What: ***$5,000,000 contract*** to purchase and install up to 18,000 water meters.

Status: In progress

The vendor has established a good routine and has installed approximately 3000 of the targeted 9000 meters have been installed

Installers are facing more resistance from customers about the change outs ~300 people are refusing the installation.

Small jumpers were added to the installation to protect plastic meters going in place of metal to protect electronics within the household.

The main focus of this contract was the $2,500,000 on the front end to complete the targeted 9000 meter installation. This was an FY15 expenditure.

Next steps: Continue with the progress.

Subject: Flint

Attached is the summary (prepared by Wayne's staff) of the call we/Treasury had yesterday with Flint. I would say nothing 'enlightening' really came out of the call.

As indicated they asked about the status of the $30mm request to the Governor. Which coincidently is the ballpark number they are at risk for in the rate lawsuit(s).
We said we did not have an immediate response other than it would likely require an appropriation by the legislature. This would probably lead to similar requests from other urban communities; but, we are still looking at it.

We are not aware of any existing qualifying projects that the City has sought funding for in the SRF-drinking water program. They had asked previously for some funds on the wastewater side but had withdrawn the request because they lacked match funds.

Tom

Any state or federal subsidized financing available? Something similar in structure to combined sewer overflow?

It's not free money, but a better option
